Straits Settlements, Brit. colony in the Malay Penin., composed of the detached sections of Singapore, Malacca, the Dindings, and Penang (including prov. Wellesley), together with Christmas I. in the Indian Ocean, which was placed under the administration of the governor of the colony in January 1889. Connected with the colony are the protected states of Perak, Selangor, Sungei Ujong, Negri Sembilan, and Pahang, occupying all the remainder of the penin. between Johor and Siamese terr., and which are remarkably rich in tin, yielding about half the entire produce of the world. Johor also is under British influence as regards its foreign relations. Besides tin the principal products are rice, pepper, gambier, copra, gutta-percha, and rattans. Coffee, sugar, and other plantations are also successful. The total value of the imports and exports combined is upwards of £40,000,000. By an order in council dated October 21, 1890, the standard coin of the colony is the Mexican silver dollar; but the American trade dollar, the Japanese yen, and the Hong-kong dollar are also legal tender if they comply with stated conditions as to weight and fineness. Till April 1, 1867, these settlements were under the government of India, but they were then placed under the control of the Secretary for the Colonies. Total area (Brit. terr.), 1542 sq. m. (somewhat more than the county of Cumberland). P. (1866) 273,000; (1871) 308,000; (1881) 423,000; (1891) 512,000.

Strassburg, tn., Austria, Carinthia, 20 m. N. Klagenfurt. P. (comm.) <4000.

Strassburg, cap. of Alsace-Lorraine, Ger., a fortress of the first-class, and seat of a Roman Catholic bishop, is built on the riv. Ill, 1–2 m. W. of the Rhine, with which it further communicates by the Rhine and Marne Canal. Its finest buildings are the celebrated mediæval cathedral (1015 onwards), with a magnificent façade, one tower (of two) incomplete, and an ingenious astronomical clock; the imperial palace; the library (700,000 vols.); the House of the Provincial Assembly; the new buildings of the university, which was refounded in 1872; the observatory; the academy, containing antiquarian and art collections. There are monuments to Gutenberg (the inventor of printing), to Marshal Maurice de Saxe, and to General Kléber. Strassburg is the seat of considerable industry, especially in machinery, hardware, pianos and organs, tobacco, beer, tanning, dyeing, printing, flour, *pâté-de-foie-gras,* jewellery and ornaments, chemicals, hats, and numerous other articles. Moreover, it carries on a very active trade in coal, groceries, leather, iron, wine, cereals, timber, hops, vegetables, tobacco, &c. Strassburg was the Roman *Argentoratum.* In the vicinity the Emperor Julian in 357 defeated the Alemanni. During the later middle ages Strassburg was one of the most influential cities in the empire, and it won additional renown through the poet Gottfried von Strassburg, and the preachers Meister Eckart and Johann Tauler. In the 15th century Gutenberg set up here his printing-presses (1439–44), and the satiric poets Sebastian Brant and Thomas Murner resided within its walls. In 1520 it gave refuge to the Reformer Bucer. From 1529 to 1681 it was a Protestant stronghold, but in the latter year the city was seized in time of peace by Louis XIV. of France. Vauban fortified the city in 1682–84 with walls and a citadel. It passed to the German Empire in 1871, and since then the fortifications have been extended and strengthened. Alt. 492 ft. P. (1827) 49,700; (1866) 84,200; (1890) 123,500, including a garrison of nearly 11,000 men, and several suburban quarters. Population of city proper (1890) 95,000.

Stratford St. Andrew, par., Eng., Suffolk, Eye div., 15 m. NE. Ipswich, 3 m. SW. Saxmundham. P. <250.

Stratford St. Mary, par., Eng., Suffolk, Woodbridge div., 9¼ m. SW. by W. Ipswich, 3 m. NW. by W. Manningtree stn., PMT.O. P. <750.

Stratford Tony, par., Eng., Wiltshire, Wilton div., 4 m. WSW. Salisbury. P. <250.

Stratford under the Castle, par., Eng., Wiltshire, Wilton div., on the Avon, 2 m. NW. by N. Salisbury, P.O. (**Stratford-sub-Castle**). P. <500.

Stratford-upon-Avon, mun. bor. (since 1553) and market-tn., Eng., Warwickshire, Stratford-upon-Avon div., 8 m. SW. Warwick, diocese of Worcester, on r. bk. of Avon, with stn. on branch of G. W. R., and connected with E. & W. Junction Rly., L. & NW. R., and M. R. The river is here crossed by a fine bridge of fourteen pointed arches, now nearly 400 years old, still known as Clopton Bridge, after its builder Sir Hugh Clopton, an alderman of London, but born in the neighbourhood of Stratford, who is also interesting as the builder of the house called The New Place, which was the property of Shakespeare in his later years, and the house in which he died, but was destroyed by the owner in 1759. The grounds are now open free. 'Shakespeare's House,' that is, the house in which he was born, having been purchased by subscription and dedicated to the public in 1847, was restored in 1859, and now contains the Shakespeare library and museum, the Stratford portrait, &c. In the cruciform parish church are his grave and portrait bust, also the font in which he was baptized. The old parish register, with the entry of Shakespeare's baptism and burial, is shown near the N. door of the church. The central tower of the church dates from the 13th century. Other monuments are the Shakespeare Memorial Theatre, built in 1879 at a cost of over £40,000, intended for occasional Shakespearian celebrations, and possibly as a dramatic college, and having attached to it a Shakespeare library and museum; the Shakespeare fountain, built by an American, and the Shakespeare monument. Anne Hathaway's cottage, in the neighbouring hamlet of Shottery, in the par. of Stratford, was acquired in the public interest in 1892. Among other interesting remains of Shakespeare's time or memorials of Shakespeare are the grammar-school in which he was educated (originally endowed in 1482, refounded under Edward VI.), the adjoining Guildhall, in which strolling players used to perform in Shakespeare's time (both buildings restored since 1891), the town-hall (rebuilt in 1768 on the site of an older structure of 1633), containing in a niche on its N. side the statue of Shakespeare presented by David Garrick. Apart from Shakespeare, the town is interesting as containing the early home of the mother of John Harvard, founder of America's oldest university. There are several interesting places besides those in and about Stratford, among these the cottage of Mary Arden (the poet's mother), at Wilmcote. The town owes its name to the old ford of the Avon parallel to the bridge on the road from London to the NW. Market-day, F. Mun. bor. P. (1801) <2500; (1851) <3500; (1871) 7200; (1891) 8300; parl. div. P. (1891) 46,500; eccles. par. (**Stratford-upon-Avon with Shottery and Luddington**) P. 8600.

Strath, Gaelic, 'a valley.'

Strath, par., Scot., Inverness-shire, isl. of Skye, comprising Pabbay and Scalpay Is.; 71,411 ac. P. <2500.

Strathaird Point, cape, Scot., in the S. of the isl. of Skye, in 6° 5½′ W.

Strathalbyn, mun. tp., S. Australia, Hindmarsh co., 28 m. SE. by S. Adelaide, on the railway to Port Elliot; one of the most picturesque towns in S. Australia. Has a productive goldmine; silver and copper also occur. Mean temp., yr. 61.3° F., Jan. 71.0°, July 51.5°. P. <1500.

Strathaven, or **Strathavon** (locally strĕvn), market-tn., Scot., S. Lanarkshire, on Avon Water, 6½ m. S. by W. Hamilton, on the C. R., PMT.O. Market-day, Th. P. <3500.

Strath Beg, narrow valley, Scot., Sutherland, in the E., opening SSW. It is traversed by the riv. Helmsdale, the short river that drains Loch Ruathair, and the H. R. passes through it.

Strathbeg, Loch of, Scot., E. Aberdeenshire, 6 m. SE. Fraserburgh.

Stuttgart, vil., U.S., state and co. Arkansas. P.<1500.

Stuttgart, cap., Würtemberg, stands in an oval-shaped valley, on the Nesenbach, a trib. of the Neckar, surrounded by hills clad with forests and vines. The most noticeable public buildings and institutions are the new royal palace, in the Renaissance style (1746–1807); the old castle, with statue of Duke Eberhart im Bart; the Academy, formerly the Carl's School, in which Schiller was educated, now a library (with a famous collection of Bibles), guard-house, &c.; the Museum of Fine Arts (1838–1843), with picture gallery; the Königsbau (1856–60), containing shops, concert-halls, &c.; the railway station, one of the finest in Germany; the Polytechnic (1860–65); three churches dating from the 15th and 16th centuries, one of them (Hospital Church) containing Reuchlin's tomb; the conservatory of music; the royal library of 400,000 vols.; collections of pictures, antiquities, coins, &c.; the statue of Schiller by Thorwaldsen. Numerous parks (the Palace park contains statuary by Dannecker, Müller, and Hofer), royal castles, and picturesque heights add to the charm of the town. Stuttgart is the seat of considerable industry, being the principal publishing and printing centre in S. Germany, and manufacturing pianos, parquet flooring, cigars, furniture, chocolate, chemicals, jewellery, carriages, bells, beer, portmanteaux, &c.; it has special trade in hops, cloth, and horses. Here were born the philosopher Hegel (1770), the poets Schwab (1792) and Hauff (1802); and with the town Schiller and Uhland were more or less closely associated. Although the virtual cap. of Würtemberg since 1316 (the official cap. since 1482), it only became a place of importance in the 19th century, after the Dukes (formerly Counts) were elevated to the dignity of King. Alt. 880 ft. Mean temp. (15 yrs.), yr. 49.2° F., Jan. 32.5°, July 66.9°; mean rfall. (45 yrs.), 24.1 in. P. (1818) 26,300; (1871) 84,500; tn. (1890) P. 125,200; comm. P. 139,800.

Styr', riv., W. Russia, govts. Volhynia and Minsk, r. bk. trib. of Pripet, rises in Galicia, flows NE., joins Pripet near Pinsk. Length, 318 m.

Styria (German **Steiermark**), duchy of Austria, situated between Upper and Lower Austria (N.), Hungary (E.), Croatia, Carniola, and Carinthia (S.), and Salzburg (W.). It is essentially a mountainous region, falling almost entirely amongst the ranges and outliers of the E. Alps. For instance, it embraces the Dachstein (9825 ft.), Kammer (8970 ft.) and Todtes Gebirge (8250 ft.), the Styrian or Noric Alps (Hochthor, 7780 ft.), the Niedere Tauern (9400 ft.), the Karawanken (8400 ft.), and others. The principal streams are the Enns in the NW., the Mur (with the Mürz) and the Raab, draining the middle and going out E., and the Drave and the Save (with the Sann) crossing the S. parts in an ESE. direction. The Save, indeed, forms the SW. boundary. The climate is severe in the mountainous regions (*e.g.*, annual mean temp. at Aussee, 42.8° F.), but is milder in the valleys (Cilli, 50° F.). [Compare also **Graz.**] More than one-half of the area is covered with forests, more than one-quarter with meadows and pastures, and only about one-fifth is cultivated, the principal crops being oats, maize, rye, roots, potatoes, and wheat, with some buckwheat, flax, hemp, hops, teazle. Cattle and swine are reared in large numbers, and horses are bred in certain localities. But one of the chief occupations of the country is mining. Iron is the mineral extracted in largest quantity, chiefly at **Eisenerz** (*q.v.*); and the smelting of iron ore, and the manufacture of various articles of iron, including machinery and sickles, constitute the principal manufacturing industries. In addition to iron, salt

(at Aussee), anthracite coal (at Leoben, Köflach, and Trifail), graphite and zinc are extracted in considerable quantities, together with a little silver and lead. There are numerous mineral springs, such as Aussee, Tüffer, Römerbad, Gleichenberg, Rohitsch, Neuhaus, Tobelbad, Einöd. Chemicals, glass, paper, cement, and beer are manufactured on a large scale. There is a university at Graz (the cap.), also a technical high school; at Leoben is a mining academy. Other towns are Marburg and Cilli. The people are two-thirds of German descent; the rest, dwelling for the most part in the S., are Slovenians. All, with but few excepted, are Roman Catholics. Styria, comprised anciently in *Pannonia* and *Noricum*, was carved out of Carinthia and made a separate duchy in the end of the 11th century. For area and population, see **Austria-Hungary,** table.

Styrian Alps. See **Alps,** SUBDIVISIONS, **III. A. 2.**

Suchou, fortified tn., China, prov. Kiangsu, on the Grand Canal, 57 m. W. by N. Shanghai. P. estimated at 500,000.

Süchou-fu, China. See **Suifu.**

Sü'chwan, Söchwan, or **Sechwan.** [An explanation is required of the addition of two new forms to the numerous forms already in use for the name of this prov., which is also spelt Sechuan, Suchuan, Ssechuan, Ssuchuan, Szechuan, Sz'chuan, and in other ways, with or without hyphens and diacritic marks, all these forms being subject to further variation, even in English books, through the interpolation, owing to French influence, of a *t* before the *ch*, and an *o* before the *u*. All those forms are intended to indicate the same pronunciation, about which there seems to be no doubt. The name is dissyllabic, and the accent on the first syllable. The first vowel sound is peculiar, being intermediate between the German *ü* and *ö*, but apparently nearer the former. It is sufficiently open, however, to make Sechwan (with the Italian sound of *e*) the nearest approximation to a spelling representing the true sound when no diacritic marks are used. The *u* and *ou*, frequently found in place of *w*, are respectively German and French modes of indicating the sound of *w*. The substitution of *e* for *a* is due to the obscurity of the vowel in the unaccented syllable. The *ss* is merely a mode of representing the sound of simple *s*, adopted in consequence of the frequent confusion, especially in Germany, between the sounds of *s* and *z*, and the *sz* is another combination adopted for the same purpose, one must suppose from Hungary, though why from Hungary it is difficult to guess. In the system of Chinese spelling adopted by Sir T. Wade, the object of employing the *ss*, which he uses only in the combination *ssz*, is stated to be 'to fix attention on the peculiar vowel sound *z*,' which is described as being 'between the *i* in *bit* and the *u* in *shut*.'] The largest prov. of China, and that with the greatest absolute population, with an area, exclusive of Tibetan dependencies in the W., equal to three-fourths of, and with an estimated population about one-eighth larger than that of France. It is the middle prov. on the W. frontier, situated roughly between 26° and 33° N., and extending from about 110° E. to a doubtful limit in the W. If the upper course of the Yalung-kiang is taken as its W. boundary, it extends nearly to 101° E. According to Baber, both an administrative and a physical boundary is marked N. of 29° by the upper valley of the Tatu-ho, which runs from N. to S. in about 102½° E. But even to the W. of the Yalung-kiang there are certain portions of Tibet (Litang, Batang, Meli) which are sometimes reckoned to this prov. The Chinese population, however, is found almost entirely to the E. of 102½° E., and even that part of the prov. includes a large area inhabited by non-Chinese, the mountains in the SW. of the prov., between the Yangtse-kiang on the E. and that of the Anning-ho on the W., being inhabited by independent Lolos (*q.v.*). The upper Yangtse-kiang (Kinsha-kiang) forms for the most part the S. boundary of the prov. from about 102° E. to about 104° 40′ E. (a few miles above Sui-fu), and below that point traverses the prov. in a NE. then (below 109° E.) in an E. direction. It receives within the prov., on the l. bk., the Yalung-kiang, and then much further E. the Min-kiang, To-kiang, and Kialing-kiang, all flowing more or less N. to S., and on the opposite bank the Nankuang-ho, Yungning-ho, Sungkan-ho, and Wu-kiang, all flowing more or less from S. to N. The prov. is one of the richest in China, both in respect of its agriculture and mineral resources, and the richest part of it is the portion chiefly on the N. of the Yangtse-kiang and S. of 31° N., extending from the valley of the Min eastwards, a region covered with a rich red soil, probably, according to Richthofen, belonging, geologically, to the lower Jura, divided into an upper clayey portion comprising by far the greater part, and a lower sandy section forming a strip on the N. This is what is known as the **Red Basin,** and contains, towards the NW., in its richest part, the cap. of the prov. Chengtu-fu. It is in a large measure traversed by ranges of mountains and hills with a N. to S. trend. These ridges present considerable obstacles to communication; but the soil is so rich and easily cultivated, as to reward the extraordinary labour that has been expended in levelling the hill-sides into terraces for cultivation. In places the unterraced hill-sides are cultivated, according to Captain Gill, on slopes with an angle of about 30°, which, he adds, is about as steep as a man can walk up unaided by his hands (*Jour. R. G. S.*, 1878, p. 81). Larger and smaller plains are scattered over this basin, the largest being that of Chengtu-fu, about 2400 sq. m. in extent, watered by streams derived from the Min [**Kwanhsien**], a plain which, as seen from the last ridge to the E. (about 15 m. from Chengtu-fu), 'stretches like a smooth lake, and is everywhere covered with a

verdure which would be monotonous were it not for the variety of shades' (Baber). This basin is bounded on the N., W., and S. by lofty mountains, which, it has been suggested, may perhaps account for its anomalous **climate**—'scorchingly hot for a short time in summer, warm in winter, and covered from Nov. to April by clouds and mists' (Bourne, *Report of a Journey in S.W. China, Parliamentary Paper*, C. 5371, 1888, p. 2). The difficulty of **communications** with the external world makes this basin peculiarly isolated. Eastwards, though the mountains are not so lofty, the whole face of the country is 'corduroyed'—ribbed with mountains, which cause the road to be a continual ascent and descent, so that traffic is confined to the Yangtse-kiang route, which is obstructed by the rapids of that river. Towards the N. the only practicable passes are those reached by ascending the valley of the Kialing, leading to the valley of the Han [**China,** Means of Communication]. The pass leading NW. from Chengtu-fu (to Kansu and the Kuku-Nor region) is upwards of 13,000 ft. in height, and the road very difficult. The W. road, to Tibet, from Chengtu-fu leads first SW., crossing the Great Hsiangling Pass (9370 ft.), in about 29° 35′ N., then NW. to Tachien-lu (N. of 30° N.), to the W. of which it crosses in succession two passes more than 14,500 ft. high; that to western Yünnan follows the same route as far as the Great Hsiangling, and afterwards crosses the Little Hsiangling (9710 ft.) to reach the Anning-ho Valley (the *Caindu* of Marco Polo). The roads to eastern Yünnan through Kweichou (from Chungking, Nachihsien, and Sui-fu) all present a series of difficult ascents and descents. Chungking, at the head of the Yangtse-kiang rapids, is the great seat of commerce of the prov. Sui-fu, at the confluence of the Min, is the river-port next in importance, and practically the terminus of navigation on the Yangtse-kiang. The total value of the eastward exports of Süchwan is roughly estimated at about £5,000,000. Besides the ordinary cereals, pulse, oil-seeds, and fruits, the chief **agricultural products,** or products connected with agriculture, are silk, sugar, and tea, western Süchwan (round Yachou-fu) being the source of the brick-tea exported to Tibet and central Asia generally; cotton is grown only to a relatively small extent. The white wax insect is found in the SW. of the prov. The chief **minerals** are salt (in the middle of the prov., between the Min-kiang and the To-kiang, especially round Tsüliu-ching, and in the extreme SW.); coal (both N. and S. of Chungking to the W. of the lower Min, and elsewhere); iron (near the coal in the valley S. of Chungking); copper and zinc in the SW. of the prov. [**Huli-chou**]. See **China,** table.

Sudân, Beled-es-Sudân (country of the Black, from Arab *aswad*, plural *sûd*, 'black'), vast terrs. in central Africa, between 3° and 16° N. lat., extending from Senegambia to the Nile. The Sudân consists of three parts, the western being formed by the basin of the Niger (*q.v.*), the central by the Chad depression, and the eastern by the upper Nile basin. Orographically, the Sudân consists on the whole of hilly country, isolated mountain masses occurring, however, in many different quarters, the principal being the volcanic group of the Jebel Marrah (6050 ft.) in Darfur, the Alantika Mts. (8800 ft.) and Tadim Mts. (6500 ft.) of Adamawa, the Kamerun Mts. (13,000 ft.), near the W. ct., Mount Mendif (6500 ft.) S. of Lake Chad, and the Saranda Mts. (6900 ft.) near Yakubu. By Binger's explorations it has been proved that the so-called Kong Mts. do not exist, extensive plateaux, studded in places with isolated peaks (Mount Kapuri, 5900 ft., near Wagadugu) characterising the country S. of the great Niger bend. The lowest depression of the central Sudân is not Lake Chad (alt. 800 ft.) itself, but the Bodele dist. (alt. 550 ft.) NE. of it, a very interesting region, which was in former times covered by a large lake, connected with Lake Chad by the Bahr-el-Ghazal, an ancient outflow of the latter lake. Geologically, granite, gneiss, crystalline schists, porphyry, and diorite prevail in many parts of the Sudân; but sedimentary rocks also occur, especially in the central parts. The climate of the Sudân is unhealthy to Europeans, and oppressively hot, the whole region from the upper Niger to the upper Nile having a mean annual temperature of more than 80° F. The distribution and quantity of the rainfall differ greatly in various parts of the Sudân, but on the whole the fall is much more copious in the southern than in the northern terrs. The mean annual rainfall of the latter is from 10 to 25 in., whilst the rainfall of the central belt in the lat. of Lake Chad is from 25 to 50 in., and still further S. it rises to 75 in. The time and duration of the rainy season seem to vary considerably; but our information is at present too fragmentary to allow of any definite conclusions. According to Barth and Rohlfs it commences in April, but Nachtigal states that the rainy season (Ningeli) is from June to September. Barth is, however, of opinion that no general data can be given, as the local variations are too great. As regards ethnology and subdivisions of the western and central Sudân regions, see **Sokoto, Haussa, Adamawa, Bornu, Bagirmi,** and **Wadai,** the last-named being the most powerful of the states in the central Sudân. The terrs. between the upper Gambia and the upper Niger are known as the **French Sudan** (see **Senegal, Niger, Futa Jallon, Fellata,** and **Mandingo**). The **eastern Sudân** comprises the Nile basin from Khartum to the great equatorial lakes. About physical features, see **Nile, Darfur,** and **Kordofan.** From 1870 to 1882 the eastern Sudân was occupied by Egypt, but it was lost again through the Mahdi rebellion (1882–86). It now forms part of the dominions of the Mahdi; and it is estimated that since 1885 more than three-fifths of the population have perished through war, famine, and slave-trading. The terrs. between the Nile lakes, viz., Uganda (*q.v.*), Unyoro (*q.v.*), &c., remained independent, until they were incorporated with British East Africa (*q.v.*). [**H. G. S.**]

Suez, seapt. tn., Egypt, on the Gulf of Suez, at the W. of the mouth of the Suez Canal, 46 m. SSE. Ismailia; ague and remittent fever prevalent in autumn. Port Ibrahim (or Port Tewfik), 2 m. S. of the town, is available for the largest vessels. Mean temp. (5½ yrs., 1880–85), yr. 67.7° F., Jan. 53.1°, July 80.6°. P. 10,600.

Suez, Gulf of (the Arabian Gulf of the Greeks), the W. arm of the Red Sea, after its bifurcation in 28° N., whence it extends NW. to 30° N.; shores desert, and alternately present arid plains and rocky headlands. Length, 200 m.; average breadth, 30 m.

Suez, Isthmus of, the neck of land connecting Asia and Africa, having S. the Gulf of Suez, and N. the Mediterranean. Surface mostly moving sands, interspersed with rocky elevations, salt marshes (the ancient crocodile lakes). A ship canal across the isthmus, 100 m. long, with a minimum depth of 26 ft., and a minimum bottom width of 72 ft., was opened in 1869. Since March 1, 1887, night navigation has been allowed through the whole extent of the canal for all vessels provided with the necessary electric-lighting apparatus. Before that date the maximum net tonnage passing through the canal in a single year was under 6,400,000 tons; since then it has exceeded 8,500,000 tons.

Suf (Berber for 'river'), or **Wad Suf,** properly **Wad Izuf** ('murmuring river'), oasis, forming the E. extremity of the Algerian Sahara, in 33°–34° N., and about 6⅔°–7⅔° E.

Total	952,709[1]	371,235[1]

[1] The administrative counties of E. and W. Suffolk include also the part of Sudbury dist. and the part of Haverhill dist. in the ancient county of Essex, and the part of Newmarket dist. in that of Cambridge, but exclude the part of Thetford dist. and part of Great Yarmouth county borough in the administrative county of Norfolk. Joint area (including county borough of Ipswich), 947,724 ac. P. 361,790; of which 549,744 ac., with a pop. of 183,478, belong to E. Suffolk, 389,870 ac., with a pop. of 120,952, to W. Suffolk, and 8100 ac., with a pop. of 57,360, to the county borough of Ipswich.

The sea has made considerable encroachments on the ancient coast-line, especially near Dunwich, where the original town has disappeared, Aldeburgh, Corton, &c. Geologically, the floor is chalk and Tertiary strata, covered in some parts by drift, the fen country in NW. being skirted by a low chalk range. The chalk further to E. is at length covered, towards the estuaries of the rivers to S., by London clay and crag. Stone and gun flints are worked at Brandon. The coast is low, skirted by shingle, except where there are sandstone crags; and inland there is much undulating land, well wooded, and sometimes picturesque. Communication is by G. E. R. and its branches, and most of the towns have also river communication. There is also the Stowmarket Canal intersecting the county, besides the Lowestoft and Norwich Navigation. Farming is the staple industry. From the agricultural statistics, see **Appendix,** pp. 7–9, it may be seen that this is still one of the chief wheat-growing counties in England, and that it is the rival of its northern neighbour for the leading place in the cultivation of barley. In respect of the relative extent of corn-crops generally, it ranks next to Cambridgeshire among the counties of England. This county is noted for its breed of cart-horses. Manufactures, see Ipswich, Beccles, Stowmarket, and Sudbury. In early times, as part of E. Anglia, Suffolk (= 'South Folk,' as distinguished from *Norfolk*) was isolated on W. by broad fens. The *Iceni* of the Roman period had their cap. at Icklingham in NW. There are many antiquities, as the castles of Burgh, Framlingham, Orford, &c., the old halls (some moated) of Helmingham, Parham, Hengrave, Ickworth, &c. Suffolk has two parl. bors., Bury St. Edmunds and Ipswich; eight mun. bors. (including those two), Aldeburgh, Beccles, Eye, Lowestoft, Southwold, and Sudbury. This county is in the dioceses of Norwich and Ely. See **England,** table.

Suffolk, co., U.S., Massachusetts, on Massachusetts Bay.

Suffolk, co., U.S., New York, made up of the greater part of Long I. (E. portion).

Suffolk, tn., U.S., Virginia, Nansemond co., 75 m. SE. by S. Richmond. P. <4000.

Suflet, bay, isl. of Haiti, republic Santo Domingo, N. ct., 117 m. NW. by N. Santo Domingo, in 70° 48′ W.

Sufli, tn., Turkey in Europe, prov. (sanjak) Dede-Agach, on the Maritsa, 37 m. SSW. Adrianople; has silk industry.

Sugar Loaf, hill, Eng., Monmouthshire, N. div., 3½ m. NNW. Abergavenny. Alt. 1954 ft.

Sugarloaf, mt., Ire., extreme SW. co. Cork, 7½ m. WNW. Bantry. Alt. 1881 ft.

Sugar Loaf, Great, mt., Ire., in the NE. of co. Wicklow, 4 m. SW. by S. Bray. Alt. 1659 ft. **Little Sugar Loaf,** 2½ m. to the E. Alt. 1120 ft.

Sugar Loaf, The, mt., Scot. See **Sulliven.**

Sugarloaf Island, New Hebrides. See **Mota.**

Sugar Loaf Mountain, called by the Portuguese **Pão de Assucar,** by the natives **Makua-Mtipa,** hill, Portuguese E. Africa, 26 m. WNW. Mozambique, a conspicuous landmark seen from the sea; composed of coarse granite. Alt. 1050 ft. (*ab.*).

Sugar Loaf Peak, mt., U.S., Oregon, in the N. of Grant co., 130 m. SW. by W. of the NE. corner of the state. Alt. 8415 ft. (Wheeler, *b.*).

Sugarloaf Point, cape, New South Wales, in 32° 28′ S.

Sugar Notch, bor., U.S., Pennsylvania, Luzerne co., 19 m. SW. Scranton, 4 m. SW. Wilkesbarre; coal is extensively mined. P. <3000.

Sugartown, vil., U.S., Louisiana, Calcasieu par., 125 m. SSE. Shreveport, 95 m. NE. by N. of SW. corner of state. P. <1500.

Suga Sima, small isl., Japan, near SE. ct. of Honshiu, opposite Toba port, with lighthouse visible 15 m.

Sugatovskiy, rich silver-mines, Russia, W. Siberia, Altai region, 253 m. SW. Biysk. P. <2000.

Sughra, small seapt. tn., SE. Arabia, with a fort, in 13° 22′ N., 45° 46′ E.

Sugi, isl., E. Archipelago, between the S. end of the Malay Penin. and the E. ct. of Sumatra, 26 m. SSE. Singapore.

Sugley, par., Eng., Northumberland, 4 m. W. Newcastle-on-Tyne. P. <250.

Sugnall, P.O., Eng., Staffordshire, 3 m. NW. Eccleshall.

Sugny, vil., Belgium, prov. Luxembourg, arr. Neufchâteau, 8 m. N. by W. Sedan. P. <2000.

Suguli Falls. See **Rufiji River.**

Sugut, riv., Brit. N. Borneo, flows NE. from Mount Kinibalu into the sea S. of Marchesa Bay, between 6° 24′ and 6° 28′ N.; has rich Dutch plantations. On the N. arm of the delta is the station of the N. Borneo Company.

Sugut, volcano, Philippine Is., near the centre of Mindanao I.

Suhag, or **Sohag,** tn., Upper Egypt, l. bk. Nile, in 26° 30′ N. P. (1882) 8800.

Suheli, southern atoll of the Laccadive Is.

Suhl, tn., Prussia, in a detached part of the prov. of Saxony, circle Schleusingen, 12½ m. E. by N. Meiningen; numerous manufactures of arms. P. (1816) 5800; (1890) 11,300; comm. P. 11,500.

Suho, Servian; Greek, **Sohos,** tn., Turkey in Europe, prov. and 22 m. NE. by E. Salonica. P. 6500; Servians, 5500 (G. 161).

Suho Rudishte, mt. group, in S. of central Servia.

Suhr, riv., Switzd., flows N. out of the Lake of Sempach into the Aar, below Aarau.

Sula Bay, Turkey, in the SW. of the isl. of Crete, in 23° 48′ E.

Sui-chou, tn., China, prov. Honan, 280 m. N. by E. Hankow, 50 m. ESE. Kaifung-fu.

Suichou-fu, tn., China, prov. Kiangsi, on the Sho-kiang, 162 m. SSE. Hankow; lapis-lazuli and silver are mined in the dist.

Suidhe, Gaelic, 'a settlement' or 'possession.' See *Set.*

Sui-fu, Hsüchou-fu, or **Süchou-fu,** tn., China, Süchwan, on the l. bk. of the Yangtse-kiang, at the confluence of the Min, 130 m. WSW. Chungking, the great centre of trade in southern Süchwan with Yünnan; outside the town are large suburbs. Salt and coal are mined, and gold washed. Population largely composed of Mohammedans; 64,000 registered houses (Pratt). See also *Proc. R. G. S.,* 1891, p. 331.

Suifun, riv., China and Russian Manchuria, S. part of Maritime Prov., rises in China, flows E. and SE., enters Amurskiy Bay, Gulf of Peter the Great.

Suigám, tn., Brit. India, Bombay, Gujarát, cap. Suigám state, in 24° 9′ N., 71° 21′ E.; in 1819 it suffered from earthquakes, and the whole tract subsequently became salt.

Suijo, tn., Japan, 150 m. W. by S. Kobe. P. 5600.

Suikai-hsien, tn., China, prov. Kwangtung, 71 m. E. Pakhoi.

Suila, oasis, Tripoli, Fezzan, 95 m. ENE. Murzuk.

Suilai-sien. See **Manas.**

Suilven ('the Sugar-Loaf'), mt., Scot., Sutherland, 13 m. SE. Storr Head. Alt. 2399 ft.

Suipacha, tn., Argentine Republic, prov. and 72 m. by rail W. Buenos Aires. P. <2000.

Suipacha, riv., Bolivia. See **Pilaya.**

Suippes, tn., France, dep. Marne, on the Suippe, arr. and 14 m. NE. by N. Châlons-sur-Marne. P. <3000.

Suir, riv., Ire., rises in NW. of co. Tipperary, flows at first mainly S. past Thurles and Caher, and then mainly E. past Clonmel (the head of navigation for the boats, 30–55 tons, of the River Suir Navigation Company), Carrick-on-Suir, and Waterford, forming the boundary between cos. Tipperary and Kilkenny on the N. and Waterford on the S., finally unites with the Barrow to form Waterford Harbour. Length about 100 m.

Suira, seapt., Morocco. See **Mogador.**

Suisun Bay, U.S. See **San Francisco Bay.**

Suisun City, vil., U.S., California, Solano co., 38 m. SW. by W. Sacramento; has an excellent harbour. P. <1500.

Suite-chou, tn., China, in the E. of prov. Shensi, 390 m. WSW. Peking, 240 m. NNW. Honan.

Suiting-fu, tn., China, Süchwan, 120 m. NE. by N. Chungking; important trade in oil.

Suiyang-hsien, tn., China, Kweichou, 100 m. NNE. Kweiyang-fu.

Suja, dist. tn., Russia, govt. and 67 m. SW. Kursk; trade in corn. P. 5660; 11,200 with suburbs.

Sujalpur, tn., Central India, Gwalior state. P. 6700; Hindus, 4000; Moham. 1900.

Sujángarh, tn., India, Rájputána, 79 m. E. by S. Bíkaner. P. (1881) 5200.

Sujánpur, tn., Brit. India, Punjab, dist. Gurdáspur, 66 m. NE. by N. Amritsar. P. 5800; Hindus, 2000; Moham. 3700.

Sujánpur Tira, municip., Brit. India, Punjab, dist. Kángra, on the Beas, 65 m. NW. Simla; has a colony of jewellers. Tira, the palace of the Katoch dynasty, stands on a height overlooking the town. P. <5000.

Sujáwal, tn., Central India, Malwá, Gwalior terr., 44 m. NW. Bhopál. P. (1881) 7100.

Sujbulak, vil., Persia, Azerbaijan, about 20 m. S. of the S. end of Lake Urmia, capital of Northern Persian Kurdistan. Alt. 4770 ft. P. about 5000.

Suk, equatorial Africa. See **Sukuta.**

Suk, es-Suk, Arabic ('the market'), locality on the N. ct. of the isl. of Jerbi, N. Africa.

Sukabumi, coalfield 42 sq. m. in extent, in western Java, in S. div. of Preanger regency; quality of coal said to be superior even to that of Cardiff.

Sukadána, tn., Dutch Borneo, on the W. ct., 95 m. SE. by S. Pontiának.

Sukarras, tn., Algeria, arr. Guelma, on the Mejerda Valley Rly., 45 m. S. by E. Bona; great trade in grain and cattle; the vine is extensively cultivated in the neighbourhood. P. <5000.

Suk-el-Arba, tn., Africa, N. Tunis, headquarters of civil and military jurisdiction, 81 m. WSW. Tunis; the chief grain market in Tunis.

Suke Point, W. end of Vanua Levu, Fiji Is.

Suk-esh-Sheiyuk, tn., Asiatic Turkey, vilayet and 90 m. W. by N. Busra (Bussora), sanjak Muntefik, on r. bk. of Euphrates; exports wool of fine quality, used in France in the manufacture of carpets. P. 12,000; Moham. 11,000 (mainly Shiah).

Suket, spur, Himálayas. See **Jalori.**

Suket, hill state under the political superintendence of Punjab government, India, between 31° 14′ and 31° 35′ N., and 76° 49′ and 77° 26′ E.

Sukhin Dol, tn., Bulgaria, prov. Sevlijevo, 31 m. SE. by E. Plevna. P. <4000.

Sukhinichi, tn., Russia, govt. and 64 m. SW. Kaluga; entrepôt for hemp, hempseed-oil, and partly corn; tanneries. P. 6560.

Sukhoi, Sukhaya, Sukhoye, Russian, 'dry.'

Sukhona, riv., NE. Russia, govt. Vologda, by its junction with Yug makes N. Dvina; rises from Lake Kubenskoye, N. of Vologda town, flows NE., past Kadnikov and Totma, for 356 m., joins Yug at Velikiy Ustyug. Considerable shipping on Sukhona and its upper trib., the Vologda.

Sukhro Creek, an inlet or channel, Brit. India, Sind, 15 m. SSE. Karáchi.

Sukhuchak, tn., Brit. India, Punjab, dist. Gurdáspur, 60 m. NNE. Amritsar. P. <5000.

Sukhum-kale, seapt. and dist. tn., Russia, Caucasia, govt. Kutais, on E. ct. of Black Sea, 70 m. NW. Poti, 42° 59′ N., 41° 0′ E.; the best roadstead of the E. ct.; sheltered, and never closed by ice; but the marshes surrounding it render it highly malarial, and the communication with the interior is difficult. Seat of ancient *Dioskuria* and of a Turkish fortress, now falling into ruins. P. <5000.

Sukkertoppen, vil. and Danish post, W. ct. Greenland, cap. dist. Sukkertoppen, 93 m. NNW. Godthaab, on the islet of Manitsok. Mean temp. (11 yrs.), yr. 30.5° F., Feb. 12.6°, July 49.3°.

Sukkot, Dar-, or Dar-Sokkot, dist., Lower Nubia, on both banks of the Nile, between 20° 10′–20° 50′ N.; the fertile plains on both banks furnish the best supply of dates in Nubia. There are ruins of two old towns.

Sukkur, Sakkar (census), tn., Brit. India, Sind, dist. Shikárpur, on the r. bk. of the Indus, 48 m. SE. by S. Jacobábád, on an insignificant limestone ridge; has considerable local and river transit trade. The important route from Sukkur through the Bolan and Nari passes is now traversed by the railway to Quetta and Pishin. P. 29,300; Hindus, 16,400; Moham. 11,900. See **Rohri** and **Bukkur.**

Sukmanovka, vil., Russia, SE. part of govt. Tambov, 40 m. by rail NW. Borisoglyebsk. P. 5550.

Sükösd, comm., Hungary, co. Pest-Pilis-Solt-Kis-Kun, dist. Solt alsó. P. <4000.

Sukravarpet, India. See **Chunnapata.**

Sukumo, vil., Japan, Shikoku, 190 m. SW. Kobe.

Su'kuta, or **Suk,** large salt steppe, E. Africa, about midway between Lakes Rudolf and Baringo, inhabited by nomadic tribes (Kibakau, Ngaboto, &c.).

Sul, tn., Portugal, Beira, in the Serra Gralheira, dist. and 14 m. NW. Vizeu. Alt. 3680 ft. P. <3000.

Sula, seapt., Italian E. Africa, on Annesley Bay, 30 m. SSE. Massaua.

Sula, riv., S. Russia, govt. Poltava, l. bk. trib. of Dnieper, which it joins at Chigirin-Dubrova. Length, 240 m.

Sulaiman, range of mts. on the borders of India and Afghanistan, running parallel to the Indus from about 28½° N., and connected at the N. end with the Safid Koh Range; highest peaks the Takht-i-Sulaiman, or Throne of Solomon, and the adjacent peak of Kaisarghar (11,300 ft.), in 31° 33′–36° N. Near the summit of the Takht-i-Sulaiman, which is about 200 ft. lower than its sister peak, is a shrine visited by Hindus and Mohammedan pilgrims. The passes through these mountains mostly follow the routes of rivers, which either empty themselves into the Indus, or dry up in the plains before reaching that river. Four towns, on or near the Indus, situated at the distance of about two degrees of latitude, or 140 m. from each other, mark the points towards which the four of the chief passes lead. These towns, in the order from N. to S., are Attock, Dera Ismáil Khán, Dera Gházi Khán, and Sukkur. A fifth town, Edwardesábád or Bannu, was founded near the frontier to defend two other passes which enter the Indian plain about midway between Attock and Dera Ismáil Khán. Attock, situated opposite the place where the Kabul R. enters the Indus, marks the route of the most important of all these passes, the Khaibar Pass, which leads from Jalálábád in Afghanistan, but diverges from the river at Lalpura, the point where the pass proper begins. The passes which meet at Edwardesábád are those which follow the Kuram (Kurrum) R. southwards and the Tochi R. eastwards across the Suláiman Mts. Dera Ismáil Khán marks the route of the Gúmal (Gomul) R., and the Gúmal or Ghwalári Pass, which, on the Afghan side of the mountains, leads north-westwards to Ghazní, and in a more westerly, slightly southerly direction to Kandahar. The Gúmal R. is entered on the S. by the Zhob, whose valley forms a natural route south-westwards to Pishin and the British fortress of Quetta. From Dera Gházi Khán an excellent military road leads westwards to the same fortress across the Suláiman Mts., and then through the Tál Pass. See *Proc. R. G. S.,* 1879, pp. 38, &c., and map, p. 80 (1 : 1,500,000).

Sula Islands, a group of three larger and several smaller isls., Eastern Archipelago, between the NW. of Celebes and Buru, on the S. of Molucca Strait.

Sulby, eccles. par. and vil., Eng., Isle of Man, Lezayre par., 4 m. W. Ramsey, on the S., with two stns. (**Sulby Bridge** and **Sulby Glen**) on the Manx Northern Rly., P.O.

Sulby (sŭl'bĭ), par., Eng., Northamptonshire, 6 m. SW. Market Harborough. P. <250.

Sulebhâve, tn., Brit. India, Bombay, dist. and 33 m. SSE. Bijápur. P. <5000.

Suledal, lake, Norway, diocese Christiansand; village at W. extremity of lake, 48 m. NE. Stavanger.

Suleima'nia, tn., Asiatic Turkey, vilayet and 137 m. ESE. Mosul, cap. sanjak Suleimania; composed mainly of single storied, flat-roofed huts, inhabited almost exclusively by Kurds. Chief manufactures, saddles and horse furniture, shoes and leather-work generally. P. (with environs) 15,000; Moham. 13,800; Jews, 1000.

Sulen Islands, group of isls., Norway, W. ct., at the mouth of the Sogne Fjord.

Sule Skerry, rocky islet off the N. ct. of Scot., in 59° 4′ 45″ N., 4° 24′ W., now being provided with a lighthouse, the light in which will be 112½ ft. above high water, visible 16½ nautical m.; lighthouse expected to be ready in the spring of 1895.

Sulfa, tn., Arabia. See **Zalfar.**

Sulgen, vil., Switzd., cant. Thurgau, 8 m. S. Constance. P. <2000.

Sulgrave, par., Eng., Northamptonshire, S. div., 11½ m. NW. Buckingham, 2 m. NW. Helmdon stn., PM.O. The church contains monuments and brasses of the Washington family. P. <500.

Sulham, par., Eng., Berkshire, Newbury div., 4 m. W. by N. Reading, 2 m. WSW. Tilehurst stn., P.O. P. <250.

Sulhampstead Abbots, par., 1 m. E. by S. Sulhampstead Banister. P. <500.

Sulhampstead Banister, par., Eng., Berkshire, Newbury div., on the Kennet, 5 m. SW. by W. Reading, 1½ m. SSW. Theale stn., P.O. P. <250.

Sulhampstead Banister Lower End, par. P. <250.

Sulima, riv., W. Africa, in the SE. of the Brit. colony of Sierra Leone, flows on the whole SW. through a rich oil-palm country, and enters the Atlantic at the village of Sulima in 6° 58′ N. Navigable 20 m. up to the Falls of Wedaro; above that its bed full of boulders, over which the river rushes impetuously during the rains. See *Geog. Jour.*, iv. p. 125.

Sulina, tn., Roumania, Dobruja, prov. Tulcea, at the mouth of the S. branch of the Danube, 41 m. ESE. Ismail. No dock, but quays on both sides the river; depth of water on bar, 20½ ft. Mean temp., yr. 52° F., Jan. 29°, July 73°. P. <5000. See **Danube.**

Sulingen, market-vil., Prussia, prov. Hanover, 27 m. S. Bremen, cap. circle Sulingen. P. <2000.

Sulita, vil., Roumania, Moldavia, 13 m. SE. Botošanĭ. P. (comm.) <5000.

Sulitjelma, mt., Norway, in about 67° 8′ N., 16½° E.; contains a rich copper-mine. Highest point estimated at 6178 ft.

Sullam, P.O., Scot., Shetland Is., Mainland, Northmaven par., 13½ m. S. of the N. end of the Mainland, on the W. side of S. Voe, an inlet stretching 9 m. from SSW. to NNE.

Sullana, tn., NW. Peru, dep. and 18 m. N. Piura, on the railway connecting Piura with the seaport of Payta. P. <4000.

Sullane, riv., Ire., in the W. of co. Cork, flows WSW. to the l. bk. of the Lee, which it joins a little below Macroom.

Sullen Islands, group off the W. ct. of Norway, diocese and 45 m. NNW. Bergen.

Sullias, country of the former Orléanais, France, now in the dep. Loiret, between the Sologne and the l. bk. of the Loire.

Sullington, par., Eng., Sussex, Chichester div., 6½ m. NE. by E. Arundel. P. <250.

Sullivan, city, U.S., Illinois, Moultrie co., 65 m. W. by N. Terre Haute (Ind.). P. <1500.

Sullivan, tn., U.S., Indiana, Sullivan co., 23 m. S. Terre Haute; has coal deposits, and manufactures woollen goods and carriages. P. <3000.

Sullivan, tn., U.S., Maine, Hancock co., 12 m. E. Ellsworth, on Frenchman Bay. P. <1500.

Sullivan, co., U.S., Missouri, N. of 40° N., crossed in the E. by 93° W.

Sullivan, co., U.S., New Hampshire, bounded on the W. by the Connecticut, crossed in the N. by 43⅓° N.

Sullivan, co., U.S., New York, in the SE., on the S. frontier (Delaware R.), crossed in the W. by 75° W.

Sullivan, co., U.S., Pennsylvania, crossed by 41½° N. and 76½° W.

Sullivan, co., U.S., Tennessee, in the NE., on the N. frontier.

Sullivan's Island, isl., Brit. India, Lower Burma, in Mergui Archipelago, in 10° 40′ to 11° N., 97° 58′ to 98° E. Length, 17 m.; breadth, 6 m.

Sullivan's Island, isl., U.S., S. Carolina, co. and 6 m. from Charleston; fashionable sea-bathing resort and summer residence. Length, 6 m.

Sully, co., U.S., S. Dakota, S. of 45° N., and bounded on the W. by the Missouri R.

Sully, par., Wales, Glamorganshire, S. div., S. ct., 5 m. SSW. Cardiff, on the Taff Vale Rly.; includes **Sully I.** as well as Barry I. P.O. P. <250.

Sully-sur-Loire, tn., France, dep. Loiret, arr. Gien, on the l. bk. of the Loire, 25 m. ESE. Orléans. P. <3000.

Sulmierschütz, Polish **Sulmierzyce,** tn., Prussia, prov. Posen, circle Adelnau, 41 m. NE. by N. Breslau. P. <3000.

Sulmona. See **Solmona.**

Sulphur Island, Eastern Sea, N. of Loo-chou Is., in 27° 56′ N., 128° 30′ E. Length, 1 m.

Sulphur Islands, a group of three small islands belonging to Japan, between 24° and 25½° N. and 141° and 141½° E.; the middle island known in Japanese as Iwo-to ('sulphur island'), the northern as Minami Iwo-to, the southern as Kita Iwo-to.

Sulphur Springs, tn., U.S., Texas, Hopkins co., 79 m. ENE. Dallas. P. <4000.

Sulphur Spring Valley, U.S., Arizona, between Chiricahua and Dragoon Ranges; noted for its artesian wells.

Sultanabad, tn., Persia, prov. Irak-Ajemi, 100 m. SE. by E. Hamadan.

Sultanabad, tn., Persia, prov. Khorassan, 95 m. SW. Meshed.

Sultanabad, tn., Persia, prov. Khuzistan, near the Jerahi, 65 m. ENE. Dorak.

Sultan-Chiftlik, vil., Turkey in Europe, sanjak Tekirdagh, on the Sea of Marmora, 50 m. W. Constantinople.

Sultan Dagh, range of mts., Asia Minor, trending NW. and SE. between the Akshehr-göl and the Eyerdir-göl.

Sultánganj, vil., Brit. India, Bengal, Bhágalpur dist., close to the banks of the Ganges, in 25° 15′ N., 86° 47′ E.; has river and railway trade. P. <5000.

Sultan Hissar, vil., Asia Minor, Anatolia, near the Mendereh, 48 m. E. Aais-aluk; has remains of a temple and theatre.

Sultania, vil., Asia Minor, Anatolia, on a bay of the Bosporus, 9 m. NNE. Constantinople, 1 m. SE. Unkiar-Iskelessi.

Sultanie, tn., Persia, prov. Irak-Ajemi, 69 m. W. by N. Kazvin.

Sultan Mountain, U.S., SW. Colorado, near 108° W. Alt. 13,366 ft.

Sultánpur, vil., India, Punjab, Gurgáon dist., 30 m. SE. by S. Amritsar. Salt is manufactured by evaporation from brine in wells; the works could turn out 50,000 tons annually, but the trade has been affected by Sámbhar Lake salt.

Sultanpur, vil., Brit. India, Bengal, dist. Darbhangah, 35 m. NE. by E. Patna.

Sultánpúr, tn., Brit. India, Punjab, Kapúrthala state. P. 9000; Hindus, 2900; Moham. 5800.

Sultánpur, tn., Brit. India, Oudh, Sultánpur dist., 58 m. N. by E. Allahábád. P. 8800; Hindus, 5500; Moham. 3300.

Sultánpur, tn., Brit. India, Punjab, dist. Kángra, 60 m. N. by W. Simla. Alt. 4092 ft. P. <5000.

Sultepec, tn., Mexico, state of and 60 m. SW. Mexico; important mulberry cultivation. P. (comm.) 13,500.

Sulu Islands, group of isls., Eastern Archipelago, between 4° 40′–6° 52′ N., and 119° 28′–122° 42′ E., having the Sulu Sea on the N. and the Celebes Sea on the S., separated from Mindanao on the NE. by the Strait of Basilan, and from Borneo in the SW. by the Strait of Sibutu. The archipelago, which comprises several large and numerous small islands, is divided into five groups: Basilan, Sulu proper or Jolo, Pangutarang, Tapul, and Tawï-Tawï. The islands are volcanic and coralline; the larger generally mountainous, the smaller low. Highest known point Bahu (Sulu I.), 2765 ft. Forests of teak, ironwood, and other valuable timber, cover a great part of the surface. The climate, similar to that of the neighbouring islands, is not generally unhealthy, but bilious fevers prevail during the SW. monsoon. The soil is very fertile. Sugar-cane and rice are cultivated, and tobacco has been introduced; coco-palms abound on the coast. Pearl-oyster and trepang fisheries are important industries. The inhabitants are mainly Sameacas and Guimbas (Indonesian) in the interior, and Maros (of mixed Malay and Arab descent) on the coasts. Since 1876 the islands have been under Spanish protection; they are attached to the Philippine Is., but the internal administration is still in the hands of various native rulers, sultans, and 'datos' (nobles), all owning the supremacy of the Sultan of Sulu. The islands were first visited by the Spaniard Figueroa in 1578. Area about 1550 sq. m. P. supposed to exceed 100,000, of whom 4000 inhabit the coast region.

Sulu, or **Jolo,** tn., cap. of Sulu I., on N. ct., at head of Sulu Bay, 570 m. SSW. Manila. The town was rebuilt in 1876, in European style; it has a wall on the land side, and is defended by two forts.

Sülz, col., Prussia, Rhine Prov., govt., circle, and 2 m. SW. Cologne. P. <4000.

Sulzbach, tn., Ger., kgd. Bavaria, govt. Upper Palatinate, cap. circle Sulzbach, 30 m. S. by E. Bayreuth. In the vicinity are iron-mines and blast-furnaces. Sulzbach was formerly the cap. of a county, and after 1656 of a duchy. In 1799 it became part of Bavaria. P. 5000.

Sulzbach, vil., Ger., kgd. Würtemberg, Neckar circle, 22 m. NE. Stuttgart. P. <3000.

Sulz-unterm-Walde, French **Soultz-sous-Forêts,** tn., Ger., Alsace-Lorraine, circle Gebweiler, 10 m. NW. by N. Mülhausen; from 1079–1789 a possession of the bishops of Strassburg. Petroleum refinery connected by rail with the petroleum well of Pechelbronn, 3 m. distant. P. <5000.

Sumampa, vil., Argentine Republic, Santiago del Estero, 152 m. NNE. Córdoba. P. <2000.

Sumao, Semao, Ssumao, or **Ssemao,** tn., China, in the S. of the prov. Yünnan, 185 m. SW. by S. Yünnan-fu, in a healthy plain nearly equi-distant from Tali-fu, Yünnan-fu, and the Franco-Chinese treaty-post of Meng-tsu, 11 m. S. by W. Puerh, the centre of trade in Puerh tea. See **Puerh.**

Suma Paz, riv., Colombia. See **Bogotá.**

Sumata, tn., W. Africa, Sierra Leone, on the great caravan route to the Niger valley.

Sumatra, the most westerly of the Sunda Is., Malay Archipelago, and, next to Borneo and New Guinea, the largest in the E. Seas, between 5° 40′ N. and 6° 0′ S., 95° 20′ and 106° 0′ E., separated NE. from the Malay Penin. by the Strait of Malacca, having E. the Java Sea, S. the Strait of Sunda, separating it from the isl. of Java, and W. the Indian Ocean. Sumatra, regarded as an outpost of the Dutch E. Indies, is divided for administrative purposes into eight divs.: govts. of Achin, and of the W. ct.; residencies (provs.) of Benkulen, Lampong, Palembang, and E. ct.; dist. of Indragiri and Kuantan (attached to Rio), and the country of the Battas (independent). The inhabitants are mostly Malays, but partly of the Papuan negro race, with Moors in the NW., Tamils, Chinese, and people from the neighbouring islands, Dutch and other foreigners. The Bukit-Barisan, a mountain chain of primitive formation, containing eight active and numerous extinct volcanoes, extends from Point Achin to Sunda Strait, keeping near to the W. ct. It consists in some places of a single chain, in others of two or even three parallel ranges, connected by transverse ridges, enclosing fertile plateaux and valleys. The culminating points of this great system are, in the N., Luseh and Abong-Abong, respectively about 12,100 and 11,150 ft.; Mount Ophir, or Passaman, 9600 ft., a few miles S. of the equator, the most conspicuous point as seen from the sea, and formerly supposed to be the highest in the island; Korinchi or Indrapura, about 12,100 ft., now regarded as the culminating point, in 1° 36′ S.; Dempo, an active volcano, over 10,000 ft., besides many other summits between 6000 and 10,000 ft. In the N. part of the island spurs extend from W. to E. to within a few miles of the coast, but S. of this dist. the E. half of the island is mostly level or undulating, and along the coasts there are many sandy and marshy plains traversed by the Rohan, Simpang, Siak, Indragiri, Jambi, Musi or Palembang, and other rivers of large size, which are navigable far into the interior, and would be still more important commercial highways, but for the sand-banks obstructing their mouths. The rivers of the W. are short and for the most part unnavigable. In the mountainous region are numerous lakes, of which the principal are Toba, at an alt. of over 3000 ft., and Maninju and Sinkarah, in the high plateau of Padang, a little S. of the equator. The coasts are rocky in the W., low and flat in the E., except towards the N. There are few well-sheltered bays; the principal are Semanká and Lampong on the S. ct., Amphitrite and Langsar on the E. Off the coasts are numerous islands. Climate in the plains not oppressive. The mean monthly temp. varies little, being from about 79° to 81° F., but the average daily range is 9° or 10°; at a height of about 3000 ft., the mean annual temp. is under 75°, and the diurnal range over 28°. The rainfall is everywhere abundant. Thunderstorms and waterspouts off the coast are frequent. Much of the island is occupied by dense forests. The flora presents close affinity with that of the Malay Penin., and of Borneo; amongst characteristic forms may be mentioned the remarkable parasitic flower *Rafflesia Arnoldi*, and some gigantic species of *Arum*. Products consist of rice, maize, millet, sago, coco-nuts, betel, sugar-cane, camphor, guttapercha, benzoin, various gums and resins, an abundance of tropical fruits, turmeric, ginger, coffee, rattans, scented wood, teak, and other timber; pepper is extensively cultivated, especially in the N., and tobacco in the Deli dist. Buffaloes are the most important live stock; the breed of horses is small, but hardy; swine and goats are both domestic and wild; the elephant, rhinoceros, tiger, bear, deer, orangoutang, &c., roam in the forest, and the hippopotamus and crocodile are met with in the rivers. The principal minerals are gold and coal; auriferous deposits are known to exist in various parts of the W. mountains, especially in the Mandeling and Supagang dists.; the richest coalfield is that of the Ombilin Valley, discovered in 1870, but coal occurs also in other parts; tin is found in the Siak Valley; lead in Kota; copper in Padang; a mountain N. of Sinkarah Lake contains a large deposit of magnetic iron ore; titanic iron occurs in various parts; sulphur, saltpetre, alum, &c., in the volcanic dists.; petroleum in Palembang prov., in Siak, and in Langkat; salt in the marshes of Achin and on the E. ct. The inhabitants manufacture gold and silver filagree work with great skill, also silk and cotton fabrics, earthenwares, arms, rattan mats, and domestic goods generally. The principal exports are pepper, maize, sago, coco-nuts, camphor, tobacco, guttapercha, gum damar, &c. Imports include manufactured goods, rice, opium and salt from India, coarse porcelain, iron and copper wares, salt-fish, &c. The chief ports are Padang, Palembang, Benkulen, Serdang, Deli, Muntok, Telok-Betong, Bangkalis, and Achin. Railways are being constructed; an important line starting from Padang was opened in 1892, with branches to Koek and Ombilin. Sumatra is mentioned by Ptolemy under the name of Jabadiu; Marco Polo visited it in 1292. In the 16th century the Portuguese formed settlements on the island, soon, however, destroyed; in 1529 the French traveller Parmentier visited the island, and in 1599 the Dutch navigator Houtman. In 1616 the Dutch founded a factory at Jambi, and in 1662 made a treaty with the Sultan of Palembang. Length, NW. to SE., 1050 m.; breadth, 90–240 m.; area, estimated at 163,000 sq. m. P. (estimated) 3,572,000 (Wagner and Supan).

Sumava, name given by the Chekhs to the Bohemian Forest (*q.v.*), but more particularly to its southern portion.

Sumba, native name of Sandalwood I., Dutch E. Indies.

Sumbawa, one of the Sunda Is., Malay Archipelago, between 8° and 9° S., 116° 50′ and 119° 10′ E., separated westward from Lombok by the Strait of Allass, and E. from Komodo by Sapi Strait. The island comprises four states (Sumbawa, Dompo, Sangar, and Bima), all, nominally, under Dutch protection. It is nearly divided into two portions by a deep bay off its N. ct., having at E. side of entrance the culminating point of the island, the volcano of Tomboro, 9000 ft. high, the eruptions of which have been most violent and destructive. The surface generally is mountainous, and there are numerous volcanic cones. There are no large rivers, and none navigable, even by small boats, except during the rainy season. Soil of great fertility. Products, generally similar to those of Java, comprise rice, which is exported in large quantities, tobacco, sapan, teak and other timber, wax, edible birds' nests, &c.; excellent ponies, for which the island is noted, are exported in large numbers; minerals include sulphur, arsenic, asphalt, and petroleum. Imports, opium, Indian piece goods, and European manufactures, chiefly brought to it by the Dutch, who have a small establishment at Bima, on a noble bay of the N. ct. Length, 160 m.; breadth, 20–60 m.; area, 5362 sq. m.

Sumbawa, tn., on the N. ct. of Sumbawa I., 100 m. W. Bima, in 8° 30′ S., 117° 30′ E.; it has a good harbour, and is the residence of a chief, subject to the Sultan of Bima.

Sümbegi, or **Symi,** Turkish isl., on the SW. of Asia Minor, at the mouth of the Gulf of Doris, to the N. of Rhodes, vilayet Jezairi-Bahri-Safid. Bay in the N. can accommodate large vessels. P. (kaza) 9000 (Cuinet).

Sumbing ('riven mountain'), volcano, central Java, 40 m. SW. Samarang, forming with the volcano Sindoro the group of the 'Two Brothers.' Alt. 10,945 ft.

Sumburgh Head, cape, Scot., Shetland Is., the southernmost point of the Mainland, PT. O. (**Sumburgh**). Mean temp. (20 yrs.), yr. 44.6° F., Feb. 38.5°, Aug. 53.1°; rfall. (20 yrs.), 36.9 in.

Sumdo, Tibetan, 'river confluence.'

Sümeg, Hungary. See **Somogy.**

Šumen, Bulgaria. See **Shumla.**

Sumène, tn., France, on the S. border of dep. Gard, 27 m. N. by W. Montpellier, arr. and 6 m. E. by S. Le Vigan; coal and iron mining, and manufacture of silk. P. <2000.

Sumepep, tn., Eastern Archipelago, on SE. ct. of Madura I.

Sumerpur, tn., Brit. India, NW. Provs., dist. and 8 m. S. Hamírpur, 47 m. SSW. Cawnpur; has two ruined forts. P. 5300; Hindus, 4900.

Sumesar, hill range, Brit. India, Bengal, dist. Champáran, stretching along the frontier of Nepál, almost inaccessible in some places; at the E. extremity the range is divided by the Kúdí *nadi*, forming a pass. Length, 46 m.; greatest height, 2270 ft.; average height, 1500 ft.

Sûmia, site, Palestine, *Sibmah* in the O. T., 31° 49′ N., 35° 46′ E., 7½ m. W. by N. Hesbân (Heshbon).

Sumida-Gawa, riv., Japan, middle region of Honshiu I., flows N., E., and SE., and empties itself into the Bay of Tokyo, after passing through the most populous quarters of the capital. Length, 190 m.; navigable for 50 m.

Sumidouro, tn., Brazil, prov. Rio de Janeiro; mining. P. (including dist.) 10,600.

Sumiswald, tn., Switzd., cant. and 15 m. ENE. Bern; manufactures linen and cheese. P. 5700.

Sun Dance, vil., U.S., Wyoming, Crook co., 43 m. S. by W. from the NE. corner of the state. P.<1500.

Sundarbans, or **Sunderbunds,** more properly **Sundarban** (that is '*sundri* forest'), maritime tract of British India, forming a cluster of small marshy islands, separated mostly by narrow, but in some cases wide, channels, having in the E. fresh, and in the W. brackish, water, Bengal, extending from the mouth of the Húglí, in 21° 40′ N., 88° 3′ E., to Rabanábád I., in 22° N., 90° 30′ E. Length, 170 m.; breadth, 60–80 m.; area, 5341 sq. m. These islands have been formed by the deposition of earth washed down by the Ganges during its periodical inundations. The waters of the Ganges enter the Bay of Bengal by fourteen principal channels, which are sufficiently deep to admit the largest coasting vessels, but so narrow that their rigging frequently becomes entangled with the trees on their banks. These islands, covered with forests intermingled with impenetrable underwood, the principal timber-tree being the sundri (*Heretiera littoralis*), which gives name to the

tract, are harbours for tigers and other ferocious animals, while the rivers are infested by two species of daring and destructive crocodiles (*C. porosus* and *C. palustris*). The whole region is highly malarious, but being contiguous to Calcutta govt., formerly held out great inducements for settlers. The settled portions contains the finest rice-fields in India, as well as plantations of other kinds; but the area has now been placed under the Forest Department, and the progress of settlement has been arrested. Over the whole area are scattered ruins (some at least 400 years old) of brick-built houses and temples, as well as extensive tanks, bearing witness to a much wider extent of cultivation at some earlier date, the decline of which has been attributed to the change in the direction of the main current of the Ganges, which formerly entered the sea by more westerly channels than it now does. It is in consequence of this change that the western channels of the Sundarbans contain only brackish water unfit to drink. Wherever fresh water is found, the land is still cultivated almost, if not quite, down to the seaboard. The total area of the Sundarbans is 7530 sq. m. (nearly as large as that of Wales), that of the still uncultivated and uninhabited tract about 5500 sq. m. See *Proc. R. G. S.*, 1891, p. 273.

Sundarwari, tn., India. See **Wári.**

Sunda Strait, Eastern Archipelago, between the SE. end of Sumatra and the W. ct. of Java; narrowest in NE., where it has a breadth of about 16 m.

Sunday, isl., Pacific. See **Raoul.**

Sunday Island. See **Kermadek Islands.**

Sunday Island, Victoria, on the S. of Port Albert, Buln Buln co., crossed by 146° 40′ E.

Sunday Island, China, in the Yangtse-kiang, just above Shishou-hien, in about 112° 22′ E. The shallows here at low water (winter and spring) constitute the chief difficulty in navigating the river below Ichang.

Sunday River, S. Africa, Cape Colony, divs. Graaff Reinet and Uitenhage, rises in the Sneeuwbergen, flows SE., and enters Algoa Bay 18 m. NE. Port Elizabeth. It receives numerous small affluents, and the tide ascends to 15 m. from the sea; but it has a rapid current, and a bar at its mouth impedes navigation. Length, 200 m.

Sunderland, post-vil., Canada, prov. and co. Ontario, 47½ m. NNE. Toronto, on a railway. P. <1500.

Sunderland, par., Eng., Cumberland, Cockermouth div., 10 m. E. Maryport, 3 m. NNW. Bassenthwaite Lake stn. P. <250.

Sunderland, parl. bor., mun. bor. (since 1834), and co. bor. (since 1888), par., seapt., and market-tn., Eng., Durham, 13 m. NE. and in the diocese of Durham, at the mouth of the Wear, with stn. on the NE. R. It is one of the chief coal-shipping ports in the kingdom; it vies with the Clyde in iron shipbuilding; it has extensive iron-works, &c. The township, r. bk. of the river, is but a small portion of the mun. bor., which includes three other townships; one of them, Monkwearmouth, on l. bk., named from that monastery of the 7th century in which the Venerable Bede spent most of his life, and another, Bishopwearmouth, on S., conveyed in 930 to the monks of Lindisfarne, but now noted for its coal-pit 381 fathoms deep. Sunderland proper only dates from the 14th century, and only became important in the present century by the growth of the coal trade and the river improvements. The harbour, 78 ac. area, is chiefly made by two stone piers, 617 and 650 ft. long, with a lighthouse on the N. pier, 64 ft. high. Protecting piers on the N. and S. sides were commenced in 1885 and 1891 respectively, total lengths of each to be nearly 2900 ft. The six docks have a total length of 2127 ft., with depths at high water varying from 15 to 19½ ft. The wet docks and tidal basins have an area of 84 ac., the quayage of the Hudson and Hendons, which are connected, being 8710 and 2800 ft. The former is named from Hudson, 'the Railway King,' who did much to improve the bor. when he was its member of Parliament. The sanitary system here is an example to other large towns. There are several fine public buildings, two single-arch iron bridges over the Wear, and four public parks—two at Roker, a favourite watering-place. Parl. bor. has returned two members to Parliament since 1832. Mean rfall. (1866-80), 26.4 in. Mun. bor. P. (1801) 12,400; (1851) 63,900; (1871) 98,200; (1891) 131,000; parl. bor. P. (1891) 142,200.

Sunderland, vil., U.S., Massachusetts, Franklin co., on Connecticut R., 2 m. from S. Deerfield; noted for beautiful scenery. P. <1500.

Sunderland, vil., U.S., Vermont, co. and 19 m. NE. Bennington, on Battenkill R. P. <1500.

Sunderland, North, par., Eng., Northumberland, Berwick-upon-Tweed div., on the coast, 11½ m. N. by E. Alnwick, 3 m. NE. Newham stn., PM.O. P. <1000.

Sunderlandwick, par., Eng., Yorkshire, E. Riding, Buckrose div., 18 m. N. by W. Hull, near Driffield stn. P. <250.

Sundgau, or 'South Country,' in contradistinction to **Nordgau,** or 'North Country,' one of the former divisions of Alsace, separated from the Nordgau in several places by the Thur.

Sundon, par., Eng., Bedfordshire, div. and 5 m. NW. by N. Luton, 2 m. NNW. Leagrave stn. P. <500; eccles. par. (**Sundon with Streatley**) P. <750.

Sundraboni, state, Celebes I., Malay Archipelago, with a town on a small island in Sundraboni R.

Sundridge, post-vil., Canada, Ontario, Parry Sound dist., 96 m. NE. by N. Collingwood, on a railway. P. <1500.

Sundridge, par., Eng., Kent, S. div., on the Darenth, 8½ m. NW. Tunbridge, with a stn. (**Sundridge Park,** formerly **Plaistow**) on SE. R., PMT.O.; 4141 ac. P. <2000.

Sundsvall, tn., Sweden, prov. Vestnorrland, on the E. ct., 28 m. SW. by W. Hernösand; important steel-works; shipbuilding; exports iron, steel, and timber. Harbour sheltered by Alnö I. from E. winds. The public quay has 9–21 ft. alongside. There is good anchorage, with a depth of 23–40 ft. P. 13,200.

Sundwig, vil., Prussia, govt. Arnsberg, circle and dist. Iserlohn; has manufacture of brass wares (that of brass thimbles introduced in 1760). P. <2000.

Sunel, tn., Central India, Indore state. P. 5100; Hindus, 2800; Moham. 1000; Aboriginal, 1100.

Sunflower, co., U.S., Mississippi, in the W., crossed by 33⅓° N., 90½° W.

Sungachi, or **Sungacha,** riv., Russian Manchuria, l. bk. trib. of upper Usuri, bringing to it the waters of Lake Khangka; rises on E. shore of the lake, flows with great windings in low banks, often inundated, for 120 m. (60 m. in straight line); navigable throughout. Its valley is being peopled by Russian settlers.

Sungari, or **Sunghwa-kiang,** the most important river of Manchuria, and the chief affluent of the Amur, rises on the NW. slopes of the central section of the Shan-alin Mts., flows NW. to its junction with the Naun, in about 45° 30′ N., after which it flows in an ENE. direction to its junction with the Amur, in about 47° 38′ N. In some parts it spreads out to over a mile, with a depth of from 3 to 4 ft.; in other parts it is compressed into a much narrower channel, with a depth varying from 12 to 20 ft. It is navigable up to Kirin and even above that city, and except for its shallows would be a very serviceable river when not frozen over.

Sungchi-kiang, Songkikong, or **Li-kiang, riv.,** China and Tongking, rises in the S. of China, flows W. and S. into Tongking, then WNW. through Tongking past Langson, and finally turns eastwards and re-enters China. At Lung-chou, in 22° 20′ N., 106° 45′ E., it unites with the Kaoping-ho to form the Tsokiang, one of the headwaters of the Si-kiang. Navigable to Namshan, in about 22° N., 106½° E., about 20 m. below Langson, between which and Namshan bad rapids occur.

Sungei Ujong, Brit. protected state, about the size of Hampshire, in the Malay Penin., between about 2° 30′ and 2° 55′ N., with a short coast-line on the Strait of Malacca, just N. of the British terr. of Malacca; principal rivers, the Linggi and Lukut. A British resident was appointed in 1874, and under him the small state of Jelebu was placed in 1885. The Malay population is almost entirely agricultural, but there are tin-mines worked by Chinese. Coffee and tapioca plantations have been established. The British residency is at Serenban, a place about 30 m. N. of the point where the Malacca frontier touches the straits, already connected with Port Dickson by a railway, which it is proposed to continue through Negri Sembilan into Pahang. Area, 1860 sq. m. P. (1891) 23,600.

Sunghwa-kiang, riv., Manchuria. See **Sungari.**

Sungi, Malay, 'river.'

Sungi, Punta, the southern point of a small island off Samar I., Philippine Is., in 10° 55′ N., 125° 50′ E.

Sungkiang-fu, tn., China, prov. Kiangsu, 22 m. SW. Shanghai.

Sungming, lake, China, Yünnan. See **Yanglin.**

Sungora, Siam, Malay Penin. See **Singgora.**

Sungpan-ting, tn., western China, Süchwan, in 32° 42′ N., 103° 36′ E., 140 m. N. by W. Chengtu-fu. Alt. 9470 ft. *Jour. R. G. S.*, 1878, p. 78, map, p. 57 (Gill).

Sungrugu, riv., W. Africa, trib. Kazamanza (*q.v.*).

Sung-shan, mt. group, China, prov. Honan, the most E. branch of the E. Kuenluen system, culminating in the granitic mountain Yutsai-shan (alt. 8040 ft.).

Sunion, or **Kolonnaes,** cape, Greece, in the extreme SE. of the prov. Bœotia and Attica, in 24° 2′ E.; has ruins at its extremity. Alt. 1265 ft.

Sunion, Cape, Italy. See **Colonne, Capo.**

Sunites, Mongol tribe, S. Mongolia, wandering in the N. and NW. of dists. Kalgan and Jehol; divided into two clans, the Baru-Sunites and the Dzun-Sunites.

Sunkam, vil., India, in the SE. of the native state of Bastár, 160 m. W. Kalingapatam.

Sunk Island, par., Eng., Yorkshire, E. Riding, Holderness div., 12½ m. SE. by E. Hull, 4½ m. SW. Patrington stn.; 7332 ac. P. <500.

Sunningwell, par., Eng., Berkshire, div. and 2½ m. N. Abingdon, 2 m. WNW. Radley stn., P.O. P.<250.

Sunniside, P.O., Eng., near Gateshead, Durham, 2 m. from Whickham.

Sunnybrow, eccles. par., Eng., Durham, in ancient par. of Brancepeth, P.O. P.<3500.

Sunny Corner, silver-mining tp., New South Wales, Roxburgh co., 124 m. W. Sydney by road and rail. There are several mines, of which the Sunny Corner mine is the largest; gold and copper are also obtained. P.<2000.

Sunnyside, PM.O., Eng., 2 m. from Tow Law, Durham.

Sunnyside, settlement, U.S., Utah, Emery co., 115 m. SE. Salt Lake City.

Sun Prairie, vil., U.S., Wisconsin, Dane co., 65 m. W. by N. Milwaukee, and 12 m. NE. Madison. P.<1500.

Sunshine, gold-mining vil., U.S., Colorado, Boulder co. P.<1500.

Suntar, Yakut settlement, E. Siberia, govt. Yakutsk, on l. bk. Vilui, 312 m. above Viluisk, and 500 m. W. Yakutsk, the head of navigation by steamers. P.<1000.

Sunth, tn., India, cap. Sunth state, 77 m. E. by N. Ahmadábád.

Suo, kuni or old prov., Japan, now included in Yamaguchi ken.

Suomalaiset. See **Lapps.**

Suo-nada, wide channel, Japan, between the N. of Kiushiu and the SW. of Honshiu.

Supan, tn., Siam, on the Tachin, 60 m. NW. by N. Bangkok.

Supe, maritime vil., S. America, Peru, dep. and 100 m. NNW. Lima. P.<2000.

Superga, hill, situated 4 m. E. of Turin, Italy; on its summit is the celebrated basilica, constructed 1717-31. Alt. 2140 ft.

Superior, city, U.S., Nebraska, Nuckolls co., 20 m. E. Red Cloud. P.<2000.

Superior, city, U.S., Wisconsin, Douglas co., near the W. end of Lake Superior, 6 m. S. Duluth (Minn.); has good harbour. P. 12,000.

Superior, Lake, the largest and most westerly of the five great lakes of North America, and the largest body of fresh water on the globe. The waters abound in fish, notably large trout. Shores greatly indented, and almost uniformly abrupt and sterile, presenting several natural curiosities, including the so-called 'Picture Rocks,' towards the E. It has numerous islands, the principal of which are Isle Royal and Michipicoten. It receives about 200 streams, and discharges its surplus waters south-westward by the riv. St. Mary into Lake Huron. There are several good harbours. Rich deposits of iron, silver ore, and native copper occur on the S. shores, and are extensively worked. For area, &c., see **America, North,** and **Canada,** Internal Communication.

Supino, tn., Italy, prov. Rome, 7 m. WSW. Frosinone. P.<4000.

Supkhan (or **Sipan**) **Dagh,** extinct volcano, Turkish Armenia, on N. shore of Lake Van. Alt. about 12,500 ft.

Suq Abu Sin, tn., eastern Sudan, 113 m. SW. by S. Kassala.

Sur, Syria. See **Tyre.**

Sura, riv., Russia, r. bk. trib. of Volga, rises in Simbirsk govt., flows N. for 527 m., past Penza and Alatyr, and joins Volga at Vasilsursk; has many populous villages on its banks, and is an important artery for shipping corn, hemp seed, hemp, tallow, potash, &c.

Surabaya, or **Sourabaya,** Dutch spelling **Soerabaja,** tn., Java, cap. residency Surabaya, on the NE. ct., in 112° 44′ E., at the mouth of the Kali-Mas, at the S. end of **Surabaya Strait,** separating Java from Madura, a narrow strait, which is getting gradually silted up by the deposits of the Solo R.; an important entrepôt of trade, and the principal naval arsenal of Java. The town is divided into two parts, Kotta and Jobokotta, the former comprising the town proper and native suburbs to the W.; the latter, the native suburbs, to the S. and E. P. (1888) 133,300.

Surafend, vil., Palestine, *Misrephoth Maim* and *Zarephath* in the O. T., *Sarepta* in the N. T., 33° 27′ N., 35° 16′ E., 7½ m. SW. by S. Sidon.

Surah, vil., Palestine, *Zorah* in the O. T., 31° 47′ N., 34° 59′ E., 14½ m. W. Jerusalem.

Surajgarh, tn., India, Rájputána, 95 m. W. by S. Delhi.

Surakarta (Dutch spelling **Soer—**), tn., Java, on the Solo, 33 m. NE. by E. Jokjokarta, cap. of native empire of Surakarta, now under Dutch control. The town, which is next in importance to Batavia, covers an immense area, and comprises several distinct quarters—Native, Chinese, and European. The centre is occupied by the Kraton, or palace of the 'Susuhunan' (emperor), a vast walled enclosure, containing about 10,000 persons; its approach is commanded by a Dutch fort. Surakarta is an active commercial emporium, and the centre of the Java railway system. P. 130,000.

Súrandái, tn., Brit. India, in S. of Madras Presidency, dist. Tinnevelli. P. (1891) 7500; Hindus, 6700.

Súrangavarapukot, tn., Brit. India, Madras, dist. and 30 m. NNW. Vizagapatam. P. 5700; Hindus, 5600.

Surár, Wadi, water-course, Palestine, the *Sorek* valley of the O. T., having its mouth on the Mediterranean, in 31° 56′ N., 34° 42′ E., 8½ m. S. by W. Joppa.

Surat, municip., Brit. India, Bombay, cap. dist. Surat, 33 m. S. by W. Broach, on the l. bk. of the Taptí, on a bend of the river, about 15 m. from the mouth. In the centre, facing the river, is the castle, built 1540, utilised since 1862 as public offices; landward the old moat encloses the city proper. Has Parsi fire-temples, besides some interesting tombs of the early European settlers. An English factory was established in Surat, 1612, but in 1687 the East India Company transferred the seat of their operations to Bombay. During the 17th and 18th centuries Surat was 'the chief export and import centre of India,' and had a very large population. With the gradual transfer of trade to Bombay its prosperity declined, and during the first half of this century it had fallen to its lowest point. In 1837 two-thirds, or more, of the city were destroyed, first by fire and later by flood. From about 1840, however, the city began to revive, and its growing prosperity was greatly stimulated by the opening of the Gujarat railway system in 1858, and the development of commerce caused by the American War (1860–64). Surat is noted for its numerous trade-guilds. Suwáli (Swally), at the mouth of the Taptí, formerly the port of Surat, is now quite deserted. The Surat roadstead affords safe anchorage from October to beginning of April, after which it is considered dangerous for large ships. Alt. 36 ft. Mean temp., yr. 79° F., Jan. 70°, May 86°; rfall., yr. 42.1 in., June–Sept. 40.3 in. P. (1797) estimated at 800,000; (1811) 250,000; (1816) 124,400; (1847) 80,000; (1851) 89,500; (1872) 107,100; (1891) 108,700; Hindus, 77,800; Moham. 20,400; Jains, 4300; cantonment, 500. See **Tápti.**

Surirpur, vil., Brit. India, NW. Provs., dist. and 28 m. W. Meerut. P. (1881) 5400.

Surite, vil., Peru, dep. Cuzco, 8 m. WNW. Anta. P. (dist.) 6400.

Surjuab, site of ruins, Algeria, prov. and 45 m. SSE. Algiers. Under the Romans it was a station of the Thracian auxiliary cavalry.

Surkh-ab, riv., Turkistan, rises in the Trans-Alai Mts., in 39° 40′ N., 73° 50′ E., under the name of Kizil-su, flows WSW. through the wide Alai valley at a height of over 8500 ft., then pierces high mountains and, after having received the Muk-su, flows at the NW. foot of Peter the Great Range, past Harm, in a broad valley 4200 to 7000 ft. high, then, after having received the Obi-khingon (r. bk.), again pierces the mountains, and, in issuing from them, assumes the name of Vakhsh. Joins the Amu from right in 37° 10′ N., 68° 22′ E. Length, 400 m.

Surlingham, par., Eng., Norfolk, S. div., 5½ m. E. by S. Norwich, 1½ m. S. Brundall stn., P.O. P. <500.

Surly Hall, PT.O., Eng., near Windsor, Berkshire.

Surmá, name of main branch of Barak R., Brit. India, Assam, dist. Sylhet; the Barak divides into two, the Surmá and the Kusiyára; the former navigable during the rains by steamers to Chhaták, with towns Sylhet, Chhaták, and Sonámganj on its banks. The name Surmá Valley is sometimes given to the dists. of Sylhet and Cachar.

Sürmene, vil., Asia Minor, on the N. ct., 20 m. E. by S. Trebizond.

Surprise Valley, valley, U.S., California, along E. base of Warner Range. It contains three bitter alkaline lakes, and wide plains of sage brush, with tracts of fertile land. Length about 60 m.; width, 30 m.

Surrey, vil., Canada, New Brunswick, Albert co., 90 m. from St. John. P. <1500.

Surrey, inland co., Eng., mainly in the Thames valley, r. bk., consisting (outside of the Metropolitan Area) of six parl. divs., as in the following table:—

	Acres.	Pop. 1891.
North-Western, or Chertsey .	97,120	61,970
South-Western, or Guildford .	112,765	67,722
South-Eastern, or Reigate . .	126,670	64,455
Mid, or Epsom	66,482	70,103
Kingston	11,720	85,367
North-Eastern, or Wimbledon .	37,461	69,239
Parl. bors. (including London bors.)	32,910	1,312,487
Total . . .	485,128[1]	1,731,343[1]

[1] The administrative county excludes the parishes now in county of London. Area, 461,230 ac. P. 521,551.

A leading geological feature of Surrey is the N. Downs chalk range, extending E. and W. through the middle of the county from Farnham, near Aldershot, to Westerham, within the Kentish border. The W. part, between Farnham and Guildford, forms a straight narrow ridge, 7½ m. long, called 'the Hog's Back,' reaching 505 ft. alt. E. of Guildford and the Wey R., which intersects the N. Downs, the outcrop widens, and the chalk range extends through Kent to Dover. All the county N. of the Downs belongs to the Thames basin, of Eocene formation, the lower ground chiefly London clay, fringed higher up by Woolwich beds and Thanet sands. To the S. of the Downs we find Upper Greensand with the grey marl called 'firestone,' and Gault. This slope is wilder in character than that of the Thames basin, and at last becomes part of the great 'Weald.' The chief heights are Leith Hill, 993 ft., commanding excellent views; Hindhead Hill, 903 ft., in the extreme SW., and Holmbury Hill; Boxhill, near Dorking, above the r. bk. of the Mole, which there intersects the N. Downs (like the Wey) to flow N. to the Thames. A third trib. of the Thames is the Wandle, at Wandsworth; in SE. of the county is the Eden, trib. of the Medway. The varied scenery of Surrey in the London basin is famous, being much enhanced by the heaths and common lands which still remain. Cooper's Hill, Richmond Park, and Wimbledon Common, Virginia Water, &c., are noted resorts. The soil is fertile towards the Thames, but generally thin and poor over the chalk. For agricultural statistics, see **Appendix,** pp. 7–9. From p. 8 it will be seen that the county takes a very high place as regards the relative extent of surface under woods. Farnham is noted for hops; Mitcham, for plants to distil scents and medicines; in the N. much land is rented by market-gardeners. Railway communication by the SW., SE., L. & B., L. C. & D. Rlys., and their many branches. Much of Surrey is now part of **London** (*q.v.* under **County Council**), and the chief manufactures belong to that belt. In the Wandle valley are tobacco, drug, and copper mills, also some calico works. Fireclay is worked at Redhill and Nutfield; stone and white sand at Godstone; hearth and firestones at Caterham. Besides some traces of the Roman occupation, the historical remains are few: Antiquities, abbeys of Newark and Waverley, castles of Farnham and Guildford, palaces of Richmond and Sheen, &c. The name is Saxon, *Suth-rice,* 'southern kingdom,' as distinguished from Middlesex and the Saxon kingdom proper. Croydon is the only parl. bor., and there are five other mun. bors.—Godalming, Guildford, Kingston, Reigate, and Richmond. Surrey is in the dioceses of Winchester, Rochester, and Canterbury. See **England,** table.

Surrey Hills, stn., Victoria, Bourke co., 8 m. E. Melbourne by rail. P. <1500.

Suspension Bridge, port of entry, Canada. See **Clifton.**

Suspension Bridge, port of entry, U.S., now included in Niagara Falls city. See **Niagara.**

Susquehanna, co., U.S., Pennsylvania, in the NE., on the N. frontier, crossed in the W. by 76° W.

Susquehanna, riv., U.S., Pennsylvania, rises in Otsego Lake, New York, flows S. and SE., and falls into Chesapeake Bay; the canals constructed along its banks have been mostly superseded by railways. It is wide and shallow; unnavigable for steamers, but much used for floating timber. Length, 400 m.

Susquehanna Depôt, bor., U.S., Pennsylvania, Susquehanna co., on the N. Branch of the Susquehanna R., 39 m. N. Scranton; has extensive industries. P. <4000.

Süsser See, lake in Prussian prov. Saxony, 3½ m. long, near Eisleben, formerly drained S. into the neighbouring Salziger See (now dry), now drained into the Salza.

Sussex, vil., Canada, New Brunswick, King's co., on the Kennebecasis R., 40 m. NE. St. John. P. <1500.

Sussex, maritime co., Eng., with coast of 91 m. on the English Channel, containing six parl. divs., as in the following table:—

	Acres.	Pop. 1891.
North-Western, or Horsham	206,919	52,978
South-Western, or Chichester	155,652	54,360
Northern, or East Grinstead	145,591	52,525
Mid, or Lewes	111,929	64,026
Southern, or Eastbourne	123,139	66,460
Eastern, or Rye	182,720	57,090
Parl. bors.	7,319	203,007
Total	933,269[1]	550,446[1]

[1] The administrative county excludes part of Tunbridge Wells urban sanitary dist. in the administrative county of Kent. Area (including the co. bors. of Brighton and Hastings), 932,733 ac. P. 548,979.

Geologically, this county consists of chalk, with the S. Downs range separating the Weald on N. from the lower dist. along the coast. Greensand and gault crop out to N. of the Downs; generally the rest shows Wealden clay and Hastings sand, with London clay near Chichester. From the ironstone of the Wealden or inland dist. Sussex became the chief seat of English iron manufacture, diminishing from forty-two forges in Cromwell's time to one in 1809. On the coast dist. occurs a level tract of Tertiary formation. The S. Downs reach a height of 813 ft. at Ditchling Beacon, and 783 ft. at Chanctonbury, while the Forest Ridge in N. has Crowborough Beacon, 796 ft., and Brightling Hill, 647 ft. In the reigns of Edward I. and II. over 5500 ac. in this county became submerged, and the site of Selsey Cathedral is about a mile out at sea. Much of the coast-line has a higher level than during the early English times. The riv. Rother, now entering the sea near Rye, had its mouth before 1250 beyond the Dungeness, 12 m. further E. The Weald, N. of the Sussex Downs, is part of the great forest 'Andredsweald' (120 m. by 30 m.). Since the Roman period the coast dist. has been noted for its fertility. The Downs, with a fine turf, support more than 500,000 sheep and an excellent breed of oxen. For agricultural statistics, see **Appendix,** pp. 7–9; p. 8 proves that Sussex is the foremost county for woods. Manufactures and industries unimportant. Gypsum is worked at Robertsbridge station. There are many Roman remains. Under the Saxons this county was a distinct kingdom (that of the *Suth Saxons*), and is still considered 'most thoroughly Saxon.' Two important battlefields are Senlac (1066), with the Abbey of Battle to commemorate the Norman victory, and Lewes (1264). Other antiquities are mediæval castles and religious houses. Communication by Guildford and Chichester Canal, and branches of the L. B. & S. C. (with daily steamers from Newhaven to Dieppe), SE., and L. & SW. Rlys. Sussex is in the diocese of Chichester. It has one city, Chichester, and seven other mun. bors.—Arundel, Brighton, Eastbourne, Hastings, Lewes, Rye, and Worthing. Most of the towns and villages on this coast are favourite watering-places.

Sussex, co., U.S., Delaware, in the S.

Sussex, co., U.S., New Jersey, in the extreme N.

Sussex, co., U.S., Virginia, in the SE., crossed in the N. by 37° N., and in the E. by 77° W.

Sussex, co., W. Australia, on the W. ct., crossed about the middle by 34° S.

Sussex Haven, harb., New South Wales, on the Pacific, 120 m. S. Sydney, a few miles S. of St. George's Head.

Sussex Lake, Brit. N. America, N. Lake Aylmer, is the source of Back or Great Fish R.

Sustead, par., Eng., Norfolk, N. div., 4 m. SW. Cromer. P. <250.

Susten, vil., Switzd., cant. Valais, on the S. bank of the Rhone, 1 m. S. by E. Leuk. P. <2000.

Susui, small isl., in Lau or E. group, Fiji Is., S. of Exploring Is., 17° 20′ S., 178° 56′ W.

Susurlu-chai, the ancient *Makestos* (*Macestus*), riv., in the NW. of Asia Minor, issues from Lake Simav, and flows W. then N. into the Sea of Marmora. It receives the drainage of Manias-göl from the W., and Abulonia-göl from the E.

Suswa, volcanic mt., Brit. E. Africa, about 20 m. S. Lake Naivasha.

Sutatausa, vil., Colombia, dep. Cundinamarca; scene of an obstinate but unsuccessful resistance by the natives against the Spanish conquerors. P. (dist.) <4000.

Sutcombe, par., Eng., Devonshire, Tavistock div., 12 m. SW. by S. Bideford, 5 m. N. Holsworthy stn. P. <500.

Sutherland, vil., Cape Colony, S. div., 80 m. SE. by S. Calvinia, in 32° 24′ S., 20° 40′ E. Alt. 4780 ft. Mean temp., yr. 53.6° F., Jan. 66.0°, July 40.7°. P. <1500.

Sutherland, maritime co., Scot., between the Moray Firth and the Atlantic, the SE. ct. being comparatively flat, and that on W. and NW. deeply indented, with bold and precipitous rocks, rising at Cape Wrath to 523 ft. Two narrow deep inlets of the sea on the N. and one on the W. are called **Kyles.** The surface inland is mostly a succession of irregular ridges, from 500 to 3000 ft. high. Benmore Assynt (3273 ft.) is the highest mountain, SE. of Loch Assynt; and in SW. are two interesting heights—Canisp (2779 ft.) and Suilven (2399 ft.); and near Loch Hope the precipitous Ben Hope (3040 ft.); and near Loch Naver, Ben Clibreg (3154 ft.). Geologically, the surface is mainly composed of gneiss or gneissose and schistose metamorphic rocks, with masses of granite here and there (on both sides of Loch Loyal and E. of the S. end of Loch Shin); and in the W. patches of Upper and Lower Cambrian (the Upper Cambrian represented by the Durness-Eriboll limestone) and Torridonian Sandstones (geologically below the Cambrian). In the western gneiss are large numbers of dykes of pre-Torridonian age. Coal is mined at Brora, where there is a wool-mill. Much of the mountainous country forming the main portion of the county is simply bleak and sterile moorland, though beautiful in autumn from the purple heather. The county abounds in lakes —Assynt (10 m. long); Shin (17 m.), Merkland and Griam, in the valley of the Shin; More and Stack, in that of the Laxford. The Oykell (35 m.), falling into Dornoch Firth, is the longest river. Less than one-fortieth of the surface is under cultivation, the best land being on the Moray Firth. For agricultural statistics, see **Appendix,** pp. 7–9. Communication by good roads; the H. R. passes from Invershin to Lairg, Helmsdale, and Caithness. There are important herring and salmon fisheries. There are some Pictish remains, but since 1034, when (under Thorfinn) this country became Scandinavian, it remained Norse till its annexation by the Scottish kings. The Norsemen named it *Southern-land*, as distinguished from Caithness and the Orkney and Shetland Is., which also belonged to them. In 1228 William Freskin was created Earl of Sutherland, and in 1833 the 19th earl became a duke. Till 1811–20, when thousands of natives, it is alleged, were ejected from their holdings, nearly all the cultivable land throughout the county was held by crofters. The census, however, shows a continuous, though small, increase from 1801 to 1831. Between 1873 and 1878 the Duke of Sutherland increased the arable area by large 'reclamations' at **Lairg** and Kildonan. More than £250,000 was spent in such improvements. The county returns one member to Parliament. Dornoch (*q.v.*) is the county town and only royal burgh; only two others, Golspie and Helmsdale, have over 1000 population. Area, 1,360,459 ac. (over 47,600 being water). P. (1891) 21,900. See **Scotland,** table.

Sutherland Falls, vil., U.S., Vermont, Rutland co., on Otter Creek, 5½ m. NW. by N. Rutland; has a quarry of fine marble. P. <1500.

Sutherland Hills, in the NE. of the South African Republic just N. of the Tropic of Capricorn, in 30° 20′–50′ E.; belong to the Klein Letaba goldfield.

Sütke, mt., Bulgaria, Eastern Roumelia, in the SW., 40 m. WSW. Philippopolis. Alt. 7175 ft.

Sutlej, riv., India, largest trib. of the Indus, rises in the twin lakes Mánasarowar and Rakas-tál, at an alt. of 15,200 ft. crosses the alluvial plain of Goge near Shipki, turns S. and breaks through a gorge in the Himálayas, E. of Kashmír. After entering British terr., for 200 m. it runs through a wild mountainous country on to the plains near Rupar, and flows W. through a fertile lowland valley till it receives the Beas, then turns SW. (continuing the general direction of the Beas) to its junction with the Chenáb, this latter river having first received on different banks the Jehlam, from Kashmír, and the Rávi. These five rivers, the Sútlej, Beas, Rávi, Chenáb, and Jehlam, forming when united the Panjnád, are those which give name to the Punjab, or 'land of the five rivers.' Before the influx of the Sutlej, the Indus receives no trib. of any consequence on its l. bk., and but scanty supplies of water on its r. bk. Navigable for steamers as far as Firozpur. Length, 600 m.

Sutna, tn. and cantonment, Central India, Rewá state, 110 m. by rail from Allahábád. Alt. 1040 ft. Mean temp., yr. 76° F., May 90°, Dec. 60°; rfall., yr. 42.2 in., June-Sept. 37.7 in. P. 6800; Hindus, 5300; Moham. 1100.

Sutor, North, hill, Scot., Ross-shire, at the N. of the entrance to Cromarty Firth. **Sutor, South,** hill, at the S. of the entrance, in Cromartyshire.

Sutri, tn., Italy, prov. Rome, 13 m. SSE. Viterbo. P. <3000.

Sutro, vil., U.S., Nevada, Lyon co., 8 m. S. Virginia city, at entrance of the Sutro tunnel, 4 m. long, which reaches to the Comstock silver lode. P. <1500.

Sutton with Seaford, eccles. par., Eng., Sussex, in the ancient par. of Seaford. P.<2000.

Suttor, riv., Queensland, flows W. then N. into the Burdekin, at its southernmost point.

Suva, tn., cap. and chief port of the Fiji Is., on the SW. ct. of Viti Levu, 1100 m. from Auckland, 1540 m. from Brisbane, 1872 m. from Sydney. Ample water for vessels using port at all tides. Good anchorage; no bar, wharf with 20 ft. at low water. P. (whites) 800.

Suvaroff, Brit. isls. (annexed 1889), Pacific, in SE. of Union group, in about 13⅓° S., 163° W.

Süverek, Turkey in Asia. See **Severek.**

Suvla-Burun, cape, Turkey in Europe, on the NE. of the Ægean Sea, in 40° 19′ N.

Suvo Rudište, mt. group, S. of central Servia.

Suwáli, vil., Brit. India, Bombay, dist. and 11 m. W. Surat (*q.v.*).

Suwałki, govt., Russian Poland, protrudes from Poland NE., between E. Prussia and the Russian govts. Kovno, Vilno, and Grodno. Covers the E. parts of the flat swelling, covered with lakes, which runs along the Baltic, attaining 800 to 1000 ft. above the sea. It slopes N. to the Niemen, and S. to the marshy tracts of the Bebrz (trib. of Vistula), the Hancza, trib. of the former, being connected by Augustowo Canal with a trib. of the Bebrz. Soil mostly unfertile. Population Lithuanians and Zhmuds (42 per cent.), Poles (28 per cent.), Jews (17 per cent.), Germans (7 per cent.), and White Russians. Potatoes largely grown, both for spirits and exportation. Divided into seven dists.: Suwałki, Augustowo, Kalwarya, Mariampol, Seiny, Wilkowiszki, and Władisławow. Wierzbołowo is an important custom-house of Russia, on main line to Berlin. Area, 4846 sq. m. P. (1890) 656,930.

Suwałki, cap. of above govt., is situated 75 m. NW. Grodno, on upper Hancza. P. 23,850.

Suwanee, co., U.S., Florida, crossed in the middle by 83° W., and in the S. by 30° N. **Suwanee,** settlement in above co., has a sulphur spring, much resorted to.

Suwanee River, stream, U.S., Georgia, flows S. through Florida into the Gulf of Mexico, about 10 m. N. of Cedar Keys; has been made navigable to White Springs.

Suwanee Shoals, vil., U.S., Florida, Columbia co. P.<1500.

Suwaraima, isl. of Guiana, formed by the Rio Cuyuni (37 m. above its confluence with the Essequibo); contested ground between Venezuela and England.

Suwedie, tn., Syria. See **Sueidie.**

Suya, Rio de, riv., Ecuador. See **Naranjal.**

Suzannet, isl., Bismarck Archipelago. See **Fischer I.**

Suzdal, dist. tn., Russia, govt. and 22 m. N. Vladimir; very old town, containing monasteries and churches dating from the 13th century; considerable kitchen gardening for export; cotton-mills. P. 7120.

Suze, La, tn., France, dep. Sarthe, on the Sarthe, arr. and 12 m. SW. Le Mans. P.<2000.

Suzunskiy, copper-works, Russia, W. Siberia, govt. Tomsk, Altai region, 85 m. NW. Barnaul. P. 5500.

Svai, Swai, or **Kompong-Svai,** in Cambodian **Pnom-dek** ('iron mountains'), range of hills, Cambodia, about 90 m. N. Prompenh, 20 m. N. Kompong-Tom; abounding in iron ore.

Svaneke, tn., Denmark, on the E. ct. of Bornholm; the harbour has depth of 12 ft. at entrance. P.<2000.

Svargsjö, vil., Sweden, prov. (län) Kopparberg, 14 m. NE. Falun. In 1523 Gustavus Vasa worked here on a farm, disguised as a peasant, when pursued by the Danes. P. (comm.) <5000.

Svartenhuk, penin., W. ct. Greenland, crossed in the centre by 71° 50′ N., 54° 20′ W.

Svartisen, glacier, W. ct. of N. Norway, prov. Tromsö, between Sjonafjord on the S. and Bejerfjord on the N. Length, 45 m.

Svartsjö, isl., Sweden, in Lake Mälar.

Svartvik, vil., Sweden, prov. Vestnorrland, on the E. ct., 3 m. SSE. Sundsvall (*q.v.*). Alt. 1050 ft. Mean temp., yr. 33.8° F., Feb. 12.0°, July 57.9°.

Sveaborg, fortress, Finland, adjoining Helsingfors.

Svedala, vil., Sweden, prov. (län) Malmöhus, 11 m. ESE. Malmö. P.<4000.

Sveen, vil., Norway, prov. and 59 m. S. Bergen. P. (comm.) <4000.

Svelvik, or **Svelvig,** vil., Norway, prov. Jarlsberg and Laurvik, on the Drammen Elf, 11 m. SSE. Drammen, of which it is the winter port; completely sheltered harbour deep enough for largest vessels. P.<2000.

Svendborg, tn., Denmark, on the S. ct. of Fyen I., prov. Svendborg, 24 m. S. by E. Odense; has boat-building and distilleries, and manufactures of tobacco and earthenware. It is one of the oldest towns in Denmark. The harbour has two entrances, depths respectively 16½ ft. and 17½ ft.; depth at quayside, 11–13½ ft. P. 8900.

Svenneby, vil., Sweden, prov. (län) Gothenburg (Göteborg) and Bohus, 59 m. NNW. Gothenburg. P. (comm.) 6600.

Svennevad, vil., Sweden, prov. (län) and 18 m. SSE. Örebro. P.<3000.

Sverbyeeva, vil., E. Siberia, prov. Amur, on l. bk. Amur, 80 m. from Ust Stryelka. P.<2000.

Sveta Jana, comm., Austria, Croatia-Slavonia, co. Zagreb, dist. Jaska. P.<4000.

Sveti, Servian, and Bulgarian, 'saint.'

Sveti Jurai, comm., Austria, Croatia-Slavonia, co. Lika-Krbava, dist. Zengg. P.<4000.

Sveti Stefan, tn., Turkey in Europe, prov. Kirk-Kilise, on the Black Sea, 45 m. SE. by S. Burgas.

Svikovo, tn., Turkey in Europe, prov. Salonica, on riv. Tsrna, 42 m. NE. Monastir.

Svilajnac, tn., Servia, prov. Ćuprija, 21 m. NE. by N. Kragujevac (Kraguyevatz). P. 5100.

Svinesund, deep and narrow bay, NE. ct. of Skager Rak, mouth in about 59° 6′ N., 11° 14′ E.

Svinö, isl., in NE. of the Faroe group.

Svir', riv., NW. Russia, govts. Olonets and St. Petersburg, takes origin in the SW. extremity of Lake Onega, and flows 135 m. into Lake Ladoga; important artery of navigation, making part of Mariinsk system of rivers and canals.

Svirou, vil., Greece, prov. Elis and Achaia, 35 m. WNW. Corinth. P.<2000.

Svisloch, riv., Russia, govt. Grodno, l. bk. trib. of Niemen. Length, 80 m.

Svisloch, tn., Russia, on the Svisloch R. P.<5000.

Svisloch, riv., Russia, govt. Minsk, r. bk. trib. of Berezina, system of Dnieper.

Svištov (svishtov), frequently called in western Europe **Shishtova,** or **Sishtova,** fortified tn. and river-port, Bulgaria, cap. prov. Svištov, on the Danube, 34 m. SW. by W. Rushchuk; has active trade in grain and wine. P. (1881) 11,500; (1888) 12,500; Bulgarians, 8700; Moham. 3000.

Sviyaga, riv., E. Russia, govts. Simbirsk and Kazañ, r. bk. trib. of Volga, flows N. 250 m., approaching the Volga at Simbirsk so near as to leave an isthmus only 4 m. wide.

Sviyazhsk, dist. tn., Russia, govt. and 16 m. WNW. Kazañ, on r. bk. Sviyaga, near its junction with Volga. P.<5000.

Sviyazhsk (Sobolevskaya), vil., 7 m. above it, is an important river-port on Sviyaga.

Svyatoi, *Svyataya*, *Svyatoye*, Russian; *Swiaty*, *Swiata*, Polish, for 'holy.'

Svyatoi Mys, or **Svyatoi Nos,** promontory, Russia. **1.** Arctic Ocean, 72° 57′ N., 141° 0′ E., 155 m. NE. of the mouth of Yana. **2.** Arctic Ocean, in Chesskaya Bay, 67° 55′ N., 49° 8′ E. **3.** (**Svyatoi Nos**) E. shore of Lake Baikal.

Svyentsiany (Polish **Swieciany**), dist. tn., Russia, govt. and 51 m. NE. Vilno, 12 m. from railway from St. Petersburg to Warsaw. One of the oldest Lithuanian towns; annexed to Russia in 1795. P. 8100.

Swabia, govt., Ger., kgd. Bavaria, in the SW. During the Middle Ages Swabia was the name of one of the great circles of the Empire, in the S. of modern Würtemberg, Baden, and Bavaria.

Swaby, par., Eng., Lincolnshire, S. Lindsey div., 7 m. SSE. Louth, 2 m. WSW. Aby stn., P.O. P.<500.

Swadlincote, par. and tn., Eng., Derbyshire, S. div., 4 m. ESE. Burton-on-Trent, on the M. R.; it has collieries and manufactures of earthenware (including art-ware, coarse earthenware, and sanitary ware). PMT.O. P.<3000.

Swaffham, par. and tn., Eng., Norfolk, SW. div., 14½ m. SE. by E. King's Lynn, on the G. E. R.; formerly noted for its butter-market. Three cattle fairs held here annually—in May, July, and November. Alt. 239 ft. Mean rfall. (1866–80), 28.3 in. 7550 ac. P.<4000.

Swaffham Bulbeck, par., Eng., Cambridgeshire, div. and 5½ m. W. Newmarket, 1½ m. E. by S. Bottisham stn., P.O. (**Swaffham Bulbeck,** or **Little Swaffham**); 4110 ac. P.<1000.

Swaffham Prior, or **Great Swaffham,** par., Eng., Cambridge, div. and 5 m. W. by N. Newmarket, with a stn. (**Swaffham Prior**) on the G. E. R.; extensive remains of Roman buildings were discovered here in 1892. PMT.O. 5587 ac. P.<1500.

Swafield, par., Eng., Norfolk, E. div., 7 m. SE. by S. Cromer, 2½ m. SE. Gunton stn. P.<250.

Swahili (name derived from Arabian *Sahil*, plur. *Sawahil*, = 'coast'), inhabitants of the Zanzibar coast and of the neighbouring islands, E. Africa. They are a mixed race (Arabs and Bantu); their language, Kiswahili, is spoken throughout central Africa. Commerce is the principal occupation of the Swahili. [**H. G. S.**]

Swain, isl., Pacific. See **Olosenga.**

Swain, co., U.S., N. Carolina, in W., N. frontier, E. of 84° W.

Swainbost (Cross to Port of Ness), vil., Scot., Ross-shire, Lewis I., Barvas par., 2½ m. S. Butt of Lewis. P.<2000.

Swainby with Allerthorpe, par., Eng., Yorkshire, N. Riding, Cleveland div., 12 m. S. by W. Middlesbrough, 2 m. S. Potto stn., PM.O. (**Swainby**). P.<250.

Swaine's Island, Newfoundland, off E. ct., N. of Bonavista Bay.

Swainshill, P.O., Eng., Herefordshire, 3 m. from Hereford.

Swainsthorpe, par., Eng., Norfolk, S. div., 5 m. S. by W. Norwich, on the G. E. R., P.O. P.<500; eccles. par. (**Swainsthorpe with Newton Flotman**) P.<750.

Swainswick, par., Eng., Somerset, Frome div., 2 m. N. by E. Bath, P.O. P.<750.

Swakop, riv., SW. Africa. Same as **Schwakop** (*q.v.*).

Swalcliffe, par., Eng., Oxfordshire, div. and 5 m. W. by S. Banbury, 3½ m. NW. Bloxham stn., PMT.O. P.<500; eccles. par. (**Swalcliffe with Epwell and Shutford**) P.<1000.

Swale, riv., Eng., N. Riding of Yorkshire, rises near the border of Westmorland, and flows first E. through the picturesque valley of **Swaledale** to Richmond, then SE., and finally SSE. in a more open basin, till it unites with the Ure near Boroughbridge, 14 m. NW. York, to form the Ouse; not navigable. Lead mined in Swaledale.

Swale, The, channel, Eng. See **Sheppey, Island of.**

Swalecliff, par., Eng., Kent, St. Augustine div., N. ct., 6 m. N. Canterbury, 2 m. E. Whitstable (SE. R.) stn., P.O. P.<250.

Swallow, par., Eng., Lincolnshire, N. Lindsey div., 7½ m. SW. by W. Great Grimsby, 5½ m. SW. Healing stn., P.O. P.<250.

Swallow Breakers, group of dangerous reefs, W. ct. of S. Africa, between Fort Rock and Palgrave Points, in 20° 5′ S.; discovered in 1879 by the ship *Swallow.*

Swallowcliffe, par., Eng., Wiltshire, Wilton div., 12 m. W. by S. Salisbury, 2½ m. SE. Tisbury stn., P.O. P.<250.

Swallowfield, East and **West,** two adjoining pars., Eng., Berkshire, Wokingham div., 6 m. S. by E. Reading, 3½ m. E. by N. Mortimer stn., PMT.O. East Swallowfield, P.<500; West Swallowfield, P.<1500.

Swallow Group, isls., Santa Cruz Is., in 10° S., 165° 35′ E.

Swallow Nest, PM.O., Eng., 2 m. from Aston, near Rotherham, Yorkshire.

Swalwell, vil., Eng., Durham, Chester-le-Street div., on r. bk. Derwent, just above its confluence with the Tyne, 3 m. W. by S. Newcastle, on NE. R.; has coal-mines and iron-works. PM.O.

Swamp Oak, gold-mining tp., New South Wales, Inglis co., 3½ m. from Moonbi stn. by rail. P.<1500.

Swampscott, tn. and fashionable watering-place, U.S., Massachusetts, Essex co., on the coast, 2 m. ENE. Lynn. P.<4000.

Swan, vil., U.S., Iowa, Marion co., 19 m. SE. Des Moines. P.<1500.

Swan, Upper, post-tn., S. Australia, co. and 19 m. from Perth by road and rail. P.<1500.

Swanage, par. and market-tn., Eng., Dorsetshire, E. div., at the S. extremity of **Swanage Bay,** 7½ m. S. Poole, on the L. & SW. R.; sea-bathing resort. It has in the vicinity numerous quarries of Purbeck stone. PMT.O. Market-day, F. P.<3000; eccles. par. (**Swanage with Herston**) P.<3000.

Swan Pool, rockbound haven, Eng., on coast of Cornwall, near Falmouth.

Swanport, Little, tn., Tasmania, Pembroke co., 50 m. from Hobart. P.<1500.

Swan River, riv. of Western Australia, rises under the name of Avon, near 32° 30′ S., 117° 0′ E., flows successively N. and W., and enters the Indian Ocean in 32° 0′ S., 115° 42′ E. It is liable to sudden and violent floods, which inundate the surrounding country. It gave name to the first colonial settlement in W. Australia, founded in 1829. Perth, the cap. of W. Australia, is situated 60 m. from the mouth of the river, where its port (Fremantle) is placed. The entrance is difficult.

Swan River Barracks, Canada, in 51° 52′ N., 101° 57′ W. Alt. 2160 ft. Mean temp. (2 yrs., 1875–77), yr. 27.5° F., Jan. –10.5°, July 62.1°.

Swanscombe, par., Eng., Kent, Dartford div., 2½ m. W. Gravesend, 1 m. WSW. Northfleet stn., PMT.O. P. 6600.

Swan's Cross Roads, P.O., Ire., co. Monaghan, 2 m. from Rockcorry.

Swansea, parl. bor., mun. bor. (since Henry III.), co. bor. (since 1888), par., seapt., and market-tn., Wales, in W. Glamorganshire, 203 m. by rail W. London, in the diocese of St. David's, on the Tawe (r. bk.), between lofty heights overlooking the bay, with stns. on G. W. R., L. & NW. R., M. R., and the Rhondda and Swansea Bay Rly. Now one of the two chief towns of S. Wales, it owes its growth to its collieries, its spacious and sheltered bay, its harbour and docks, admitting the largest vessels afloat, and its tin-plate manufacture, amounting to nearly 80 per cent. of that of the whole kingdom. Copper smelting and refining is also a great industry, and has lasted since the time of Queen Elizabeth; owing to this industry Swansea has been termed 'the metallurgical centre of the world.' Chief imports are: copper, silver, lead, tin, and nickel, with their ores, &c., iron and iron ore, &c. Exports: tin, terne, and black plates (nearly £3,500,000 annually), coal and coke (over £1,000,000), iron and steel, &c. The eight dry docks have a total length of 2377 ft., with depths at high water varying from 15 to 24 ft. The wet docks are the Prince of Wales Dock, area 23 ac., quayage 6130 ft., ordinary depth 24½–32 ft.; North Dock, 15 ac., quayage 5400 ft., depth 15½–23 ft.; Duke's Dock, 275 ft. long (entered from North Dock); South Dock, 17 ac., quayage 4800 ft., depth 14½–24½ ft. The North and South Docks have basins 500 by 220 ft. and 380 by 445 ft. The castle, whose tower is a picturesque feature of Swansea, is said to have been originally built about 1120, but was rebuilt about 1330. Camden spells **Sweinsey,** as if derived from the sea-swine (porpoises) anciently seen in the bay; or, according to others, from Sweyn, a Danish pirate. The Welsh name is **Abertawe,** from the river. The chief public buildings are the Guildhall; the Royal Institution (established 1835), with a library and museum; the free library, 30,000 vols.; a hospital, &c. There are excellent recreation grounds: Park Llewellyn, 40 ac.; Vieton's Park, 20 ac.; Cwmdonkin Park, 13 ac.; Brynmill Grounds, 9 ac.; and

others. Part of the co. bor. of Swansea is associated with the bors. of Loughor, Kenfig, Neath, and Aberavon to form the Swansea dist. of parl. bors., Swansea town returning one member to the House of Commons, Swansea dist. another. Mun. bor. P. (1801) 6100; (1851) 31,500; (1871) 51,700; (1891) 90,300; parl. bor. P. 57,500; parl. dist. of bors. P. 117,400.

Swansea, tn., U.S., Massachusetts, Bristol co., 3 m. NW. Fall River. P. <1500.

Swansea, tp., sanatorium, and small port, Tasmania, Glamorgan co., on the E. ct., 67 m. SE. Launceston, in 42° 7′ S.; has a beach 9 m. in length, and very fine climate. Mean temp. (5 yrs., 1861-66), yr. 54.4° F., Feb. 60.8°, July 47.4°; rfall. (3 yrs.), 26.97 in.

Swansea and Mumbles Railway, a short rly., Wales, along W. side of Swansea Bay, from Swansea to Oystermouth (about 1 m. short of Mumbles Head).

Swansea Bay, Wales, Glamorganshire, entering from Bristol Channel, penetrates NE. to the mouth of Neath R., 5¾ m.; width between Scar Point and Mumbles Head, 9¼ m.

Swans Island, U.S., Maine. See **Swan Island.**

Swarthmore, vil., U.S., Pennsylvania, Delaware co., 11 m. W. Philadelphia; seat of a Friends' college. P. <1500.

Swát, the *Suastos* of Greek geographers, riv., whose head-water flows SW. through a mountain valley to the NW. of Brit. India, and which afterwards turns SE., enters British terr. at Fort Abázai (Punjab), and finally joins the Kabul R. at Nisatha, NE. of Pesháwar. The head-works of the Swát R. irrigation canal are above the Abázai Fort.

Swatch of No Ground, natural depression in the Bay of Bengal, India, attributed to the action of rotatory tides in the bay, extends NE. from 20° 30′ to 21° 22′ N.; the interior of basin has not been sounded; depth on N. edge about 13 fathoms, on W. face, 200 and even 300 fathoms no ground. Breadth, 3 leagues.

Swathling, stn., Eng., Hampshire, Fareham div., on the Itchen, 3 m. NNE. Southampton, on the L. & SW. R., P.O.

Swaton, par., Eng., Lincolnshire, N. Kesteven div., 12 m. NW. by N. Spalding, 2 m. S. Helpringham stn., P.O. P. <500; eccles. par. (**Swaton with Spanby**) P. <500.

Swatow, Chinese **Shachou,** seapt. tn., E. ct. of China, prov. Kwangtung, on l. bk. of the Han, 5 m. from its mouth, 220 m. ENE. Canton. It is one of the open ports under the treaty of Tientsin, and has a considerable foreign trade. The material of all buildings is a sort of concrete, made from disintegrated felspar rock mixed with lime from calcined oyster-shells, and rammed between boards placed parallel to each other at a distance of 18 in. The walls are carried up entire, and openings are then cut for doors, windows, and spaces for beams and rafters. Climate healthy. The harbour bar has a depth at ordinary springs of 23 ft. high water, 16 ft. low water; depth alongside quays 7 ft. high water, nil low water. It has a British consul. P. about 30,000.

Swatragh, tn., Ire., E. co. Londonderry, bar. Loughinsholin, 18½ m. N. by E. Cookstown, 3 m. N. Maghera stn., P.O. P. <250.

Swavesey, par., Eng., Cambridge, Chesterton div., 8 m. NW. Cambridge, on the M. R. and G. E. R., PMT.O. P. <1500.

Sway, par., Eng., Hampshire, New Forest div., 11½ m. ENE. Bournemouth, 4 m. NW. Lymington, on the L. & SW. R., PM.O. P. <1000.

Swayfield, par., Eng., Lincolnshire, S. Kesteven div., 10 m. N. by W. Stamford, 1 m. S. Corby stn., P.O. P. <250.

Swazi-land, country inhabited by the Swazis, a warlike Kaffir race, in the SE. of Africa, bounded on the E. by the Lobombo Mts., which separate it from Tonga-land and the S. of Portuguese East Africa, on the other sides surrounded by the South African Republic, of which it is now a dependency. The country is a tableland, healthy and well watered, drained wholly into Delagoa Bay, the N. part by the Komati, the S. by several feeders of the Maputa. The whole land of the country had been granted in concession for grazing, farming, mining, and other purposes to citizens of the South African Republic and others, and the Republic itself had acquired from the chief so many rights to land and other sources of revenue in the state, that in 1895 the independence of the chief had become only nominal, and in that year the administration of the country was taken over by the Republic, though the country was not formally 'annexed.' The country has long been known to be rich in minerals, the most celebrated mines being the Piggs Peak and Forbes Reef gold-mines. Area about 8000 sq. m. Estimated P. 60,000.

Swede, isls., Pacific. See **Lamotrek.**

Swedeland, settlement, U.S., Pennsylvania, Montgomery co., on Schuylkill R., 14 m. NW. by N. Philadelphia.

Sweden, the kingdom which forms the E. portion of the Scandinavian Penin., stretches from 69° 3′ to 55° 20′ N., a distance of nearly 1000 m., though the breadth nowhere reaches 200 m., and is bounded N. by Norway, E. by Finland, the Gulf of Bothnia, and the Baltic Sea, S. by the last-named, and W. by the Kattegat, Skager-Rak, and Norway, E. and W. limits 24° 13′ and 11° 10′ E. The area is nearly double that of Great Britain. It is divided as shown in the following table:—

Area of the Provinces of Sweden, with the Population in Thousands, and the rate of Increase per Cent. per Annum of the Population of the Great Divisions between the successive Censuses for which particulars are here given:—

Provinces.	Area in sq. m.	Population in Thousands.			Pop. per sq. m. 1890.
		1870.	1880.	1890.	
Blekinge	1,163	126	137	143	123

[1] Including 5106 sq. m. of inland waters, of which 2307 sq. m. belong to Lake Wener, 742 sq. m. to Lake Wetter.
[2] Including 3346 sq. m. of inland waters, of which 451 sq. m. belong to Lake Mälar, 197 sq. m. to Lake Hjelmar.
[3] Including 5519 sq. m. of inland waters.
[4] Including 13,970 sq. m. of inland waters.

The **surface** constitutes an inclined plain, sloping from the main range of the Kjölen Mts., from alts. of 7000 ft. in the N. and 3500 ft. in the S., SE. towards the level of the Baltic Sea. The S. portion of the kingdom is, however, in great part occupied by a plateau of 700–900 ft. average elevation. The inclined plain of the N. is trenched by numerous narrow valleys, all running SE., and in many places almost wholly occupied by ribbon-like lakes (Torneå, Luleå, Stor-Afvan, Stor-Uman, Storsjö, Siljan, &c.). S. Sweden is also studded with lakes, some of them (*e.g.*, Wener, Wetter, Mälar, and Hjelmar) being of great size. Altogether, lakes constitute more than 8 per cent. of the total area. The entire **coast,** nearly 1600 m. long, is everywhere very ragged, affording a great number of harbours and ports. It is fringed in many parts with small bare rocky islands—the Skärgard or 'skerry-fence.' The coast of the Gulf of Bothnia is gradually rising; on the contrary, the coast of the extreme S. is rapidly sinking. The large Baltic isls. of Gothland and Öland belong to Sweden. The **rivers** are all short, none reaching 300 m. in length. In many cases they are merely torrents, descending the valleys, flowing through the lakes, and forming several waterfalls (Niaumelsaska, Edfors, Tännfors, Trollhätta). The more important, going from N. to S., are the Torneå (or Muonio), Kalix, Luleå, Piteå, Byske, Skellefteå, Umeå, Ångerman, Indal, Ljusna, Dal, Em, Helge, Nissa, and Göta. **Geology.**—The vast bulk of Sweden consists of crystalline granite and gneiss of the oldest ages; over these are spread, more particularly in the S., thin layers of Silurian rocks. The surface is in many parts thickly strewn with erratic boulders and with long narrow ridges of smooth stones (*åsar*), relics of the Glacial age, when Sweden was hidden under a vast ice-sheet. Except on the coasts, the **climate** is continental; but it is subject to great yearly fluctuations, and to a wide range between summer and winter. S. of 60° N. the yearly mean temp. is 40.4°–44.9° F., Jan. 24.5°–31.3°, July 60.3°–63.9°. N. of that parallel, on the coast, the yearly mean temp. is 31.9°–40° F., Jan. 10.1°–24.5°, July 56.4°–61°; but inland the yearly mean temp. falls to 29.1° F., Jan. 3.1°, July 57.7°. The rfall. is heaviest in the S., next the Kattegat, where it averages 28–32½ in. Thence it decreases N. to 15½ in. in Lapland, and to 12¾ in. in the extreme SE. The **vegetation** consists principally of forest-trees, low scrub, arctic forms of low growth, and cultivated crops. The **fauna** includes the bear, wolf, lynx, glutton, fox, lemming, wild reindeer, a few elk, hare, several birds of prey (hawks, falcons, eagles, owls), most of the European game birds, as the ptarmigan, blackcock, heath-cock, hazel-grouse, partridge, and snipe, and swarms of aquatic birds. Foxes are extremely common, and in certain seasons lemmings also. Singing-birds frequent S. Sweden in the warm months; and during the same period gnats are a great plague in Lapland (extreme N. of Sweden). Agriculture, mining, forestry work, and manufacturing are the principal occupations. Although fully one-half of the people are dependent upon **agriculture,** less than 8 per cent. of the area, and that principally in the S., in the division of Gotland, is cultivated. Potatoes, oats, and rye are the chief crops; barley, wheat, and fodder are also grown. Pasturage is found over about 4 per cent. of the area. **Forests** cover two-fifths of the area; N. Sweden, or Norrland, is in fact little else than one gigantic expanse of pine, fir, larch, and wild berry and other scrub. In middle and southern Sweden the predominating forest trees are oak, ash, alder, and *Coniferæ*. The country is everywhere rich in **minerals,** more particularly in iron and copper. These, as well as silver, manganese, zinc, nickel, and cobalt, are all extracted, principally in central Sweden and in the extreme N. (Gellivara). Coal is mined near the S. end of the country. Turf moors abound nearly everywhere. **Fisheries.**—The coasts are lined with a thin sprinkling of fisher folk, who catch herrings, sprats, flounders, mackerel, haddock, and cod. The busiest **industries** are connected with iron, timber, sugar, and cotton. Next in order come breweries, and manufactures of tobacco, paper, cloth, furniture, matches, leather, papier-maché, bricks, glass, chemicals, and woollens. **Communications.**—All the middle parts of the country, corresponding to the great division of Svealand, or Sweden proper, are admirably equipped with waterways for inland navigation, not only in the great lakes, but in the numerous canals which connect them one with the other and with the sea on both E. and W. The rivers are, as a rule, too torrential, except in their lower courses, to be serviceable for much else except floating down timber and turning saw and other mills. The lakes are ice-bound for periods varying from three to seven months in the year. Sweden possesses, moreover, a railway system of nearly 1800 m. in length. There is unbroken railway communication between Malmö on the Sound and Gellivara in the far N.; indeed, the line is being extended from Gellivara still further to the NW., namely, to Ofoten Fjord on the W. ct. of Norway. Other lines connect Stockholm with Christiania, the cap. of Norway, and with Trondhjem, near the middle of the W. ct. of the same country. **Commerce.**—All round the coasts of Sweden there are a great number of little seaports, generally accessible to large vessels. The foreign commerce reaches an aggregate of more than thirty-two millions sterling, the imports exceeding the exports by about four millions. The imports consist principally of textiles (nearly one-third of the total), groceries (more than one-sixth), minerals (less than one-sixth), with machinery, cereals and flour, wine and spirits, fish, manure, oils, paper, and coals. More than one-half of the exports consists of timber and wood-pulps; the remaining objects are minerals (one-sixth of the total), butter and bacon (one-sixth), cereals and flour, matches, paper, and textiles. Nearly half the minerals, more than half the timber, and nearly all the butter (exceeding one million sterling), are sent to Great Britain. The **weights, measures,** and **money** are identical with those of Norway (*q.v.*). The head of the **government** is a hereditary constitutional monarch. The responsible executive is vested in a council of seven ministers. The legislative functions are entrusted to a parliament of two chambers, one (nearly 150 members) elected for nine years by the provincial councils and the municipal councils of certain large towns; the other consists of close upon 230 members, who are elected directly or indirectly by the rural districts and the towns. The standing **army** embraces two classes of men—one class are enlisted, and serve from two to six years; the other class are given a cottage and a fixed annual pay, but only serve about one month in the year with the colours. In addition there is a militia, embracing all males between 21 and 33 years of age. The **navy** is composed of nearly 20 large armoured vessels and nearly 50 unarmoured boats of smaller size. The **population** are almost entirely pure Swedes, descended from an old Teutonic stock, which is believed to have crossed over into Sweden before 1500 B.C. (Montelius). The tribe in the extreme S. were however called Goths, though very closely akin to their N. neighbours, the Svea. In the N. forests there are some 17,000 Finns and 6000 Lapps; the latter, and many of the former, are nomads, owning large herds of reindeer. The language is a development of the ancient Scandinavian or Norrœnian tongue. Between 20,000 and 50,000 Swedes emigrate every year, the greater proportion of them going to the United States. The state **religion,** professed by nearly the whole of the people, is Lutheranism; but all creeds are tolerated. Primary **education,** which is free and compulsory, is imparted in excellent schools. The illiteracy of the country barely exceeds ¼ per cent. of the population. There are two universities, Upsala and Lund, and a medical school at Stockholm, besides several schools of navigation and technical sciences. Of the **towns,** Stockholm (the cap.) and Gothenburg each has a population exceeding 100,000; there are 17 others with more than 10,000 inhabitants each; and of these again Malmö, Norrköping, Gefle, Upsala, Karlskrona, and Helsingborg have between 20,000 and 50,000 each. **History.**—Down to past the middle of the 13th century the Svea and the Goths existed side by side as separate states, the former being heathens down to the middle of the 12th century, the latter Christians from the 9th century. In this same century the S. part of Gotland, known as Scania, was conquered by Denmark, and was held by her (with interruptions) down to the 17th century. On the other hand Finland was added to the lands of the Swedish crown in 1155–60. For about 120 years after the opening of the 17th century Sweden, under Gustavus Adolphus and Charles XII., played a conspicuous part in the politics of Europe, and possessed Livonia, Esthonia, and part of Pomerania on the E. and S. coasts of the Baltic; but since the loss of Finland in 1809 her territory has been confined to the Scandinavian penin. The **configuration** of the surface is essentially determined by the great mountainous masses of the Alps (*q.v.*) and by the Jura (*q.v.*) Mts. Between these two systems extends a greatly broken upland region of 1200 to 2500 ft. in average elevation, diversified by several lakes and deep valleys, and by the northern spurs and outliers of the Alps, *e.g.*, Schafberg (7290 ft.), Rothhorn (7714 ft.), Pilatus (6999 ft.), Albis (2864 ft.), Irchel (2284 ft.), Säntis (4935 ft.), Glärnisch (9535 ft.). The lowest elevation of Switzerland is the basin (646 ft.) of the Lago Maggiore, on the Italian side of the Alps; the lowest point N. of the Alps is at Basel (912 ft.). About 70½ per cent. of the surface is drained by the riv. Rhine and its affluents (Thur, Aar, Kander, Saane, Zihl, Emme, Reuss, Linth, Limmat); 16½ per cent. by the Rhone (fed by the Visp, Lonza, Drance, Borgne, &c.); 8½ per cent. by the Ticino, Maggia, Moesa, and other streams belonging to the basin of the Po; and 4½ per cent. by the Inn (trib. of Danube). The **lakes** occupy 520 sq. m. of the surface; the more important are those of Geneva, Neuchâtel, Murten (Morat), Biel (Bienne), Thun, Brienz, Lucerne, Zug, Sempach, Hallwyler, Zürich, Walenstadt, Constance (Bodensee)—all these on the N. side of the Alps; on the S. side are portions of Lago Maggiore and Lugano. But the glaciers of the Alps occupy a still larger area, viz., 710 sq. m., or nearly 4½ per cent. of the total area. The **climate** necessarily presents great contrasts in different dists., chiefly owing to the wide range of elevation, but partly also to the confined character of many of the valleys. In the lower region the temp. varies between the limits for Bern (alt. 1880 ft.) on the N. side of the Alps, and Lugano (900 ft.) on the S. side: thus—yr. (15 yrs.) 46.8° F. (Bern)—53° (Lugano); Jan. 29.4°–35.6°, July 64.8°–71.6°. The averages on the Great St. Bernard (8130 ft.) will illustrate the variations on the highest inhabited Alpine tracts—yr. (15 yrs.) 29.7°, Jan. 17.4°, July 45.3°. The rainfall is heaviest amongst the spurs and outliers of the Alps, viz., 65 to 100 in.; in the broad plain of the Aar it is only 35 in. The heavy rain in the uplands sometimes causes serious landslips (*e.g.*, at Goldau, E. of the Rigi, in 1806; at Zug in 1887). A characteristic feature during the summer months is the occurrence of the **föhn** (*q.v.*), a hot dry wind which is frequently the occasion of serious fires (*e.g.*, Meiringen in 1891). The healthiness of Switzerland is attested by the number of summer, and even winter, resorts which in recent years have been established on the slopes and in the valleys of the Alps: Davos-Platz, St. Moritz, Samaden, Pontresina, Sils Maria, Tarasp, Bergün, St. Beatenberg, Urseren, Heiden, Engelberg, Seelisberg, Mürren, and Grindelwald, all at alts. between 3000 and 6000 ft., may be named as being the most frequented. The shores of the Lake of Geneva (Montreux, Vevey, Lausanne, Bex, &c.), Interlaken, Gersau, and Lugano, at lower alts., are also frequented in the spring and autumn. **Flora.**—Below 2500 ft. the oak, beech, fir, and larch grow generally everywhere; the pine, yew, and chestnut in places. The vine flourishes up to 1800 ft., but to 2500 ft. in cant. Vaud. Deciduous trees (including fruit-trees) do not ascend above 2500 ft.; at those alts. the forests are principally *Coniferæ*. At 5900 ft. the forests cease, their place being taken entirely by the Alpine pastures, adorned with the Alpine rose. The only forms of plant-life that penetrate to the region of perpetual snow (above 8500 ft.) are saxifrages, the gentian, dwarf willow, mosses, and lichens. **Fauna.**—In the lower regions the hare and fox, buzzard, hawk, wild-duck, spoonbilled duck, and snipe are the commonest wild creatures; in the Alpine tracts the marmot and mountain hare abound, also the ptarmigan and mountain finch. The chamois and roebuck are becoming rare. The bear, wolf, and lynx are met with sometimes in the Engadine, in cant. Valais, and in the Jura Mts. The eagle and lämmergeier (vulture) frequent the Alps. The prevalent **occupations** are agriculture, pastoral pursuits, industry, and ministering to the needs of tourists. Only 16 per cent. of the area is, however, devoted to arable cultivation, 28 per cent. is barren; and not more than three or four cantons grow sufficient cereals for their own consumption. The chief crops are fodder, potatoes, spelt, wheat, oats, rye, the vine, vegetables, and fruit (apples and pears). Wine is made in largest quantity and best quality in the W., especially in cant. Vaud. Cattle, sheep, and goats are bred and fattened in large numbers; during the summer they are generally fed on the Alpine pastures. Meadows and grass cover 19½ per cent. of the total area. Swine and bees are also kept. **Forests** still cover about 19 per cent. of the surface, in spite of excessive felling, the effects of which the authorities are striving to repair. Switzerland is relatively poor in minerals. Salt (plentiful in the Rhine valley), iron (in the Jura), lignite, peat, and asphalt (Val de Travers) alone are extracted. The country is, however, richly endowed with mineral waters, the best known spas being Ragatz, Pfäffers, Schweizerhall, Rheinfelden, St. Moritz, Fideris, Leuk, Gurnigel, Schinznacht, Baden, Stachelberg, Birmensdorf, Wildegg, Saxon. The lakes were formerly well stocked with salmon, trout, and gwyniad; but these **fish,** as well as grayling, are now reared in fish-hatcheries in order to stock the waters. Despite her inland situation, Switzerland is the seat of very large **manufacturing industries,** including every branch of the cotton industry (cants. Zürich, Glarus, Appenzell, St. Gall, Thurgau), the manufactures of silks (Zürich and Basel), clocks and watches (Geneva, Val de Joux, Chaux-de-Fonds, Locle, and other places in cants. Neuchâtel and Bern, and at Schaffhausen), woollens (cant. Aargau), jewellery and ornaments (Geneva), embroidery (cants. St. Gall, Appenzell, Thurgau), with straw-plaiting (Aargau, Ticino, Freiburg), cheese-making (*e.g.*, Emmenthal, Gruyère, Schabzieger), condensed milk, beer, chemicals, machinery (Oiten and Winterthur), and wood-carving (Bernese Oberland). In these pursuits the people derive very great assistance from the copious water-supplies. It is calculated that Switzerland

possesses in her rivers an aggregate of nearly one million horse-power of motive force available for manufacturing purposes. Switzerland lies in the most direct line of **communication** between Italy (and also formerly of the Orient) and central and N. Europe, especially by the Rhine valley route. Accordingly, from very early times there have been passes kept open (at all events in summer) across the Alps. The Romans used the St. Gothard, Julien, and St. Bernard passes. During the Middle Ages these three, as well as the Simplon, Splügen, Septimer, Bernardin, and Lukmanier, were also used. At the present day there are many others (see **Alps,** PASSES). The first carriage-road across the Alps was that of the Simplon, made by Napoleon in 1800–1806. The first railway to climb and pierce the system was that of Mont Cenis (1871). Although the first railway in Switzerland was not built until 1847, the country is now liberally equipped, and possesses in the St. Gothard (*q.v.*) line over the Alps not only one of the grandest pieces of railway engineering work in Europe, but also a route of the first importance. [See **Italy,** Commerce.] Cog railways, ascending the steepest mountain slopes, are a pretty common feature in certain parts of Switzerland. Excellent carriage-roads exist in all parts. The lakes are traversed by numerous steamboats. The **postal union,** which was originated in Switzerland in 1874, has its headquarters at Bern. Despite the paucity of her natural resources, and the obstacles arising out of the configuration of her surface, Switzerland carries on a surprisingly large, and rapidly increasing, **commerce,** valued in 1890, in the aggregate, at about seventy millions sterling (52½ millions sterling in 1885). See also **Appendix,** pp. 4–5. The imports, amounting to an annual value of forty million pounds, consist chiefly of raw silk, cotton, wool, &c. (nearly £12,000,000), provisions and groceries, *i.e.*, cereals and flour, wine, coffee, tobacco, sugar, eggs, &c. (£10,000,000), minerals (7½ millions), animals (2⅝ millions), chemicals (1¼ million), confectionery (1 million), machinery, leather, and timber; the exports (£30,000,000), of manufactured silks, cottons, and woollens (15½ millions), watches and clocks (4 millions), provisions, *i.e.*, meat, cheese, fruits, chocolate, sugar, flour, wine and spirits (3 millions), gold and silver wares (nearly 1½ million), live stock (1 million), with machinery, chemicals, &c. The metrical system of **weights and measures** has been in vogue since 1877. **Money** reckonings are made in francs and centimes. **Administration.**—The legislative power of the Confederation rests with the Federal Assembly, which consists of two chambers: (1) the Council of States, embracing two representatives chosen, variously and for one, two, or three years, by each canton—44 in all; and (2) the National Council, consisting of deputies (140 to 150) elected by the people for three years at a time, in the proportion of one deputy for every 20,000 of the population. The executive is a body of seven members, elected for three years by the Federal Assembly, and styled the Federal Council. The chairman of the Federal Council, who with the vice-president is elected afresh every year by the Federal Assembly out of the Federal Council, acts at the same time as president of the Swiss Confederation. The people can, however, exercise a direct control over the acts of the Federal Assembly by means of the *referendum* and the 'initiative.' On the demand either of 30,000 Swiss electors, or of 8 cantons, any proposed legislative measure must be submitted to direct popular vote. The people may also propose, absolve, and alter legislative measures, provided 50,000 electors demand it. The cantons are self-governing communities, not in any sense provs.; the legislative machinery of the canton generally consists of an elected popular assembly and a small executive, the latter chosen by the former. But in a few cantons (*e.g.*, Glarus, Uri, Appenzell) the old open-air gathering of all the men still survives. The proceedings of the cantonal rulers are equally subject to the *referendum* and the initiative; but the former is of two kinds—optional and compulsory. The optional referendum exists where usually 5000 voters can require the popular opinion to be taken upon any proposed measure; the compulsory, where all laws must be submitted for the people's approval. Freiburg is the only canton which has not the *referendum.* The initiative rests with, as a rule, 5000 electors. The **national defence** devolves upon the militia, which embraces every citizen between the ages of 20 and 44; they are divided into two categories, those under and those over 32 years of age. The **population** belong to the German and the Latin races. They speak one or more of the three official languages, German, French, Italian, or else the Romonsch tongue, which is used chiefly in the Grisons. Compare the table above for statistics both of race and of religion. All creeds are free, though the majority of the people belong either to the Reformed Protestant or to the Roman Catholic churches. Jews number between 7000 and 8000. Switzerland sends every year 7000 to 10,000 of her children abroad as emigrants, mostly to the United States. Primary education is free, compulsory, and unsectarian. There are four universities, at Zürich, Bern, Basel, and Geneva, a Roman Catholic university at Freiburg, an academy at Neuchâtel, a federal polytechnic at Zürich, a superior technical college at Winterthur, and various other special schools. **Towns.**—The Federal cap. is Bern; but the three largest cities are Zürich, Geneva, and Basel, each between 70,000 and 100,000 inhabitants. There are twelve others whose population exceeds 10,000—Bern, Lausanne, St. Gall, Chaux-de-Fonds, Lucerne, Neuchâtel, Winterthur, Bienne, Hérisau, Schaffhausen, Freiburg, Locle. **History.**—The earliest inhabitants were the lake-dwellers. They were succeeded by the Celtic Helvetii and the Rhætii, conquered by the Romans in the first century. Then came the Burgundians and the Alemanni, who settled in Switzerland in the 5th century A.D. In the early Middle Ages the monasteries of St. Gall and Einsiedeln were celebrated centres of monkish learning. Early in the 14th century the nucleus of the present confederation was formed by the subsequent cantons of Uri, Schwiz, and Unterwalden banding themselves together to resist the tyranny of the Austrian rulers, for from the time of Charlemagne down to the end of the 14th century the greater part of the country belonged to the Empire. During the 14th century the Swiss in several heroic battles shook off the rule of Austria, and in the 15th defeated Charles the Bold of Burgundy at Grandson, Morat, and Nancy. At the period of the Reformation the league embraced thirteen cantons, bound together simply by alliances. In 1798 the French framed the federal organisation known as the Helvetic Republic, which embraced 19 cantons. The remaining three were added after the treaty of Vienna (1815). Once again Switzerland formed merely a union of loosely bound independent states, until the existing federal constitution was called into life in 1848; it was further amended in 1874. Sydney, seapt. tn., Canada, Nova Scotia, Cape Breton I. and co., on the E. arm of **Sydney Harbour.** The tidal harbour has depth at entrance low water of 44 ft.; alongside wharves at ordinary springs high water 22 ft., low water 18 ft. Mean temp., yr. 40.9° F., Feb. 20.3°, Aug. 62.8°. P.<3000. **North Sydney,** on the W. arm of Sydney Harbour, 7½ m. WNW.

Sydney, cap. and seapt. tn., New South Wales, is situated on the southern shore of Port Jackson, 4 m. from the entrance to the harbour, lat. 33° 52′ S., 151° 12′ E. The city proper has a length N. to S. of 3⅜ m. and a breadth of 2¾ m., but the suburbs cover a much larger area. The principal streets intersect each other at right angles, and are lined with handsome and commodious business establishments. Numerous fine public buildings adorn the city, of which the more noteworthy are the university, founded in 1858 (with three colleges, 44 professors and lecturers, and between 400 and 500 students), the Protestant and Catholic cathedrals, post-office, town-hall, Parliament Houses, Treasury, museum, and observatory, besides many others. The free public library contains about 100,000 volumes. There are several public parks and recreation grounds, of which the largest are the adjoining Centennial and Moore Parks (768 and 600 ac.) in the SE.; the Domain around Government House (including the Botanic Gardens, 38 ac.), Hyde, Phillip, and Cook in the centre of the city. The suburbs adjacent to the city, and in most cases connected with it by steam tramways or steam ferries, are Balmain in the W., separated from the city by Johnstone's Bay and Darling Harbour; Newtown, Redfern, Marrickville, and Waterlow in the S.; Paddington, Randwick, Waverley, and Woolahara in the E. On the N. shore of the harbour are N. Sydney, Mosman's Bay, Manly, &c., and there are many other suburban places within a radius of 10 m. The harbour is one of the finest in the world, quite landlocked, broken by promontories into numerous bays forming separate sub-harbours with deep water close to shore. Circular quay at the head of Sydney Cove has a length of 4765 ft. wharfage, depth alongside 28 ft. low water, affording accommodation for the largest ocean vessels; at Cowper Wharf, Wooloomooloo Bay, the depth is 26 ft., but at an adjoining wharf the depth is to be increased to 30 ft. The E. side of Darling Harbour, on the W. of the city, is also lined with wharves and large warehouses. The Pyrmont Wharves have a frontage of 3660 ft., depth alongside 28 ft. low water. The government docks at Cockatoo I. include the Fitzroy dry dock, 506 ft. in length, with 20½ ft. on sill, and a graving dock excavated out of the sandstone rock, 638 ft. in length depth on sill ordinary high springs, 32 ft. There are also large private docks, including Morts, length 418 ft., depth on sill 20½ ft. The approaches to the city are defended by extensive fortifications, including those on Pinchgut I. (a rock cut nearly level with the sea), and mounted with heavy guns. The Sandstone formation on which the city stands affords an abundant supply of durable building stone. On the N. side of the harbour coal has been discovered at a depth of 3000 ft., and preparations have been made for working it. Sydney, the oldest city in Australia, was founded in 1788 by Captain L. Phillip, who had been despatched by the Imperial government to establish a penal settlement in this region, and named after Viscount Sydney, Secretary of State for the Colonies. Mean temp., yr. 63.0° F., Jan. 71.5°, July 52.5°; rfall. (46 yrs.), 49.86 in.; (7 yrs.), 54.01 in. P. city proper (1891) 112,000; with suburbs, P. 380,000.

Syracuse, Italian **Siracusa,** fortified city, on the E. ct. of Sicily, cap. prov. Syracuse, 33 m. SSE. Catania, in modern times occupying only the site of the original and smallest quarter of the famous city of antiquity, viz., the isl. of Ortygia, between the sea and the great harbour, 30 m. SSE. Catania; lat. of lighthouse, 37° 3′ N., long. 15° 17′ 5″ E. The Doric cathedral, formerly the temple of Minerva, which was renowned for the splendour of its decorations, has been a place of worship continuously for 2500 years. The church of St. Marcian claims to have been the earliest in Europe for Christian worship. The chief vestiges of antiquity are the catacombs and the *latomiæ,* or ancient prisons, open to the sky, in the quarries from which the materials of Syracuse were taken; the 'ear of Dionysius,' a remarkable resonating cavity connected with the *latomiæ;* the famous fountain of Arethusa, the remains of the strong fortress Hexapylon, of a temple of Diana, and a Roman amphitheatre. The port, enclosed between points Plemmirio and Massa Oliveri, is sheltered from all winds, and admirably adapted for a harbour of refuge and for a commercial emporium; the principal exports are wine, oranges and lemons, oil, cheese, &c. Syracuse was founded, B.C. 735, by a colony from Corinth, governed alternately

as a republic or under kings; unsuccessfully besieged by the Athenians B.C. 415, and by the Carthaginians B.C. 396; taken by the Romans B.C. 212; and again, after a lengthened siege, in 878 by the Saracens, who partially destroyed it; but it was chiefly ruined by the earthquake of 1693. It was the residence at different periods of Plato, Simonides, Zeno, and Cicero, the place where Hicetas first propounded the true revolution of the earth, and the birthplace of the poets Theocritus and Moschus, and the philosopher Archimedes, who lost his life at the capture of the city by the Romans. The climate is mild in winter, but unhealthy from miasma in summer. Mean temp., yr. 64.8° F., Jan. 52.7°, Aug. 79.8°; rfall. (1869–91), yr. 21.1 in., June–Aug. 0.41 in., May–Aug. 0.85 in. Comm. P. (1871) 20,000; (1881) 25,300.

Syracuse, vil., U.S., Nebraska, Otoe co., 45 m. S. by W. Omaha, and 30 m. ESE. Lincoln, with limestone quarries. P. <1500.

Syracuse, city, U.S., New York, Onondaga co., 35 m. SE. by S. Oswego, on the Erie Canal, at the confluence of the Oswego Canal, and at the head of Onondaga Lake. It contains the state armoury; is noted for its extensive salt-works, which manufacture both by solar and artificial heat. Educational institutions include the Syracuse University, established by the Methodists in 1870, and consisting of an assemblage of colleges, connected with which are the Holden Observatory and Leopold von Ranke's historical library, and the John Crosse Memorial Building for the College of Fine Arts. P. (1850) 22,300; (1870) 43,100; (1880) 51,800; (1890) 88,100.

Syracuse, vil., U.S., Ohio, Meigs co., on r. bk. of Ohio, 87 m. SE. Columbus; coal is extensively mined, and salt manufactured. P. <1500.

Syracuse, settlement, U.S., Utah, Davis co., 25 m. NNW. Salt Lake City.

Syracuse, East, vil., U.S., New York, 4 m. E. Syracuse. P. <3000.

Syracuse Beach, a frequented summer resort, U.S., Utah, on Great Salt Lake.

Syr-daria (ancient *Yaxartes*, Arab *Sihûn*), riv., central Asia, Russian Turkistan, trib. of Lake Aral, rises on the high plateaux (*Syrts*), 11,500 or 12,000 ft. high, of the Tian Shan, to the S. of Lake Issyk-kul, partly from the Akshiriyak glaciers, by the junction of the Jaak-tas and the Barskaun streams. After having pierced a wild gorge it takes the name of Naryn and flows SW., receiving the Little Naryn at Fort Naryn-skoye (6800 ft.), near which the first Kirghiz fields begin to appear, the Atpasha, the Alabuga, and the Jumgal. It then enters at Ketmen-tube into the former khanate of Kokan, and at Uchkurgan into the broad and fertile valley of Fergana. It receives the name of Syr-daria near Namangan, after a course of 465 m. From Uch to Khojent the Syr-daria continues to flow SW., watering the Fergana valley, and only after Khojent it bends to NNW. and NW., which course it maintains for 360 m. till its mouth. From this bend to Turkestan town it receives from the right several large tribs. (Chotkal, Chirchik, Arys), on which the chief towns of the terr. stand (Tashkent, Chimkent, Chinaz), and is a large river, which at Fort Perovskiy (44° 50′ N.) has a width of 300 yards, and carries at low water 312,500 cubic ft. per second, and much more at inundation time. In its lower course the Syr-daria, having the Kizil-kum desert on the left, and the Moyun-kum desert on the right, receives no tribs., and loses much of its water by evaporation. Its delta begins at Fort Perovskiy; a branch, Jany-daria, which is sent off south-westwards, becomes eventually lost in the sands. The main river also divides into two branches, Kara-uzyak and Jaman-daria, and the last of these gives origin to Kuvan-daria. It enters the N. part of Lake Aral. The river is navigable throughout, and freezes but for three months every year. During the early Post-Pliocene period, when the Caspian Sea spread much to the eastward, and perhaps joined Lake Aral, the Syr-daria flowed into the Caspian.

Syr-darlinskaya, prov., Russian Turkistan, has Turgai and Akmolinsk on the N., Lake Aral on the W., Khiva, Bukhara, and the Russian provs. Samarkand and Fergana on the S., and Semiryechensk on the E.; includes parts of the Tian Shan highlands in the SE., as well as the Karatau chain, which shoots NW. from the above, along the r. bk. of the Syr. The valleys of the two, irrigated by tribs. of the Syr on their S. slope, and by several mountain streams on the N. slope, are the best parts of the prov. The Chu flows along its NE. border, and the Talas flows from the Tian Shan into Lake Kara-kul. Large parts of the prov. are occupied by the deserts Kizil-kum in the W., Moyun-kum or Ak-kum in the E., and Kara-kum in the N. Population mixed: Sarts, Tajiks, Kirghizes, and a few Russians. Divided into six dists.: Tashkent, cap. of Russian Turkistan, Aulie-ata, Chimkent, Kazalinsk, Perovsk, and Amu-daria forming a separate *otdyel* under a military governor. Area, 194,853 sq. m. P. (1889) 1,214,300.

Syresham, par., Eng., S. div. of Northamptonshire, 6½ m. NW. Buckingham, 3 m. ESE. Helmdon stn.; has manufactures of lace and boots and shoes. P.O. P. <1000.

Syria, with Palestine, the region lying between the E. end of the Mediterranean Sea and the Arabian Desert. Syria in the wider sense (that is, including Palestine) extends from about 37° N. to about 31° N.; the penin. of Sinai, and the desert of Et-Tih to the N. of it, being usually (as in this work) treated of separately. More precisely defined, the N. boundary of Syria is marked by the Ahmar (Musa), the Alma or Akma (*Auranus*), and the Kurd Dagh, all outliers of the Taurus Range, and all less than 6000 ft. in average elevation. The NE. boundary as far E. as about 38° E. is the Euphrates. On the E. and S. there are no other limits save those set by the broad expanse of the Arabian deserts. Of course the Mediterranean washes the whole of the W. side of Syria. The country thus circumscribed measures 450–500 m. from N. to S., but is only 140 m. at its widest (about 36° N.), and contracts further S. to 90 m. Its area probably exceeds 55,000 sq. m., or is but little less than the area of England and Wales. The ancient Semitic name given to this region was Aram (*Aramæa*), meaning 'the High Country.' The name Syria is derived from the Greeks, who adopted this contracted form for what they first knew as a prov. of the empire of Assyria. To the Arabs it is known as Bahr-es-Sham, 'the Country on the Left Hand,' in contradistinction to Yemen, 'the Country on the Right Hand,' *i.e.*, of Mecca. For long periods the coast-belt in the N. was known as Phœnicia, whilst further S. the dists. next the sea were called Philistia and also Palestine. But it is customary to extend the name Palestine so as to include along with Philistia also the hilly country behind it, which has borne, and still bears, the various designations of the Land of Canaan, Land of Israel, Land of Judæa, and the Holy Land. At and after the time when those events happened which entitle it to the last-quoted appellation this S. portion of Syria was divided into the several states, dists., or provs. of Galilee, Samaria, Judæa, Idumæa, Peræa, Gaulanitis, Iturea, Auranitis, and Trachonitis. On the whole the **coast** is tolerably regular and uniform, there being no deep indentations and no penins., only shallow bays and short capes. The most notable of these, going from N. to S., are the Gulf of Alexandretta, Ras (cape) el-Khanzir, Ras el-Basit, Ras ibn-Han, Bay of Tripoli, Bay el-Herah, Bay of June or Kesruan, St. George's Bay, Ras Beirut, Bay of Akka (Acre), and Cape Carmel. The **physical features** are esentially determined by the mountains, which stretch N.–S., parallel to the coast, and send off bold spurs towards it, in places almost coming to the water's edge; in fact, the coast-plains nowhere exceed a breadth of 15 m. The most outstanding orographical features are the lofty parallel chains of Lebanon (6000–10,000 ft.) and Anti-Lebanon (8000–9000 ft.), which lie close together between 33° 15′ and 34° 30′ N.; they are separated by the deep depression of El-Bekaa (*Cœle-Syria*), along which flow in opposite directions the rivs. El-Asi (*Orontes*) to the N. and the Litani to the S., both streams eventually piercing the mountains to get to the sea. The Lebanon (*q.v.*) Range is continued N. by the Jebel el-Ansariye and the Jebel Akrad (6000–8000 ft.), and S. by the hills and rolling uplands of Palestine—as the mountains of Galilee, Carmel, Gilboa, Samaria, Judæa, ranging in elevation between 1500 and 3500 ft. These short chains inclose several fertile valleys, and between them and the sea stretch the plains of Acre, drained by the Naman (Belus); Esdraelon (Jezreel), watered by the El-Mukatta (Kishon); Sharon, drained by the Akhdar, Abu Zabura, and Falaik; and Sephela, between Jaffa and Gaza, the ancient Philistia, through which flow the rivs. El-Aujeh, Rubin, Faranj, Esneid, and Ghazzeh (Gaza). On the W. side of Mount Hermon the most conspicuous as well as the highest and southernmost part of the Anti-Lebanon begins, not far from the bed of the Litani, though quite separate from it, the river Jordan (*q.v.*), which courses S., descending from an elevation of 1830 ft. *above* to 1290 ft. *below* the level of the Mediterranean. The gigantic fissure (about 135 m. long) along which the river flows from Lake Huleh (which is practically at sea-level), and through the Lake of Tiberias (Sea of Galilee), is a great geological fault, formed along the line of a natural river valley, which at one period extended to the Gulf of Akabah, at the head of the Red Sea, but is now cut off from it by a subsequently elevated watershed (600 ft.) some 60 or 70 m. S. of the Dead Sea (*q.v.*). The mountains of Anti-Lebanon rise up out of the elevated plains (1250 ft.) of Aleppo (Halab) on the N., and sink down on the SE. and S. into the plateau land of Hauran (*q.v.*), the principal subdivisions of which are the plain or depression of Damascus (2280 ft.), drained by the rivs. Barada (ancient Abana), Awaj (Pharpar), Luva, and Khanafis, all rising into shallow basins or lakes—Bahr-el-Ateibeh, El-Hijane, and others; the lava plateaux of Es-Safa and El-Lejah (*Trachonitis*); the Jebel Hauran, rising to 5850 ft.; the plain of El-Nukrah; the basalt plateau of Jolan or Jaulan, close to the Jordan; and, further S., the mountains of Gilead and the mountains of Moab (Jebel Misme and Jebel Gueile). Several streams, in part intermittent, traverse the volcanic plateaux of the Hauran, and enter the Jordan and the Dead Sea, frequently at the bottom of ravines 2000 ft. in depth; the principal are the Yarmuk or Menadire,

Jabis, Zerka, Zerka Main (Callirhoe), Mojib (Arnon), and Kerak. In the dist. of Aleppo the drainage is carried in part into the lakes or shallow basins of Baluk-göl (Ak-Deniz), El-Makh, and El-Sabbakah. **Geologically,** the Hauran is built up of basalts and lavas, and shows besides, in isolated cones and other features, unmistakable proofs of volcanic activity; indeed, it has been the scene of two earthquakes in the 19th century, in the years 1822 and 1837. Cretaceous limestones, predominantly of Jurassic age in Lebanon, form the geological substance of the greater part of the rest of Syria. Owing to the range of elevation, and to the direction of the mountain chains, the **climate** differs greatly in different dists. The prevailing winds, being W., strike against the mountains, and so discharge their moisture over the maritime region W. of the Jordan and Lebanon, tempering the heat of summer and the coolness of winter. On the E. side of the mountains, that is in Damascus (*q.v.*), Hauran, and the plain of Aleppo, which lie open to the dry winds of the N. and NE., the heat is very great in summer, but the winters are mild, though snow and ice are not infrequent. The valley of the Jordan (the Ghor) is intensely hot in summer. The higher mountainous parts are sometimes subject to severe cold, being invariably covered with snow during the winter. (Compare **Beirut** and **Jerusalem.**) **Fauna.**—The jackal, lynx, panther, wild boar, bear, and numerous varieties of birds, with swarms of scorpions, mosquitoes, and bugs, and at times locusts, as well as many snakes, are the most characteristic forms of animal life. The lion is not now present in Syria. The buffalo and camel are kept in domesticity, in addition to the flocks of sheep and goats, and excellent breeds of horses, asses, and mules. Good pasturage is found in Hauran and on the hills of Judæa. **Natural products.**—The soil is in general fertile; and if only irrigation were practised to the extent it evidently was in antiquity, when the hill-sides were everywhere admirably terraced (as indeed they still are in the Lebanon dist.), it would produce crops very greatly in excess of what it now yields. Hauran is especially famous as a corn-growing country, Damascus is equally celebrated for its fruits, and the whole of Syria for the olive and the vine. The commonest crops are wheat, rye, barley, beans and pease, lentils, cotton, and millets. Excellent tobacco is cultivated along the coast to the N. (Latakia or Ladakie); maize in El-Bekaa; rice near Lake Huleh; indigo in Hauran; madder, flax, and saffron in the coast plains; the mulberry in Lebanon and Anti-Lebanon. Fruits—the date, orange, fig, pomegranate, almond, peach, apricot, and pistachio nut—grow all along the coast, in the plain of Damascus, and on the hills of Judæa. The slopes of Lebanon, the mountains of Galilee and of Gilead, and the outliers of the Taurus (in the N.) are all fairly well wooded, the principal trees being oaks and pines, sycamores and oleanders. The famous cedars of Lebanon are now confined to a single grove of small extent. This part of the world is poor in **minerals.** Iron occurs in Lebanon (mined at Mesra, just S. of 34° N.) and in Judæa; copper, coal, chrome (mined), antimony, lead, borax, bitumen, and marble in the neighbourhood of Aleppo and Antioch. Lignite is extracted in Lebanon, and salt and asphalt beside the Dead Sea. The principal **industry** is the manufacture of silk in Lebanon, also at Damascus. Other pursuits, such as the manufacture of cottons, leather, gold thread, metal-work, soap, glass, &c., are carried on for the most part in Damascus, Aleppo, and Beirut. The forging of sword-blades (damascene work), once famous at Damascus, is now a thing of the past. Sponge-fishing is pursued at Latakia, in the neighbourhood of Tripoli, and at other places along the coast. The **means of communication** chiefly in use for centuries have been mere caravan tracks and mountain paths. The most important routes between the great empires of the Euphrates valley and the Iranian tableland on the one side, and of Egypt on the other, have always passed this way. At the present time one of the chief pilgrimage routes to Mecca goes through Damascus and traverses the elevated region of Hauran. Several mountain passes give access from the sea to the E. side of the Lebanon and its continuations, and in the N. establish connection with the routes across the desert to Mesopotamia and the Euphrates. In addition to the various roads or tracts of antiquity, there are now good carriage roads from Damascus to Beirut and to Saida (Sidon) on the coast, and to Homs (making) further N. and between Jaffa and Jerusalem. Between these two places there is also a railway (54 m. long). Another line runs S. from Damascus to Mzerib (70 m.), in Hauran. A third, to connect Damascus with Haifa and Acre, has been commenced; and a fourth is planned to unite Beirut with Damascus. Apart from the caravan-borne trade across the desert with Mesopotamia, Arabia, and Egypt, the foreign **commerce** of Syria mostly passes through the two ports of Alexandretta (for Aleppo) and Beirut (Damascus), though Jaffa (for Jerusalem), Haifa, and Tripoli have each of them a little trade. The annual trade of Alexandretta is valued at 2½ millions sterling, that of Beirut at about 2 millions, that of Jaffa at approximately one-half a million. The imports consist principally of cottons and other textiles, supplemented by ironmongery, groceries, paper, glass, &c. The most important of the exports are silks, wheat and sesamum, fruits, wool, olive-oil, sponges, soap, hides, gold and silver thread stuffs. The country is divided for **administrative** purposes into the vilayets of Haleb (Aleppo), Soristan (Syria), and Beirut, and the mutessarifliks of Lebanon and Kuds-i-Sherif (Jerusalem), each ruled by a Turkish governor. The ruler of Lebanon is, in contradistinction to all the rest, a Christian. The **population** is estimated to number (1888) 2,185,000. The bulk of the peasantry are, no doubt, of Aramæan descent, or, in other words, the original native (Semitic) race. But there is, besides them, a great variety of peoples—Arabs in the villages, Turks around Antioch and in the large towns, Kurds in the Kurd-Dagh, Bedouin (nomad Arabs) in the deserts, and Maronites and Druses in Lebanon and El-Bekaa. Arabic is the language commonly spoken. Ancient Syriac is only used liturgically by certain sects, *e.g.*, Moronites and Jacobites. The prevailing religions are Mohammedanism and various sects of Christianity, as the Greek Orthodox and the Maronites, Greek United, Syrian United, and Jacobites, the first four recognising the Pope at Rome. The Christians are estimated to number about 900,000 in all. In addition there are 80,000–120,000 Druses (*q.v.*), the Metawile (Mohammedan Shiites), the Ansariye, who profess a corrupt Christianity, some Protestants, and some Jews. Several of the **chief towns** have been already mentioned; others, mostly possessing historical or antiquarian interest, are Hama, Baalbek, Zahleh, Sur (Tyre), Safed, Tabarijeh (Tiberias), En-Nasirah (Nazareth), Sebastijeh (Samaria), Nabulus (Shechem), Ludd (Lydda), Ramleh, Er-Riha (Jericho), Bethlehem, El-Khulil (Hebron), Askulan (Askalon); and the sites of ruined or decayed places are truly innumerable, embracing Membij (Hierapolis), Jerabis, Kyrrhos, Palmyra, Hamath, Apamea, Capernaum, Endor, Nain, Jabesh, Gilead, Gerasa, Ramoth-Gilead, Rabbat-Amman, Shiloh, Arimathea, Emmaus, Beersheba, and many others. Nor is this surprising, considering the centuries of time through which Syria plays a part in **history.** Situated between two of the most highly civilised regions of the ancient world, Egypt and Babylonia (Assyria), the people of Syria borrowed from both, though they were not without original initiative, as the nautical enterprise and the commercial and industrial skill of the Phœnicians testify. The N. parts of Syria probably belonged to the empire of the Chetá or Hittites prior to the decay of their power in the 12th century B.C. But from the 8th century B.C. onwards, Syria was generally subject to one or other of the great empires on either side of it; first it was to the Assyrians (8th century B.C.), then to the Greek Seleucides (4th century onwards), after them to the Romans (1st century B.C. to 7th century A.D.), and the Arabs (7th century to 12th century). For some time it was in part divided amongst the crusading principalities (Latin kingdom of Jerusalem, &c.), until they were overthrown by the Mongols, who struck (1260) the first real blow at the prosperity of the country. The next came when Syria was wrested by the Turks, its modern lords, from the hands of the Egyptian Mamelukes in 1516. The history of Palestine agrees in the main with that of Syria proper, except during the long period when it was occupied by the Israelites (13th century to 6th century B.C.). See Baedeker's *Syria*, by Dr. A. Socin, and the nine volumes of the Palestine Exploration Fund. [**J. T. B.**]

Tafahna-el-Azab, tn., Lower Egypt, prov. Gharbiye, 9 m. S. Zifte. P.<4000.

Tafalla, tn., Spain, prov. Navarra, 20 m. S. by W. Pamplona, cap. dist. T. P. (comm.) 6500.

Tafassasset, riv., Africa, Sahara, on the S. slope of the desert; its valley, about which little is known, runs through the country of the Aulimmidens; its point of confluence with the Niger is unknown.

Tafelfichte, highest point of the Isergebirge, Sudetic Mts., on the confines of Bohemia, Silesia, and Lusatia; source of the Iser. Alt. 3690 ft.

Tafelne, tn., Morocco. See **Tefelne.**

Taff, riv., Wales, rises in Brecknockshire, on the Brecknock Beacon, and flows S. through Glamorganshire, past Merthyr-Tydfil, into the Bristol Channel at Cardiff; the Taff Vale Rly. accompanies it throughout. The valley is entirely occupied with the coal and iron industries.

Taffs Well, PMT.O., Wales, Glamorganshire, 8 m. NW. Cardiff; coal mined.

Tafilet, oasis, Morocco, S. of the E. end of the Jebel Bani, irrigated by the Wadis Gheriz, Tizimi, and Zi; chief villages,

Abuam and Risani, the former in 31° 0′ N., 4° 15′ W. Visited by Réné Caillé in 1828, by Rohlfs in 1864, and not again by Europeans till 1894, when it was reached by Delbrel, and also by Harris.

Tafna, riv., Africa, Algeria, prov. Oran, with part of its basin in Morocco, flows NE. into the Mediterranean. Length, 80–90 m.

Tafrata, large desert plain, Africa, in E. of Morocco.

Tafrent, mt. group, Africa, Algeria, prov. and 68 m. SE. Constantine. Alt. 4200–4580 ft.

Tafsah, site, Palestine, probably the *Tiphsah* of 2 Kings xv. 16, 32° 10′ N., 35° 10′ E., 6 m. SW. by W. Nablus.

Taft, tn., Persia, prov. Irak-Ajemi, 13 m. SW. Yezd; noted for fine felt carpets; lapis-lazuli is found in the vicinity. P. 5000.

Taftville, vil., U.S., Connecticut, New London co., 3 m. NNE. East Norwich; has large cotton-mills. P. <1500.

Tafuna's, vil., near the S. end of Lake Tanganyika, in Ger. E. Africa, in 8° 29′ S.

Tagal, cap. of T. residency, N. ct. of Java I., in 6° 51′ S., 109° 8′ E.; good port. P. 16,000.

Tagal, important tribe of the Spanish Philippines, inhabiting Luzon I.; the language of this tribe is gradually spreading. P. 1,500,000.

Tagancha, tn., Russia, govt. and 66 m. SE. Kiev; sugar-works, woollen cloth-mills. P. <5000.

Taganrog, tn. and seapt., Russia, at the head of a bay of Sea of Azov, 75 m. long and 28 m. wide, formed by two sandy penins. which approach each other for 15 m., the bay receiving the Don, Kalmius, Mius, and Yeya Rivs.; situated, 47° 12′ 21″ N., 38° 56′ 31″ E., on a promontory near to the site of the old Italian colony *Portus Pisanus,* and later on the Turkish town *Azov;* taken by Peter I. in 1698; finally annexed to Russia in 1796. Owing to the proximity of the fertile wheat-lands of S. Russia, it is one of the chief ports of the empire. Well built, with a good quay. Roadstead too shallow for large ships, which stop at a distance of 8 to 13 m., the W. and E. winds modifying the depth of water. Connected by railways with Rostov, on the Moscow-Ryazañ-Voronezh Rly. (45 m.), which is the head of the N. Caucasian Rlys., and with Yasinovataya junction, whence railways radiate W. and NW. Tobacco and Italian paste factories; tanneries; fishing. Brisk export trade, the port being visited by about 1000 vessels, over 300,000 tons, and the value of exports exceeding £5,000,000. Imports vary from £500,000 to £1,000,000. T., with surrounding villages (Nikolaevka, Troitskoye, Pokrovskoye), forms a township under a separate governor. Alexander I. died here. Mean temp., yr. 48° F., Jan. 20.6°, July 73.0°. P. (1870) 38,036; (1891) 47,310.

Tagant, region of W. Sahara, in 18°–20° N., 10°–12° W.

Tagarigua, large coast lake, Venezuela, 68 m. ESE. Caracas.

Tagbilaran, tn., Philippine Is., SW. ct. Bohol I. P. 7600.

Tage, tn., Turkey in Asia, vilayet, sanjak, and 40 m. S. by W. Van. P. 2400; Christians, 1500; Moham. 900.

Taggia, tn., Italy, Liguria, prov. Porto Maurizio, on the Argentina, 5 m. NE. by E. San Remo. P. <5000.

Tagh, Turkish, 'mountain.' See **Dagh.**

Taghadoe, par., Irc., NE. co. Kildare, bar. N. Salt, 2 m. S. by W. Maynooth; 4133 ac. P. <250.

Taghanic, mt. range, U.S., Massachusetts. See **Taconic.**

Tagharma, peak in the Kashgar Mts., in 38° 20′ N., 75° 16′ E., S. of the Little Kara-kul Lake, sometimes confounded with the Mustagh-ata, but, according to Captain Younghusband, about 20 m. SW. of the latter peak. Gives origin to many large glaciers, of which Prjevalsky's is best known. Alt. about 25,800 ft. See *Proc. R. G. S.,* 1892, p. 230.

Tagharot, pass. See **Tizi Tagherat.**

Taghart, electoral div., Ire., co. Cavan, dist. Shercock.

Taghboy, par., Ire., cos. Galway and Roscommon, bars. Killian and N. Athlone, on riv. Suck, 12 m. N. Ballinasloe; 13,996 ac. P. <2000.

Taghdumbash ('supreme head of mountains'), one of the Pamirs, central Asia, Pamir, S. of Sarikol, N. of the Mustagh or Karakorum Range, which separates it from the Hunza-Nagar valley, in 36½°–37° 40′ N., 74½°–75° 40′ E.; in its upper part forks into two branches, one rising S. the other SW. Alt. 10,300 to 15,500 ft.; inhabited by Kirghiz and Sarikolis.

Taghees, par., Ire., co. Mayo, bar. Clanmorris, 3 m. W. Claremorris; 6837 ac. P. <1500.

Taghit, vil., Africa, Algeria, prov. and 82 m. SSW. Constantine; has rich lead and mercury mines.

Taghmaconnell, par., Ire., SW. co. Roscommon, bar. S. Athlone, 7½ m. WSW. Athlone, P.O. (**Taughmaconnell**); 18,827 ac. P. <2500.

Taghmon, par., Ire., NE. co. Westmeath, bar. Corkaree, 6½ m. NNE. Mullingar. P. <500.

Taghmon, par. and tn., Ire., S. co. and 8 m. W. Wexford, bars. Bargy and W. Shelmaliere, PMT.O.; 10,125 ac. P. <2000; tn. P. <750.

Taghsheenod, par., Ire., SE. co. and 8½ m. SSE. Longford, bars. Moydow and Shrule; 5711 ac. P. <1000.

Taghshinny, par., Ire., SE. co. and 10 m. SSE. Longford, bars. Rathcline and Shrule, P.O. (**Tashinny**); 4884 ac. P. <1000.

Tagilskiy Zavod, Upper, or **Tagil,** iron-works and gold-washings, Russia, govt. Perm, 63 m. N. Ekaterinburg, on Tagil R. P. <5000. **Tagilskiy Zavod, Lower.** See **Nizhnetagilsk.**

Tagliacozzo, tn., Italy, Abruzzi e Molise, prov. Aquila, 24 m. E. by N. Tivoli. Near it, in 1268, Charles of Anjou defeated Conradin, and overthrew the Hohenstaufen dynasty in Italy. P. 8600.

Tagliamento, riv., Italy, Venetia, rises in the Alps (Monte Cridola), and flows E. then S. into the head of the Adriatic. Length, 106 m.; area of basin, 1000 sq. m.; mean discharge 2800 cubic ft. per second, highest discharge 53,000 cubic ft. per second.

Taglio di Po, vil., Italy, Venetia, prov. Rovigo, 6 m. NNE. Ariano. P. (comm.) <5000.

Tago, Rio, riv., Luzon I. See **Grande, Cagayan.**

Tagoat, P.O., Ire., SE. co. and 7 m. SSE. Wexford, bar. Forth.

Tagodast, tn., Africa, Morocco, on W. border of Mount Atlas, 98 m. NE. Morocco. P. 7000.

Tagolanda, small isl. of Malay Archipelago, about 50 m. from NE. extremity of Celebes.

Tagolo, Punta, cape, N. ct. Mindanao I., Philippine Is., in 123° 23′ E.

Tagomago, islet, Spain, Balearic group, immediately E. of Iviza I.

Tagremaret, Arab vil., Africa, Algeria, prov. and 87 m. ESE. Oran; a projected colony. P. <2000.

Tagrirt, tn., Africa, Moroccan Sahara, on l. bk. of the upper Wad Gur; has palm-trees. P. (Berbers) <2000.

Taguaralzinho, vil., Brazil, Matto Grosso, on l. bk. of the Tapajoz, in 9° S., 430 m. SSE. Manaos.

Tagudin, tn., Philippine Is., Luzon I., 150 m. NNW. Manila. P. 13,800.

Taguig, tn., Philippine Is., Luzon I., on Bay Lake, 8 m. SE. Manila; active fisheries. P. 9900.

Tagulus, oasis, Africa, S. Tunis, 10 m. E. Tozer, on N. shore of the Shot el Jerid; renowned for the excellence of its fruits. P. 5800.

Tagula, isl., Pacific. See **Louisiade Archipelago.**

Tagus, Spanish **Tajo,** Portuguese **Tejo,** principal river of the Iberian Penin., through the centre of which it flows from E. to W., between the basins of the Ebro and Douro on the N., and the Guadiana on the S. It rises in the Sierra Albarracin, on the borders of Aragon and New Castille, in 40° 38′ N., 1° 35′ W., at an alt. of about 5720 ft.; it flows WSW. in Spain, through New Castille and Estremadura, and in Portugal between the provs. Beira and Alemtejo, and through Estremadura to the Atlantic, which it enters at Belem, 2 m. below Lisbon. Chief affluents, r. bk., Guadiela, Jarama, Alberche, Alagon, and Zezere; l. bk., Almonte, Sever, Sorraia, and Solor. In its upper course the river flows through defiles between pine-clad mountains, and then across the central plateau, with steep descent, forming, especially in the higher parts, numerous waterfalls and rapids, passing Aranjuez, Toledo, and Talavera. In Estremadura its course again lies through narrow gorges, sometimes not more than 50 or 60 ft. in breadth. After passing Alcantara, and finally entering Portuguese terr., it gradually flows more quietly. Above Lisbon it widens into a lake-like expansion, 20 m. in length, and 3 to 8 m. in width, narrowing again to about 2 m. opposite that city. Its uses for commerce are at present much restricted, navigation being mainly confined to the part below the confluence of the Zezere, though it is classed as navigable to Alcantara. Length, 566 m.; area of basin, 31,864 sq. m. (Strelbitsky).

Tah, Chinese, 'pagoda.' See *Ta.*

Tahaa, isl., Pacific, Society group, in 16° 35′ S., 151½° W.

Taha-el-Marg, tn., Lower Egypt, prov. Dakahlie, 50 m. N. by E. Cairo. P. <4000.

Tahan, Gunong, mt., Malay Penin., Pahang, in about 4° 0′ N., 102° 20′ E. Alt. estimated by report at about 12,000 ft.

Tahania, or **Chichagof,** isls., Pacific, Tuamotu group, crossed in extreme W. by 145° W., in about 16½° S.

Taha-Nub, vil., Lower Egypt, prov. Kalyubie (the prov. in upper angle of delta). P. <5000.

Tahara, post-tn., Victoria, Normanby co., 45 m. N. by W. Portland. P. <1500.

Tahatee, lake, Canada, Brit. Columbia, crossed by 52° 15′ N., drained N. to Black Road R. (r. bk. trib. of Fraser).

Tahia-ho, or **Tasia-ho,** riv., China, prov. Kansu, flows NE. into the Hwang-ho 47 m. above Lanchou-fu. Length, 137 m.

Tahichipi (or **Tehachapi**) **Pass,** U.S., at one end of Sierra Nevada, traversed by S. Pacific Rly. Alt. 3832 ft. (Gannett).

Tahilla, tnld., Ire., S. ct. co. Kerry, bar. S. Dunkerron, on the N. side of Kenmare R., 11 m. W. by S. Kenmare, P.O. P. <250.

Tahiri, small vil., Persia, Laristan, on Persian Gulf, 120 m.

SE. Bushire, in 27° 40′ N., 52° 21′ E., inhabited chiefly by pearl-fishers. Close by are the ruins of *Siraf*, a mercantile city of wealth and importance in the Middle Ages down to about the middle of the 11th century.

Tahiti, or **Taiti,** called by Cook, its discoverer (1774), **Otaheite** (the first syllable meaning 'it is,' the whole name being the answer to Cook's question, 'What is the name of the island?'), isl., Pacific, the most important of the Society group, in 17° 29′–52′ S., 149° 7′–38′ W. It is about one-third larger than the isl. of Anglesey, and consists of two somewhat oval-shaped volcanic penins. connected by an isthmus, submerged at high water, and the whole surrounded by coral reefs, the smaller penin., distinguished by the name of Taiarabu, comprising less than one-fourth of the whole area. Circumference 164 m., of which 119 m. belongs to the main penin., which contains near the middle the culminating point of the whole island, Mount Orohena, 7340 ft. The island contains other rugged high lands, with many fertile valleys, and a belt of rich land along the coast, on which are numerous small harbours. The total cultivable area is estimated to form one-third of the whole. The natives have mostly been converted to Christianity by Protestant missionaries. Principal town and port, Papiti (NW. ct.), frequently known even to the French under the English spelling of Papeete. Sugar-cane, cotton, coffee (said to be specially well suited to the island), maize, tobacco, fruits, and vegetables are cultivated in small quantities; bread-fruit, yams, plantains, arrowroot, vanilla, coco-nuts, oranges (introduced by Cook), and limes grow spontaneously. Besides natural and plantation vegetable products, wax, wool, bêche-de-mer (trepang), and pearl-shell are exported. Oxen and hogs are reared, and horses are numerous. Tahiti was taken under the protection of the French in 1842, and was formally annexed, along with the neighbouring isl. of Moorea or Eimeo, to the NW., in 1880. Mean temp. (5 yrs., 1855–60), yr. 77.3° F., Feb. 79.1°, Aug. 74.5°. Area, 400 sq. m. P. estimated by Cook at 150–200,000, an estimate probably much too large, though it is certain that the population has since his time greatly declined through epidemics and other causes. It is now about 9000; including Moorea, 10,000, of whom about 1500 are Europeans.

Tahlequah, vil., U.S., Indian Terr., cap. of Cherokee Nation; has two good schools, and various public buildings. P. <1500.

Ta-ho, or **Foa-kiang,** riv., China, prov. Süchwan, flows SE. into the Kia-ling near Ho-chou. Length about 300 m.

Tahoe, lake, U.S., California and Nevada states, intersected by 120° W. and 39° N., surrounded by high peaks. It is drained N. by the Truckee into Pyramid Lake. Alt. 6247 ft. (R.R.). Length, 20 m.; width, 10 m.

Tahshish, settlement, Canada, prov. Brit. Columbia, Vancouver I., 211 m. NW by W Victoria.

Tahsoo Harbour, inlet, Canada, Brit. Columbia, on the W. ct. of Moresby I.

Tahta, Upper Egypt. See **Takhta.**

Tahtajl, sect, Anatolia, prov. Adana; workers in wood, of whose rites, worship, and beliefs very little is known.

Ta-hu, or **Tai-hu** ('large lake'), lake, E. China, provs. Kiangsu and Chekiang, 57 m. W. Shanghai, of almost circular form, filling up an old depression; situated in a charming country; it contains a large number of islands and islets, and has numerous villages on its shores. Length, 44 m.; breadth, 34 m.

Tahuamanu, Datimanu ('turtle river'), or **Orton,** riv., Peru, winds tortuously through low plains, flowing ENE., and joins the Beni below the mouth of the Madre de Dios, in 12° 48′ S.; not fully explored. Length about 400 m.

Tahuata, or **Santa Cristina,** isl., Pacific, Marquesas group, in about 139° 5′ W., crossed in the S. by 10° S.

Tai, Chinese, 'a tower or terrace.'

Tai, large Arab tribe of the Kahtanide family, emigrants from Yemen, forming the chief population of Jebel-Shomer.

Tai, states, SE. Asia. See **Laos.**

Taiara, or **King,** isl., Pacific, Tuamotu group, in about 144½° W., 15½° S.

Taibach, vil., Wales, Glamorganshire, 6 m. S. by E. Neath, belonging to the Swansea dist. of parl. bors., close to Port Talbot stn. See **Margam.**

Taibetism, large oasis, central Arabia, Shomer, 45 m. ENE. Hail.

Tai-chou, bay, E. ct. China, prov. Chekiang, entered by river of same name; has good anchorage.

Tai-chou, tn., China, prov. Chekiang, 70 m. SSW. Ningpo; has trade in tea and salt.

Tai-chou, tn., China, prov. Kiangsu, 65 m. ENE. Nanking.

Tai-chou, tn., China, prov. Shansi, 190 m. WSW. Peking.

Taidong, or **Teitong,** riv., Korea, flows SW. past Phyöngyang (*q.v.*), and enters Korea Bay by a wide estuary, in 39° 15′ N.

Taieri, co., New Zealand, South I., between 45° and 46° S., and crossed by 170° E.

Taïf (E'Taïf). See **Tayif.**

Taiglum, vil., Scot., S. Ayrshire, 7 m. ESE. Ayr, close to Drongan stn. P. <500.

Taihohsien, tn., China. See **Tai-fu.**

Tai-hu, lake, China. See **Ta-hu.**

Taik-gyi, or **Taik-kyi,** vil., Burma, dist. Hanthawadi, 36 m. W. Pegu, 41 m. by rail from Rangoon. P. <5000.

Taila, co., New South Wales, bounded on the SE. by the Murray R., and crossed in extreme W. by 142° E.

Tailao, isl., S. ct. of China, in the entrance of Macao roadstead.

Taillat, Cap, cape, France, dep. Var, on the S. ct., 19 m. S. by W. Frejus.

Taillebourg, tn., France, dep. Charente-Inférieure, arr. St. Jean-d'Angély, on r. bk. of Charente, 4 m. SSE. St. Savinien; scene of the victory gained by the French over Henry III. of England in 1242.

Taimoro, Moham. tribe, SE. ct. Madagascar, occupying the shore of Masindrano to Faranfagana.

Taimyr, large penin., Russia, Arctic Ocean, eastern Siberia, govt. Yeniseisk; protrudes in two parts as far as 77° 30′ N. (**Cape Syevero-Vostochnyi**), between the Gulfs of Taimyr and Khatanga; covered in middle by Byrranga Mts., 1000 ft. high. The **Taimyr Bay** receives the **Taimyr R.,** which rises in 73° N., flows through large **Lake Taimyr,** and enters Taimyr Bay under 75° 35′ N.

Tain, tn., France, dep. Drôme, arr. Valence, on the l. bk. of the Rhone, opposite Tournon, 33 m. S. Vienne. P. <3000.

Tain, royal and parl. burgh and par., Scot., in the NE. of Ross-shire, on the S. shore of Dornoch Firth, 4½ m. S. by W. Dornoch, on the H. R.; has the collegiate church of St. Duthus, founded 1360, restored 1871–76. Par. 16,668 ac., P. <3000; royal burgh, P. <2500; parl. burgh, P. <2000. See **Wick.**

Tainan-fu, formerly **Taiwan-fu,** treaty-port (since 1858), Formosa I., W. ct., in 22° 59′ N.; its harbour, at Anping, to the NW., has a bar with only 6 ft. of water at high water ordinary springs, but there is good anchorage, though not safe in the SW. monsoon, in 5½ fathoms outside. P. 50–60,000. See **Takow.**

Tainaron, cape, Greece. See **Matapan.**

Taingan-fu, tn., China, prov. Shantung, 200 m. S. Tientsin, 36 m. SE. by S. Tsinan; at the foot of the Tashan, a sacred mountain much resorted to by pilgrims. A great ladder leads from the town to the summit. P. 45,000 (Markham).

Taininh, tn., Lower Cochin-China, 55 m. NW. Saigon.

Tai Noi, states, SE. Asia. See **Laos.**

Taintignies, comm., Belgium, prov. Hainaut, arr. Tournai. P. 3000.

Taipas, Caldas de, place with hot mineral springs, Portugal, prov. Minho, 26 m. NE. Oporto, 6 m. SE. Braga.

Taipei-fu, or **Thaipe-fu,** chief tn. in the N. of isl. of Formosa, 25° 4′ N., a little to the E. of Twatutia [**Tamsui,** riv.]; tea, rice, and jute grown near.

Taipeng, Taiping, Thaipeng, or **Thaiping,** tn., Malay Penin., cap. Perak, 13 m. WNW. Kwala-Kangsa, a few miles from W. ct., in about 4° 48′ N.; connected by railway with Port Weld. Residence of a British agent.

Taipe-shan, mt. chain, China, prov. Shansi, between the town of Soping and the Hwang-ho.

Taiping, tn., China, prov. Kwangsi, on the l. bk. of the Tso-kiang, in 22° 19′ N., 107° 19′ E. (*Proc. R. G. S.*, 1891, p. 254.)

Taiping, tn., China, prov. Kwangtung, on Canton R., 37 m. SE. Canton.

Taiping, tn., China, prov. Shansi, 24 m. SW. Pingyang-fu; anthracite coal is worked in the vicinity.

Taiping-fu, tn., China, on r. bk. of Yangtse-kiang, prov. Nganhwei, 37 m. SSW. Nanking.

Taipung, tn., China, prov. Kwangtung, on the E. ct., 30 m. NE. Victoria.

Tair, volcanic islet, Red Sea, 47 m. WNW. Kamaran I., in 15° 38′ N.; the only active Arabian volcano.

Tairua, post-tn., New Zealand, North I., Thames co., 60 m. E. by S. Auckland. P. <1500.

Taishaki, riv., China, prov. Fokien, r. bk. trib. of the Niautung-kiang; the lower valley of this river belongs to the large black tea region of Fokien.

Taiskirchen, comm., Upper Austria, 42 m. WNW. Steyr, 33 m. W. Linz. P. <3000.

Taisnières, vil., France, dep. Nord, arr. Avesnes, 14 m. E. by S. Valenciennes. P. <2000.

Taita, less properly **Teita,** group of isolated mts., or highland areas, rising somewhat abruptly from the Nyika or desert plains of Brit. E. Africa, between 3° 10′ and 3° 50′ S., and 38° and 38° 40′ E. **Taita ya Bura,** alt. 7200 ft., in 3° 25′ 2″ S., 38° 17′ 42″ E. (*Geog. Jour.*, iv. p. 436), inhabited by the Wataita. Only three of these areas, Bura, Ndara, and Kadiaro, have sufficient water to maintain a tolerably dense population. Other mountains are Ndi, Mlaleni, and Maungu.

Taiti, isl., Pacific. See **Tahiti.**

Taitok, tribe, Sahara, the most powerful of the confederation of the W. Tuaregs.

Taitse-ho, riv., China, prov. Liautung, trib. of the Liao-ho by the Hun-ho. Length, 155 m.

Taiwan, Chinese name of **Formosa Island.**

Taiwan-fu, inland tn., Formosa, 82 m. NNE. Tainan-fu (*q.v.*).

Tai Yai, states, SE. Asia. See **Laos.**

Taiya Inlet. See **Lynn Canal.**

Taiyang-chou, highest mt. group of the mountainous region stretching between the Kinsha-kiang and the Kien-kiang, trib. of the Yalung, China. Alt. 19,500 ft.

Taiyuen-fu, walled city, China, cap. prov. Shansi, on the main road leading from central China northwards to Tatung, Kalgan, and Kweihuacheng; government arsenal, powder-mills, and cannon-foundry. P. 50,000. *Jour. R. G. S.*, 1877, p. 173; *Proc. R. G. S.*, 1890, p. 60.

Taïz, or **Taas,** fortified tn., Arabia, Yemen, 55 m. ENE. Mokha, on a spur of the mountains overlooking the southern plains.

Taizerbo, oasis, Africa, the most N. of the Kufra group, Libyan desert.

Tajado, cape, Haiti. See **Punta Sabaneta.**

Tajett-ernt, frequented wells, Africa, Sahara, 215 m. SW. Ghat (Rhat), on the route to Air.

Tajik, name given to the Iranians of E. Persia, N. Afghanistan, and Russian Turkistan.

Tajima, kuni or old prov., Japan, now included in Hyogo ken.

Tajo, riv. See **Tagus.**

Tajuña, riv., Spain, New Castille, flows SW. to the Jarama, which it joins about 20 m. SSE. Madrid.

Tajurra, tn., E. ct. Africa, in French colony of Obok, on N. shore of the Gulf of T., 31 m. WSW. Obok, in 11° 47′ N.; the roadstead is exposed. The inhabitants, of the Afar or Dankali race, trade with Ankober (Shoa) and Harrar. P. <2000.

Taka, isl., Pacific, Marshall Archipelago, Ratak group.

Takachiho, the most southerly cone of the volcanic group of Kirishima, Kiushiu, Japan, culminating point of the island. Alt. 5480 ft.

Takaka, post-tn., New Zealand, South I., Collingwood co., 34 m. NW. Nelson. P. 1500.

Takalik, mt. pass, China, East Turkistan, Tian Shan system, in about 42° 20′ N., 83° 40′ E., 47 m. N. Kucha.

Takamatsu, maritime tn., Japan, Shikoku, 68 m. WSW. Kobe. P. (1890) 34,600.

Takaoka, tn., Japan, 148 m. NE. by N. Kyoto; cotton and silk goods are manufactured in the environs. P. (1887) 19,900.

Takapau, post-tn., New Zealand, North I., Waipawa co., 50 m. SW. Napier. P. <1500.

Takari, E. chain of the Brahui or Hala Mts., Baluchistan, running N. to S. from Bolan Pass to Mula Pass, actually the slightly elevated margin of the Khelát plateau. Alt. 7000 ft.

Takasaki, tn., Japan, 62 m. NW. Tokyo; has cotton manufactures and sericulture. P. (1887) 18,800.

Takase, maritime vil., Japan, Kiushiu, 48 m. E. by N. Nagasaki. P. <3000.

Takashima, islet, near W. ct. of Kiushiu, Japan, 10 m. W. of the entrance to the roadstead of Nagasaki; has very important coal beds, which in 1888 produced over 350,000 tons.

Takata, tn., Japan, 64 m. SSW. Niigata; one of the chief industrial centres of the W.; manufactures cotton. P. (1886) 24,500.

Takatu, range of mts., Brit. Afghanistan, stretching NNE. from the Shalkot valley to the S. of 30½° N., and E. of 67° E. See map, *Proc. R. G. S.*, 1880, p. 272.

Takayama, tn., Japan, 94 m. ENE. Kyoto. P. (1887) 13,600.

Takazze, or **Setit,** r. bk. affluent of Atbara (Nile basin), rises in the Abwia-Meder Mts., Abyssinia, E. of Lake Tana, and describes a circuitous course mainly N. and NW. to its junction with the Atbara. In its upper course it flows through deep gorges, and separates the provs. of Goudar and Tigre; in its lower course through the plain it is called the Setit. Length about 500 m.

Takdemt, tn., Algeria, prov. and 107 m. ESE. Oran, arr. Mostaganem; has Roman remains. It was founded about 671, and became an important town, destroyed in the beginning of the 13th century, and again by the French in 1841.

Takebrit, the ancient *Siga*, ruined site, Algeria, 54 m. WSW. Oran.

Takefu, tn., Japan, 68 m. NNE. Kyoto. P. (1887) 12,000.

Takeley, par., Eng., Essex, Epping div., 10½ m. S. Saffron Walden, on the G. E. R., PMT. O. P. <1000.

Takhi, or **Ngeu-kiang, riv.,** China, S. Chekiang, flows on the whole E., and at Wenchou, in 28° N., forms an estuary; about 150 m. long.

Takhino-göl, Lake, lake, European Turkey, Macedonia, 5 m. S. Seres, and N. the Gulf of Rendina (Orfoni), receives the riv. Angista, and is traversed throughout by the Struma, ancient *Strymon*. Shores abrupt, except in the N. Length, 15 m.; greatest breadth, 5 m.

Takhla Makan, desert, Chinese Empire, E. Turkistan, bounded W. by the valley of Yarkand-daria, N. by Tarim valley, E. by the lower Tarim and Lake Lobnor, S. by the oases stretching to the base of the mountains bordering the great plateau of Tibet.

Takhta, or **Tahta,** tn., Upper Egypt, prov. Girge (between provs. Keneh and Siut). P. (1882) 13,800.

Takhta Bazar, vil., Russian Transcaspian Terr., on the Murghab, 13 m. NW. by W. Maruchak.

Takhtakorum ('the throne of stone'), the most W. chain of the Kuenlun Mts., which it connects with the Muztagh-ata group. Alt. estimated at from 14,700 to 15,700 ft.

Takhtalu, mt., Armenia, belonging to the Sinek chain; marked on Russian maps as Perlidagh.

Takhtalu, or **Takhtalydagh,** the ancient *Solyma*, mt., Lycia, Taurus Mts., 31 m. SSW. Adalia, 4 m. W. of Gulf Adalia. Alt. 7810 ft.

Takht-i-Jamshid, Persia. See *Persepolis*.

Takht-i-Sulaimán ('Solomon's throne'), mt., with two separate summits, Brit. Baluchistan, the highest mountain of the Suláiman Range, 140 m. NW. Múltán, thickly covered with pines; the higher peak is called locally 'Abashta chuka,' or sometimes 'Kaisargarh.' Alt. 11,317 ft.; the lower peak, 11,076 ft.

Takht-i-Suláimán, mt. peak, Kashmír (*q.v.*).

Takht-i-Sulaiman, mt., Persia, in the Elburz Range, 35 m. N. by E. Kazvin. Alt. 14,400 ft.

Ta-kiang ('great river'), Chinese name of the Yangtse-kiang.

Ta-kiang, riv., China, rises in Yünnan and traverses the prov. Kwangsi in the centre from W. to E., enters the prov. Kwangtung, and a little above Canton joins the Pe-kiang to form the Canton R. It receives several large affluents. Length about 950 m.

Takilunt, vil., Algeria, 28 m. SE. by S. Bougie.

Takla-khar, large Tibetan town in Hundes (SW. Tibet), in about 30° 18′ N., 81° 10′ E.; carries on a trade with India across the Lipu-lek pass.

Takmak, tn., Turkey in Asia, vilayet Smyrna, sanjak Sarukhan, 32 m. E. by N. Alashehr. P. 4000; Moham. 3900.

Takow (sub-port of **Tainan-fu**), treaty-port, in the S. of Formosa I., on the W. ct., in 22° 36′ N., at the N. end of a long spit of land. The three acres of harbour have a depth of 12 ft. on bar ordinary springs, high water 14½ ft., low water 11½ ft. Outside the bar the anchorage (in 5½ fathoms) is good, but not safe during the SW. monsoons. In the vicinity are extensive plantations of sugar-cane.

Takrur, name applied by early Arab writers to certain recently converted negro populations in the W. Sudan, but given also to others in Bornu, Wadai, &c. At the present day the name is given to Mohammedan negroes on the Atbara and Blue Nile, who seem originally to have come from the W. on the pilgrimage to Mecca.

Taksadonisa, mt., Tibet, NW. of Lake Dangrayum, in about 86° 25′ E. Alt. 20,000 ft.

Taksun, tn. and fort, Eastern Turkistan, 33 m. SSW. Turfan, in a rich cotton-growing country.

Takt-i-Bostan, celebrated grottoes of Persian Kurdistan, near Kermanshah. The walls of the grottoes are covered with sculptures representing hunting-scenes, &c., some of which date from the 6th or 7th centuries, and are said to be finer than those of any other Persian monuments.

Taku, tn., China, prov. Pechili, on the E. ct., at the mouth of the Pei-ho, 27 m. ESE. Tientsin. There are 12 ft. of water on bar at spring tides, and 10 ft. at neaps. The forts were captured by the allied English and French in 1860. Mean temp., yr. 53.4° F., Jan. 23.4°, July 77.4°.

Taku-ho, riv., China, prov. Shantung, flows SSW. to Kiaochou Bay. Length more than 90 m.

Taku Inlet, fjord stretching 18 m. NE. from the N. end of Stephen's Passage, Alaska, its mouth in 58° 10′ N.; at its head a large glacier.

Takurea, or **Volkonsky,** isl., Pacific, in the E. of the Tuamotu group, in about 15° 45′ S., 142° 0′ W.

Takush, cape, Algeria, in 7° 23′ E., 24 m. WNW. Bona.

Takutu, riv., forming the boundary between Brit. Guiana and the Brazilian terr. of Amazonas, rises near 1° 30′ N., flows N. to its junction with the Mahu, which thenceforth takes its name, and then bends SW. and joins the Rio Branco at Fort San Joachim, in 3° 2′ N.; chief affluents the Mahu and Zuruma. Length estimated at 170 m.

Takuwa-pa, tn., Siam, Malay Penin., near the W. ct., in about 8° 51′ N.

Takuwa-tung, tn., Siam, Malay Penin., 15 m. from the W. ct., in about 8° 27′ N.

Takwa, tn., in the W. of Gold Coast Colony (Wawsaw dist.), W. Africa, near 2° W., 38 m. N. Dixcove; gold mined near since ancient times, now on a somewhat extensive scale.

Takwan, riv., China. See **Heng-kiang.**

Takwanting, tn., China, in the NE. of prov. Yünnan, 208 m. NNE. Yünnan-fu.

Tal, Welsh, 'headland,' 'promontory.'

Tala, tn. and stn., Argentine Republic, Entre Rios, 88 m. SE. by E. Paraná. P. <2000.

Tala, tn., Lower Egypt, prov. Menufiye, 10 m. NNW. Shibin-el-Kom. P. 9700.

Tala, vil., Uruguay, dep. Canelones, 46 m. NNE. Montevideo.

Talaat Musa, highest point of the northern part of the Anti-Libanus Range, Syria, in 34° 7′ N. Alt. 8720–8760 ft.

Talabo, Cape, Eastern Archipelago, in the E. of Celebes I., in about 0° 40′ S., 123° 30′ E.

Talachddû, par., Wales, Brecknockshire, 4 m. NE. by N. Brecknock. P. <250.

Talacre, seapt. vil., Wales, Flintshire, 8 m. NW. Holywell; has coal-mines and freestone quarries.

Talágang, municip., Brit. India, Punjab, dist. Jehlam, 60 m. SW. by S. Ráwal Pindi; manufactures cotton cloths, shoes worked with tinsel. P. <5000.

Talahat, tn., Upper Egypt, prov. Girge, dist. Tâta. P. <4000.

Talaings, tribe. See **Burma.**

Talamba, municip., Brit. India, Punjab, dist. and 50 m. ENE. Múltán. P. <5000.

Talamona, tn., Italy, Lombardy, prov. and 12 m. WSW. Sondrio. P. <3000.

Talamone, the ancient *Telamon*, seapt., on the W. ct. of Italy, Tuscany, prov. Grosseto, 45 m. NW. Civita Vecchia, 9 m. NNW. Orbetello; fortress in course of erection. P. <2000.

Talang, active volcano, Sumatra, 17 m. E. Padang. Alt. 8345 ft.

Talantē, N. part of the arm of the sea separating Eubœa from the mainland of Greece.

Talar, pass of the Andes, in 24° 55′ S., connecting the provs. of Antofagasta and Atacama in Chile with the Argentine prov. of Salta. Alt. 14,175 ft.

Talara, Punta, cape, NW. Peru, dep. Piura, in 4° 29′ S.; petroleum occurs in the dist. over an area of 1000 sq. m.

Talargoch Lead Mine, Wales, Flintshire, 3 m. NE. Rhuddlan.

Talas, tn., Asia Minor. See **Tallas.**

Talas, riv., Russian Turkistan, prov. Syr-daria; rises on snow-clad peaks of Alexandrovskiy Mts. (W. part of Tian Shan), from confluence of two streams, pierces to Cha-archa Mts., flows NW. past Aulie-ata, and enters brackish Lake Kara-kul before having reached the Chu R. Receives many l. bk. tribs., chief of which is Boroldai, utilised for irrigation. Length about 170 m.

Talas Mountains, Russian Turkistan, part of Tian Shan highlands, stretch WNW. to ESE., connect Nuratyn-tau with Chotkal Range. Talas R. at their NE. foot.

Talat ('well,' 'spring'), Berber name of numerous villages in Morocco.

Tal'at ed Dumm, site, Palestine, *Adummim* in the O. T., 31° 49′ N., 35° 21′ E., 8 m. ENE. Jerusalem.

Tal'at es Safa, site, Palestine, *Zophim* (Field of) in the O. T., 31° 45′ N., 35° 46′ E., 3½ m. SW. of the ancient Heshbon.

Talaton, par., Eng., Devonshire, Honiton div., 10 m. ENE. Exeter, 2 m. W. Sidmouth Junction, P.O. P. <500.

Talandière, La, tn., France, dep. Loire, arr. and 4 m. NNE. St. Étienne. P. <4000.

Talaut Islands, group of Dutch isls., Eastern Archipelago, SE. of Mindanao.

Talavera de la Reina, tn., Spain, prov. and 40 m. W. by N. Toledo, cap. dist. T., on the r. bk. of the Tagus; manufactures of silk (formerly more important) and earthenware. In the neighbourhood are abandoned gold-mines. Scene of a sanguinary battle in which the French under Joseph Bonaparte were defeated by the allied British and Spanish forces under Sir A. Wellesley, July 27, 1809. P. (comm.) 10,500.

Talaya, small riv., Russia, E. Siberia, govt. Irkutsk, enters SW. extremity of Lake Baikal; mines of lapis-lazuli.

Tálbehat, tn., Brit. India, NW. Provs., dist. Lalitpur, 90 m. S. by E. Gwalior. P. 5800; Hindus, 5400.

Talbenny, par., Wales, Pembrokeshire, on the S. of St. Bride Bay, 6 m. NW. Milford. P. <250. See **Walton, West.**

Talbot, co., Queensland, crossed by 25° S., and in the W. by 148° E.

Talbot, isl., U.S., Florida, off the coast of Nassau co., separated by Nassau Sound from Amelia I. Length, 10 m.; width, 2½ m.

Talbot, co., U.S., Georgia, S. of 33° S., and between 84° and 85° W.

Talbot, co., U.S., Maryland, bounded on the W. by Chesapeake Bay, S. of 39° N.

Talbot, formerly **Back Creek,** tp., Victoria, T. co., 42 m. SW. Sandhurst; has gold-mining. P. <1500.

Talbotstown, electoral div., Ire., Wicklow, dist. Kiltegan.

Talbotstown, Lower and **Upper,** two bars., Ire., in the NW. of co. Wicklow, Upper T. to the S. of Lower T.

Talbotton, tn., U.S., Georgia, Talbot co., 55 m. W. by S. Macon. P. <1500.

Talbot Village, vil., Eng., Dorsetshire. See **Kinson.**

Talbragar, tn., New South Wales. See **Denison Town.**

Talca, tn., Chile, cap. prov. and dep. T. The principal industry is the manufacture of woollen 'ponchos,' noted throughout the country for their durability and handsome colours. Alt. 344 ft. Mean temp. (2 yrs., 1871–72), yr. 56.5° F., Jan. 70.2°, July 43.3°. P. (1865) 17,900; (1885) 23,400.

Talcahuano, seapt., Chile, in 36° 42′ S., prov. and 10 m. by rail N. Concepcion (420 m. by rail from Santiago), at the root of a narrow penin. jutting N. and sheltering the port from the W. There are no docks. The port stands on a bay looking N., with two entrances divided by Quiriquina I. Vessels anchor near the shore in 4–6 fathoms, and load and discharge by lighters. A breakwater, a dock, and quays are now being constructed; the dock to be 594 ft. long, 120 ft. wide, and 82 ft. deep. Founded as a military post in 1780. Mean temp. (3 yrs., 1883–86), yr. 58.5° F., Jan. 67.1°, July 49.6°. P. (1885) 5000.

Talcottville, vil., U.S., Connecticut, Tolland co., 9 m. ENE. Hartford. P. <1500.

Talegáon, or **Talegáon Dashasahasra** (census), tn., Brit. India, Berar, dist. and 30 m. SE. Amráoti. P. (1891) 6400; Hindus, 5200.

Talence, tn., France, dep. Gironde, arr. and 3 m. SW. by S. Bordeaux; produces excellent wine; manufactures oil-cloth. P. 7600.

Tale (or **Tonle**) **Sap** (**Sab** or **Seb**), literally 'inland lake,' large lake in the NW. of Cambodia (*q.v.*), fed during the summer monsoon by a branch from the Mekong, which brings it to a length of 120 m. and a depth (in places) of 50 ft., and drained in the dry season SE. by the same arm to a length of 70 m. and a depth of 2–4 ft. Divided by narrows into two sections, the NW. called Caman Dai, the SE. Caman Tieu.

Talgareg, PM.O., Wales, 4 m. from Llanarth (Cardiganshire).

Talgarth, par. and market-tn., Wales, Brecknockshire, 8 m ENE. Brecknock, on the Cambrian and M. Rlys., PMT.O Market-day, F. 12,294 ac. P. <1500.

Talgram (census). See **Táligram.**

Talia, tn., Egypt, 8 m. SW. by S. Tanta. P. 9700.

Talia, post-tn., S. Australia, Robinson co., in 33° 19′ S., 134° 53′ E. P. <1500.

Taliabo, isl., Eastern Archipelago, one of the Sulu Is., to the E. of Celebes, just N. of 2° S., crossed by 125° E.

Taliaferro, co., U.S., Georgia, between 33° and 34° N., and touching in W. 83° W.

Taliang-shan, mts., SW. China. See **Lolos.**

Talienwan, or **Talienhwang,** bay, on E. side of the narrow isthmus connecting a minor penin. (on which stands Port Arthur) with the main penin. of Manchuria, between the Gulf of Liautung and the Yellow Sea. Free from ice all the year. Coalfield near its shores.

Taliesin, Tre-Taliesin, hamlet, Wales, Cardiganshire, 7½ m. NE. by N. Aberystwith, 3 m. E. by N. Borth stn. About 1½ m. from T. is Bedd T., said to be the true burial-place of the bard Taliesin (6th century). PM.O.

Tali-fu, or **Taiho-hsien,** tn., in the SW. of China, prov. Yünnan, on the W. side of Erh-hai Lake, in 25° 42′ N., 168 m. WNW. Yünnan-fu; the Carajan of Marco Polo. T. occupies an important strategic position, the plain on which it stands being reached by two narrow defiles between the lake and surrounding mountains, one N., the other S. of the town. It is the entrepôt of trade between Süchwan and Burma. The opium poppy is cultivated in the environs, and there are salt and other mines and marble quarries. P. (1877) 23,000 (Gill).

Talyllyn, par., Wales, Merionethshire, 5½ m. S. by W. Dolgelly, 2½ m. NE. Abergwynolwyn stn.; on a picturesque lake. P.O. 15,936 ac. P. <2000.

Tal-y-llyn Railway, short rly., Wales, in the SW. of Merionethshire, from Towyn to Abergwynolwyn.

Talysarn, PMT.O., Wales, Carnarvonshire, Eifion div., 6 m. S. by E. Carnarvon, 2 m. E. by N. Penygroes stn.

Talyshin Mountains, Russia, Transcaucasia, govt. Baku, border ridge of Iran plateau; reach over 8000 ft. (Kemur-kul, 8221 ft.), slope abruptly to Caspian, leaving but a very narrow ledge at the sea-shore.

Talyshins, Iranian stem, Russia, Transcaucasia, govt. Baku, dist. Lenkoraň. P. about 35,000.

Talywain, stn., Eng., Monmouthshire; coal is mined near. PMT.O. See **Abersychan.**

Tama, tn., U.S., Iowa, T. co., on Iowa R., 50 m. W. Cedar Rapids. P. <2000.

Tama, or **Teme,** tn., Upper Egypt, prov. Girge, in 26° 45′ N. P. (1882) 7900.

Tamagamingue, Lake, Canada, Ontario, crossed by 47° N., drained SE. to Lake Nipissing by the Sturgeon R.

Tama-gawa, riv., Japan, flows ESE. to Gulf of Tokyo, which it enters about 6 m. S. of the cap., forming a delta; it supplies water to Tokyo and Yokohama.

Tamagrut, oasis, Morocco. See **Tamgrut.**

Tamai, important wells, Nubia, on the route from Berber to Suakim, often disputed during the Sudan war.

Tamaki Strait, narrow sheet of water, New Zealand, connecting Auckland Harbour with the Firth of Thames, and separating Waiheke I. from the mainland.

Tamalameque, vil., Colombia, Magdalena, 170 m. SE. Cartagena; founded in the 16th century by Lorenzo Martin. P. (dist.) <2000.

Tamañ tn. and fort, Russia, N. Caucasia, govt. Kubañ, 92 m. W. Ekaterinodar, on a bay of Tamañ Penin., of Sea of Azov; naphtha wells close by. P. <5000.

Tamana, isl., Pacific, in the S. of the Gilbert group, in about 2½° S., 176° E.

Tamandua, tn., Brazil, Minas Geraes, 208 m. NW. Rio de Janeiro; formerly yielded alluvial gold, now exhausted; cotton is cultivated in the vicinity, and woven into coarse fabrics. P. 7000.

Tamao, port, China. See **Shangchwan.**

Tamaqua, bor., U.S., Pennsylvania, Schuylkill co., 44 m. SSW. Scranton, 13 m. NE. by E. Pottsville; has several manufactories, and extensive coal-mines. P. 6100.

Tamar, riv., Eng., Cornwall and Devon; rises in the extreme N. of Cornwall, and flows SSE., for the most part on the boundary between these two counties, into the English Channel, which it enters by a much-branched estuary called the Hamoaze [**Plymouth**], terminating in Plymouth Sound. Its lower course is navigable to the neighbourhood of Launceston, and the Bude and Launceston Canal, now in part abandoned, is for many miles parallel to its upper course. The canal connecting it with Tavistock is now used as an aqueduct. At its mouth it is crossed by the Albert Rly. viaduct. Length, 60 m.

Tamar, reef, Pacific, W. of the middle of New Caledonia, in about 21° 40′ S., 161° 40′ E.

Tamar, principal riv. of Tasmania, formed by the union of the N. and S. Esk at Launceston, whence it has a tortuous course of 30 m. N., and enters Bass Strait at Port Dalrymple, 4 m. from Georgetown, which is on its E. bank; its valley is narrow and wooded. It was discovered by Bass and Flinders in 1798.

Tamara, the largest of the Los Is., NW. Sierra Leone.

Tamarasseri, pass leading from Calicut to the Wainád and Mysore, Brit. India, Madras, Western Ghâts, in 11° 30′ N., and 76° 5′ E.

Tamarida, chief tn. of Sokotra I., middle of N. ct.

Tamarite de Litera, tn., Spain, Aragon, prov. and 48 m. ESE. Huesca, cap. dist. T.; salt is mined in the vicinity. P. (comm.) <4000.

Tamaron, coal-mining vil., U.S., Illinois, Perry co., 63 m. SE. by E. St. Louis (Mo.). P. <1500.

Tamarugal, Pampa del, plain, N. Chile, bordering the desert of Atacama on the S.; the immense prehistoric forest which covered it is now almost reduced to a fossil state. Thousands of tombs of the ancient inhabitants are found here, and also rocks covered with Indian hieroglyphics. On the W. or seaboard edge of the pampa are immense deposits of nitrate of soda (cubic nitre), now extensively worked by English companies; port, Iquique. Alt. 2950–3940 ft.

Tamashima, tn., Japan, 90 m. W. Kobe. P. 16,300.

Tamási, comm., Hungary, co. Tolna, dist. Dombovár. P. <5000.

Tamatam, isl., Pacific, near middle of Caroline group.

Tamatave, a French spelling, current, however, in Eng., properly **Tamatav,** maritime tn., E. ct. Madagascar, in about 18° 10′ S.; the roadstead is one of the few accessible points on the E. ct., and it is the chief port of the cap. of the island. P. about 7000.

Tamaulipas, one of the states of Mexico, on the NE. slopes of the E. Sierra Madre to lower Rio Grande del Norte and along the Gulf of Mexico as far as Tampico (*q.v.*), with extensive lagoons (De la Madre, Soto de la Marina, Morales). The principal rivers are San Fernando del Tigre, Purificacion, Tamesi, and Tampico. Cattle are reared on the N. desert part. See **Mexico,** table.

Tamaya, Rio, riv., E. Peru, r. bk. trib. of the Ucayali, which may become of importance as a means of communication owing to the probable proximity of its sources to those of the Jurua.

Tamba, kuni or old prov., Japan, now included in Kyoto-fu and Hyogo ken.

Tamba, vil., French W. Africa, in 11° 51′ N., 10° 32′ W.

Tambach, market-tn., Ger., duchy Saxe-Koburg-Gotha, circle Ohrdruf, 11½ m. SSW. Gotha. P. <3000.

Tambaroora, gold-mining tp., New South Wales, Wellington co., 30 m. N. by W. Bathurst. Including Hill End, about 3 m. distant, it was formerly one of the richest gold-reefing dists. in Australia; there are still several gold-mines. P. <1500.

Tambelan Islands, a group of numerous small isls., Eastern Archipelago, off the W. ct. of Borneo, N. of the equator.

Tamber Springs, post-tn., New South Wales, Pottinger co., 60 m. WSW. Tamworth. P. <1500.

Tambo, riv., Peru, Amazon basin, formed by the union of the Ene and Perene, flows E. then N., and unites with the Urobamba to form the Ucayali.

Tambo, vil., Peru, dep. Arequipa, 29 m. ESE. Islay, distributing centre for Arequipa, Islay, and Moquegua. P. (dist.) 5800.

Tambo, post-tn., Queensland, T. co., 285 m. WSW. Rockhampton; has an artesian well, 1000 ft. deep, capable of yielding 200,000 gallons per day. P. <1500.

Tambo, co., Victoria, on the SE. ct., crossed in the N. by 37° S.

Tambo, riv., Victoria, Australia, rises N. of Mount Leinster, in the Dividing Range, flows S. through a rugged country. It is very liable to floods, owing to the melting of the snows on the mountains. It falls into the lagoon called Lake King, after a course (exclusive of winding) of 76 m.

Tambobon, tn., Philippine Is., Luzon I., N. suburb of Manila. P. 21,800.

Tambora, mt., Eastern Archipelago, in the N. of Sumbawa I.

Tambourine, post-tn., Queensland, Ward co., in 27° 58′ S., 153° 5′ E. P. <1500.

Tambov, govt., central Russia; extends N. to S. between the basins of Oka and Don; has Vladimir and Nizhniy Novgorod on N., Penza and Saratov on E., Don Cossacks and Voronezh on S., Tula and Ryazañ on W.; an undulating and deeply cut plain, 450–800 ft. of alt., covered with fertile 'black earth' and boulder-clay, overlying Chalk and Jurassic deposits, from under which occasionally crop up Carboniferous and Devonian limestones. Iron ore; some seams of coal in deep ravines. Mineral waters at Lipetsk. Watered by Oka in NW. corner, and its navigable tribs., Moksha and Tsna, as also by Don, which touches the boundary in SE., and its tribs. Climate continental and dry. Average temp. at Tambov, yr. 42°, Jan. 13°, July 68°. Forests few, chiefly in N. Very fertile, black earth soil throughout, especially in the wide steepes of Borisoglyebsk in SE. Densely peopled. Population Great Russian throughout, with Mordvinians in W. and NW., and some 20,000 Tatars and 4000 Mescheryaks. Peasants mostly settled in large villages. Agriculture is chief occupation, wheat being largely exported, as also hempseed, linseed, and tobacco. Extensive cattle-breeding; good breeds of horses. Brisk commerce, especially in corn, horses, and cattle. Distilleries and flour-mills begin to extend. Divided into twelve dists.: Tambov, Borisoglyebsk, Elatma, Kirsanov, Kozlov, Lebedyañ, Lipetsk, Morshansk, Shatsk, Spassk, Temnikov, and Usmañ. Several villages: Raskazovo, Alabukhi, Sasovo, Izberdei, Arkhangelskoye, Ternovka, are important commercial centres. Alt. 388 ft. Mean temp., yr. 40.3° F., Jan. 10.5°, July 69.8°. Area, 25,710 sq. m. P. (1846) 1,649,690; (1872) 2,189,180; (1890) 2,850,800.

Tambov, cap. of above govt., 299 m. by rail SE. of Moscow (*viâ* Ryazañ and Kozlov), on Tsna R.; mostly built of wood; considerable trade in cereals. P. (1872) 25,340; (1891) 40,980.

Támbraparni, riv., Brit. India, Madras, dist. Tinnevelli, rising in Western Ghâts; of exceptional value for irrigation, as it flows across that part of India where the differences in the amount of the rainfall are most remarkable, in the mountains between 200 and 300 in., in the plains only 18 in. Seven of the eight dams which have been made across it are old works due to native rulers; only the last and lowest of the eight, that of Srivaikantham, has been added under British rule. Length, 80 m. Area irrigated with its feeders, 65,000 ac.

Tambre, or **Gordon Reef,** in Lau group, Fiji Is., SE. of Exploring Is., in 17° 40′ S., 178° 32′ W.

Tambre, small riv., in the NW. of Spain, prov. Corunna, flowing W. into the Atlantic (into the Ria de Muros e Noya).

Tambulam, vil., New South Wales, on Clarence R., 40 m. W. Casino, and 530 m. N. Sydney. P. <1500.

Tambura, La, mt., Italy, Tuscany, central Apennines. Alt. 6150 ft.

Tamda, vil., Algeria, prov. and 65 m. E. Algiers, arr. Tizi-Uzu; a recent colony employed in vine cultivation.

Tame, riv., Eng., Staffordshire and Warwickshire, rises near Walsall, flows E. and N., and joins the Trent 7 m. N. Tamworth. Affluents, Rea and Anker, from S. and W. It supplies water to the Birmingham and other canals. Length, 38 m.

Tamega, riv., Spain and Portugal, trib. of the Douro, which it enters on the r. bk. about 18 m. above Oporto.

Tamentit, the chief town of Tuat, Sahara, about 300 m. SSW. Golea, surrounded by a wall; a considerable centre of commerce. P. 8000.

Tamerna, oasis, Algeria, in the hollow of Wad-Rir, 27 m. NNW. Tuggurt; here the first artesian wells in the Sahara were bored in 1856.

Tamerton, North, par., Eng., Cornwall, div. and 7½ m. N. by W. Launceston, 5 m. W. by N. Ashwater, P.O.; 5302 ac. P. <500.

Tamerton Foliott, par., Eng., Devonshire, Tavistock div., 4½ m. N. Plymouth, on a branch of the estuary of the Tavy, 1½ m. N. St. Budeaux stn., PMT.O. (**Tamerton Foliot**); 4775 ac. P. <1500.

Tamesi, riv., Mexico, flows E. through states Zacatecas, San Luis Potosi, and Tamaulipas, and joins the Panuco at Tampico.

Tamesis, riv., Eng. See **Thames.**

Tamesmida, site of ruins, S. Tunis, 165 m. SW. Tunis; has remains of an important Roman military establishment.

Tamest, group of oases, Africa, Sahara, Tuat, about 19 m. SSW. Tamentit.

Tamgrut, or **Tamagrut,** oasis, in the W. of the Sahara, to the S. of Morocco, in about 30° 15′ N., 5° 30′ W.

Tamgwe, mt. chain, Africa, French Sudan, NE. of Futa Jallon.

Tamhorn, par., Eng., Staffordshire, Lichfield union, 2 m. NW. Tamworth. P. <250.

Tamiahua, Lake of, E. ct. Mexico, from Tuxpan to Tampico, which places are being united by a navigation canal in connection with the lagoon.

Tamie, small tn., Egypt, prov. Fayum, 15 m. NE. Medinet-el-Fayum, and on a canal 20 m. W. of the Nile.

Tamines, comm., Belgium, prov. and arr. Namur, on the Sambre, 4½ m. SE. Fleurus. P. <4000.

Taming, tn., China, in the S. of prov. Pechili, 215 m. SSW. Tientsin.

Tamins, Ger. **Tumein,** vil., Switzd., cant. Grisons, 6 m. W. by S. Chur, a little to the N. of the confluence of the Vorder- and Hinter-Rhein. P. <2000.

Tamiscamingue, or **Temiscamingue,** lake, Canada, Ontario, N. of 47° N., drained S. to the Ottawa R.

Tamise, comm., Belgium, prov. E. Flanders, arr. St. Nicolas, on the l. bk. of the Scheldt, 8 m. NE. by N. Dendermonde; manufactures include cotton and woollen fabrics, boat-building, and various industries. P. 10,900.

Tamjurt, mt., Morocco. See **Atlas.**

Tamkala, tn., western Sudan, in NW. of Gando, 30 m. E. by S. Say (on the Niger), in about 13° 0′ N., 2° 50′ E.

Tamlaght, tnld., Ire., co. Fermanagh, bar. Tirkennedy, 3 m. SE. Enniskillen, P.O. P. <250.

Tamlaght, par., Ire., cos. Londonderry and Tyrone, bars. Loughinsholin and Upper Dungannon, on riv. Ballinderry, 3 m. SE. Moneymore; 4954 ac. P. <2000.

Tamlaght-ard, par., Ire., co. Londonderry. See **Magilligan.**

Tamlaght-Finlagan, par., Ire., co. Londonderry, bar. Keenaght, on riv. Roe and Lough Foyle, 2 m. W. Limavady; 16,467 ac. P. <3500.

Tamlaght O'Crilly, par., Ire., E. co. Londonderry, bars. Coleraine and Loughinsholin, 18½ m. NNE. Cookstown, 2 m. from Upperlands stn., P.O.; 16,787 ac. P. 5400.

Tamlúk, tn., Brit. India, Bengal, dist. Midnapur, 33 m. SW. by W. Calcutta, on the r. bk. of the Rúpnáráyán; has a temple to the goddess Kálí; it was a famous city in ancient times. P. 6600; Hindus, 5700.

Tammerfors, tn., Finland, govt. Tavastehus, in 61° 30′ N., 23° 25′ E., on rapids connecting Lakes Näsiff and Pyha-järvi; has large cotton, linen, and paper mills, and other industries. Mean temp., yr. 38.7° F., Feb. 18.7°, July 62.8°. P. 22,200.

Tammún, vil., Palestine, 32° 17′ N., 35° 23′ E., 9 m. NE. by E. Nablus.

Tamnaherin, electoral div., Ire., Londonderry, dist. Eglinton.

Tamney, PMT.O., Ire., N. co. Donegal, bar. Kilmacrenan, 20 m. NW. Londonderry.

Tampa, city, U.S., Florida, cap. Hillsboro co., at the head of T. Bay, W. ct. of state, in 27° 57′ N., 82° 28′ W. The bay, the upper part of which forms the harbour of T., is the largest on the Gulf of Mexico, and affords excellent anchorage; at its entrance are many islands. Depth available from port to sea, summer 29 ft., winter 19½ ft. Length, 40 m.; mean breadth, about 15 m. The town has manufactures of cigars, and being connected by rail with Barton, is one of the places of export of the Florida phosphates. De Soto landed near T. in 1539. P. 5500.

Tampakwang, Buddhist cave, Indo-China, in the valley of the Nam-u, NE. of Luang Prabang.

Tampassne Point, cape on the E. ct. of Brit. N. Borneo, in 6° 4′ N., 117° 58′ E.

Tampico, maritime tn., Mexico, Tamaulipas, on the Gulf of Mexico and S. bank of the Panuco, in 22° 51′ N., 190 m. (270 m. by rail) E. San Luis Potosi; built on a low hill surrounded on three sides by water. Inside the bar a general depth of 25 ft., depth on bar 22½ ft. Good anchorage in any part of the river; loading and discharging by lighters. P. 8000. See **Tamiahua, Lake.**

Tamsui, treaty-port, Formosa. See **Tamsui,** riv.

Tamsui, riv., in the N. of the isl. of Formosa, formed by the union of the Kelung from the E., the Sanquai or Sintiam from the SE., and the Tokaham from the SW., forms an estuary entering the Fokien Channel in 25° 10′ N. At its mouth is the treaty-porty of T.; bar 5–6½ ft. deep at low water, 14½–15½ ft. at high water ordinary springs; vessels load and discharge by lighters; navigable at high water for junks and light-draught steamers to Twatutia, 10 m. up, the chief tea-mart of the island.

Tam Tinh, tn., French Indo-China, 48 m. W. Hue.

Támura, Korea. See **Quelpart.**

Tamworth, vil., Canada, Ontario, Addington co., 30 m. NW. Kingston, on a railway. P. <1500.

Tamworth, mun. bor. (since Queen Elizabeth), par., and market-tn., Eng., Staffordshire, T. div. (till 1890 partly in Warwickshire), 13 m. NE. Birmingham, in the diocese of Lichfield, at junction of the Tame and Anker, with a stn. on the L. & NW. R. and M. R.; manufactures of elastic webbing, tape, paper; some wool-stapling and dyeing; coal-mining. The castle, on a knoll 130 ft. high, replaces one famous in the Saxon times, a royal stronghold given by William I. to the Marmion family. The church dates from the 11th century. There are two large recreation grounds, 'The Moors.' Market-day, S. Mun. bor. P. 6600; parl. div. (in Warwickshire) P. (1891) 154,00; eccles. par. (**T. with Amington, Glascote, and Hopwas**) P. 10,700.

Tamworth, tp., New South Wales, Parry co., 155 m. SW. Grafton; various manufactures. The first town lighted by electricity in Australia; has gold and diamond fields near, the principal goldfields being at Bowling Alley Point, Nundle, and Hanging Rock, 20, 37, and 40 m. distant. P. <5000.

Tamworth, tn., U.S., New Hampshire, Carroll co., 20 m. NE. Meredith. P. <1500.

Tamworth Castle, par., Eng., Staffordshire and Warwickshire, 6½ m. SE. Lichfield. P. <500.

Tamyras, riv., Syria. See **Nahr-Kadi.**

Tan, or *Than,* Chinese, 'rapid.'

Tana, lake, Abyssinia. See **Tsana.**

Tana ('river' in the language of the Pokomo), riv., Brit. E. Africa. The source is not known, but, according to Gregory, it is probably formed to the S. of Mount Kenia by two head-streams, one, the Kiroruma or Kiloluma, rising on the W. side of Kenia itself, the other, the Thikathika (called Krapf and Peters Dika), probably issuing from the forests of Kikuyu. The river flows first E. then on the whole SSE. into the Indian Ocean, which it enters in 2° 38′ S.; navigable for stern-wheel steamers up to Hameye, in 0° 7′ S., 139° 9′ E. About 15 m. higher up occur the Hargazo Falls (20 ft.). As to the source, see *Geog. Jour.*, iv. pp. 505–9; navigation, *Proc. R. G. S.*, 1892, p. 513.

Tana, riv., Norway, Finmark, formed by the junction of two rivers, the Anarjokk and the Karasjokk, flows tortuously NE., through an almost desert country, into the T. Fjord, inlet of the Arctic Ocean; navigation very difficult. Length about 205 m.

T'ana, ruins, Palestine, *Taanath Shiloh* in the O. T., 32° 11′ N., 35° 22′ E., 7 m. ESE. Nablus.

Tana Fjord, fjord, Arctic Ocean, N. ct. Finmark, Norway, running NNE. and SSW., with high mountains on its shores. Total length about 30 m.

Tanaga, one of the Aleutian Is., N. Pacific Ocean, Andreanov group, W. Kanaga; surface mountainous. It contains an active volcano. Alt. 6975 ft.

Tanala ('people of the woods'), Malagasy tribe, Madagascar, inhabiting the belt of forests stretching E. from Betsileo and Bara, 124 m. to the S. of Antananarivo, partly subject to the Hovas, and partly independent; the chief lives on an almost inaccessible stronghold on Mount Ikongo.

Tanamera, dist., on N. ct. of Dutch New Guinea, E. of Geelvink Bay.

Tanan, tn., Lower Cochin-China, 28 m. WSW. Saigon, on the railway to Mitho.

Tananarivo. See **Antananarivo.**

Tanargue, mt. range, France, in SW. of dep. Ardèche, trending E. to W., between the Lignon, Baume, and Borne (tribs. of the Ardèche); summits exceed 4900 ft.

Tanaro, riv., Italy, rises in the S. Alps, near the Col de Tenda, flows N. and NE. past Garessio, Ceva, Alba, Asti, and Alessandria, 10 m. NE. of which city it joins the Po; navigable for barges to Asti. Principal affluents, the Stura, Pesio, Ellero, and Corsaglia from the W.; the Belbo and Bormida from the SE. Length, 171 m.; area of basin, 3083 sq. m.; mean discharge 4700 cubic ft. per second, highest discharge 60,000 cubic ft. per second.

Tanat, small riv., Wales, Montgomeryshire and Denbighshire, partly in the English county of Salop, flows E. to the Vyrnwy.

Tanauan, tn., Philippine Is., Luzon I., 3 or 4 m. from NE. shore of Bombon Lake. P. 20,300.

Tancanhulty, vil., Mexico, state of and 125 m. E. by S. San Luis Potosi. P. (comm.) 3000.

Tanchhön, or **Tanchen,** tn., Korea, 140 m. NE. by N. Wönsan, near the E. ct., in 40° 45′ N., with deposits of iron ore.

Tancook, Great and **Little,** two isls., Nova Scotia, in Mahone Bay, 45 m. SW. Halifax.

Tánda, municip., Brit. India, Oudh, dist. Faizábád, on the l. bk. of the Gogra, 86 m. N. by W. Benares; celebrated for its cotton goods. P. 19,700; Moham. 10,600; Hindus, 9200.

Tánda, municip., Brit. India, Punjab. See **Urmar.**

Tánda Bádridán, tn., India, native state of and 14 m. from Rampur, 50 m. NW. by N. Bareilly; centre of rice trade. P. 8800; Moham. 6600; Hindus, 2100.

Tanderagee, municip. and market-tn., Ire., NE. co. Armagh bar. Lower Orior, 5 m. S. by E. Portadown, 1½ m. W. Gilford stn., on the G. N. (Ire.) R.; manufactures linen; has brisk trade in flax. PMT.O. (**Tandragee**). Market-day, W. P. <1500.

Tandi, vil., Brit. India, Punjab, dist. Kangra, 104 m. N. by W. Simla.

Tandil, tn. and stn., Argentine Republic, prov. and 180 m. (233 m. by rail) SSW. Buenos Aires, in the midst of picturesque hills of blue granite, which furnish paving-stones for the cap. On one of these hills is a curious rocking-stone. Alt. 650 ft. Mean temp. (6 yrs., 1876–82), yr. 58.1° F., Jan. 70.2°, July 46.6°. P. 6000.

Tando Adam, or **Adam-jo-Tando,** tn., Brit. India, Bombay, dist. and 32 m. NE. Haidarábád. P. 5000; Hindus, 3300; Moham. 1700.

Tandora, co., New South Wales, bounded on the SE. by the Darling R., and crossed by 32° S.

Tandora, lake or marshy tract, Portuguese E. Africa, to the N. of 19° S., and W. of 35° E.

Tandridge, par., Eng., Surrey, div. and 8 m. E. Reigate, 1½ m. SW. Oxted stn., PM.O. P. <750.

Tandtjesberg, mt. range, Cape Colony, trending E. and W. between about 25° and 25½° E., in about 32° 20′ S.

Tandui, riv., Java, flowing E. then SE. into the Indian Ocean, which it enters to the W. of 109° E.

Tandurek, volcano, Armenian Alps, or Anti-Caucasus, 12 m. SW. Bayazid, the nucleus of diverging chains, retaining numerous traces of its former activity. Alt. 11,640–11,700 ft.

Tanega-shima, isl., Japan, S. Kiushiu. Length, N. to S., 25 m.; average breadth, 12 m.

Tanela, Tanera, or **Rio Darien,** short riv., Colombia, dep. Cauca, enters the Gulf of Uraba immediately W. of the Atrato delta. Its valley was at one time suggested as suitable for an inter-oceanic canal, communicating on the Pacific side with the Tuyra, but a subsequent survey has shown that the difficulties of the route are too great.

Tanentaonghi, great chain of mts., Indo-China, runs on the whole from NNE. to SSW., dividing the basin of the Salwín from the basins of the Mekong and Meping. Length, 930 m.

Tanera, or **Tanera More,** isl., Scot., Ross and Cromarty, Lochbroom par. P. 95.

Taney, par., Ire., co. and 4 m. S. Dublin, on riv. Dodder, bars. Dublin and Rathdown; 4570 ac. P. <5000.

Taney, co., U.S., Missouri, S. frontier, crossed by 93° W.

Taneytown, vil., U.S., Maryland, Carroll co. P. <1500.

Tanfield, par., Eng., Durham, NW. div., 6½ m. SW. by S. Newcastle, 2 m. SE. by S. Rowlands Gill stn., P.O., and PM.O. (**Tanfield Lea**); 6636 ac. P. 12,000.

Tanfield, East and **West,** two adjoining pars., Eng., Yorkshire, West T., N. Riding, Thirsk and Malton div., on the Ure, 5½ m. NNW. Ripon, with a stn. (**Tanfield**) on the NE. R.; the church contains effigies of the Marmions of the time of Edward III. PMT.O. P. <750; East T., P. <250.

Tang, P.O., Ire., near Mullingar, co. Westmeath, 3 m. from Ballymahon, 12 m. from Mullingar stn.

Tanga, bay and seapt., on the coast of E. Africa, Zanzibar terr., in 5° 6′ S.; a rising port of entry for German E. Africa; starting-point of a railway now being made into the interior. The German E. Africa mission has a station on Tanga I., in the bay. P. (tn.) 3–4000.

Tangail, tn., Brit. India, Bengal, dist. Maimansingh, 50 m. NW. Dacca. P. 18,000; Hindus, 12,200; Moham. 5800.

Tanganyika, Tanganika (according to Stanley probably meaning 'large lake,' from the Kijiji words *tanga*, 'lake,' and *nika*, 'plain'), **Kimana, Yemba, Msaga,** large fresh-water lake of equatorial Africa, situated between 3° and 9° S. lat., in the central and southern parts of the gigantic trough which runs W. of the Victoria Nyanza from N. to S. The T. is long, narrow, and of considerable depth (980 ft. in the S., more than 1300 ft. in the N. parts). The shores are characterised by a great number of small bays and gulfs: Burton Gulf (formed by the peculiar penin. of Ubwari), Cameron, Hore, Rhodes Bays. The lake is surrounded by high and picturesque mountains, mostly densely wooded. Numerous small rivers flow into the T. (Ruzizi, Malagarazi, Lofu), and on its W. side it has a peculiar outlet, the Lukuga, which at certain periods, when the level of the lake is high, connects the T. with the upper Congo, whilst at other times it is merely a creek with pools of water and full of papyrus. The countries surrounding the lake are densely peopled by various Bantu tribes. Principal places on the lake: Ujiji, Kavala, Mpala, Karema, Pambere, Niamkolo. The W. shore of the lake belongs to the Congo Free State, the S. to British Central Africa, and the E. to German E. Africa. Alt. 2670 ft. Area estimated at 14,000 sq. m. Length estimated at 400 m.; width varying from 10 to 45 m. The T. was discovered in 1858 by Burton and Speke, and first circumnavigated by Stanley in 1876. Mean temp. (2 yrs., 1880–82), yr. 76.6° F. See Stanley, *Through the Dark Continent*, vol. ii., 1878; Hore, *Lake Tanganyika, Proc. R. G. S.*, 1889, pp. 581–94. [**H. G. S.**]

Tangarava, tn., Peru, dep. Piura, 190 m. SSW. Guayaquil.

Tangasi, vil., equatorial Africa, in the Mangbattu country, in about 3° 15′ N., 28° 0′ E., the most S. establishment of the Nubian slave-dealers.

Tangaunku, or **Tanganyiko,** tn., E. ct. Africa, 25 m. NNE. Mombasa; in the 18th century it was still a large city.

Tangermünde, tn., Prussia, prov. Saxony, circle Stendal, on the l. bk. of the Elbe, 32 m. NNE. Magdeburg. P. 6900.

Tangi, tn., Brit. India, Punjab, dist. Peshávar. P. 9900; Moham. 9400.

Tangier, seapt. and post-vil., Canada, Nova Scotia, on the SE. ct., 44 m. ENE. Halifax; in gold-mining dist. P. <1500.

Tangier, improperly **Tangiers,** locally **Tanja,** seapt. tn., Morocco, at W. entrance to Strait of Gibraltar, 35 m. SW. Gibraltar, 8 m. E. Cape Spartel; seat of a British minister-plenipotentiary and consul-general, and of other European consuls and ministers; of Protestant and Roman Catholic missions. Principal sights, the Kasbah or citadel, and the Soko (El Suk) or market-place. Climate agreeable, temperature in winter hardly ever falling to 50° F., in summer moderated by Atlantic breezes, so that it is at that season frequently visited by residents of Gibraltar, with which it is in daily steamer communication in fine weather. No docks. Value of imports about £1,000,000 annually; exports about £400,000. T. was taken by the Portuguese in 1471; it was ceded to the English as a part of the dowry of the queen of Charles II. in 1662, but retained only till February 1684. Outside of the town are the ruins of a Roman bridge. About 3 m. SE. are the remains of ancient *Tingis* (Byzantine) or Old T. (*Tanjabalia*). Mean temp. (6 yrs., 1879–85), yr. 64.1° F., Jan. 55.4°, Aug. 75.6; mean rfall. about 30 in., June to August nearly rainless. P. 25,000 (including many Jews and Spaniards).

Tangiers, P.O., Wales, Pembrokeshire, 3 m. from Haverfordwest.

Tangier Sound, U.S., Maryland, in Chesapeake Bay, off coast of Somerset co., NW. from Pocomoke Bay; contains a number of islands.

Tangipahoa, par., U.S., Louisiana, stretching from Lake Pontchartrain to the Mississippi frontier.

Tangley, par., Eng., on the W. border of Hampshire, div. and 5 m. NNW. Andover, 12½ m. SW. Newbury, 4 m. NNE. Weyhill stn. P. <250. See **Faccombe.**

Tankardstown, par., Ire., co. Limerick, bar. Coshma, 2 m. NW. Kilmallock. P. <500.

Tankári, small port, Brit. India, Bombay, dist. Broach, 7 m. from mouth of Dhádhar R. P. <5000.

Tankerness, PT.O., Scot., Orkney Is., 6 m. SE. Kirkwall.

Tankersley, par., Eng., Yorkshire, W. Riding, Hallamshire div., 4½ m. S. Barnsley, close to Birdwell and Hoyland stn. P. <2500.

Tankerton Bay, bay, Eng., N. ct. Kent, at Whitstable.

Tan-kiang, or **Fu-ho,** riv., China, prov. Kwangsi, flows S. to the Si-kiang, which it joins in 111° 12′ E., 2 or 3 m. above Wu-chou; it forms the main channel of communication between prov. Hunan and the E. of prov. Kwangsi. See also **Tan-ho.**

Tankisso, or **Tinkisso,** riv., W. Africa, flows NE. then E., entering the upper Niger above Siguiri in 11° 17′ N.; recognised in 1887 as the S. boundary of the French protectorate.

Tankse, tn., Ladakh, 35 m. E. by S. Leh. Alt. 12,900 ft. (*Jour. R. G. S.*, 1878, p. 181).

Tanla, mt. chain, Tibet, on the border between N. and S. Tibet. This chain, explored only in the vicinity of Tanla Pass (about 32° 40′ N. and 92° 20′ E.) by Huc, Prjevalsky, and A. K., extends E. and W., with summits rising to 18,000 ft., many covered with perpetual snow. Towards the W. the elevation appears to increase, and, according to native accounts, the range extends in that direction for about 85 m., and then terminates abruptly. It seems probable, however, that the Dupleix Range, which was crossed near the point thus indicated (about 33° 45′ N. and 89° 40′ E.) by Bonvalot and Prince Henri of Orléans, is really a continuation of the T., with summits rising to about 25,000 ft. The chain is prolonged E. of the T. Pass, probably to the borders of the Kinsha-kiang, thus forming the water-parting between the Yangtse-kiang and the rivers of Indo-China. The range consists mainly of rocky débris, worn by water and ice. The ascent to the pass is gradual; on the N. by a slope of about 85 m., and on the S. of 50 m. Alt. 16,367 ft. (A. K.); 16,695 ft. (Prjevalsky).

Tan-myo, tn., Burma. See **Ramri.**

Tanna, isl., S. of New Hebrides, in 19° 30′ S., 169° 25′ E.

Tannadice, par., Scot., Forfarshire, on the l. bk. of the S. Esk, 4½ m. N. by E. Forfar, P.O.; 21,328 ac. P. <1500.

Tannay, tn., France, dep. Nièvre, on the Yonne, 33 m. NE. by N. Nevers, arr. and 7 m. SE. by S. Clamecy. P. <2000.

Tanner, Water of, small riv., Scot., W. Aberdeenshire, flowing NE. into the Dee about 1½ m. above Aboyne.

Tannery, West, and **Tanneries des Rolands,** tn., Canada. See **St. Henri.**

Tännfors, cascade, N. Sweden, prov. Jemtland, draining Lakes Arm and Gelf into Lake Nor. Height, 100 ft.; breadth, 40 ft.

Tanninges, or **Taninges,** tn., France, dep. Haute-Savoie, 23 m. ESE. Geneva, arr. and 9 m. E. by N. Bonneville. P. <2000.

Tanworth, par., Eng., Warwickshire, Stratford-on-Avon div., 10 m. E. Bromsgrove, 5 m. W. by S. Kingswood stn.; here is a large reservoir of the Birmingham and Stratford Canal. PM.O. 9808 ac. P. <2000.

Tan, Welsh, 'under.'

Tan-y-bwich, stn., Wales, Merionethshire, on the Festiniog Rly., 6 m. E. by N. Portmadoc; tourist resort. PMT.O.

Tan-y-Grisiau, stn., Wales, Merionethshire, 11 m. NE. by N. Harlech, on the Festiniog Rly., PMT.O. (**Tanygrisiau**).

Tanygroes, P.O., Wales, 8 m. from Cardigan.

Tao, or *Tau,* Chinese, 'island' or 'mountain.'

Tao, valley, Sahara, Tibesti, on SW. slopes of Tarso Mts.; the least barren region in the dist.

Taodeni, another spelling of **Taudeni.**

Tao-ho, riv., China, prov. Kansu, rises in the SW. corner of that prov. in the Min-shan Range, and flows first E. then N. into the Hwang-ho. Length more than 370 m.

Taongi, or **Gaspar Rico,** isl., Pacific, in the NE. of Marshall Archipelago (Ratak group).

Taormina, tn., on the E. ct. of Sicily, prov. and 25 m. SW. by S. Messina. On site of Greek city *Tauromenium,* founded 403 B.C. Ruins of Greek theatre, rebuilt by the Romans, and capable of containing 40,000 persons. Timoleon landed here when he came to deliver Sicily from her tyrants. P. <4000.

Taos, settlement, U.S., New Mexico, T. co., 56 m. NNE. Santa Fé. Alt. 6983 ft. (Wheeler).

Taos Peak, mt., U.S., New Mexico, Taos co., 70 m. NNE. Santa Fé, in Sangre de Cristo Range. Alt. 13,145 ft. (Wheeler).

Tapacari, vil., Bolivia, dep. Cochabamba, 110 m. SE. La Paz.

Tapachula, tn., Mexico, Chiapas, 130 m. S. by E. San Cristobal; in the vicinity are important coffee plantations. P. 6000.

Tapajoz, or **Tapajos,** riv., Brazil, Para state, after a N. course, joins the Amazon near Santarem, its basin lying between those of the Madeira and Xingu. It is formed by the junction of the Arinos and Juruena, and is navigable to within a short distance of the source; but the navigation is so greatly impeded by two groups of rapids, one about 4½° S. and the other between 8° and 9° S., as well as by less serious rapids between these two and above the latter, as to be of very little value. Total length about 1200 m.

Tapalque, tn., Argentine Republic, prov. and 160 m. SSW. Buenos Aires. P. <2000.

Tapamanoa, Tobuai-Manu, or **Saunders Island,** isl., Pacific, Society group, in about 17° 30′ S., 150½° W.

Tapanahoni, riv., Dutch Guiana, l. bk. trib. of Maroni R., joining the main stream in about 4° 25′ N., claimed as the boundary of French Guiana until 1891, when the award of the Emperor of Russia fixed the right branch, or Awa, as the limit. Length, 155 m.

Tapanui, bor., New Zealand, South I., Tuapeka co., 55 m. NE. by E. Invercargill, on the railway to Invercargill. P. <1500.

Tapanuli, tn., near the W. ct. of Sumatra, in 1° 50′ N.

Taparntowoot, vil., Canada, prov. Brit. Columbia, on Bella Ceola R., 250 m. NW. by N. Vancouver.

Taparo Point, cape, W. Indies, on the S. ct. of Trinidad.

Tapei-shan ('long white mountain'), mt., China, prov. Shensi, in Tsingling chain, its summit covered with perpetual snow. Alt. 11,485 ft.

Taperoa, maritime tn., Brazil, prov. Bahia, 56 m. SW. São Salvador; has foundry, saw-mill, and weaving by steam.

Taphis, vil., Upper Egypt. See **Tafah.**

Taphouse, East, P.O., Eng., Cornwall, 5 m. W. Liskeard.

Tapia, tn., Argentine Republic, prov. and 14 m. WNW. Tucuman. P. <2000.

Tapia, comm., Spain, Asturias, prov. and 56 m. WNW. Oviedo, dist. Castropol. P. 5000.

Tapiau, tn., Prussia, prov. E. Prussia, circle Wehlau, on the r. bk. of the Pregel, 24 m. E. by S. Königsberg. P. <4000.

Taping, or **Tapeng,** riv., Upper Burma and China, prov. Yünnan, rises in about 26° 10′ N., and flows S. and SW. into the upper Irâwadi at Bhâmo. Its valley affords access to the lower levels of the Yünnan plateaux in the SW. Length, 200 m.

Tápió-Györgye, comm., Hungary, co. Pest, dist. Kecskemét-alsó. P. <5000.

Tápió-Szele, comm., Hungary, co. Pest, dist. Kecskemét-alsó. P. 5600.

Tápió-Szent-Márton, comm., Hungary, co. Pest, dist. Kecskemét-felsö. P. <4000.

Taplow, par., Eng., Buckinghamshire, Wycombe div., on the Thames, 4½ m. NW. Windsor, on the G. W. R.; important deposits of phosphatic chalk, a valuable fertiliser, now worked near. PMT.O. P. <1500.

Tapolcza, tn., Hungary, prov. Zala, 49 m. WSW. Stuhlweissenburg; has mineral springs. P. 5800.

Tappahannock, vil., U.S., Virginia, Essex co., on the r. bk.

of the estuary of the Rappahannock, 40 m. NE. by E. Richmond; has a good harbour and a custom-house. P. <1500.

Tappen, vil., U.S., N. Dakota, Kidder co., 53 m. E. Bismarck. P. <1500.

Tappuah, place named in O. T. See **Tuffûh.**

Taps, vil., Russia, govt. Esthonia, 182 m. by rail W. St. Petersburg; branch railway to Walk and Riga. P. <5000.

Tápti, lighthouse, Brit. India, Bombay, dist. and 13 m. W. Surat, at mouth of Tápti R.

Tápti, riv., W. India, rises in about 21° 6′ N. and 78° 21′ E., at an elevation of 2500 ft.; it flows W. through the Sátpura highlands for about 150 m., its current here so violent that timber floated down is often dashed to pieces. The river then descends to the Khandesh plateau (700 to 750 ft. at its E. extremity), which it traverses for 180 m., receiving several tribs., chiefly on the l. bk., with smaller streams from the Sátpura hills, which bound its valley on the r. bk. From the Khandesh plateau it descends through the wild region of the Dang Forests to the Surat plains, through which it winds for 70 m. The lower course (about 30 m.) is tidal, and here the banks are in some places so low that disastrous floods have occurred (as in 1837, when nearly 70 villages were destroyed). In the lower course are several low islands, and numerous sandbanks obstruct navigation, of which Surat is at present the ordinary limit, though boats sometimes ascend to Amroli, 10 m. higher (by river). The depth of water on the bar at the mouth of the river varies from 12 to 22 ft. at neap to 27 ft. at spring tides. Length, 410 m.; drainage area, 26,173 sq. m.

Tapton, par., Eng., Derbyshire, union and 1½ m. NE. Chesterfield. P. <250.

Tapu, post-tn., New Zealand, North I., co. and 12 m. from Thames by road and rail. P. <1500.

Tapul, Isla, isl., Sulu group, in 5° 45′ N., 120° 55′ E.

Ta-pun, tn., Burma, dist. Tharáwadi, 33 m. SSE. Prome. P. <5000.

Taputeuwea, or **Drummond,** isls., Pacific, Gilbert group, in about 1½° S., 175° E.

Taquari, riv., Brazil, flows W. then SW. through a marshy region of the state of Matto Grosso, and enters the Paraguay just S. of 20° S., a few miles above Puerto Pacheco. Length about 450 m.

Taquari, tn., Brazil, state Rio Grande do Sul, on the l. bk. of the Rio Taquari, 43 m. WNW. Porto Alegre, at the terminus of the railway to Uruguayana, and centre of the German colonies in the dist. The **riv. Taquari** flows E. then SE. into the Jacuhi, which it joins in 29° 56′ 38″ S., 51° 38′ 55″ W. Depth available on bars with NE. wind 12 ft., with SW. wind 9 ft. See **Rio Grande do Sul.**

Tar, riv., U.S., N. Carolina, rises in the extreme N., in the E. of Person co., and flows on the whole ESE. Pamlico R., an inlet off Pamlico Sound, forming the estuary of the Tar.

Tar, Jebel. See **Jebel Ter.**

Tara, vil., Canada, Ontario, Bruce co., 46 m. W. Collingwood. P. <1500.

Tara, par., Ire., SE. co. Meath, bar. Skreen, 6 m. SSE. Navan, 2 m. NE. by E. Kilmessan stn. The Hill of Tara was anciently a chief seat of the Irish monarchs, where they held their assemblies; has mounds said to mark the site of former buildings, and an ancient stone. P.O. P. <250.

Tara, riv., Montenegro and Turkey in Europe, flows N. and NW. until, by its junction with the Piva, it forms the Drina, r. bk. affluent of the Save. Length about 75 m.

Tara, co., New South Wales, in the SW. corner.

Tara, dist. tn., Russia, W. Siberia, govt. and 380 m. SE. Tobolsk, on Irtysh R., 35 m. below its junction with **Tara R.,** a trib. of the Irtysh, into which it drains the immense marshy forests of Vasyugan; trade in furs and produce of cattle-breeding. P. 6500.

Tarabba, riv., central Sudan, flows on the whole NW., and joins the Benue on its l. bk. in about the centre of its course. Length more than 186 m.

Taramundi, comm., Spain, Asturias, prov. and 63 m. W. Oviedo, dist. Castropol. P. <4000.

Taraki, Bay of, on N. part of Japan Sea, dividing Sakhalin I., or Taraki, from Manchuria. Length, 400 m.; breadth, from 50 m. to 200 m.

Tarana, tn., Central India, Indore state. P. 5800; Hindus, 4700; Moham. 1000.

Tarana, stn., New South Wales, Roxburgh co., 80 m. WNW. Sydney. P. <1500.

Taranaki, co., New Zealand, W. ct. of North I., just S. of 39° S. Mean temp., yr. 57.4° F., Feb. 64.7°, July 50.2°.

Taranchis, Turkish stem, settled by the Chinese government on Ili R., Russian Turkistan, prov. Semiryechensk; carry on agriculture and cattle-breeding. P. about 40,000.

Tarancon, tn., Spain, New Castille, prov. and 48 m. WSW. Cuenca, cap. dist. T. P. (comm.) 5100.

Tarang, vil., Siam, Malay Penin., near the W. ct., in about 7° 32′ N.

Tarangan Island, Eastern Archipelago, one of the largest islands forming the Aru group.

Taranna, or **Norfolk Bay,** coasting-place, Tasmania, on Tasman's Penin. P. <1500.

Taranto (*Tarentum*), comm., fortified city, and seapt., South Italy, prov. Lecce, cap. circle, on an island, formerly a penin., separating the Mare Piccolo, its inner harbour, from the Mare Grande, in the Gulf of Taranto, 39 m. WSW. Brindisi. The city, on the site of the ancient citadel, has a cathedral, and trade in olive-oil, grain, and shell-fish. The last (oysters and mussels) are found in abundance in the inner harbour. The outer harbour, or Mare Grande, is protected by the isls. St. Peter and St. Paul, each having a lighthouse. The channel between them is crossed by a bridge 160 yards in length, over which is an aqueduct conveying water to the city from Mutina, 12 m. distant. The castle, flanked on one side by enormous towers, commands both seas. Area of mercantile port (Mare Grande) 25 ac.; depth, 18 ft. Vessels load and discharge by small boats. A channel available for vessels drawing 33 ft., but narrow enough to be spanned by a revolving bridge, runs from the Mare Grande to the Mare Piccolo, a basin of about 1000 acres, affording anchorage for the largest ironclads, where there is a government arsenal and dockyard. T., reputed to have been founded by colonists from Sparta about 700 B.C., was long a healthy seat of commerce, literature, and science. It was also one of the chosen seats of the Pythagorean philosophy, and the residence of its founder; but it was taken by the Romans 272 B.C. and despoiled. At the end of the 10th century A.D. it was rebuilt by the Eastern emperor Nicephorus, and again became a Greek town. Since the 16th century its fortunes have followed those of the kingdom of Naples. Comm. P. (1881) 35,600.

Taranto, Gulf of, a large inlet of the Mediterranean Sea, bounded, except on the SE., by the provs. Cosenza, Potenza, and Lecce. Length, 70 m.; breadth of entrance between Capes Nau and Santa Maria de Leuca, 70 m.; average breadth, 60 m.

Tarapacá, prov. and dep., Chile, in the N.; cap. Iquique. The prov. contains in the coast region deposits of guano, sulphate of soda and salt, with mines of copper and silver in the mountains, nickel in the hills of Huantacaya, and gold near the riv. Loa; to the E. of this zone a strip 3 m. wide, but over 250 m. long, containing deposits of nitrate of soda, and E. of that again the Pampa of Tamarugal (*q.v.*), extending to the foot-hills of the Andes. The only cultivation in the prov. is at the base of the Andes, but the pampas are said to be capable of irrigation.

Tarland-Migvie, par., Scot., Aberdeenshire, contains village of Tarland; 17,353 ac. P. <1500.

Tarlee, post-tn., S. Australia, Light co., 46 m. N. by E. Adelaide, on the Great Northern Line. P. <1500.

Tarleton, par., Eng., Lancashire, Chorley div., 7 m. E. by N. Southport, 2 m. S. Hesketh Bank stn., PMT.O.; 5553 ac. P. <2000.

Tarleton, settlement, Tasmania, Devon co., 42 m. WNW. Launceston, 26 m. ESE. Emu Bay.

Tarma, tn., Peru, cap. dep. Junin, 100 m. ENE. Lima, in direct communication with Jauja, Oroya, Cerro de Pasco, and the Chanchamayo valley. The inhabitants are noted for their skill in weaving. Alt. 10,000 ft. P. 6000.

Tarmon, electoral div., Ire., Kerry, dist. Tarbert No. 1.

Tarn, dep., S. France, traversed E. to W. by Tarn R., formed in 1790 out of parts of Languedoc (Albi, Castres, and Lavaur, the two first forming the country of the Albigeois); divided into four arrs.: Albi (cap.), Castres, Gaillac, and Lavaur. Surface very varied, mountainous in S. and E., hilly in N. and centre, plains chiefly in W. The Lacaune Mts. in the E., a bare and

sterile group, contain the culminating point of the dep., Pic de Montalet, 4155 ft.; several other summits rise from 3300 to 3600 ft., with intervening plateaux (2000–3000 ft.), swept in winter by icy winds, and marshy meadows locally known as 'sagnes.' To the SW. the Sidobre plateau (1310–2295 ft.), bounded by the gorges of the Agout, connects the mountains of Lacaune with the hills of Castres and Brassac, a wild and picturesque region, strewn over with immense blocks of granite, &c. Further S. the Montagne Noir, richly wooded on the T. side, forms part of the frontier with Aude. The plains are of remarkable fertility, and the lower slopes of the hills in the N. and centre are planted with vines and fruit-trees. The dep. is drained almost entirely to the Garonne, chiefly by the T., of which the principal trib. in the dep. is the Agout (l. bk.), with its (r. bk.) affluent the Dadou. Above the Saut de Sabo the T. winds through deep and sombre gorges, but lower, traverses the fertile plain of the Albigeois, where it is confined by natural dykes. It is almost useless for navigation. Granite, gneiss, and schists predominate in the mountains; limestone, sandstone, &c., in the hilly regions; and alluvium in the plains. Forests considerable (Grésigne, Cayroulet, &c.). Climate temperate but variable [**Albi**], the E. part on the whole rather cold and damp. The principal cereal is wheat, then maize; the vine (Gaillac, Cunac, Cahusaquet, &c.) occupies 3½ per cent. of the surface, but the production per acre is only about a quarter of the average for France; a little flax, hemp (Gaillac), and cider-apples are grown. The principal mineral is coal (Carmaux, La Bruguière, Montredon, &c.); manganese (Réalmont) and other minerals are obtained in small quantity. Manufactures limited, woollen goods (Mazamet, Lacaune, &c.), hosiery (Castres, Mazamet). Area, 2232 sq. m. P. (1891) 346,700. See **France,** table.

Tarn, riv., France, rises in Mount Lozère, flows W. through the deps. Aveyron, Tarn, Tarn-et-Garonne, and joins the Garonne, on r. bk., 3 m. W. Moissac; affluents, on l. bk. the Agout, on r. bk. the Aveyron. Length, 233 m. See **Causses.**

Tarna, riv., Hungary, flows S. into the Thiess (Tisza) at Szolnok.

Tarnac, vil., France, on the N. border of dep. Corrèze, arr. Ussel, 35 m. ESE. Limoges. P. <2000.

Tarnagulla, mun. tn., Victoria, Gladstone co., 27 m. W. Sandhurst; has mining. P. <1500.

Tarnak, or **Turnuk,** riv., Afghanistan, flows SW. and afterwards W. till it joins the Dori. The road from Ghazni to Kandahar passes down its valley.

Tarnauca, vil., Roumania, Moldavia, 14 m. NNW. Dorohoiu. P. (comm.) <5000.

Tarn Bay, Chile, in 47½° S., at N. end Messiere Channel.

Tarn Bay, Eng., on the SW. ct. of the co. of Cumberland, 17 m. SSE. St. Bees Head.

Tarnbrook, Eng., Lancashire, div. and 8 m. ESE. Lancaster, on riv. Wyre.

Tarn-et-Garonne, dep., S. France, traversed from S. to W. by Garonne and Tarn Rivs., formed in 1808 out of terr. taken from the deps. Lot (Montauban), Lot-et-Garonne (Moissac), Haute-Garonne (Castelsarrasin), Tarn, Aveyron, and Gers.; the terr. belonged originally to Guienne and Gascogne, chiefly the former; divided into three arrs.: Montauban (cap.), Castelsarrasin, and Moissac. Surface of very moderate elevation, 650–1000 ft., comprises two distinct regions, the NE. and the SW., separated by the plains and valleys of the Garonne, Tarn, and Lower Aveyron. The NE. region is the more elevated, hills and plateaux rising gradually to the frontiers of Lot and Aveyron; highest point 1635 ft., a little S. of Castanet. The E., chiefly N. of the Aveyron, belongs to the region of the Causses (*q.v.*), here lower and less sterile than in neighbouring deps. The principal Causse in the dep. is that of St. Antonin. The hills in the SW., continuations of the Lannemezan plateau, are intersected by gently sloping valleys. Lowest point 165 ft., where the Garonne leaves the dep. The dep. is drained entirely to the Garonne, which traverses it for about 47 m. from S. to W., forming a sharp bend in the centre, where it is joined by its principal trib. the Tarn, with its affluent the Aveyron, which joins the Tarn below Montauban. Climate mild, but variable. Prevailing winds E. and W., the former known locally as 'autan,' the latter as 'cers.' The principal cereal is wheat, then maize; the vine covers nearly 10 per cent. of the surface (Grisolles, Villebrumier, Auvillas, Campsas, &c.), but the production per acre is only about half the average for France. Fruits, especially plums, are abundant (St. Antonin, Moissac, &c.); mulberry and sericulture (Castelsarrasin, Grisolles, &c.). Minerals of little importance, except phosphate (Puy-la-Roque, Caylus, &c.). Manufactures very limited; blast-furnaces, forges, &c. (Brunquil, Montauban). Area, 1440 sq. m. P. (1891) 206,600. See **France,** table.

Tarn Hows, tarn, Eng., N. Lancashire, 2 m. NE. Coniston.

Tarnicar, vil., Eng., Lancashire. See **Rawcliffe, Upper.**

Tarnmonath Fell, hill, Eng., Cumberland, Eskdale div., about 12 m. E. Carlisle.

Tarquino, possibly **Pico Turquino** ('blue mt.'), peak and culminating point of Cuba I., on the SE. ct., in the Sierra Maestra, half way between Santiago and Cape Cruz. Alt. estimated from 6855 ft. to 8400 ft.

Tarragona, ancient *Tarraco,* tn., on the E. ct. of Spain, at mouth of Francoli R., cap. prov. T., 50 m. WSW. Barcelona. It was a great commercial centre, first under the Phœnicians, and afterwards under the Carthaginians and Romans, and surrounded by a wall about 35 m. in circuit. The town, which now occupies only a small portion of its ancient site, consists of upper and lower divisions, many of the houses in the former being built out of the ruins of Roman palaces and temples, and containing numerous ancient inscriptions. Remains of an amphitheatre and other Roman edifices, and in the environs the magnificent aqueduct of the Ferreras. Great trade in Barcelona nuts, almonds, wine, brandy, &c. The port has a depth of 19¾–30¼ ft.; vessels discharge by planks or lighters. P. (1860) 18,400; (1877) 23,000; (1887) 27,200.

Tarrangole, old military station, Egyptian Sudan, in the Latuka country, 84 m. ESE. Lado. In 1850 the Khartum merchants settled their Danagla troops here.

Tasfaut, group of oases, Sahara, Tuat proper, W. and S. of Tamentit.

Tásgáon, tn., Brit. India, Bombay, dist. Sátára, 74 m. W. by N. Bijápur. P. 11,300; Hindus, 9900.

Tash, Turkish, 'stony.'

Tash, vil., Russian Turkistan, prov. Syr-daria, dist. Kuralinsk. P. <5000.

Tashakuiskoye, vil., Russia, govt. Perm, 96 m. ESE. Ekaterinburg, on a trib. of Isset R. P. <5000.

Ta-shan, mt. chain, China, prov. Shantung, between about 117° and 118° E.; the highest peak, T., is in WSW. of chain. According to Chinese mythology, it is the holiest of the five sacred mountains of the empire. Alt. 3330-4900 ft.

Ta-shan, name of the axial mountain chain, Formosa I.; highest point Mount Morrison, alt. 12,860 ft.

Tash Dawan, pass across the Altyn Tagh Range, in about 89° E. Alt. about 13,000 ft.

Tashinny, P.O., Ire., co. Longford. See **Taghshinny.**

Tashkend, or **Tashkent,** one of the largest cities of central Asia, cap. Russian Turkistan and of the Syr-daria prov., situated in the valley of Chirchik, 50 m. above its junction with Syr, 41° 20′ N., 69° 18′ E., alt. 1480 ft., 180 m. NE. Samarkand railway terminus, with which it is about to be connected by a branch railway to Andijan, in Fergana. The population of the city consists chiefly of Sarts, with a few Uzbegs, Tajiks, Kirghizes, Jews, Russians, and Germans. The old walls of the city are now in ruins, and the houses are buried amidst gardens. A great variety of domestic trades (cottons, boots, brass and iron goods, harness, &c.) is carried on by the inhabitants. Considerable trade with Bukhara, Kashgaria, Persia, Kashmír, India, and Russia. The Russian town, on the SE. of the Asiatic city, has clean broad streets bordered by trees, and contains an observatory, a museum, a library, two gymnasia, a hospital, and a branch of the Russian Geographical Society, as well as the houses and buildings of the administration and the military. Its population is about 10,000. The city is often visited by earthquakes. Mean temp., yr. 58.3° F., Jan. 29.0°, July 77.5°; yearly rfall. 11.3 in. Total P. (1892) 121,510.

Tash-Köpri, tn., Asia Minor, Anatolia, on the Gok-Irmak, 52 m. SW. Sinope. It has remains of the ancient *Pompeiopolis.*

Tash-kulak, vil., Russian Turkistan, prov. Syr-daria, dist. Kuralinsk. P. <5000.

Tash-kurgan, fort in Chinese Turkistan, in SE. part of Pamirs, Sarikol, in 37° 45′ N., 75° 20′ E. Alt. 10,400 ft.

Tash-kurgan ('stone fort'), fort, N. Afghanistan, 65 m. W. Kunduz, about 4 m. S. of the ruins of Khulm. Alt. 1490 ft. (Curzon).

Tash-kurgan, small fort of Roshan, on the Pamirs, at the junction of Kudara with Murghab, 38° 18′ N., 70° 20′ E. Alt. about 10,000 ft.

Tashla, two vils., Russia, govt. Simbirsk, 25–31 m. from chief town. P. (of both) 5000.

Tashlija, Slavonic **Pievlje,** tn., Turkey in Europe, prov. (vilayet) Kossovo, sanjak and 57 m. W. by N. Novibazar. Here is the monastery of Troitsa, which for a long time served as residence to the bishops of Herzegovina; in the library are valuable Servian manuscripts; it is a place of pilgrimage for the inhabitants of all the neighbouring countries. Alt. 2850 ft.

Tasht, lake, Persia, prov. Fars, directly N. of the NW. part of Lake Niriz, with which it communicates by two arms.

Tashtybskaya, vil., Russia, E. Siberia, govt. Yeniseisk, dist. and 146 m. NW. Minusinsk. P. <2000.

Tash-tyube, vil., Russian Turkistan, prov. Syr-daria, dist. Kuralinsk. P. <2500.

Tashun, tn., Persia, prov. Khuzistan, 18 m. NNW. Behbehan. It was of importance, but is now almost wholly in ruins.

Tasia-ho, riv., China. See **Tahia-ho.**

Tasiast, region of W. Sahara, E. of Arguin Bay; the inhabitants are nomadic Marabouts.

Tasichozong, tn., Bhután, 13 m. SW. by W. Punakha.

Tasiko, or **Api,** isl., New Hebrides, SE. of Mallikollo, crossed by 16° 45′ S., 168° 20′ E.

Tasiusak, isl. and hamlet, W. ct. Greenland, dist. Upernavik, in 73° 22′ N.; it is the nearest point to the Pole permanently inhabited by Europeans and Eskimos.

Tasley, par., Eng., Salop, Ludlow div., 15 m. NW. by N. Kidderminster, 1½ m. NW. Bridgnorth. P. <250.

Tasman, another name of the Palowi Is., Ger. New Guinea.

Tasman Bay, or **Blind Bay,** large bay, New Zealand, N. ct. of South I.; at its head is Nelson city.

Tasman Glacier, Great, largest glacier of the Southern Alps, New Zealand, descends SSW. from Hochstetter Dome

and Mount Delabeche, receives on the W. the Haast glacier from Mount Haast, and the Hochstetter and Ball glaciers from different sides of Mount Aorangi (Cook), terminates in a long and broad moraine, from the lower end of which issues the **Tasman R.,** which flows into Lake Pukaki (Waitaki basin). Length of glacier, 18 m.; greatest breadth, more than 2 m.; area, 13,664 ac. Mean daily rate of motion in middle of glacier near the lower end, 18 in.

Tasman Head, the most S. point of Bruni I., Tasmania, in 147° 20′ E.

Tasmania, isl., and one of the Australasian colonies, S. of Australia, from which it is separated by Bass Strait; area (including islands) less than one-third that of Great Britain. Coasts generally bold and rocky, with many deep inlets forming good harbours — N., Stanley, Emu Bay, Ports Frederick, Sorrell, and Dalrymple, Anderson and Ringarooma Bays; E., George's, Oyster, and Prosser Bays; S., Port Arthur, Norfolk, Frederick Henry, and Storm Bays, D'Entrecasteaux Channel, with several secondary bays, South Cape Bay and Cox Bight; W., Port Davey, Macquarie Harbour, mouths of Pieman and Arthur Rivs. Peninsulas—Freycinet in E., and Forestier and Tasman's in SE. Off the coast are several islands—Flinders, Cape Barren, &c., NE.; Schouten and Maria, E.; Bruni Is., SE.; King and Hunter Is., NW., with several smaller islands. The **surface** is generally undulating, and in the W., centre, and NE. more or less mountainous. Communication between the N. and S. of the island is facilitated by the valleys and low tablelands, which extend from the estuary of the Tamar to that of the Derwent. The eastern mountains run nearly N. and S. parallel to the coast, at a distance of about 40 m.; highest Ben Lomond, 5010 ft., with several other mountains rising to about 4000 ft. A tableland, about 3000 ft. in elevation, occupies the middle of the island, stretching westwards, and bearing the culminating summit of the island, Cradle Mt., 5069 ft., and several other peaks rising to between 4000 ft. and 5000 ft.; other ranges connected with the central plateau are the Norfolk, West Coast, D'Aguilar, Wilmot, and Arthur, which trend successively N. to SE., parallel to the W. ct., and Perouse and Bathurst Ranges in the S. On the central plateau several large fresh-water lakes—Great Lake, Sorrell, St. Clair, Echo, Woods, Arthur, &c.—form the head reservoirs of some of the larger rivers. **Principal rivers**—S., Coal, Derwent, and Huon, all debouching in the SE.; W., Gordon, Pieman, and Arthur; N., Forth, Mersey, Tamar, and Ringarooma. The rivers of the E. ct. are short. As regards **geological structure,** the central and connected mountain ranges are mainly of trap or greenstone, while the intermediate valleys and plains are occupied by Palæozoic formations; granite and metamorphic rocks predominate in the NE. and SW., and occur in several other parts. There are numerous traces of volcanic action. The soil varies much; in some places it is poor, but throughout the greater part fertile, sometimes exceedingly so. The central plateau has few trees, but affords good pasturage. Large areas in the NE., W., and SW. are covered with **forest.** The vegetation closely resembles that of the neighbouring parts of Australia, one proof of the connection which formerly existed between the two. The principal trees are eucalypts, but T. has some forms peculiar to itself, including the Huon pine (*Dacrydium Franklinii*), abundant in the SW. The native mammals are marsupials, generally similar to those of Australia; but two species, both predaceous, are peculiar to the island, the native tiger or hyæna and the native devil, the former being the largest of all carnivorous marsupials. The **climate,** owing to the more southerly position of the island, is cooler than that of Australia, and, in consequence of its smaller size and mountainous character, no part is subject to extreme drought. The air is particularly invigorating, and the alternation of land and sea-breezes moderate the heat of summer. The **leading cereals** are oats and barley; the cultivation of wheat has declined in recent years, but there has been a steady increase in the area under root-crops; all kinds of fruits belonging to the warm temperate zones grow luxuriantly, and their cultivation is extending; hops form an important crop. Exports include wool, sheep, gold, silver, tin, timber, &c. The **mineral resources** of the island are very important; they include tin (Bischoff, Ben Lomond, Blue Tier, Cox Bight); gold, found in various parts (Beaconsfield and Lefroy, N., Mathinna, E., Pieman's R., W., &c.); galena and other silver ores (Zeehan and Dundas); valuable deposits of copper associated with silver were discovered in 1892–93 at Mount Lyell; coal is found in several dists., the most important deposits being those of Cornwall co. (Fingal, Mount Nicholas, &c.), which furnish an excellent steam coal entirely used on the railways of T.; other coal-mining dists. are Hamilton, Mersey R., Gardiner's Bay, Colebrook (Jerusalem), Port Seymour (bituminous), Newtown, and Port Arthur (anthracite); other minerals are wolfram (Mount Lyell), nickel (Heazlewood), plumbago (Cape Barrier). Industries include brewing, fruit-preserving, silver-smelting (Strachan and Zeehan), and the manufacture of Portland cement, agricultural implements, flour, cotton goods, &c. The N. and S. of the island are connected by a main line of railway, and there are several branch and other lines connecting the mining centres with ports. Elementary **education** is under the control of the state, and is compulsory for children between the ages of seven and thirteen. Higher education is now (since 1890) under the superintendence of the Council of the 'University of Tasmania,' an institution, however, not yet fully organised. Technical schools have been established at several places. The military forces include a small permanent staff and an auxiliary force. For **government,** see **British Empire, The.** T. was discovered in 1642 by the Dutch navigator Tasman, who named it Van Diemen's Land, in honour of the governor of the Dutch East Indies, and this name it continued to bear till 1856, when, after the cessation of transportation and the institution of representative government, the name was changed to T. The first settlement in the island was established by the governor of New South Wales at Risdon, on the Derwent, in 1803, but it was soon after removed to Hobart. Free settlers, also from Sydney, followed, and in 1825 it was made an independent colony. The aboriginal inhabitants, against whom relentless war was waged by the early settlers, are now quite extinct, the last representative having died in 1876. Area, 26,215 sq. m. P. (1891) 146,700. See **Australia, Australasian Colonies, British Empire, The.**

Tasman Peninsula, SE. Tasmania, connected N. by a narrow stretch of land with Forestier's Penin., which in turn is similarly connected with the mainland. Site of the penal settlement of Port Arthur.

Tasman Sea, name given on the proposal of the Australasian Association for the Advancement of Science to the sea between New Zealand and the islands to the NW. of New Zealand on the one hand, and Australia and Tasmania on the other hand.

Tasman's Island, isl., Tasmania, off Cape Pillar, in about 148° E.

Tasman Strait, between Taviuni and Ngamia Is., Fiji Is., in 16° 48′ S., 180° 10′ E.

Tasnád, comm., Hungary, co. Szilágy, 45 m. E. Debreczen, cap. dist. T. P. <4000.

Tass, comm., Hungary, co. Pest, dist. Solt-felsö. P. <4000.

Tassiding, vil., India, Sikkim, 20 m. N. by E. Darjfling.

Tassili ('rooky plateau' in Berber), name specially applied to the two great rocky plateaux of the Sahara, Tassili of Azjer to the NE., and Tassili-wan-Ahaggar to the SW. of the Jebel Ahaggar.

Tassin, tn., France, dep. Rhône, arr. and 3 m. W. Lyons; has nurseries and manufactures. P. <3000.

Tassisudon, tn., Bhutan. See **Tasichozong** (of which T. is apparently an improper form).

Tas-tau, mt., Russian Turkistan, prov. Semipalatinsk, highest peak of Tarbagatai Mts. Alt. 9700 ft.

Tastuba, vil., Russia, govt. Ufa, dist. and 105 m. E. Zlatoust, on Siberian highway. P. <5000.

Tasyeyeva. See **Uda (Chuna).**

Tata, comm., Hungary, co. and 11 m. SE. Komorn; has mineral springs, vineyards, and various manufactures. P. 6900.

Tatakoto, or **San Narcisso,** isl., Pacific, in the E. of the Tuamotu group, in about 17¼° S., 138½° W.

Tatamagouche, seapt. tn., Canada, Nova Scotia, Colchester co., on **T. Bay,** 32 m. W. Pictou; copper is found in the vicinity. P. <1500.

Tatar-bunar, tn., SW. Russia, prov. Bessarabia, 70 m. SW. Odessa. P. <5000.

Tatar-Pazardžik (-jik), tn., Bulgaria, Eastern Roumelia, cap. prov. T.-P., on the Maritsa, 22 m. W. by N. Philippopolis. Alt. 680 ft. P. (1888) 15,700; Bulgarians, 11,500; Moham. 1600.

Tatars, or **Tartars,** name given to over four million inhabitants of the Russian Empire, who belong mostly to the Turkish branch of the Ural-Altaic stem, but are mixed to some extent with Finnish and Samoyedic stems, as also with Mongols. Derive their generic name from the Tata Mongols, who migrated in the 9th century from the NE. Gobi southward, and under Batu-khan (Batyi) invaded Russia, driving with them many Turkish stems. Consist in Russia of three large groups: (1) The **Kazañ Tatars,** in Kazañ, Ufa, Simbirsk, and partly Vyatka, Perm, Orenburg, and the middle Volga provs. They number about 1,000,000, speak a pure Turkish dialect, and are Mussulmans. The Bashkirs ought to be reckoned with them. (2) The **Astrakhañ Tatars,** nearly 25,000; (3) the **Crimean Tatars,** about 100,000. The **Caucasus Tatars** are estimated at over 2,000,000. They are (4) the **Nogais,** mostly nomade, mixed with Mongolian Kalmucks; (5) the **Karachais**; (6) the **Mountain Tatars,** scattered in Transcaucasia. The **Siberian Tatars** are mostly mixed with Finnish stems: (7) the **Baraba Tatars,** in Tobolsk and Tomsk (about 55,000); (8) the **Chulym Tatars,** much mixed with Mongols; (9) the **Minusinsk Tatars,** and (10) the **Altai Tatars.** There are, moreover, about 30,000 Tatars properly (not including the Sarts) in Russian Turkistan.

Tatar Strait, or **Strait of Mamia Rinso,** Russia, N. Pacific;

separates Sakhalin I. from mainland. Fomerly taken for a gulf, it was found to be a strait by Mamia Rinso in 1808. Its narrowest part, 5 m., is under 52° N., between Cape Lazarev on mainland and village Pogobi on Sakhalin. The estuary of the Amur is in its N. part. De Castries Bay, under 51° 28′ N. Further S. comes the Haji Bay, or Imperatorskaya Bay. Experiences the cooling influence of the Sea of Okhotsk, and its bays freeze for 4 to 4½ months; the average temp. of winter at Imperatorskaya Bay is 0.4° F.

Tatay, vil., Argentine Republic, prov. and 95 m. WNW. Buenos Aires, in 34° 16′ N., 59° 54′ W. Alt. 367 ft. Rfall. (6 yrs.), 33.79 in.

Tatchera, co., Victoria, on the N. frontier, between 143° and 144° E., traversed in the N. by the riv. Murray.

Tate, vil., U.S., Georgia, Pickens co.; has extensive marble quarries, steam and other works belonging to the Georgia Marble Company, which here owns more than 6000 ac. of marble beds. P. <1500.

Tate, co., U.S., Mississippi, in the NW., to the S. of 35° N., crossed by 90° W.

Tatenhill, par., Eng., Staffordshire, Burton div., 2½ m. W. by S. Burton-upon-Trent, P.O. P. <750.

Tates, an Iranian stem, Russia, Caucasia, chiefly in govt. Baku. Estimated at about 140,000.

Tateshino, summit of Japan, in central Honshiu, prov. Sinano, separating the basins of the Tenriu Gawa and Shinano Gawa, flowing respectively to the Pacific Ocean and Sea of Japan. Alt. 7875 ft.

Tate Springs, or **Tate Epsom Springs,** vil., U.S., in NE. Tennessee, Grainger co., near the Clinch Mts.; has a valuable mineral spring, much resorted to. P. <1500.

Tateyama, one of the principal summits of Japan, in centre of Honshiu Is., in 36° 35′ N., with a sharp cuneiform point. Alt. 9250–9500 ft.

Tatham, par., Eng., Lancashire, 4½ m. E. Hornby; 8547 ac. P. <500.

Tatham Fells, eccles. par. and upland tract, Eng., in the E. of the Lancaster div. of Lancashire, about 12 m. E. by N. Lancaster. P. <250.

Tathsianlu, tn., China. See **Tachienlu.**

Tathwell, par., Eng., Lincolnshire, E. Lindsey div., 3 m. S. by W. Louth, 2 m. SE. Hallington stn., P.O. P. <500.

Tati, tn., Portuguese E. Africa, on the Shashi, 108 m. SW. by S. Buluwayo, in 21° 27′ S., 27° 35′ E.; formerly an important gold-mining centre.

Tating-fu, tn., China, Kweichou, 62 m. WNW. Kweiyang-fu.

Tatipur, tn., Brit. India, Punjab, dist. and 15 m. E. by N. Múltán. P. <5000.

Tatome, tn., French Indo-China, on the Chan, 138 m. SE. by E. Luang Prabang.

Tatoosh Island, U.S., Washington, near Cape Flattery, in 48° 23′ N., 124° 44′ W. Mean temp. (15 yrs.), yr. 48.6° F., Jan. 41.0°, July 56.0°; rfall., yr. 89 in., April–Aug. 17.2 in.

Tatra, mt. range, Hungary. See **Carpathians** (central groups), also *Geog. Journ.*, ii. pp. 255–58.

Tatra Füred, in Ger. **Schmecks,** hot springs with bathing establishment in the E. of the Tatra Range, N. Hungary, co. Szepes (Zips), 55 m. NW. by W. Kaschau.

Tatrang, comm., Hungary, co. Brassó, dist. Hétfalus. P. <4000.

Tatros, riv., SE. Europe, rises on the W. side of the E. Carpathians, and after traversing the range by a circuitous course flows SE. to join the Sereth.

Tatsfield, par., Eng., Surrey, div. and 11 m. ENE. Reigate, 2½ m. NW. by W. Westerham stn., P.O. P. <500.

Tatsien-lu, tn., China. See **Tachien-lu.**

Tatsu-hsien, tn., China, Sŭchwan, 55 m. WNW. Chungking.

Tatta, tn., Brit. India, Sind, dist. and 58 m. E. by S. Karáchi, at foot of Makli Hills; the stagnant pools around produce a bad form of fever. Formerly seat of the court of the King of Sind, and an important city, with extensive industries. Pottinger states that in 1742 there were 40,000 weavers and 20,000 other artisans. Chief modern industry, silk and cotton shawls; the finest building is the Jamá Masjid mosque. P. 9000; Hindus, 4000; Moham. 4800.

Tattæus, Palus, lake, Asia Minor. See **Tuz-göl.**

Tatton, par., Eng., Cheshire, 2 m. N. Knutsford. P. <250.

Tattymoyle, electoral div., Ire., co. Tyrone, dist. Fintona.

Tatu-ho, riv., China. See **Tung-ho.**

Tatuhy, tn., Brazil, state and 80 m. WNW. São Paulo; very fertile dist., favourable to tobacco and cotton.

Tatung-fu, tn., China, in the N. of prov. Shansi, 170 m. W. Peking. It stands on a coalfield containing thick seams of excellent coal, but in too isolated a situation to acquire more than local importance. See Richthofen, *China,* ii. p. 789.

Tatung-ho, Tetung-ho, riv., China. Same as **Datung-gol.**

Tatung-kou, tn., Manchuria, on estuary of Yalu, just S. of 40° N., opposite Korean port of Wiju.

Tatura, post-tn., Victoria, Rodney co., on riv. Goulburn, 36 m. SE. Echuca; agricultural centre. P. <1500.

Tatworth, eccles. par., Eng., Somerset, S. div., 13½ m. SSE. Taunton, 2 m. S. Chard stn., 1 m. NW. Chard Road stn. P. <1000.

Tau, or *Tao,* Chinese, 'island.'

Tau, isl., Samoan Is. See **Manua.**

Tauarga, tn., N. Africa, Tripoli, 130 m. ESE. Tripoli.

Taubaté, tn., Brazil, state of and 78 m. ENE. São Paulo; bituminous schists, yielding mineral oil, occur in the neighbourhood. P. 15,000.

Taubenheim, vil., Ger., kgd. Saxony, circle Bautzen, dist. and 9 m. WSW. Löbau. P. <3000.

Tauber, riv., Ger., Würtemberg and Bavaria, winds NW. into the Main at Wertheim, opposite the SE. of the Spessart.

Tauberbischofsheim, urban comm., Ger., gd.-duchy of Baden, circle Mosbach, 14 m. SSW. Würzburg, Bavaria; formerly belonging to the electorate of Mainz (Mayence). P. <4000.

Taucha, tn., Ger., kgd. Saxony, on riv. Parthe, circle and 6 m. NE. by E. Leipzig. P. <4000.

Taudeni, or **Taodeni,** oasis, western Sahara, about 360 m. N. by W. Timbuktu, in about 22° N., 4½° W.; has large salt-mines which, since 1596, have been the chief source of salt for the western Sudan. Previously the salt was obtained at Tighasa (Trasa), further N. Alt. about 730 ft.

Tauern, Hohe, mt. range. See **Alps,** SUBDIVISIONS, **III. A. I.**

Taufikya, former post of Egyptian Sudan, on r. bk. of White Nile, 3 or 4 m. above the confluence of the Sobat. Founded in 1870 by Sir S. Baker.

Taughannock Falls, vil., U.S., New York, Tompkins co., 2 m. from Cayuga Lake; here the riv. Taughannock falls 210 ft. P. <1500.

Taughboyne, par., Ire., co. Donegal, on riv. Foyle, bar. N. Raphoe, contains St. Johnstown; 15,847 ac. P. <3500.

Taughmaconnell, P.O., Ire., co. Roscommon. See **Taghmaconnell.**

Taul, isl., Ger. New Guinea, in the Admiralty group, crossed by 2° S., 147° E.

Tauiskaya Bay, Russia, Sea of Okhotsk, 200 m. E. of Okhotsk town, nearly 135 m. wide, and 40 m. long; receives the **Taul,** 130 m. long, and three other rivers; contains several hilly islands. **Tauisk village,** at the mouth of Taui R.

Taui-Taui, isl., Sulu group, crossed by 5° 15′ N., 120° E.

Taulé, tn., France, dep. Finistère, 31 m. ENE. Brest, arr. and 3 m. NW. Morlaix. P. <2000.

Taungbain, Shan state, Upper Burma, crossed in N. by 23° N., in W. by 97° E.; contains the Bawdwin silver-mines.

Taung-gup, vil., Burma, dist. Sandoway, 63 m. W. Prome; an important road runs across the Yoma Mts. to Pegu. P. <5000.

Taung-ngu, or **Kantha,** riv., Lower Burma, joins Salwín, r. bk., at T.

Taung-ngu, or **Toungoo,** tn. and cant., Burma, dist. T., 74 m. E. by N. Prome, 166 m. by rail from Rangoon; has large suburbs; inside the old wall is a sheet of water 1½ m. long. Formerly seat of an independent king. Alt. 181 ft. Mean temp., yr. 78° F., Jan. 70°, April 85°; rfall., yr. 78.1 in., May–Oct. 74.8 in. P. 17,500; Buddhists, 13,700; cant. P. 1700; Buddhists, 58.

Taungs, tn., S. Africa, Brit. Bechuana, 41 m. S. Vryburg, chief residence of the tribe of Batlapins; small European town, with fortress and station on railway from Kimberley to Vryburg.

Taunton, parl. and mun. bor. (first charter granted 1627, lost in 1660; second charter granted 1677, lost 1792; present charter granted 1877) and cap. of co., Eng., Somerset, 45 m. SW. Bristol, in the diocese of Bath and Wells, on the Tone, with stn. on the G. W. R., and junction for local lines. The castle, built in 1135, on the site of the early Saxon foundation,

and held by Blake in the defence, 1644-45, is now utilised for a museum. In its hall were held the 'Bloody Assizes' of Judge Jeffreys, 1685. The church of St. Mary Magdalene has a fine tower 153 ft. high. In T. are several important colleges—King's, Queen's (Wesleyan), and the Independent College. Formerly one of the 'clothier towns' of the W., T. now depends on agriculture, with manufactures of silk, collars, and gloves. There is an admirable arrangement for sewage, by precipitation. First town in England lighted by electricity. Birthplace of Kinglake, the historian of the Crimean War (1802–91). Returned two members to Parliament till 1885, and since only one. Market-days, W. and S. Mean rfall. (1866–80), yr. 29.8 in. P. (1801) 5800; (1851) 14,200; (1871) 15,500; (1891) 18,000.

Taunton, co., S. Australia, on the N. frontier, and bounded on the W. by Lake Torrens.

Taunton, city, U.S., Massachusetts, Bristol co., on Taunton R., 14 m. N. by E. Fall R.; noted for its locomotive works and manufactures of iron and brick, furnaces and stoves, cotton machinery, nail and cotton factories, &c. The oldest copper company in the U.S. is here, manufacturing on a large scale copper, sheet zinc, and yellow metal sheathing. P. (1850) 10,400; (1870) 18,600; (1880) 21,200; (1890) 25,400.

Taunton, riv., U.S., Massachusetts, in the SE., rises in the NW. of Plymouth co., and flows SW. and then S. past T. into the Atlantic through Mount Hope Bay, a branch of Narragansett Bay, Rhode Island.

Taunus, the part of the Schiefergebirge, W. Ger., extending for about 40 m. ENE. from the Rhine, near Kaub, and continuous on the NE. with the Vogelsgebirge, separating the basin of the Main on the S. from that of the Lahn on the N. Highest summit, Gross-Feldberg, alt. 2885 ft., is accessible for carriages. Has ancient German stone ramparts and remains of Roman fortifications and trench. Rocks of the Devonian formation predominate. On the S. side is the finest wine-growing dist. in Germany (Rüdesheim, Johannisberg, Schloss Vollraths, Markobrunnen, &c.).

Taupiri, post-tn., New Zealand, North I., Waikato co., 69 m. SE. Auckland by road and rail. P. <1500.

Taupo, post-tn., New Zealand, North I., E. Taupo co., 72 m. NNW. Napier. P. <1500.

Taupo, Lake, lake, New Zealand, prov. Auckland, in centre of North I., crossed by 39° S. and 176° E. The Waikato issues from NE. corner and flows NW. To the S. are the mountains of Tongarira and Ngaurahoe. Length, 30 m.

Taura, vil., Ger., kgd. Saxony, circle Leipzig, dist. and 9 m. SSE. Rochlitz. P. <3000.

Tauranga, post-tn., New Zealand, North I., T. co., 95 m. SE. by E. Auckland, on T. Harbour, which is extensive and safe, and available for the largest vessels; port for Hot Lakes dist.; has large chemical works for utilising the deposits of sulphur which abound in the neighbourhood. P. <2500.

Tauranga Bay, excellent harbour, New Zealand, North I., in about 37° 30′ S. Depth, 6 fathoms.

Taurasi, tn., Italy, Campania, prov. Avellino, 13 m. SSW. Ariano di Puglia. P. <3000.

Taurida, govt., S. Russia, including the penin. of Crimea, and part of mainland in the N. of it, on the banks of the Black Sea and the Sea of Azov, between this last and the lower course of the Dnieper; has Kherson in W., Ekaterinoslav in N., and the Sea of Azov and Black Sea on E. and S. In ancient times occupied by the Scythians, later on (13th century) by the Nogai Hordes, conquered by Russia by the end of last century. Mostly low steppes, waterless and encroached upon by sands, reaching the low shores of both seas. The best port of the Sea of Azov, Berdyansk, belongs to the Taurida government. So also the seaports Melitopol and Genichesk. For climate, see **Crimea.** Out of a total population of 1,167,600, nearly 400,000 live on the mainland. They are chiefly Russians (Great, Little, and White), with an admixture of nearly 45,000 Germans, 20,000 Bulgarians, and 5000 Jews. They live in large villages, often having 4000 to 8000 inhabitants. Chief occupations cattle-breeding, agriculture, gardening, and vine culture, wine being obtained to the amount of nearly 2,000,000 gallons in Crimea. Salt extracted from lakes. Fishing in the Sea of Azov. Manufactures insignificant. Active shipping on lower Dnieper, and active export trade from the Crimean ports of Eupatoria, Sebastopol, Sudak, and Theodosia. Crossed by railway from Kharkov to Sebastopol, with branches to Theodosia and Genichesk. Divided into eight dists.: Simpheropol (cap. of government), Eupatoria, Theodosia, and Yalta in Crimea; Berdyansk, Dnieper, Melitopol, and Perekop on mainland. Several villages of importance: Great Tokmak (8000 inhabitants), Andreyevka (7300), Mikhailovka (7600), Great Byelozerka (6520), and others on N. ct. of Sea of Azov. Area, 24,539 sq. m. P. with Crimea (1872) 709,900; (1890) 1,167,600.

Tauris, city, Persia. See **Tabriz.**

Taurisana, tn., S. Italy, Apulia, prov. Lecce, 14 m. ESE. Gallipoli; birthplace of the philosopher Vannini (died 1619). P. <3000.

Taurogen, tn. and important custom-house, Russia, govt. and 70 m. WNW. Kovno, on highway from Riga to Tilsit, on Jura R., 15 m. above its junction with Niemen. P. 5800.

Taurus, ancient name still used by geographers for the mts. running parallel to the sea-coast in the SE. of Asia Minor, on the borders of the ancient *Cilicia* and *Pamphylia.* The most continuous and loftiest range in this region, the range called by the Turks Bulgar Dagh, and further N. where it trends N. (away from the coast), Ala Dagh, now forms the N. and NW. frontier of the vilayet of Adana, and towards the NE. is separated by the valley of the Zamanti-chai (right headwater of Seihun) from the parallel and more easterly range of the Anti-Taurus. Highest peak, the Medehs Dagh (WNW. of Adana), has an alt. of about 11,500 ft. The Cilician Gates (*q.v.*), the only pass across the range, has at all times been of the highest importance as a means of communication between the tableland of Asia Minor and the plains in the SE.

Taurvit, oasis, Sahara, in the S. of Tuat, 103 m. SSE. Tamentit. P. <2000.

Taus, tn., Austria, Bohemia, 30 m. SW. Pilsen. P. 7700.

Taushanjyk, vil., Asia Minor, on the N. side of the Gulf of Ismid, 37 m. ESE. Constantinople.

Táuste, tn., Spain, prov. and 27 m. NW. Saragossa, dist. Ejea de los Caballeros. P. (comm.) <5000.

Táuste Canal, lateral canal of the Ebro, Spain, l. bk., beginning a little below Tudela, and rejoining the Ebro above the confluence of the Jalon, passes a little to the S. of the town of Táuste; used solely for irrigation. Length, 25 m.

Tauves, tn., France, dep. Puy-de-Dôme, arr. Issoire, 27 m. SW. by W. Clermont-Ferrand. P. <2000.

Tauwara, native name of Milne Bay, Brit. New Guinea.

Tavali, isl., Eastern Archipelago, one of the Molucca Is., SW. of Halmahéra I., and W. of the N. end of Bachian I.

Tavar, city, Western India, pleasantly situated on a hill overlooking an extensive plain; burnt by the Portuguese in 1582.

Tavarres, tn., U.S., Florida, 110 m. S. by W. of mouth of St. John's R., cap. Lake co.; important railway centre. P. <1500.

Tavastehus, a govt. of Finland, in SW. part of lake-plateau; surface flat, with a few hills (700 ft.) along Lake Päjäne. Lakes Näsi-järvi in W., Päjäne in NE., and many small ones. Soil fertile, well cultivated. Chief town Tavastehus, 71 m. by rail NNW. of Helsingfors, with the castle Kronoborg, founded in 1249; now a penitentiary. P. 5110.

Tavate, or **Tavau,** vil., Switzd. See **Davos.**

Tavda, riv., Russia, western Siberia, govt. Tobolsk, formed by the junction of Lozva and Sosva, which both rise in Perm, on E. slope of Urals, flows E., SE., and joins Tobol 65 m. above Tobolsk. Length, 650 m.

Taveita, tn., Africa. See **Taveta.**

Tavenna, tn., Italy, Molise, prov. Campobasso, 10 m. NNW. Larino; has sulphureous spring. P. <3000.

Taxila, ancient city, India. See **Dehri Shahán.**

Tay, riv., Scot., draining nearly the whole of co. Perth, with parts of the cos. Forfar, Argyll, and Inverness, rises in Breadalbane, on the borders of Argyllshire, as the Dochart, and flows to Loch Tay, issuing from which as the Tay it flows E. and S. past Aberfeldy, Dunkeld, and Perth; after which it expands into an estuary from 1 to 3½ m. in greatest width, called the Firth of Tay, separates Perth and Forfar on the N. from Fife on the S., and joins the North Sea between Ferryport-on-Craig on the S. and Button Ness on the N. Total course about 120 m. It receives the Tummel and Isla on l. bk., and the Bran, Almond, and Earn on r. bk. Mean discharge of water per minute is estimated at 273,000 cubic ft., being more than any other river in Britain, and its basin comprises 2400 sq. m. Navigable to Newburgh (20 m.) for vessels of 500 tons burden, and sometimes to Perth for vessels drawing 9 ft. of water. There are artificial ponds for the propagation of salmon at Stormontfield, 4 m. above Perth. **Loch Tay,** Breadalbane, is surrounded by mountains, Ben Lawers, 3945 ft. in height, being on its W. side. It receives the Dochart and Lochy Rivs. at the SW., and discharges itself by the Tay at Kenmore, its NE. extremity; 15 m. in length, ½ to over 1 m. in breadth, and 100 to 600 ft. in depth (soundings, *Scot. Geog. Mag.,* 1888, p. 288). Alt. 355 ft.

Tayan, tn., Dutch Borneo, on the Kapuas, 55 m. E. Pontiának.

Te Anau, lake, New Zealand, South I., prov. Otago, near W. ct., surrounded by lofty mountains from 5000 to 7000 ft. high, while the E. shore runs almost directly NNE. and SSW., several long narrow bays project on the W.; its waters flow by the Waiau into Lake Manipori, thence into Tewaewae Bay. Length, 38 m.; breadth, 1–6 m.

Teano, tn., Italy, Campania, prov. Caserta, 13 m. NW. by N. Capua; has trade in corn and oil, and manufacture of copper utensils; residence of a bishop. P. 5300.

Teapa, tn., Mexico, Tabasco, 30 m. S. San Juan Bautista; one of the chief markets of Tabasco. P. (comm.) 6200.

Tearaght, isl., Ire., off W. ct. co. Kerry, bar. Corkaguiny, at the entrance to Dingle Bay. P. 10.

Te Aroha, gold-mining and agricultural locality, New Zealand, North I., Piako co., 70 m. SE. Auckland, at foot of T. A. Mt. (alt. 3200 ft.); has hot medicinal springs. P.<1500.

Teatinos, riv., Colombia, l. bk. trib. of the Upia, SE. boundary of the state of Boyaca. On it was fought the battle of August 7, 1819, in the War of Independence.

Tea Tree, post-tn., Tasmania, Pembroke co., 21 m. from Hobart by road and rail. P.<1500.

Teatree Gully, or **Steventon,** postal-stn., S. Australia, Adelaide co., in 34° 48′ S., 138° 44′ E.; pipe-clay abounds in the neighbourhood. P.<1500.

Te-Aute, post-tn., New Zealand, North I., Hawke's Bay co., 23 m. SW. by S. Napier; has a Maori college. P.<1500.

Te Awaite, settlement, New Zealand, North I., Wairarapa East co., 40 m. ESE. Wellington.

Te Awamutu, tp., New Zealand, North I., Waipa co., 80 m. SSE. Auckland. P.<1500.

Teb, gruop of wells on the road from Sawákin (Suakim) to Tokar, 6 m. NE. Tokar; scene of the rout of Baker Pasha's army, and the subsequent victory of the English in 1884.

Teba, tn., Spain, Andalusia, prov. and 32 m. WNW. Malaga, dist. Campillos; has salt springs, and mill-stone quarries. P. (comm.)<5000.

Tebay (ti'be), eccles. par., Eng., Westmorland, Appleby div., on the Lune, 9½ m. NE. Kendal, 1 m. NE. of its stn. on the L. & NW. and NE. Rlys., PMT.O. P.<1500.

Tebbes, tn., Persia, prov. Irak-Ajemi, 243 m. ENE. Ispahan, starting point of caravans crossing the plains in the direction of Ispahan, Yezd, and Kerman. The town is surrounded by an enormous earthwork, surmounted by towers, and protected by a trench. Exports tobacco, opium, asafœtida, and silk.

Tebernuk, or **Teburnok,** site of Roman, Byzantine, and Mussulman ruins, 22 m. SE. Tunis.

Tebessa, the ancient *Thebeste* or *Theveste,* tn., Algeria, arr. and 106 m. SE. Constantine; has trade in Algerian produce; argentiferous lead-mines in the neighbourhood. The modern town, comprised within the citadel of Solomon, 1300 years old, contains a triumphal arch, built in 213, and other interesting remains. Alt. 2890 ft. Mean temp., yr. 59.6° F., Jan. 44.3°, July 79.5°. P.<3000.

Tebuk, oasis, in the NW. of Arabia, about 290 m. NW. by N. Medina.

Tebulos-mta, peak, Russia, Caucasia, on N. slope of main Caucasus ridge, on boundary between govts. Tiflis and prov. Terek, 42° 35′ N., 45° 19′ E. Alt. 14,781 ft.

Teburba, tn., Tunis, on the Mejerda, 20 m. W. Tunis; has market-gardens; important manufactures of oil, tobacco, and fezes. Its bridge dates from the Spanish occupation.

Teburnuk, the ancient *Thibursicum Bure,* tn., Tunis, 56 m. WSW. Tunis.

Tebworth, P.O., Eng., Bedfordshire, div. and 7½ m. NW. by W. Luton, 2½ m. NE. by N. Stanbridgeford stn.

Tech, small riv., France, dep. Pyrénées-Orientales, flows NE. into the Mediterranean. Length, 49 m.

Tech, Le, vil., France, dep. Pyrénées-Orientales, arr. Céret, 4 m. ENE. Prats-de-Mollo; has quarry of old green marble and gypsum. P.<2000.

Teche Bayou, riv. arm, U.S., Louisiana. Same as **Bayou Bœuf.**

Tecklenburg, tn., Prussia, prov. Westphalia, cap. circle T., 20 m. NNE. Münster, formerly cap. of county T.; ceded to Prussia in 1707. P.<2000.

Tecoanapa, vil., Mexico, Guerrero, on the S. ct., 85 m. ESE. Acapulco.

Tecolm, par., Ire., Queen's co., bar. Ballyadams, 5 m. SW. Athy. P.<250.

Tecolote, settlement, U.S., New Mexico, San Miguel co., 40 m. ESE. Santa Fé.

Tecolutla, vil., Mexico, Vera Cruz, on the E. ct., 120 m. NE. Puebla, in 18° 25′ N.

Tecoma, vil., U.S., Nevada, Elko co., near the E. frontier, 43 m. S. of the NE. corner of the state, on the Central Pacific Railroad. P.<1500.

Tecpam, vil., Central America, Guatemala, 16 m. NNW. Chimaltenango; about 1 m. from the village, on an isolated rock, stood the ancient *Iximche,* destroyed by the Spaniards. P.<4000.

Técsö, comm., NE. Hungary, co. Máramaros, cap. dist. T., 92 m. ENE. Debreczen. P.<4000.

Tecuci, or **Tecuciu,** tn., Roumania, cap. prov. T., 44 m. NW. Galatz. P. 9300.

Tecumseh, post-vil., Canada, Ontario, Essex co., near Lake St. Clair, 8 m. E. Windsor, on a railway. P.<1500.

Tecumseh, vil., U.S., Michigan, Lenawee co., 53 m. SW. by W. Detroit. P.<3000.

Tecumseh, city, U.S., Nebraska, Johnson co., 63 m. S. by W. Omaha. P.<2000.

Tedavnet, par., Ire., NW. co., bar., and 3½ m. N. by W. Monaghan, P.O. (**Tydavnet**); 26,503 ac. P. 5400.

Tedburn St. Mary, par., Eng., Devonshire, St. Thomas union, 4 m. SW. Crediton, P.O.; 4527 ac. P.<750.

Teddesley Hay, par., Eng., Staffordshire, Cannock union, 2 m. NE. Penkridge. P.<250.

Teddington, par. and tn., Eng., Middlesex, Uxbridge div., on the l. bk. of the Thames, limit of tidal flow 2½ m. SSW. Richmond, on the L. & SW. R.; here is the first lock on the Thames. PMT.O., and PM.O. (**Upper T.**). P. 10,100; eccles. par. (**Upper T.**) P. 6200.

Teddington, par., Eng., on the S. border of Worcestershire, Evesham div., 5 m. E. Tewkesbury, 3 m. E. Ashchurch stn. P.<250. See **Overbury.**

Tedham Moss, an upland tract in the S. of the Hexham div. of Northumberland, Eng., about 11 m. SSW. Hexham. Height, 1586 ft.

Tedstone Delamere and **Tedstone Wafer,** two adjoining pars., Eng., Hereford. T. Delamere, div. and 12½ m. E. Leominster, 4 m. NE. Bromyard stn., P.<250; T. Wafer, P.O. (**T. Wafre**), P.<250. See **Edvin Loach.**

Teebane, electoral div., Ire., co. Cavan, dist. Hollywell.

Teelin, P.O., Ire., SW. ct. co. Donegal, bar. Banagh, on T. Bay, 20 m. W. by S. Donegal.

Teelin Head, cape, Ire. See **Malinmore Head.**

Teeranearagh, electoral div., Ire., co. Kerry, dist. Emlagh.

Teerelton, tnld., Ire., W. co. Cork, bar. W. Muskerry, 5 m. S. Macroom. P.<250.

Tees, riv., Eng., rises in Cross Fell, in the SE. of Cumberland, flows SE. and then NE. through **Teesdale,** between Durham on the N., and Westmorland and Yorkshire on the S., into the North Sea. It passes Barnard Castle, forms the S. boundary of the parl. bor. of Darlington, passes Stockton, and below that town forms an estuary, on the S. side of which stands Middlesbrough; it is tidal to Yarm, navigable to Stockton for vessels of 60 tons. On the l. bk. it receives Langley Beck and the Skerne, on the r. bk. the Greta and the Leven. Has a bar at its mouth with 12 ft. water at low, 26–28 ft. at high tide. Area of basin, 708 sq. m.

Teesdale, post-tn., Victoria, Grant co., 20 m. WNW. Gee long. P.<1500.

Teeswater, vil., Canada, Ontario, Bruce co., on a trib. of the riv. Saugeen, 64 m. SW. by W. Collingwood. P.<1500.

Teeton, par., Eng., Northamptonshire, Mid div., 7½ m. NW. by N. Northampton, 2½ m. W. Spralton stn. P.<250.

Teetulpa, goldfields tp., S. Australia, Lytton co., 120 m. E. by N. Port Augusta; gold was discovered in 1886. P.<1500.

Teeworker, P.O., Ire., co. Cavan, 3 m. from Bailieborough, 9 m. from Kingscourt stn.

Tefelne, cape and tn., Morocco. See **Tufelne.**

Tefenl, the ancient *Themisonion,* tn., Asiatic Turkey, Anatolia, dist. and 32 m. SSW. Buldur; barley and other cereals grown; fine pastures; town is surrounded by plane and other trees.

Teffe, tn., Brazil, Amazonas, 325 m. W. Manaos; natural mart for the products of the dist.; formerly a Jesuit mission stn.

Teffont Evias and **Teffont Magna,** two adjoining pars., Eng., Wiltshire, Teffont Magna, Wilton div., 10½ m. W. by N. Salisbury, 2 m. NW. Dinton stn., P.O. (**Teffont**). P. (of each)<250. See **Dinton.**

Tegal, tn., Java, on the N. ct., in about 109° 8′ E., 103 m. NW. by W. Jokjokarta.

Tegea, ancient tn., Greece. See **Tripolis.**

Tegel, comm., Prussia, prov. Brandenburg, govt. Potsdam, circle Niederbarnim, 6 m. NW. Berlin. P.<3000.

Tegernsee, alpine lake, Ger., Upper Bavaria, 27 m. S. by E. Munich, beautifully situated between the Isar and Inn, drained by the Mangfall into the Inn. Length, 4 m.; breadth, 1 m.; depth, 235 ft.; alt. 2400 ft.

Teggiano, tn., Italy, Campania, prov. Salerno, 22 m. SW. by S. Potenza. P. 6100.

Teglio, tn., Italy, Lombardy, prov. and 10 m. E. Sondrio, near the r. bk. of the Adda; has blast-furnaces and forges. Formerly Tellio, whence Val Tellina. P.<3000.

Tegriwelt, Ras, cape, Morocco. See **Sim.**

Tegucigalpa, tn., Central America, cap. Honduras, 125 m. E. by N. San Salvador; centre of a region very rich in gold

and silver ore; has a cathedral and university; since 1880, chosen as the seat of Congress.

Teguise, comm., Canary Is., dist. Arrecife. P. <4000.

Tegulet, vil., S. Abyssinia, 31 m. NW. Ankober, the cap. of Ethiopia after Axum, abandoned last century for Ankober.

Tegur, vil., Brit. India, Bombay, dist. and 15 m. NW. Dhárwár; iron ore smelted. P. <5000.

Tehachapi Pass, U.S. See **Tahichipi.**

Tehallan, par., Ire., NE. co. and 3 m. NE. Monaghan, bars. Cremorne and Monaghan; 5948 ac. P. <2000.

Tehama, or **Tihama.** See **Arabia.**

Tehama, co., U.S., California, crossed by 40° N., and traversed by Sacramento R.

Teheran', or **Tehran'** (the latter being the true Persian pronunciation, the trisyllabic form due to Turkish influence), cap., Persia, about 70 m. due S. of the middle point of the S. shore of the Caspian, situated at the S. base of the Shemran range of the Elburz system, at the E. end of a plain measuring about 90 by 40 m., naturally desert, but now in a large measure irrigated and cultivated. It is about 5 m. in circuit, and enclosed by an earthen wall flanked with towers, a glacis, and a dry trench. Its mosques, colleges, and caravanserais are in good repair; and it has well-furnished shops and bazaars, with palaces of the Persian nobility; but its dwellings are mostly of earth; and in summer it is so unhealthy, that the Shah and the upper classes leave it to encamp on the plains of Sultanieh, about 150 miles NW. The Ark, or royal citadel, is extensive, and comprises, besides the royal harem and apartments, a grand saloon, the public offices, quarters for the royal guards, numerous baths and gardens. On a height near the city is another royal palace, with fine grounds. Manufactures of carpets and iron goods. Its vicinity is fertile, and covered with villages. It became the Persian cap. instead of Ispahan towards the end of last century. On its S. side, and about 25 m. E., are extensive ruins, and one of these localities marks the site of the ancient *Rhages.* Alt. 3800 ft. (Curzon), 4030 ft. (Stebnitzky); meteorological stn. (? at Gulahek), 4739 ft. Mean temp. (3 yrs., 1884–86), Jan. 36.0° F., July 74.5°. P. at the end of the 18th century scarcely 15,000, now (1890) estimated at 60,000 to 160,000, diminished by one-third in summer.

Tehichipa, vil., U.S., California, Kern co., 3 m. from T. summit; gold and marble found here. P. <1500.

Tehre, vil., Persia, prov. Mekran, 12 m. N. Bampur, identified with the ancient *Pura,* cap. of Gedrosia.

Tehri, tn., Central India, 115 m. SSE. Gwalior; within the town is the large fort of Tíkamgarh. P. (1881) 18,300.

Tehuacan, tn., Mexico, state of and 65 m. SE. Puebla; has a mineral spring; had formerly magnificent temples. P. 8000.

Tehuacana, vil., U.S., Texas, Limstone co., seat of Trinity (Presbyterian) University. P. <1500.

Tehuantepec ('tiger mountain'), tn., Mexico, Oaxaca, 200 m. S. by E. Vera Cruz; has a cathedral of date 1530; trade in leather, cotton, silk, cochineal, and indigo. The inhabitants are a mixed race, mostly descendants of Zapatecos, once a powerful tribe of Indians. The old port of Tehuantepec, Puerto Ventosa, is only a bay, affording less shelter than does the bay of Salina Cruz behind its pier. P. 8000.

Tehuantepec, Isthmus of, separating the Gulf of Mexico from the Pacific, has two lagoons in the S., named Upper and Lower Lake. The largest river is the Coatzacoalcos, which flows in a NE. direction to Campeachy Bay; length, 221 m. The S. ct. encloses the Bay of Tehuantepec; width about 130 m. The greatest alt. on the lowest line across the isthmus is about 390 ft. A railway 205 m. long, connecting the opposite sides, has been in progress from both ends for some years; and this is one of the parts of the world where it has been proposed to build a railway for the transport of laden ships. By this route the distance between San Francisco and New York would be rather more than 1000 miles shorter than by the Isthmus of Panama, and more than 700 miles shorter than by the Nicaragua Canal route.

Tehuda, vil., Algeria, prov. and 115 m. SSW. Constantine, spoken of by El-Bekri, in the 11th century, as an opulent and populous place of ancient origin, identified with the Roman station *Thabudeos.*

Teîâsîr, vil., Palestine, *Tirzah* in the O. T., 32° 20′ N., 35° 23′ E., 11½ m. NE. Nablus.

Teifi, riv., Wales, rises in the E. of Cardiganshire, flows SW. then W., separating that county partly from Carmarthenshire and wholly from Pembrokeshire, falls into Cardigan Bay. It passes Lampeter, Newcastle-Emlyn, and Cardigan.

Teigh, par., Eng., Rutland, 4½ m. N. Oakham, 2 m. ESE. Whissendine stn., on the Oakham Canal. P. <250.

Teign, riv., Eng., Devonshire, rises on Dartmoor Forest near the source of the Dart, flows E. then S. to Newton Abbot, where it forms an estuary and flows E. into the English Channel at Teignmouth.

Teignegrace, par., Eng., Devonshire, Ashburton div., 6 m. W. Teignmouth, on the G. W. R. P. <250.

Teignmouth (tēn'mŭth), tn., Eng., Devon, Ashburton div., at mouth of Teign (l. bk.), 6 m. N. by E. Torquay, on the G. W. R. It communicates with the village of Shaldon, on the opposite side, by a wooden bridge of 34 arches with a swing, one of the longest wooden bridges in England. The tidal harbour has a depth available at entrance and quayside of 17 to 20 ft. high water, 3 ft. low water. Resort for sea-bathing; has quay, a fine promenade called the Den, and a sea-wall 2 m. in length. P. 8300; pars., **East T.** P. <2500; **West T.** P. <5000.

Teil, tn., France, dep. Ardèche, arr. Privas, 4 m. N. Viviers; has limestone quarries, from which the hydraulic lime of T. is manufactured and exported to all parts of the world; average annual production, 100,000 tons. P. <3000.

Teilleul, Le, tn., France, dep. Manche, 17 m. SSW. Tinchebrai, arr. and 8 m. SSE. Mortain. P. <2000.

Teima, tn., central Arabia, Shomer, SW. of Nefud, about 220 m. N. by W. Medina, and about 210 m. W. Haïl; the dates of T. are among the best in all N. Arabia. T. has a reservoir, 65 ft. square, where the water is at all seasons at the same level. It is a town of great antiquity, known in the Bible as *Thema,* with ruins ½ m. SW. of the present town. Alt. 3410 ft. P. <2000.

Teinach, vil., Ger., Würtemberg, Black Forest circle, dist. Kalw; has hot and cold water-cure establishment; chalybeate springs. P. <2000.

Teise, small stream, Eng., Kent, flows N. to the Medway, which it joins at Yalding.

Teisendorf, vil., Ger., kgd. Bavaria, govt. Upper Bavaria, dist. Laufen, 10 m. WNW. Salzburg; has saltpetre refinery, iron-works, brewery. P. <2000.

Teissières-les-Boulliès, vil., France, dep. Cantal, arr. Aurillac, 8 m. NNE. Montsalvy; has an iron sulphate spring. P. <2000.

Teita, mts., Africa. See **Taita.**

Teiteiki, lake, apparently occupying an ancient crater on Mount Peiktusan, or Changpai-shan, on the frontiers of Corea and Manchuria, 12 m. in circumference. One of the branches of the Sungari is said to issue from the lake, which is regarded with superstitious veneration by the Koreans.

Teith, riv., Scot., Perthshire, is formed of two headstreams which, after draining Lochs Katrine, Achray, and Vennachar, and Lochs Voil and Lubnaig respectively, unite near Callander and flow SSE. to enter the Tay 2½ m. NW. Stirling.

Teitong, riv., Korea. See **Taidong.**

Teixoso, tn., Portugal, Beira, dist. and 32 m. N. Castello Branco. P. <3000.

Tejeda, Circus of, or **The Caldera** ('boiler'), Canary Is., 17 m. SW. Las Palmas; has a circumference of 22 m.

Tejeda, Sierra, mt. chain, Spain, Andalusia, prov. Granada, NE. of Malaga. Highest point, 7005 ft.

Tejeñ. See **Transcaspian.**

Tejend, the stn. for Karibent, on the Transcaspian Rly., Transcaspian, 94 m. NE. by N. Meshed.

Tejend, riv., Turkistan. See **Heri-Rud.**

Tejo, riv. See **Tagus.**

Tekamah, tn., U.S., Nebraska, Burt co., 38 m. NNW. Omaha. P. <1500.

Tekapo, lake, New Zealand, South I., prov. Canterbury, in the region of the upper Alps. Length, 11 m.; maximum breadth, 6 m.

Tekax, tn., Mexico, Yucatan, 50 m. SSE. Merida. P. 6000.

Tekeh, vil., Asia Minor, prov. Smyrna, 19 m. W. Aidin, site of the ancient *Magnesia ad Meandrum.*

Tekeli, vil., Turkey in Europe, vilayet and 9 m. W. by N. Salonica.

Tekendorf, or **Teke,** comm., Hungary, prov. and 45 m. E. by N. Klausenburg. P. <3000.

Tekes, riv., Russian Turkistan, prov. Semiryechensk, rises in the Khan-Tengri group of peaks of Tian Shan, at an alt. of 10,000 ft., and forms the upper part of Ili R. It flows in its upper part NNW. for 160 m. in a high valley, and, turning N., pierces the mountains, and next joins the Kunges to form the Ili R.

Tekhing, tn., China, prov. Kwangtung, on the l. bk. of the Si-kiang, 95 m. W. Canton.

Tekirdagh, Turkey in Europe. See **Rodosto.**

Tekirova, vil., Asia Minor, on the Gulf of Adalia, 130 m. E. Rhodes. NE. of the village are the ruins of *Phaselis.*

Tekkali, tn., Brit. India, Madras, dist. and 80 m. SW. Ganjam. P. 7100; Hindus, 7100.

Tekke, dist., Asia Minor, on the Gulf of Adalia. It is traversed by various branches of the Taurus system, corresponding to the ancient Pamphylia and part of Lycia.

Tekna, region, W. Africa, extending S. from Morocco (the Wadi Draa) to Cape Bojador. Coast generally inaccessible; only natural harbour Tarfaya.

Tekoa, place named in O. T. See **Tekû'a.**

Tekoa, settlement, U.S., Washington, Whitman co., 35 m. SSE. Spokane Falls.

Tekonda Point, Abyssinia. See **Hadas.**

Tekonsha, vil., U.S., Michigan, Calhoun co., 100 m. W. by S. Detroit. P. <1500.

Tekopuru, post-tn., New Zealand, North I., Hobson co., 94 m. from Auckland by road and rail. P. <1500.

Tekotota, or **Doubtful Island,** isl., Pacific, Tuamotu group, in about 17° S., 142½° W.

Tekrit, the ancient *Birtha*, tn., Asiatic Turkey, Mesopotamia, dist. and 118 m. NNW. Bagdad; of great importance in the time of the Caliphs of Bagdad. Saladin, the hero of the third Crusade, was born in the citadel. P. <2000.

Tekû'a, ruins, Palestine, *Tekoa* in the O. T., 31° 36′ N., 35° 12′ E., 10½ m. S. by W. Jerusalem.

Tekush, country, Turkey in Europe. See **Tikvech.**

Tel, or *Tell,* Arabic, 'mound,' 'hill.'

Telaghma, large tribe of Berbers, Algeria, prov. and 22 m. SW. Constantine, inhabiting a region of high plateaux, numbering more than 5000.

Telamon. See **Talamone.**

Telav, dist. tn., Russia, Transcaucasia, govt. and 105 m. ENE. Tiflis, by highway to Signakh in Kahetia, and 40 m. in a straight line. Founded in 893; cap. of Kahetia till 1797. Ruins of old forts. Alt. 2420 ft. P. 11,214 (Armenians and Georgians).

Telde, tn., Canary Is., on a terrace on the E. ct., 7 m. S. Las Palmas. P. (comm.) 9400.

Telega-de-Grossu, vil., Roumania, Walachia, 19 m. NW. Ploiesti; 1 m. SE. are mines of rock-salt. P. (comm.) <5000.

Telek, tn., Asiatic Turkey, Kurdistan, 23 m. WNW. Arghana, on l. bk. of the Euphrates, here 655 ft. broad, with formidable rapids.

Telekul-tata, or **Till-kul,** group of lakes, Russian Turkistan, prov. of and on r. bk. of Syr-daria, 45° N., 65° E., receives the Sary-su from the N., but their outflow reaches to Syr-daria no more. The Ulun-kul, Ashin-kul, and Sauman-kul, which formerly made one lacustrine basin with T., are close by—this last group receiving the Chu from the E.

Telemark, mountainous dist., S. Norway, cos. (amter) Bratsberg and Söndre-Bergenhus.

Telembinskoye, vil., E. Siberia, prov. Transbaikalia, 60 m. N. Chita. P. <1000.

Telescope Mountains, mts., U.S., California, Ingo co., in about 36° 30′ N., 117° 30′ W.

Telese, vil., S. Italy, 4 m. SSE. Cerreto Sannita, much-frequented bathing-station; has hot sulphureous springs.

Teletskoye (*Altyn-nor,* 'Golden Lake'), lake, Russia, W. Siberia, govt. Tomsk, Altai region, between the snow-clad **Teletskiya Mts.** and the Abakan Mts. Most picturesquely situated in a deep valley. Receives the Chulyshman, its outflow being the Biya. Frozen from December to end of March, but the ice always thin. A few settlements on N. shore. Alt. 1600 ft.; 42 m. long; 950 yds. to 4 m. wide; max. depth, 135 fathoms; area, 110 sq. m.

Telfair, co., U.S., Georgia, intersected by 32° N. and 83° W.

Telford, stn., Canada, prov. Ontario, on the C. P. R., 1333 m. by rail W. Montreal, 91 m. E. Winnipeg.

Telford, post-tn., Victoria, Moira co., 46 m. NW. by W. Beechworth. P. <1500.

Telfs, tn., Austria, Tirol, on the l. bk. of the Inn, 21 m. W. by N. Innsbruck. P. <3000.

Telgte, tn., Prussia, prov. Westphalia, circle and 8 m. E. by N. Münster; place of pilgrimage, with a miracle-working image of the Virgin Mary. P. <3000.

Tellbon, isl., Siam. See **Pulo Tellbon.**

Telica, volcano, Central America, republic of Nicaragua, in the Marrabios Range. Alt. 4190 ft.

Telisarhe, valley, Tripoli, W. Fezzan, about 124 m. W. Murzuk; has remarkable sculptures, including representations of oxen now unknown in the country.

Telkef, tn., Turkey in Asia, vilayet, sanjak, and 11 m. NNW. Mosul. P. 5000.

Tell, or *Tel,* Arabic, 'mound,' 'hill.'

Tell, rainy, well-watered, fertile dist. of Barbary, Africa, as distinguished from the upper plateaux; a country of undulating mountains. Once the granary of Rome; wheat and barley are still the chief products.

Tell, city, U.S., Indiana, Perry co., on the r. bk. of the Ohio, 57 m. WSW. Louisville (Ken.). P. <3000.

Tell-Abu-Tumeis, volcanic cone, N. of Hauran, Palestine, beyond Jordan. Alt. 5250 ft.

Tell, Et-, vil., Syria, 56 m. SW. Damascus, a mile or two to the N. of ruins supposed to be those of Bethsaida. See **Ed Dikkeh.**

Tell Amarna, mound on the site of the ancient *Arsinoë,* Egypt, about 180 m. by river above Cairo. Tablets containing important cuneiform inscriptions discovered here in 1887. See *The Tell Amarna Tablets,* by Major C. R. Conder, R.E., London, 1893.

Tell 'Arâd, hill, Palestine, *Arad* in the O. T., 31° 17′ N., 35° 7′ E., 20 m. E. Beersheba.

Tellarought, par., Ire., co. Wexford, bar. Shelburne, 4 m. SE. New Ross. P. <250.

Tell Ashterah, vil., Palestine, *Ashteroth Karnaim* in the O. T., 32° 49′ N., 36° 0′ E., 28 m. E. Tiberias; has remains of a thick wall.

Tell 'Asûr, mt., Palestine, *Baal Hazor* in the O. T., 31° 59′ N., 35° 16′ E., 14 m. N. by E. Jerusalem. Alt. 3315–3340 ft.

Tell Beni Amran, tn., Upper Egypt, prov. Siut, or Assiut, on r. bk. of the Nile, 6 m. SSE. Mallawi; has ruins of an ancient Egyptian town. P. <3000.

Tell D'aûk, site, Palestine, *Beth Dagon* in the O. T., 32° 42′ N., 35° 7′ E., 16 m. S. by E. Acre.

Tell Der'ala, site, Palestine, *Succoth* in the O. T., 32° 5′ N., 35° 34′ E., 22 m. ESE. Nablus.

Tell Dôthân, ruins, Palestine, *Dothan* in the O. T., 32° 25′ N., 35° 17′ E., 13½ m. N. by W. Nablus.

Tell-el-Amarna. See **Tell Amarna.**

Tell-el-Barud, vil., Egypt, 20 m. WNW. Tanta; near the village is the site of the ancient city of *Naucratis.*

Tell-el-Hesy, ruins of an old Canaanitish stronghold, Palestine, perhaps the *Lachish* of the O. T., 31° 32′ N., 34° 43′ E., 16 m. E. by N. Ghuzzeh (ancient Gaza). Among the ruins have been found evidences of a long and varied history, from rude palæolithic implements and relics of pre-Israelitish or Amorite times down to the 5th century B.C.; various sorts of pottery, &c.

Tell-el-Jeljul, Palestine. Same as **Jiljûlieh.**

Tell-el-Kâdy, ruins, Palestine, *Dan* in the O. T., *Lais* in classical writers, 33° 15′ N., 35° 39′ E., 27 m. E. Tyre.

Tell-el-Kebir, vil., Egypt, 18 m. E. by S. Zagazig; scene of the victory of Sir G. Wolseley over the forces of Arabi Pasha. P. <2000.

Tell-el-Milh ('salt hill'), *City of Salt* in the O. T., ruins, Palestine, 31° 13′ N., 35° 1′ E., 14 m. E. by S. Beersheba.

Templeuve, comm., Belgium, prov. Hainaut, arr. Tournai; noted for its buter. P. <4000.

Templevanny, electoral div., Ire., co. Sligo, dist. Boyle.

Templin, tn., Prussia, prov. Brandenburg, cap. circle T., 43 m. N. Berlin, between several lakes which communicate with the Havel by means of the navigable canal T., length 7 m.; has manufactures of agricultural machinery, and an old wall with three gates. P. <5000.

Tempo, tn., Ire., E. co. Fermanagh, bar. Tirkennedy, 8 m. ENE. Enniskillen, PMT.O. P. <500.

Temposan, fort, Japan, Honshiu I.; the lighthouse of Osaka is situated in 34° 40′ N., 137° 26′ E.

Tempsford, par., Eng., Bedfordshire, Biggleswade div., on the Ivel, 7½ m. E. by N. Bedford, 1 m. NW. by W. of its stn. on the G. N. R., P.O. P. <500.

Temryuk, dist. tn. and growing seaport, Russia, N. Caucasia, govt. Kubañ, on N. ct. of Tamañ Penin., 98 m. WNW. Ekaterinodar, 45° 17′ N., 37° 22′ E.; seat of Turkish fortress *Adass* until 1774; mineral mines close by. P. (1865) 6610; (1892) 15,420.

Temuco, tn., Chile, cap. prov. Cautin, 77 m. NNE. Valdivia. P. <4000.

Temuka, post-tn., New Zealand, South I., Geraldine co., 10 m. NNE. Timaru. P. <1500.

Temulga, vil., Algeria, prov. and 92 m. WSW. Algiers, arr. Orléansville; rich iron mine worked. P. <2000.

Temurt, Moorish word, in Senegal signifying 'marsh.'

Tenafly, tn., U.S., New Jersey, Bergen co., 11 m. E. by N. Paterson. P. <1500.

Tenampua, ruined tn., Central America, Honduras, 19 m. SE. Comayagua.

Tenan, tn., Portuguese E. Africa, Gaza-land, 182 m. S. by W. Sofala.

Tenancingo, tn., Mexico, cap. dist. T., 14 m. S. Toluca; has mulberry trees. Alt. 6030 ft. P. 8500.

Tenandry, eccles. par., Scot., Perthshire, Blair Athole, Dull and Moulin pars., on riv. Garry, 1 m. S. Killiecrankie stn. P. <500.

Tenant's Harbour, vil., U.S., Maine, Knox co., on Penobscot Bay, 15 m. SW. Rockland. P. <1500.

Tenasserim, tn., Lower Burma, T. div., 40 m. SE. Mergui, and 33 m. from the mouth of the Tenasserim R.; once an important city, founded by the Siamese in 1373. There is a floating pontoon jetty for coasting steamers. P. <5000. See **Burma.**

Tenasserim, riv., Lower Burma, formed by the junction of the Great and Little T., flows S. between the Yoma Range and

the Myin-molek-kat Mts. It has several mouths; the two principal ones are separated by Mergui I. Large boats ascend as far as the town of T.

Tenaun, tn., Chile, prov. Chiloe. P.<2000.

Tenay, tn., France, dep. Ain, arr. Belley, 4 m. ESE. St. Rambert; has manufactures of imitation Portland cement, and wire gauze. P.<4000.

Tenbury, par. and market-tn., Eng., Worcestershire, on the r. bk. of the Teme, Bewdley div., 16 m. WSW. Kidderminster, on the G. W. R. and L. & NW. & G. W. Joint Rly.; has trade in hops and cider, and malting. Market-day, Tu. Mean rfall. (Orleton, alt. 200 ft., 1866–80), yr. 33.1 in. 5582 ac. P.<2500.

Tenby, mun. bor. (since Edward III.), contributory parl bor. [**Pembroke**], seapt., and market-tn., Wales, 9 m. E. Pembroke, in the diocese of St. Davids, on a headland overlooking Carmarthen Bay, on branch of S. Wales R. (G. W. R.). Some fishing trade, but traffic in the port is unimportant. The port has a depth at high water ordinary springs of 20 ft., ordinary neaps of 10 ft. Coal mined. Ruins of ancient walls and castle; it is a favourite bathing-place, owing to its fine sands, climate, and scenery. Market-days, W. and S. Mun. bor. P. (1801)<1000; (1891)<5000.

Tence, tn., France, dep. Haute-Loire, arr. and 9 m. E. by S. Yssingeaux, 23 m. S. by W. St. Étienne; has extensive manufactures of lace, ribbon, and velvet. P.<2000.

Tench Island. See **Squally Island.**

Tencin, vil., France, dep. Isère, on the Isère, arr. and 15 m. NE. by E. Grenoble. P.<2000.

Tenda, tn., Italy, Piedmont, prov. Cuneo, 21 m. NNW. San Remo. The pass across the Maritime Alps, known as the **Col di Tenda,** is a few miles to the N. Alt. 2570–2885 ft. P.<2000. See **Alps,** PASSES AND RAILWAYS, **I.** (2).

Tenda, riv., S. Africa. See **Loange.**

Tendo, lagoon, Africa, Ivory Coast, E. branch of Aby or Ahy lagoon; has outlet on the E. by the Tanoe. Length, 37 m.; average breadth, 6–9 m.

Tendre, Mount. See **Jura.**

Tendring, par., Eng., Essex, div. and 8½ m. E. Colchester, 1½ m. N. Weeley stn., P.O. P.<1000.

Tenduf, tn., Africa, W. Sahara, about 295 m. SSE. Mogador; an increasing town, founded in 1852. Settled population from 600 to 1000.

Tendukhera, tn., Brit. India, Central Provs., dist. and 27 m. NW. Narsinghpur; has smelting industry; the iron-mines 2 m. SW. of the town yield excellent ore. P.<5000.

Tenedos, isl., W. ct. Asia Minor, 5 m. NW. Alexandria Troas. On its NE. side is the town T., vilayet Jezairi-Bahri-Sefid, sanjak Lemni. The soil is stony; no pastures or fruit-trees except figs and almonds; good wine, climate healthy and temperate. Exports annually about 4,114,000 gallons of wine to the European ports on the Mediterranean; inhabitants vine-dressers, sailors, or fishermen. Length, 5 m.; breadth, 2 m.; area, 16 sq. m. P. 4100; Orthodox Greeks, 2800; Moham. 1300 (Cuinet).

Tenenku, tn., Africa, W. Sudan, Massina, 87 m. NE. Sansandig; important market.

Tenerife, or **Teneriffe,** the largest of the Canary Is., in the Atlantic, 37 m. W. the Great Canary; surface mountainous, soil mostly volcanic, producing maize, wheat, sweet potatoes, and the fruits of S. Europe. It is the principal seat of the vine culture in the Canaries; orchil, barilla, and silk are also products. Principal towns, Santa Cruz (the cap.), Orotava, Laguna, Icod, and Guiamar. Length, 53 m.; breadth, 28 m. Alt. 1867 ft. Rfall. (10 yrs.), 33.30 in. The **Peak of T.,** or **Pico-de-Teyde,** is a famous volcanic mountain, on NW. of island, in 28° 16′ N., 16° 39′ W. Alt. 12,190 ft.

Tenes, tn. and artificial port, Algeria, arr. Orléansville, on the N. ct., 103 m. W. by S. Algiers. P.<2000. **Cape Tenes,** 3½ m. to the NE., with a lighthouse.

Tenetu, vil., W. Africa, Wasulu, in about 11° 10′ N., 7° 19′ W.; important market. Alt. 1245 ft. (Binger).

Tengan-fu, tn., China, prov. Hupe, 130 m. ENE. Ichang.

Tengchou-fu, tn., China, prov. Shantung, on the Strait of Pechili, 40 m. NW. Chi-fu; one of the ports designed for foreign trade by the treaty of Tientsin, but owing to its shallowness at the present day its place has been taken by Chi-fu.

Tengeszem ('eyes of the sea'), name given to a number of small lakes in the Tatra, N. Hungary, about the source of the Feher-Vág (Weisser Waag).

Tengrela, walled tn., W. Africa, in the Mandingo country, in about 10° 12′ N., 5° 57′ W.; inhabitants trading and agricultural. Alt. 1435 ft. (Binger).

Tengri Nor (or **Nur**), Mongol, Tibetan **Nam-tso,** or **Namcho,** fresh-water lake, Tibet, to the S. of 31° N., and W. of 91° E., about 80 m. N. Lhassa; as its names signify, it is the 'Celestial lake' which every year thousands of pilgrims visit, on account of the convent of Dorkia, on the W. shore of the lake, and other monasteries. The outlet of the lake, at its NW. corner, was said by the Pandit Nain Singh to join the riv. Nakchu, supposed to be the upper course of the Salwín, but this is now considered doubtful. Length, 50 m.; greatest breadth, 29 m.; drained W. from its NW. extremity. *Jour. R. G. S.*, 1877, p. 110.

Tengure, riv., Africa. See **Kagera.**

Tengwan, tn., China. See **Sachu.**

Tengyueh-ting, tn., China. See **Momein.**

Teniet-el-Had, tn., Algeria, prov. and 86 m. SW. Algiers, arr. Miliana; in the neighbourhood are superb cedar forests (*Cedrus atlantica* with others) celebrated in all Algeria. Alt. 3750 ft. Rfall. (5 yrs.), 20.05 in. P.<2000.

Teninber. See **Timor-Laut.**

Tenino, vil., U.S., Washington, Thurston co., 13 m. SSE. Olympia. P.<1500.

Tenje, comm., Hungary, Croatia-Slavonia, co. Virovitica, dist. Osjek. P.<4000.

Tenkarai, tn., Brit. India, Madras, dist. and 28 m. ESE. Tinnevelli. P.<5000.

Tenkási, tn., Brit. India, Madras, dist. and 30 m. NW. by W. Tinnevelli, on Chittar R.; is a centre of trade; possesses a temple of great sanctity. P. 12,900; Hindus, 8900.

Tenke, comm. and health resort, Hungary, co. Bihar, dist. T. P.<4000.

Ten Mile Bank, P.O., Eng., Norfolk, 4 m. SW. Downham Market.

Ten Mile Bottom, coal-mining vil., U.S., Pennsylvania, Venango co., 7 m. SE. Oil City. P.<1500.

Tennant's Creek, stn. on Overland Telegraph, S. Australia, N. Terr., 1354 m. from Adelaide.

Tennessee, riv., U.S., N. America, the largest affluent of the Ohio, formed by the union of the Holston and Clinch, two rivers from Virginia, near Knoxville; flows SW. then NW. through E. Tennessee, Alabama, W. Tennessee, and Kentucky, joins the Ohio at Paducah by a mouth 600 yards across, 12 m. below the mouth of the Cumberland. Total course to the head of the Holston 1100 m., and it is navigable for steamers from the Ohio for 300 m. to the Muscle Shoal Rapids, when a railway supplies the missing link to Knoxville, above which it is navigable for 500 m. more, to the Suck, a mountain gap, in 34° 50′ N., through which it breaks with a magnificent fall. Chief affluents, the Hiawassee, Hatchee, and Duck Rivs. The whole river has a mean fall of 2 ft. per mile. Length, 1200 m.; area of basin, 41,600 sq. m.

Tennessee, vil., U.S., Illinois, McDonough co., 8 m. SW. Macomb by rail; has coal-mines. P.<1500.

Tennessee, one of the states of the United States of America, lying between the Mississippi R. and the Great Smoky range of the Appalachians, S. of Kentucky, and W. of N. Carolina. Extending thus from E. to W., its surface is exceedingly varied: first, the range of the Great Smoky Mts., with peaks 6600 ft. high (Cambrian); then the Valley of East T. (Knoxville, 980 ft.), which is part of the Great Valley of the Alleghanies, here occupied by the headstreams of the Tennessee R. (Silurian); thirdly, the Cumberland Plateau (Carboniferous), about 2000 ft. high (with Mr. Hughes' Rugby). W. of the plateau is the very fertile valley of middle T. (Silurian), through which flows the Cumberland R.; to the W. of the lower T. a fertile plain (Cretaceous and Eocene) descends to the bluffs that overlook the bottom lands of the Mississippi (Pleistocene). Along the Mississippi R. the state has water front for about 150 m. The climate is mild [**Memphis, Knoxville, Nashville**], and though unhealthful in the bottom lands, everywhere else very salubrious. W. of the Cumberland Plateau the state is essentially agricultural, producing maize, wheat, oats, tobacco, and cotton. Swine constitute over one-half the live stock. In the E. minerals abound; 5000 sq. m. of the Appalachian coalfield lie upon the Cumberland plateau. Iron-making has advanced rapidly in late years, though not equalling Alabama's rate of output. T. marble is extensively used, especially in interiors of buildings and furniture, very fine qualities of many different colours being quarried in Hawkins, Knox, and Loudon counties. Upon the mountains are forests of pine, hemlock, chestnut, and walnut, yielding tan bark, lumber, tar, &c. Common school education suffers from lack of efficient superintendence and multiplicity of weak schools. A larger proportion of the white children are enrolled than of negroes, and they attend more regularly. The University of T. is at Knoxville. Nashville is the seat of four universities, two for negroes exclusively. Nashville, the capital and largest city, Memphis, Chattanooga, Knoxville, and Jackson are the chief towns. The Spanish under De Soto crossed the Mississippi at the site of Memphis in 1541. By the charter of Charles II., N. Carolina included the land now T., which was ceded by N. Carolina to the general government, 1784. It became a terr. in 1794, and a state in 1796. Area, 42,050 sq. m. P. 1,767,500. See **United States,** table. [**C. H. L.**]

Tennessee, Little, riv., U.S., rises in N. Carolina, and flows W. into Tennessee, joining the Holston in about 35° 47′ N. Length about 150 m.

Tenningering, postal-centre, Queensland. See **Mount Perry.**

Tennstedt, tn., Prussia, prov. Saxony, circle Langensalza, 14 m. NNW. Erfurt. P.<3000.

Tenochtitlan, Aztec name of Mexico.

Tenoes, vil., Portugal, Entre Douro e Minho, dist. Braga; the most frequented place of pilgrimage in the N. of Portugal. P.<2000.

Tēnos (tinos), isl., Greece, one of the Cyclades, separated from Andros I. by Steno Passage, 32 m. SE. of the SE. point of Eubœa. Area, 79 sq. m. (Wisotzki). P. (1889) 11,442.

Tēnos, small port, SW. ct. Tēnos I., Greece. P.<3000.

Tenryu Gawa, one of the largest rivs. in Japan, rises in the centre of the isl. of Honshiu, its headstreams forming the lake of Suva, and flows SSW. into the Pacific Ocean. Length over 160 m.

Tensas, par. (co.), U.S., Louisiana, on the Mississippi, crossed by 32° N.

Ten'saw, or **Tensas,** bayou, U.S. See **Alabama,** riv.

Tensift, Wadi, riv., Morocco, flows W. a few miles to the N. of Morocco, and enters the Atlantic just N. of 32° N. Length, 124 m.

Tenterden, mun. bor. (since Henry VI.), par., and market-tn., Eng., Kent, Ashford div., 17 m. SE. Maidstone, in the diocese of Canterbury, on an eminence, the nearest stns. (SE. R.) being Appledore and Headcorn. The trade is local and unimportant. Handsome church, with 'perpendicular' tower. Anciently the sea came near T., and it was united to the Cinque Port of Rye (8½ m. S. by E.). Market-day, F. Alt. 190 ft. Mean rfall. (1866–80), yr. 29.7 in. Mun. bor. and par., 8948 ac., P. (1801)<2000; (1891)<3500.

Tenterfield, border tn., New South Wales, Clive co., 70 m. NW. Grafton; important deposits of gold, silver, and tin occur in the dist., and other minerals have been found. Alt. 2800 ft. Mean temp., yr. 58.7° F., Jan. 70.2°, July 46.6°; rfall. (16 yrs.), 29.71 in.

Tentergate, part of par., Eng., Yorkshire, W. Riding. See **Scriven with Tentergate** and **Knaresborough.**

Tentugal, tn., Portugal, Beira, dist. and 9 m. WNW. Coimbra. P.<3000.

Tenui, post-tn., New Zealand, North I., Wairarapa, North co., 100 m. SSW. Napier. P.<1500.

Teny Cape, post-vil., Canada, Nova Scotia, co. Hants, 24 m. from Newport. P.<1500.

Teo, comm., Spain, Galicia, prov. and 42 m. SSW. Corunna, dist. Padron. P. 7000.

Teodorano, vil., Italy, Emilia, prov. and 11 m. SSE. Forlì; has sulphur-mine; manufacture of gunpowder; flour-mill. P. (comm.)<4000.

Teolo, vil., Italy, Venetia, prov. and 11 m. SW. Padua; has hot sulphureous spring. P.<2000.

Teora, tn., Italy, Campania, prov. Avellino, 28 m. ENE. Salerno. P. 6000.

Teotihuacan. See **San Juan de Teotihuacan.**

Tepágarh, hill range, Brit. India, Central Provs., in 20° 29′ N., 80° 34′ E., crowned by the old fortress of T. Alt. 2000 ft.

Tepe, Turkish, 'hill,' 'mountain.'

Tepeaca, tn., Mexico, state of and 22 m. E. by S. Puebla, situated near the outer slope of the plateau. T. has important strategic value, and was, after Vera Cruz, the first town founded in Mexico by the Spaniards. P. (comm.) 7300.

Tepehuanes, Indians, Mexico, inhabiting valleys in W. of Sierra Madre; now Christianised, retaining their own language in some dists.

Tepeleni, tn., Turkey in Europe, prov. Ergeri, on the Viosa, 75 m. SSE. Durazzo.

Tepexpan, tn., Mexico, state of and 18 m. NE. Mexico.

Tepeyacac, rock, in Mexican valley, 3 m. NNE. Mexico, on which is the church of Guadalupe, formerly one of the richest in the world, the Virgin of Guadalupe being the patron saint of the Indians.

Tepic, tn., Mexico, Jalisco, 30 m. W. by N. Guadalajara; has manufactures of cotton stuffs, cloth, and cigars; its prosperity has been due to its salubrity. It is the residence, during the rainy season, of most of the wealthy inhabitants of San Blas. Alt. 3460 ft. Mean rfall. (7 yrs.), 42.9 in. P. 14,000.

Tepic, one of the two terrs. of Mexico, on the lower course of Rio Grande de Santiago-Lerma, around T. town, the latter being a high place (about 3000 ft.); considered as a sanitarium for the swampy littoral. See **Mexico,** table.

Tepl, tn., Austria, Bohemia, 16 m. S. Karlsbad; health resort. P.<3000.

Tepli, peak, Russia, Caucasia, prov. Terek, dist. Vladikavkaz, on boundary of govt. Kutais, main Caucasus range, 42° 44′ N., 43° 38′ E. Alt. 14,510 ft.

Teplitz, tn. and health resort, Austria, Bohemia, 30 m. S. Dresden, 15½ m. NW. by W. Leitmeritz; its bathing establishment is annually frequented by 11,000 to 12,000 invalids; has hot sodium carbonate springs, 77°–83° F. Here the first treaty of the Holy Alliance was signed in 1813 by the Emperors of Russia and Austria and the King of Prussia. Alt. 750 ft. P. 17,500; including **Schönau,** P. 20,300.

Tepong, tn., Cambodia, 220 m. WNW. Saigon.

Teporoporo, cape, New Zealand. See **Turnagain.**

Teposcolula, tn., Mexico, state of and 63 m. NW. by W. Oaxaca.

Tepoto, tn., French W. Africa, on the coast, in 2° 1′ N.

Te Puke, post-tn., New Zealand, North I., Tauranga co., 108 m. SE. by S. Auckland. P.<1500.

Tequendama, cataract. See **Bogotá.**

Tequila, tn., Mexico, Jalisco, 47 m. WNW. Guadalajara; noted for the brandy named after the town. P. (comm.) 6800.

Ter, riv., Eng., Essex, flowing SE. and S. through the Chelmsford and Maldon div., trib. of the Chelmer, which it joins on the l. bk. 5⅓ m. E. by N. Chelmsford.

Ter, riv., in the NE. of Spain, provs. Barcelona and Gerona, flows first S. from the Pyrenees (Puigmal), then E. past Gerona into the Mediterranean; the T. serves a large number of water-mills and factories of all sorts. Not navigable for ships or rafts. Length, 109 m.

Ter, isl., Red Sea. See **Jebel Ter.**

Tera, riv., Spain, Leon, prov. Zamora, r. bk. trib. of the Esla, flows on the whole E.; not navigable for ships or rafts. Length, 93 m.

Terai. See **India,** Vegetation.

Tera-kako, penin., E. ct. New Zealand, North I., bounding the entrance to Hawke Bay on the NE.

Teramne, tn., Abyssinia, Tigre, 50 m. N. Adowa, formerly an important town.

Teramo, tn., Italy, Abruzzi e Molise, cap. prov. T., on the Tordino, 32 m. NW. Chieti; has silk-spinning. Alt. 870 ft. P. 9700.

Terang, post-tn., Victoria, Hampden co., 25 m. NW. Warrnambool; dairying is extensively carried on. P.<1500.

Terapse, islet. See **Plane.**

Terara, vil., New South Wales, included in dist. of Shoalhaven (*q.v.*).

Terawhiti, former gold-mining locality, New Zealand, North I., Hutt co., in 41° 17′ S., 174° 38′ E. P.<1500.

Terawhiti, Cape, New Zealand, SW. ct. of North I., in about 41° 17′ S.

Terceira, one of the Azores Is., in the Atlantic Ocean, central group, NE. of Fayal and San Jorge; volcanic, though for the time extinct. The last eruption took place in 1761. Surface mountainous, soil highly fertile. Highest point Caldeira de Santa Barbara, alt. 3500 ft. On its S. side is the town Angra, formerly cap. of the Azores, in 38° 38′ N., 27° 13′ W. Estimated area, 222 sq. m.

Tercero, riv., Argentine Republic, provs. Córdoba and Santa Fé, after an E. course joins the Paraná 68 m. below the influx of the Salado, whence it is navigable for barges to the pass of Fereira, 100 m. SE. Córdoba.

Tercis, vil., France, dep. Landes, arr. and 4 m. SW. Dax; has an establishment using hot mineral spring. P.<2000.

Terdál, tn., India, Bombay, 50 m. WSW. Bijápur. P. (1881) 5800.

Terek (**Terek Daban', Davan',** or **Dawan'**), pass across the Tian Shan Mts., 52 m. NNE. the Kara-kul (lake, Pamirs), in about 39° 55′ N., 73° 40′ E., on the route from Kashgar to Gulcha (Fergana). Alt. estimated at from about 12,200 to 13,100 ft.

Terek, Armenian **Terkh,** Georgian **Terchi,** or **Lomekhi,** riv., Russia, N. Caucasia; rises in the Main Caucasus Range at Zilga-khokh Mt., and is joined by the Little T. at Kobi. It then pierces the main range in the renowned Darial gorge at the foot of Kazbek, falling from an alt. of 7010 ft. to 2063 ft., and, issuing from it at Vladikavkaz, on the high plains which border the Caucasus on the N., it makes a great bend to NW. before assuming its E. course, past Mozdok (441 ft.) and Kizlyar (29 ft. below the sea-level), towards the Caspian Sea, which it enters by several branches: Prorva, Talovka, Old T., and New T., thus forming a delta 60 m. wide. In its lower course it flows at a higher level than the surrounding plains and is kept by dams, but often makes inundations. It does not freeze every year, only carrying floating ice in the winter. Part of its water is utilised for irrigation, by means of the 146 m. long canal of Eristov. Chief tribs. Kambilei and Sunzha, r. bk.; Ardon, Baksan, and Malka, l. bk.. Length, 382 m.

Terek, Russian **Terskaya Oblast,** a prov. of Russia, N. Caucasia, bound by Stavropol on N., Caspian Sea on E., Daghestan, Tiflis, and Kutais on S., Kubañ on W. It has on its S. boundary the main Caucasus range, from Mount Elbrus to Kazbek, and nearly one-third of its area is occupied by high mountains, the remainder being high plains gently sloping N., and the depression of the Terek, which mostly is a sandy desert on the l. bk. of this river. Mineral springs at and about Pyatigorsk (Essentuki, Kislovodsk). Climate severe, the average temp. being: at Pyatigorsk (1850 ft. above the sea), yr. 49.6°, Jan. 39°, July 70°; Vladikavkaz (2230 ft.), yr. 47.7°, Jan. 23°, July 69°. Yearly rfall., 30 in. on mountain slopes, and 10 to 20 in. on the Steppes. Watered by **Terek** (*q.v.*) and tribs. Population very mixed: Great and Little Russians 275,000, Caucasians (Cherkeses, Kabardians, and various mountaineers)

368,000, Osses 88,000, Tatars 60,000, and Armenians 8000. Part of the terr. belongs to the **Terek Cossacks,** who have their own separate organisation. Agriculture extensively carried on, so that the prov. becomes a granary for Russia. Vineyards and tobacco plantations. Considerable cattle-breeding. Fishing on lower Terek. Manufactures in infancy. Naphtha wells begin to be worked, and are very promising at Groznyi; silver is extracted at Sadonsk. Trade suffers from want of roads. The railway from Russia (Rostov) does not go beyond Vladikavkaz, at the foot of the Caucasus, but has a branch to the mineral waters of Pyatigorsk (Essentuki and Kislovodsk), and a main line running E. from Beslan junction to Petrovsk, on Caspian Sea. Divided into seven dists.: Vladikavkaz (cap. of prov.), Groznyi, Kizlyar, Nalchik, Pyatigorsk, Sunzhenskiy, and Khasav-yurt division of nomads. Area, 23,548. P. (1884) 615,660; (1892) 798,900.

Terektyntau, mt. chain, central Asia, stretching from Turugart Pass to the valley of the Aksai; many of its summits are over 16,400 ft. high. Principal passes, Turugart (11,485 ft.) and Terekti (12,600 ft.).

Terenure, tn., Ire., co. Dublin. See **Roundtown.**

Terespol, tn., Russian Poland, govt. and 58 m. ESE. Siedlce, on l. bk. Bug, opposite Brest-Litovsk. P. <5000.

Termoli, tn., on the E. ct. of Italy, Abruzzi e Molise, prov. Campobasso, 46 m. NW. by N. Foggia; the only port in the prov. of Campobasso. Seat of a bishopric. P. <5000.

Termon, electoral div., Ire., co. Cavan, dist. T., Bailieborough union.

Termon, P.O., Ire., co. Donegal, 8 m. from Millford.

Termon, tnld. and fishing harbour, Ire., W. co. Mayo, bar. Erris, 38 m. W. Ballina. P. <250.

Termonamongan, par., Ire., co. Tyrone, bar. W. Omagh, on riv. Derg, 3 m. SW. Castlederg; 45,401 ac. P. <5000.

Termonbarry, par., Ire., E. co. Roscommon, bar. N. Ballintober, 5½ m. W. by N. Longford, on the r. bk. of the Shannon; 8540 ac. P. <2500.

Termoncarragh, tnld., Ire., NW. ct. co. Mayo, bar. Erris, 37 m. W. by N. Ballina, P.O. P. <250.

Termonde, comm., Belgium. See **Dendermonde.**

Termoneeny, par., Ire., co. Londonderry, bar. Loughinsholin, on riv. Moyola, 3 m. SE. Maghera; 4801 ac. P. <1500.

Termonfeckin, par. and tn., Ire., S. co. Louth, bar. Ferrard, 4 m. NE. Drogheda, PM.O. Par. 6307 ac., P. <2000; tn. P. <250.

Termonmaguirk, par., Ire., co. Tyrone, bars. E. Omagh and Upper Strabane, contains Six Mile Cross town; 41,077 ac. P. 7000.

Termon Rock, Ire. See **Carrickmore.**

Tern, riv., Eng., in N. Staffordshire and Shropshire, flows W. then S. to the Severn, which it joins 4 m. SE. of Shrewsbury.

Tern, or **Tön,** tn., Siam, on the Menam-wang, 50 m. N. by E. Rahang.

Ternanteuil, vil., France, dep. Deux-Sèvres, arr. and 6 m. NNE. Niort; has magnificent ruins of the feudal fortress of Coudray-Salbart. P. <2000.

Ternata, important dist., Africa, Morocco, 124 m. SE. Morocco; has five markets; trade chiefly in the hands of Jews.

Ternate, isl., Eastern Archipelago, one of the Molucca Is., W. of Halmahera I., in 0° 50′ N.; created entirely by a still active volcano, with alt. of 5410 ft.; fifteen great eruptions have occurred during three centuries. Climate healthy. The prov. of T. includes the N. isls. of the Moluccas, a part of E. ct. of the Celebes Is., and the Dutch possessions in New Guinea. The town of T. stretches along the E. ct. of the island; it is the cap. of sultanate, and prov. of T. The harbour has no bar; vessels load and discharge by longboats and native boats. There is a government quay, and a private pier. Area, 25 sq. m.

Terneuzen, comm., Holland, prov. Zeeland, on the l. bk. of the W. Scheldt, at the mouth of the ship-canal to Ghent, 13 m. SE. by E. Flushing. Depth of 18 ft. over sill at ordinary tides. P. 6300.

Terni, tn., Italy, Umbria, prov. Perugia, on the Nera, 29 m. ENE. Viterbo; has large iron and steel works, the most important in central Italy. Birthplace of the Emperor Claudius; also the supposed birthplace of the historian Tacitus. In the neighbourhood are the celebrated Cascade delle Marmore ('marble falls'), on the riv. Velino (560 ft., upwards of 300 ft. in one leap), at its confluence with the Nera, and hence frequently called the falls of the Nera. The enormous water-power afforded by these falls is now utilised in the iron-works. P. 10,000.

Ternois, country in Artois, France, now in dep. Pas-de-Calais, a part of the ancient *Pagus Tarvannensis.*

Ternovka, vil., Russia. See **Novo-Georgievskoye.**

Ternovo, tn., Turkey in Europe, Macedonia, vilayet and 4 m. W. Monastir. P. about 5000.

Terny, vil., Russia, govt. and 80 m. NW. Kharkov, 12 m. from Kursk-Kiev Rly.; large tobacco plantations. P. 9400.

Terodant, tn., Morocco. See **Tarudant.**

Teror, tn., Canary Is., 15 m. SW. Las Palmas, in a delightful valley, but threatened by the instability of the easily decomposed soil. P. (comm.) <5000.

Terowie, post-tn., S. Australia, Kimberley co., 80 m. SE. by E. Port Augusta. Alt. 1632 ft. P. <1500.

Terpyeniya Guba, bay. See **Patience Bay.**

Terraba, riv., Central America, Costa Rica, flows W. from the central range into the Pacific. Little known until explored by H. Pittier in 1891.

Terraba, tn., Costa Rica, 68 m. SE. San José.

Terracina, the ancient *Anxur*, later *Trachinia* (Greek, 'rough'), maritime tn., Italy, on the S. ct. of prov. Rome, 17 m. WNW. Gaeta; trade in wood and cereals. P. (comm.) 9100.

Terra del Sole, tn., Italy, Tuscany, prov. Florence, 11 m. NNE. Rocca San Casciano, founded by the Grand-Duke Cosmo I. of Medici. In the neighbourhood are springs rich in sodium chlorides, iodides, and bromides; much frequented. P. (comm.) <5000.

Terra de Lavradores, penin., Brit. N. America. See **Labrador.**

Terralba, tn., Sardinia, prov. and 28 m. N. by E. Iglesias. P. <5000.

Terramiasti, riv., Sardinia, in the W., rises on Monte Linas, and flows NE. then N. through the northern part of the Campidano into a lagoon to the E. of the Gulf of Oristano.

Terranova di Pollino, tn., Italy, prov. Potenza or Basilicata, 30 m. ESE. Lagonegro. P. <3000.

Terranova di Sibari, tn., Italy, prov. Cosenza, 14 m. SSE. Castrovillari. P. <3000.

Terranova di Sicilia, seapt., Sicily, S. ct., at the mouth of the Gela, prov. and 30 m. SSE. Caltanissetta; has a college. Coarse cotton cloth is manufactured here, and finds a good market at the annual fair in August. Exports wine, sulphur, soda, grain; has fisheries of tunny and sardines. The town was founded at the end of the 13th century on the site of *Gela.*

Terranova Pausania, tn., Sardinia, at the head of the Gulf of T., prov. and 49 m. E. by N. Sassari; has brisk trade. Large vessels should anchor at Isola Bianca. P. <4000.

Terrara, vil., New South Wales. See **Shoalhaven.**

Terrasini Favarotta, tn., on the N. ct. of Sicily, prov. and 15 m. W. Palermo. P. 7000.

Terrasse, La, vil., France, dep. Isère, arr. Grenoble, 3 m. S. Touvet; has a sulphureous spring. P. <2000.

Terrasson, tn., France, on E. border of dep. Dordogne, arr. Sarlat, 30 m. E. by S. Périgueux; has great trade in timber. P. <3000.

Terrazzo, vil., Italy, Venetia, prov. Verona, 5 m. ESE. Legnago. P. (comm.) <4000.

Terrebonne. **1.** County, Canada, Quebec, bounded SE. by the riv. Jesus, a branch of the riv. Ottawa. **2.** A town in that county, on the riv. Jesus, and a railway, 9 m. N. by W. Montreal. P. <1500.

Terre Bonne, par., U.S., Louisiana, on the Gulf of Mexico, crossed in the W. by 91° W.

Terre-de-Haute and **Terre-de-Bas,** two islets of French W. Indies, together forming the group Petit-Terre, 26 m. E. Guadeloupe.

Terre des Etats, French name for Staaten I.

Terregles, par., Scot., Kircudbrightshire, on riv. Nith, containing part of Dumfries burgh; the town is included in the burgh of Dumfries. The par. contains fine ruins of Lincluden House, a convent of Benedictine nuns originally founded in the 12th century by Uchtred, Lord of Galloway. P. <500.

Terre Haute, city, U.S., Indiana, Vigo co., on l. bk. of Wabash R., 68 m. WSW. Indianapolis; has important manufactures, iron, nail, and car works, the Hudnut hominy mills, capable of grinding 1000 barrels per day, foundries, and various other industries. The state normal school, and the Rose polytechnic institute for instruction in the higher branches of engineering, are situated here. Its magnetic artesian well is noted for the curative qualities of its waters. The city has grown rapidly, owing to its proximity to rich coalfields. Alt. 492 ft. (R.R.). P. (1850) <5000; (1870) 16,100; (1880) 26,000; (1890) 30,200.

Terrell, co., U.S., Georgia, S. of 32° N., and between 84° and 85° W.

Terrell, city, U.S., Texas, Kaufman co., 30 m. E. Dallas; exports cotton. P. <3000.

Terre-Noire, tn., France, dep. Loire, arr. and 1 m. E. by N. St. Etienne; has very important steel-works. P. <3000.

Terrick Terrick, post-tn., Victoria, Gunbower co., 28 m. W. Echuca. P. <1500.

Terride, name of three old castles in S. of France, deps. Gers, Tarn-et-Garonne, and Ariège; they belonged to a branch of the powerful house of Lomagne.

Terrington St. Clement and **St. John,** two adjoining pars., Eng., Norfolk, NW. div., the former 4 m. W. King's Lynn, 1 m. N. of its stn. (**Terrington**) on the M. & G. N. Joint Rly. T. St. Clement, PMT.O., 9902 ac., P. <2500; T. St. John, PM.O., P. <750.

Terrington with Wiganthorpe, par., Eng., Yorkshire, N. Riding, Thirsk and Malton div., 12 m. NNE. York, 3½ m. S. Hovingham stn., PM.O. (**Terrington**). P. <750.

Terry, co., U.S., Texas, in the NW., crossed by 33° N., bounded on the E. by 102° W.

Terryglass, par., Ire., N. co. Tipperary, bar. Lower Ormond, 12½ m. W. by S. Parsonstown, on the E. shore of Lough Derg, P.O.; 7772 ac. P. <1000.

Terryville, vil., U.S., Connecticut, Litchfield co., 18 m. WSW. Hartford. P. <1500.

Ters-Akhan-Su, riv., Anatolia; its headstream, known as the Ladik, flows through the lake of the same name. Length about 95 m.

Terschelling, isl., Netherlands, North Sea, prov. N. Holland, between Vlieland and Ameland; low-lying and sandy. Length, SW. to NE., 16 m.; breadth, 3 m. P. 3750.

Terskaya Oblast, prov., Russia. See **Terek.**

Terskiy Bereg. See **White Sea.**

Tersus, tn., Asia Minor. See **Tarsus.**

Tersyutskaya, vil., Russia, W. Siberia, govt. Tobolsk, 74 m. WSW. Yalutorovsk, on S. highway to Siberia (*viâ* Shadrinsk). P. <5000.

Teruel, tn., Spain, cap. of prov. T. (area, 5720 sq. m.), which is one of the most mountainous in Spain, abounding in torrents 72 m. NW. by N. Valencia. The Tierra Alta, or highlands, is a region of woods and forests and pastures; the Tierra Baja, or lowlands, produces vines, olive and mulberry trees, hemp and flax. Climate continental; has but little commerce and industry. Seat of a bishopric. Its aqueduct, bringing water from a distance of 2 m., crosses a valley on 140 stone arches, and stands at a height of 5100 to 5120 ft. P. (comm.) 9500.

Terwick, par., Eng., Sussex, Horsham div., 11½ m. N. by W. Chichester, 2 m. N. Elsted stn. P. <250.

Terzigno, vil., Italy, prov. Naples, 9 m. N. Castellammare di Stabia. P. <3000.

Tešanj, tn., Bosnia, prov. Banjaluka, 36 m. S. Brod. P. 5800.

Tese, riv., Eng., trib. of the Yare, which it joins on the r. bk. just below Norwich.

Tesero, tn., Austria, Tirol, dist. Cavalese. P. <3000.

Tesino, Castello, tn., Austria, Tirol, 23 m. E. Trent. P. <3000.

Tess, riv., Mongolia, govt. Kobdo, flows on the whole WNW. into Lake Ubsa Nor.

Tessaua, tn. and oasis, Tripoli, Fezzan, 31 m. W. Murzuk; formerly a centre of negro civilisation, now scarcely more than a large village, though its towers and walls of clay still remain.

Tessaua, tn., central Sudan, Hussa, cap. of a terr. dependent on Gober, 62 m. NNE. Katsena. P. 10,000.

Tessele, name given by the Moors of N. Senegal to heights.

Tessenderloo, comm., Belgium, prov. Limburg, arr. Hasselt, 21 m. NE. by E. Louvain. P. <4000.

Tessin, French name for the Swiss cant. Ticino.

Tessin, tn., Ger., Mecklenburg-Schwerin, circle Ribnitz, on riv. Recknitz, 13 m. E. by S. Rostock. P. <3000.

Tessy-sur-Vire, tn., France, dep. Manche, 22 m. NW. Tinchebrai, arr. and 10½ m. S. St. Lô. P. <2000.

Test, riv., Eng. See **Anton.**

Testa, Capo della, cape, on the N. ct. of Sardinia, in 9° 8′ E., with a lighthouse.

Teste de Buch, La, tn., France, dep. Gironde, on the S. shore of the Bassin d'Arcachon, arr. and 32 m. WSW. Bordeaux, on the site of the ancient *Testa,* cap. of the Boii, who have left the name of Buch to the region; has oyster beds. Iron worked. P. <5000.

Testelt, comm., Belgium, prov. Brabant, arr. Louvain, on the Demer, 27 m. ENE. Brussels. P. <2000.

Testerton, par., Eng., Norfolk, NW. div., 20 m. WSW. Cromer, 1½ m. W. Ryburgh stn. P. <250.

Testigos, group of small isls. belonging to Venezuela, in the Caribbean Sea, in 11° 25′ N., 63° 10′ W.

Teston, par., Eng., Kent, Medway div., on the Medway, 4 m. WSW. Maidstone, 1 m. ENE. Wateringbury stn., P.O. P. <500.

Testur, tn., Tunis, on the riv. Mejerda, 45 m. WSW. Tunis; has market-gardens and a crowded market.

Tet, riv., France, dep. Pyrénées-Orientales, after an ENE. course enters the Mediterranean 7 m. E. Perpignan; not navigable for ships or rafts. Length, 75 m.; area of basin, 379 sq. m.; ordinary flow leaving the mountains, 1650 gallons.

Tetbury, par. and tn., Eng., Gloucestershire, div. and 10 m. SW. Cirencester, 8 m. SSE. Stroud, on the supposed site of a British stronghold, and on a branch of the G. W. R.; has trade in agricultural produce. Par. 4627 ac., P. <3500; tn. P. <2500.

Tetcott, par., Eng., Devonshire, Tavistock div., 7½ m. N. Launceston. P. <250.

Tete, or **Nyungwe,** decayed tn., Portuguese E. Africa, Batoka-land, on the r. bk. of the Zambezi, in 33° 27′ E., 110 m. W. by S. Blantyre, built on a fairly healthy site, on rocky hills overlooking the river, below the Kebrabasa rapids. It is the most advanced post on the river since the abandonment of Zumbo, 124 m. above, by the Portuguese, but the houses are now mostly in ruins, and the slave trade has destroyed its commerce. The opening of the Brit. terrs. on the Zambezi may, however, restore some of its lost importance, as it lies on the route of the telegraph line connecting Salisbury with Blantyre. Coal occurs on the river banks about 20 m. above. Seat of a Jesuit mission. Mean temp. (1 yr.), yr. 80° F., Jan. 85°, July 73°.

Tête à Gauche, post-settlement, Canada, New Brunswick, co. Gloucester, 3 m. from Bathurst.

Tête Blanche, Mount. See **Alps,** SUBDIVISIONS, **II. A. 1.**

Tete Jaune Cache, settlement, Canada, prov. Brit. Columbia, on Grand Fork of Fraser R., 286 m. NE. by N. Vancouver.

Tewkesbury, mun. bor. (since 1574) and market-tn., Eng., Gloucestershire, T. div., 10 m. NNE. and in the diocese of Gloucester, at the confluence of the Avon and Severn, on M. R., communicating with Birmingham by rail and water. Norman abbey church (built 1123) with massive tower 132 ft. high, and other remains of the monastery which existed here till 1539. The church has in recent years been carefully restored. Trade mainly agricultural; once a considerable trade in woollen cloth, and mustard. The Lancastrians were defeated here in 1471 by Edward IV. T. returned two members to Parliament till 1867, then one till 1885, when it was merged in the div. Market-days, W. and S. Mun. bor. P. (1801) 4200; (1851) 5900; (1891) 5300; parl. div. P. (1891) 50,300.

Tewksbury, tn., U.S., Massachusetts, Middlesex co., 5 m. SE. by E. Lowell. P. <3000.

Texada, isl., Canada, Brit. Columbia, in Strait of Georgia, N. of 49° N., separated from mainland by Malaspina Strait; 21 m. long; iron occurs in great masses.

Texa Island, isl., Scot., Argyllshire, off SE. ct. of Islay I., 2 m. SE. Port Ellen.

Texarkana, city, U.S., Arkansas and Texas, Miller and Bowie cos., 145 m. SW. Little Rock. P. 6400.

Texas, one of the United States, the greatest in area, extending along the Gulf of Mexico some 370 m. from Louisiana to Mexico. Cap. Austin; other chief towns, Dallas, San Antonio, Galveston, the chief seaport, Houston, Fort Worth, Laredo, Denison, Paris, Sherman. The surface slopes from NW. to SE., all rivers entering the gulf directly or as tribs. In the NW. the Llano, Estacado a desert plateau 3000–5000 ft. high (mainly Cretaceous), is part of the great highland region of the western United States. From this the slope to SE. is first rapid, the lines of 2000 and 1000 ft. elevation crossing the state from N. to S., only from 25 to 200 m. apart. The succeeding belt of rolling prairie land and hills reaches to the flat alluvial coast region, which is fringed by the characteristic swamps and lagoons of the gulf border. Sand bars obstruct the entrances of all harbours, or are cut by jetties to afford navigable channels. The geological formations E. of the Llano Estacado embrace Carboniferous, Cretaceous, Eocene, and Neocene. El Paso, in the extreme W., is about 3700 ft. elevation, Austin 500 ft. The chief streams are the Trinity, Brazos, Colorado, and Nueces. The Red separates Indian Territory, the Sabine, Louisiana, the Rio Grande del Norte, Mexico, and is therefore an international boundary. The navigability of all the streams is much reduced in dry weather. The climate, generally mild, is extremely dry in the W., but near the coast the rainfall, mostly of summer, is sufficient. [**El Paso, Fort Stockton, Concho, Jacksboro, Palestine, Brownsville, Rio Grande City, Eagle Pass, San Antonio, Denison, Corsicana, Galveston, Indianola.**] Sudden cold storms, similar to the mistral of SE. France, and called Northers, descend at times from the tableland, and are destructive of animal life, and a cause of consumption. Otherwise the climate is healthful, except in the lowlands of the coast, where fevers, at times the yellow fever, prevail. The industries are pre-eminently grazing and agriculture, the former leading in the western half of the state; the crops of the cotton-belt flourish in the eastern lowlands, grain-growing and grazing share the intermediate region. The wool-clip and the cotton-crop are the largest of all the states. Pine and oak forests exist E. of the Trinity R. A limited area of bituminous coal yields small quantities at high cost. Gold, silver, copper, lead, gypsum, salt, and petroleum are found. Building stones include granite (pink granite in Burnet co.), marbles, and sandstones in great variety. Large areas of land have been devoted to school purposes, and there is a state university at Austin. Illiterates, however, equal 25 per cent. of the population. The first settlement in T. was at San Antonio by Spaniards in 1694. T. declared itself free from Mexico in 1836, was admitted to the Union as a state in 1845. As admitted, it included land now forming parts of New Mexico, Colorado, Kansas, and Oklahoma. Area, 265,780 sq. m. P. 2,235,500. See **United States,** table. [**C. H. L.**]

Texas, vil., U.S., Maryland, co. and 12 m. N. by W. Baltimore. P. <1500.

Texas, co., U.S., Missouri, N. of 37° N., crossed by 92° W.

Texcoco, or **Tezcuco,** vil., Mexico, state of and 18 m. ENE. Mexico. During the Aztec rule it was a place of importance, and near it are ruins of ancient edifices. Lake T. is the largest body of water in the valley of Mexico, which city is on its W. side. Length, 40 m.; breadth, 10 m. P. (comm.) 15,900.

Texel, isl., Holland, prov. N. Holland, at the mouth of the Zuider Zee, to the N. of Helder, from which it is separated by a channel 2 m. wide. The inhabitants are engaged in agriculture, fishing, boat-building, and as pilots. Surface low and chiefly in pasturage, on which fine breeds of cattle and sheep are reared. Its N. part is termed Eyerand, from the great abundance of eggs deposited there by wild-fowl. Its W. ct. is sheltered by dykes, which were broken through, with great damage to the island, by a storm in Feb. 1825. It contains a town and several villages. Off the Texel, on July 31, 1653, the English fleet under Monk defeated the Dutch under Van Tromp, who was killed during the action. A lighthouse was erected on the N. island in 1864. P. 5900.

Tey, Great and **Little,** two adjoining pars., Eng., Essex, Maldon div., 7 m. W. Colchester. Great T., P.O., P. <750; Little T., P. <250.

Teyde, mt. See **Orotava.**

Teyma, an oasis, Arabia. See **Telma.**

Teynham, par., Eng., Kent, div. and 3½ m. NW. by W. Faversham, on the L. C. & D. R.; the dist. is famous for its orchards. P. <2000.

Teza, vil., Morocco, 68 m. E. by N. Fez. Alt. 2035 ft.

Teza, mt., Morocco, in Atlas Mts., about 50 m. SSW. Morocco. Hooker and Ball were the first Europeans who ascended it. Alt. 10,990 ft.

Tezcuco, Mexico. See **Texcoco.**

Teziutlan, tn., Mexico, state of and 74 m. NE. Puebla. Alt. 6503 ft. Rfall. (5 yrs.), 60.28 in. P. 7500.

Tezpur, tn., Brit. India, Assam, cap. dist. Darrang, on the l. bk. of the Brahmaputra, 92 m. NE. Shillong; important seat of trade for the neighbouring tea-gardens. P. <5000.

Tfan-dagh, peak, Russia. See **Thfan-dagh.**

Thaasinge, isl., Denmark. See **Taasinge.**

Thaba Bosigo, dist. stretching from W. to E. across Basutoland about the middle; cap. of same name 67 m. E. by S. Bloemfontein (Orange Free State).

Thaba Nchu, tn., Orange Free State, in Baralong Location, 32 m. E. Bloemfontein. This town was formerly the cap. of the small native republic of Baralong, and numbered more than 7000 inhabitants, but since the annexation of the country by the Free State, the natives have left in large numbers.

Thabeitkyin, or **Thabyetkin,** vil., Upper Burma, on l. bk. of the Iráwadi, about 60 m. N. Mandalay; starting-point of a road to the ruby mines dist. P. <5000.

Thabudeos, vil., Algeria. See **Tehuda.**

Thackaringa, tp., New South Wales, Yalcowinna co., 975 m. from Sydney by road and rail. P. <1500.

Thackley, stn., Eng., Yorkshire, W. Riding, on the G. N. R., 3 m. N. Bradford, P.O.

Thai, one of the large ethnic divs. of the penin. of Further India, comprising the Siamese, Laotians, and other allied races of SW. China, Assam, and Tongking. According to Terrien de Lacouperie, the cradle of this race is in central China.

Thaibinh, riv. belonging to Songkoi delta, Tongking; passes Haidzuong.

Thailfingen, vil., Ger., kgd. Würtemberg, Black Forest circle, dist. and 8 m. E. Balingen. P. <3000.

Thainguyen, tn., Tongking, 45 m. N. Hanoi, cap. of prov. of same name, which is almost covered with mountains containing considerable mineral resources of gold, silver, and iron.

Tha-kut-pin, tidal creek, Lower Burma, dist. Hanthawadi, between the Rangoon and China Bakir or To Rivs., between Rangoon and the Iráwadi; the only practicable creek for steamers in the dry season.

Thal, vil., Brit. Baluchistan, 105 m. E. by S. Quetta. Alt. 3060 ft.

Thal, fishing stn., Brit. India, Bombay, dist. Kolába, 3 m. N. Alíbágh. P. <5000.

Thal, vil., on the W. frontier of Brit. India, Punjab, dist. Kohat, 73 m. SW. by W. Pesháwar. P. <5000.

Thal, vil., Switzd., cant. St. Gall, 1 m. W. Rheineck; has vineyards, and manufactures embroidery. P. (comm.) <4000.

Thala, tn., Tunis, 82 m. W. Kairwan; has considerable Roman remains.

Thaldat, halting station, Tibet, 134 m. NE. Leh.

Thale, vil., Prussia, prov. Saxony, govt. Magdeburg, circle and 18 m. WSW. Aschersleben; has cement works and iron-foundries. P. 5200.

Thálghát, a pass of the Western Ghâts, Brit. India, about 70 m. NE. Bombay, ascended by the NE. line of the Great India Penin. Rly. Alt. 1912 ft.

Thalheim, vil., Ger., kgd. Saxony, circle Zwickau, 9 m. SSW. Chemnitz. P. 5300.

Thalheim, tn., Upper Austria, dist. Wels. P. <3000.

Thalwil, vil., Switzd., cant. and 6 m. S. Zürich, on the W. shore of Lake Zürich. P. <5000.

Thame, riv., Eng., rises in Buckinghamshire, about 10 m. SE. Buckingham, and flows, on the NW. and W. of the Chiltern Hills, SW. through Buckinghamshire and the S. of Oxfordshire to the l. bk. of the Thames, which it joins 6 m. ESE. Abingdon. Length, 40 m.

Thame, par. and market-tn., Eng., Oxfordshire, Henley div., on the riv. Thame, 12½ m. E. Oxford, on the G. W. R.; has remains of an abbey, founded 1138. John Hampden died here, 1643. Market-day, Tu. Mean rfall. (Aston Rowant, alt. 395 ft., 1866-80), yr. 27 in. 5229 ac. P. <3500.

Thames, riv., Canada, Ontario, rises in Perth co., and flows S. then SW. past London and Chatham into Lake St. Clair.

Thames, ancient *Tamesis,* Saxon *Temese,* the principal and one of the two longest rivers of England, through the S. part of which it flows mostly in an E. direction. It rises about 2 m. S. Cirencester, 376 ft. above the sea, flows at first S. to near Cricklade, then ENE. past Lechlade to near Oxford, and SE. (curving round the SW. end of the Chiltern Hills) past Oxford, Abingdon, and Wallingford to Reading, after which its course is mostly E. It separates the cos. of Oxford, Bucks, Middlesex, and Essex on the N. from Berks, Surrey, and Kent on the S. A few miles beyond Gravesend it expands into an estuary, which, at its junction with the North Sea at the Nore, between the Isle of Sheppey and the Essex coast, is 7 m. across. Principal affluents, the Thame, Churn, Coln, Windrush, Evenlode, Cherwell, Colne, Brent, Lea, and Roding from the N., and the Cole, Ock, Kennet, Loddon, Wey, Mole, and Darent from the S. The Medway joins its estuary at Sheerness. It is of vast commercial importance. The tide flows up to Teddington, 66 m. above the Nore. Constant dredging is required to preserve a navigable channel for large ships to the port of London, and complaints having been made of the inadequacy of this channel, a commission of inquiry has been appointed. This commission has not yet (July 1895) reported, but a navigable channel of 25-26 ft. at low water ordinary spring tides has been ascertained to exist as high as Tilbury Docks. Vessels of 4000 tons can reach Blackwall, 800 tons to St. Katherine's Docks, and barges to Lechlade, the E. terminus of the Thames and Severn Canal (30 m. long, 42 locks), by which the river was united in 1783-92 through the Stroudwater Canal with the Severn, below Gloucester. The canal was formerly navigable throughout by barges drawing 3½ ft. Recently, however, it has fallen into disrepair and disuse, but a movement is on foot for having it restored. The T. is also connected with the Midlands by the Oxford and Warwick and Grand Junction Canals, and by other canals with Bristol, Basingstoke, Arundel, &c. Under the Romans it formed the N. boundary of the province *Britannia Prima.* During the Saxon Heptarchy it divided the kingdoms of Wessex, Sussex, and Kent from those of Mercia and Essex. The name *Isis,* though used at least as early as the time of Camden (1607), who speaks as if it were the proper name of the upper part of the river, is, in fact, only a fancy name of Oxford origin; and the belief long current, that the name below the confluence of the Thame was derived from the composition of *Thame* and *Isis,* is erroneous. Total course to the Nore, 210 m.; area of basin, including that of Medway, 6010 sq. m.; excluding that of Medway, 5334 sq. m.; mean discharge per second at Teddington Weir (for an area of 3766 sq. m.), 2220 cubic ft., or including the water withdrawn by the water companies, 2375 cubic ft.

Thames, co., New Zealand, North I., on the NE. ct., crossed in the N. by 37° S.

Thames, tp., New Zealand, North I., an important goldfield on Cape Cotville Penin., about 40 m. SE. Auckland. See **Grahamstown.**

Thames, riv., U.S., in the E. of Connecticut, formed by the union of the Quinebaug (which previously receives on the right the Shetucket), and the Yantic at Norwich, enters the Atlantic at New London, 14 m. S. of Norwich, from which it is navigable.

Thames, Firth of, estuary, New Zealand, prov. Auckland, forms part of Hauraki Gulf, and receives the Thames or Waiho R., which flows N. into Hauraki Gulf.

Thames and Severn Canal, Eng. See **Thames.**

Thames Ditton, par., Eng., Surrey, Epsom div., on the r. bk. of the Thames, and the L. & SW. R., 2 m. SW. by W. Kingston, PMT.O. P. <4000.

Thames Embankment, The, Eng., includes the Albert Embankment (opened 1869), on Surrey side of Thames R., from Westminster Bridge to Vauxhall; the Victoria Embankment (1870), on Middlesex side, from Westminster Bridge to Blackfriars; and the Chelsea Embankment (1874), on same side, from Chelsea Bridge to Battersea Bridge.

Thamesville, post-vil., Canada, Ontario, Kent co., on riv. Thames and a railway, 50 m. SW. by W. London. P. <1500.

Thammapatti, tn., Brit. India, Madras, dist. Salem, at the foot of Kollamalai Hills, on the Swathanati R.; has iron-smelting industry. P. <5000.

Thamugas, colony, Algeria. See **Timgad.**

Than, or *Tan,* Chinese, 'rapids.'

Thán, vil., India, Bombay, Lakhtar state, 22 m. WSW. Muli, surrounded by a fort; one of the most ancient places in India, hallowed by famous shrines. The central fortress was called Kandola; the celebrated temple of the Sun was here. P. (1881) <2000.

Thána, tn., Brit. India, Bombay, on the E. ct. of Salsette I., 22 m. NE. by N. Bombay; has a fort and Portuguese cathedral; place of residence of Bombay officials. Under Portuguese rule a place of great commercial importance. P. 17,500; Hindus, 13,900.

Thana, ruins, Tunis. See **Tina.**

Thána Bhawán, tn., NW. Provs., dist. Muzaffarnagar, 45 m. WNW. Meerut. P. 8400; Hindus, 4300; Moham. 4100.

Thána River, Brit. India, the name given to the S. part of the channel separating Salsette and Trombay Is., in the N. of Bombay Harbour, from the mainland.

Thandayarpeti, a N. suburb of Madras, Brit. India.

Thandiání, small hill sanitarium, Brit. India, Punjab, dist. Hazára, in 34° 15′ N., 73° 18′ E.

Than-dwe, native name of Sandoway (*q.v.*), Burma.

Thánes'war, or **Thánesar** (census), tn., Brit. India, Punjab, dist. and 30 m. S. Ambála; place of Hindu pilgrimage in centre of the holy tract of Kurukshetra; has a sacred pool and an old ruined fort. The attendance at the religious gatherings, which in former years numbered half a million persons, has now dwindled down to less than 50,000. P. 6100; Hindus, 4000; Moham. 1800.

Thanet, Isle of, the NE. extremity of the co. Kent, Eng., surrounded N. and E. by the sea, S. and W. by the riv. Stour and its branch the Nethergong, both formerly navigable for ships of large burden. Its NE. point, the North Foreland, in 51° 22′ 29″ N., 1° 26′ 47″ E., has a lighthouse, 340 ft. above the sea, and visible for 22 m. Near it are two large tumuli, said to mark the place of a battle between the Saxons and Danes in 853. Reculvers, on the NW., marks the site of the ancient *Regulbium;* and Richborough, on its S. side, was the ancient *Rutupiæ.* Thanet was the first possession of the Saxons in Britain. On it are the favourite watering-places, Ramsgate, Margate, and Broadstairs. Length, 10 m.; breadth, 5 m. 26,886 ac. It now forms a parl. div. P. 60,600.

Thanh, Tongkinese, 'fort.'

Thanhhoa, tn., Tongking, near the coast, 85 m. S. Hanoi, cap. of prov. of same name.

Thanhmoi, tn. and fortified post, Tongking, cap. dist. T., 19 m. SW. Langson.

Thanington, par., Eng., Kent, partly in co. bor. of Canterbury. P. <750; eccles. par. (**T. with Milton**) P. <750.

Thebes (Greek *Diospolis Magna*), a famous city of antiquity, long the cap. of Egypt, the stupendous remains of which, in Upper Egypt, extend for 7 m. along both banks of the Nile, in about 25° 41′ N., 32° 38′ E. Among its temples are those of Karnak and Luxor, on the E. bank of the river; the former, the temple of Jupiter Ammon, occupies nine acres, and is in many parts comparatively perfect. The temple of Luxor, 1½ m. S. Karnak, is of a less size, and in front of it were formerly two monolith obelisks, 80 ft. in height, one of which has been conveyed to Paris, where it is erected in the Place de la Concorde. W. of the Nile are the famous temple of Medinet-Abu, the Rhameseian, and two sitting colossi, one being the celebrated Memnon; and in the mountains on the same side are the tombs of most of the earlier Pharaohs. Several villages are scattered over the site of T., which declined after the removal of the seat of govt. to Memphis. Its importance was finally destroyed through its capture, after a three years' siege, by Ptolemy Lathyrus in the 1st century B.C.

Thebes, Greece, Bœotia. See **Thivai.**

Thebes, site of ruins, Greece, prov. Larissa, 9 m. NNW. Halmyros, the ancient T. of Phthia, conquered by Philip, and named by him Philippopolis.

Thelnui, Shan state, Upper Burma, crossed in SW. by 22° N., 98° W.

Theiss, Hungarian **Tisza,** the ancient *Tibiscus,* riv., Hungary, all the E. part of which, and most of Transylvania, is drained by it and its tribs., rises in the Carpathian Mts., on the borders of Galicia, and is formed by the union of the Black and White Theiss (Czarna Tisza and Bilu Tisza), 20 m. ENE. Sziget. Its course is then W. to Tokay, whence it has a S. course to the Danube, which it joins on the left, 22 m. E. Peterwardein. In its lower half it flows parallel to the Danube, through a marshy plain, and with many windings. The chief traffic on it is the downward conveyance of salt, timber, and rural produce. It has sturgeon and other fisheries. The T. gives name to two great divisions of Hungary. Alt. at mouth, 255 ft. Total length 500 m., for the greater part of which it is navigable.

Theissholz, Hungary. See **Tiszolcz.**

Thum, tn., Ger., kgd. Saxony, circle Zwickau, 10 m. S. Chemnitz. Alt. 1685 ft. P. <5000.

Thun, tn., Switzd., cant. and 15 m. SE. Bern, charmingly situated on the Aar less than a mile below its exit from Lake Thun; has slate, majolica, and brick works; is centre of trade for the Bernese Oberland; seat of the Federal Military School. In the chief street the foot-pavement, bordered by the shops, runs along the roof of a row of warehouses and cellars which border the carriage-way. The church has an octagonal tower of the 11th century. P. 5500.

Thun, lake, Switzd., cant. Bern, above the town of Thun, traversed by the Aar, separated only by a low tract of land (the Bödeli), about 3 m. wide, from Lake Brienz; seldom frozen over. Length, 10½ m.; width, 2½ m.; depth, 710 ft.; alt. 1837 ft.

Thunder Bay, or **Hutil Bay,** now called **Le Conte Bay,** on the W. ct. of Alaska, in 56° 45′ N.; at its head, 56° 50′ N., is the most southerly tide-water glacier of the coast.

Thunder Bay, Canada, prov. Ontario, the inlet at the head of Lake Superior on which Port Arthur stands.

Thunder Bay River, U.S., Michigan, in the NE., flows E. into Thunder Bay, Lake Huron, at Alpena, a little to the N. of 45° N.

Thunderley, vil., Eng., Essex. See **Wimbish.**

Thundersley, par., Eng., Essex, SE. div., 6½ m. WNW. Southend, 1½ m. SW. Rayleigh stn., P.O. P. <750.

Thundridge, par., Eng., Hertfordshire, on the Rib, div. and NE. Hertford, 2 m. N. by E. Ware stn. P. <500.

Thuong, port, Tongking. See **Langgiang.**

Thur, riv., Switzd., cants. St. Gall, Thurgau, and Zürich, joins the Rhine 7½ m. SSW. Schaffhausen, after a N. and W. course. Affluents, the Sitter and Murg. Length, 81 m.; area of basin, 695 sq. m.

Thurcaston, par., Eng., Leicestershire, Loughborough div., 4 m. NNW. Leicester, 3 m. W. Syston Junction. P. <250.

Thurgarton, par., Eng., Norfolk, N. div., 5 m. SW. by S. Cromer. P. <250.

Thurgarton, par., Eng., Nottinghamshire, div. and 7 m. WSW. Newark, on the M. R.; the church belonged to the priory, founded in 1130. P.O. P. <500. See **Hoveringham.**

Thurgau, or **Thurgovia,** cant., NE. Switzd., having N. and E. Lake Constance, Untersee, and the Rhine, separating it from Baden and the cant. of Schaffhausen, and on other sides the cants. St. Gall and Zürich. Surface undulating, and soil fertile. Principal rivers the Thur, Sitter, and Murg. Agriculture, embroidery, cotton and linen spinning and weaving are the chief occupations of the inhabitants. Principal towns, Frauenfeld (the cap.), Weinfelden, Arbon, and Steckborn. It is the seventeenth canton in order of admission (1803). Area, 380 sq. m. See **Switzerland,** table.

Thurgoland, par., Eng., Yorkshire, W. Riding, Holmfirth div., 4½ m. SW. Barnsley, 1½ m. E. by S. Oxspring stn., PM.O. P. <2000.

Thurgoona, postal-centre, New South Wales, Goulburn co., in 35° 56′ S., 147° 0′ E.; wine-growing dist. P. ~1500.

Thuringian Forest, German **Thüringerwald,** mt. range, central Ger., in the Saxon duchies, extends from the Frankenwald NW. for 50 m. The summits are covered with pine woods, and the hill-sides with other timber trees. In spite of its slight elevation it forms an important line of demarcation for central Germany. The highest points are the Beerberg (3225 ft.) and the Schneekopf (3210 ft.), but these are little above the general elevation of the chain. The valley of the Gera (trib. Unstrut, Elbe basin) with that of the Hasel (trib. Main), those of the Saale and its trib. the Loquitz with that of the Hasslach (trib. Rodach, Main basin), and the valley of the Weisse Elster afford routes for three railways crossing the range from N. to S.

Thuringian States, a general name for the minor states of the German Empire, traversed by the Thuringian Forest, and surrounded by the kgd. of Saxony, the Prussian provs. of Saxony and Hesse-Nassau, and the kgd. of Bavaria. They consist of the gd.-duchy of Saxe-Weimar-Eisenach, the duchies of Saxe-Koburg-Gotha, Saxe-Meiningen, and Saxe-Altenburg, and the two Schwarzburg and two Reuss principalities. The region occupied by these states, a region comprising also the Prussian circles of Schmalkalden, Schleusingen, and Ziegenrück, which are included for the purposes of judicial administration along with the T. States (except Schwarzburg-Sondershausen) in the sphere of the upper land-court of Jena, is frequently known as **Thuringia.** See **German Empire,** table, and the articles on the different states.

Thursday Island, isl., Queensland, off the NE. ct. of Prince of Wales group, in Normanby Sound, Torres Strait, in 10° 33′ S., 142° 10′ E., about 400 m. NNW. Cooktown; has pearl fisheries. It has an excellent harbour, known as **Port Kennedy,** which is also the name of the town; an important shipping centre, coaling station, and port of call for the mail steamers; fortified. Vessels drawing 22½ ft. can come up to the hulks of the town with perfect safety. A quay is (1894) under construction; rise and fall of spring-tides, 8½ ft. Centre of the bêche-de-mer and valuable pearl-fishing industries; contains considerable government establishment. Close by is Friday I., the quarantine stn., and a small island (Dayman, 18 m. from Thursday I.) has been set apart for lepers from Queensland. P. <1500.

Thursford, par., Eng., Norfolk, N. div., 16 m. WSW. Cromer, on the M. & G. N. Joint Rly., P.O. P. <250. See **Great Snoring.**

Thursley, par., Eng., Surrey, Guildford div., 5½ m. SSE. Farnham, PM.O.; 4378 ac. P. <1500.

Thurso, river-port, Canada, Quebec, co. and 28 m. below Ottawa, on Ottawa R. P. <1500.

Thurso, riv., Scot., Caithness, rises in the extreme W., flows E., then NE., then N. to Thurso Bay (Atlantic Ocean).

Thurso (Norse *Thors-aa,* 'Thor's River'), par., seapt., and market-tn., Scot., Caithness, on Thurso Bay, at the mouth of the riv. Thurso, 18½ m. NW. by W. Wick, with a stn. on the H. R.; has extensive exports of large Caithness flagstones; formerly a centre of trade between Scotland and Scandinavia. Its harbour is safe for small vessels, but is obstructed by a bar; there is a good roadstead, with a pier at Scrabster, within the bay. Quays are (1894) in course of construction. The town-hall contains a museum, in which are preserved the fossils collected by Robert Dick (1811-66), a local baker, celebrated in his time as a geologist and botanist. Market-day, F. Par. 28,049 ac., P. 5800; tn. P. <4000.

Tiahuanaco, site of ruins, Bolivia, 27–37 m. W. La Paz, on the high plateau of Vilque; it is a vast quadrilateral, consisting of megalithic blocks, and ruins described by many historians and travellers.

Tiali, region, French Sudan, on l. bk. of the Faleme, E. part mountainous, W. part low and marshy.

Tiamat, or **Chaimat,** tn., Siam, on the Menam, a little below the point where the Tachin arm breaks off, 103 m. N. by W. Bangkok.

Tian Shan (properly **T'han Shañ,** Chinese, 'celestial mountains'), an extensive mountain system, Russian Turkistan, attaining a length of nearly 1600 m. from WSW. to ENE., and a width of from 100 to 330 m. May be considered on the whole as the border ridge of the High Plateau of E. Asia (from the Iranian plateau to the Altai), fringed on its outer slope by a series of shorter chains, running parallel to the border ridge, separated by deep valleys, and pierced by the gorges of several rivers. According to this view the ranges of Peter the Great, Trans-Alai, Kokshal-tau, and Sary-yassy, which all have behind them (on the SE. slope) high plateaux, but fall abruptly to low valleys on the NW., would be defined as the border ridges of the High Plateau (Pamirs and plateaux of Turfan and Ak-su, sloping to the E. Turkistan depression). They contain also most of the highest peaks and largest glaciers of the region; *e.g.,* Kaufmann Peak (22,500 ft.), Seltau, Khan-Tengri (24,000 ft.), and the passes across it are 10,000–14,000 ft. high. The series of chains form a wide alpine region, in the midst of which are the Kokan or Fergana, Issyk-kul, Kulja, and Ebi-nor depressions. The chief chains of this alpine region, most of them attaining heights of from 10,000–19,000 ft., and snow-clad for large distances, are (beginning from the SW.) the Baisun-tau, Hissar, and Alai Ranges; Bish-ilik, Chotkal, Talas, Ala-tau, and Alexandrovskiy Range in the N. of the Fergana depression; the Trans-Ili and Kunghei Ala-taus in the N. of, and the Terskei Ala-tau in the S. of, Lake Issyk-kul; the Dzungarian Ala-tau in the N. of, and the Narat-tau in the S. and SE. of, Kulja—all having, generally speaking, a direction towards the NE.; while five ridges of later upheaval—Nura-tau, Kara-tau, the Chu-Ili Mts., Uch-kara, and Chingiz-tau—project from the alpine belt to the NW., their continuations being traced within the alpine belt as well, as is the case with the Fergana range by which the Kara-tau seems to be continued towards Kashgar. The Tian Shan highlands are built up of Azoic and Primary rocks, with Secondary and Tertiary deposits in some valleys and on the edges of the highlands. Some of the outer valleys are very fertile, and a fringe of fertile loess lies all round at the foot of the highlands; its terraces, irrigated by the numerous rivers and streams that issue from the highlands, and the canals drawn from them, have been from a remote antiquity the seat of a now decaying civilisation (see also **Turkistan**). The **Eastern Tian Shan** is a system of mountains stretching eastwards for 700 m., from 84° E. (Khan-tengri group) to 92° E., with a width of about 120 m. in the W. and only 50 m. in the E., between the depression of Dzungaria in the N. (a deep trench, opening to the NW., in the High Plateau, alt. 2100–3500 ft.), and the Tarim depression and Ha-shuñ Gobi on the S. The orography of these mountains is not yet fully known. They attain an altitude of 9000 to 10,000 ft. and have the oases of Karashar, Urumchi, Turfan, Barkul, and Hami at their N. and S. foot. See **Turkistan, Eastern.**

Tiaquin, bar., Ire., in the E. of co. Galway.

Tiaret, walled tn., Algeria, arr. and 112 m. E. by S. Oran; has a trade in wool, grain, and cattle with caravans from the S. Founded in 1843 on Roman ruins. P. <4000.

Tiaro, post-tn., Queensland, March co., 125 m. N. by W. Brisbane; excellent coal seams in the neighbourhood; plumbago is also found, and antimony is worked at Neardie, 25 m. distant. P. <1500.

Tiassale, tn., French Guinea, Ivory Coast, 75 m. WNW. Great Bassam, at the point where navigation begins on the Lahu; an important centre of commerce.

Tibagy, vil., Brazil, Paraná, on the riv. Tibagy, in about 24° 40′ S., 50° 40′ W. The riv. Tibagy flows N. to the Paranapanéma, which it enters in about 20° 50′ S., 51° 28′ W. *Jour. R. G. S.,* 1876, map, p. 263.

Tibati, tn., central Sudan, Adamawa, about 146 m. S. Yola,

the cap. of a small state trib. to Adamawa. The population consists of Mussulman negroes, with a considerable number of Fellata.

Tibbu, a Berber or Negroid Berber race in the E. Sahara, ranging from Tripoli to Kanem and Wadai. They are fanatical Moslems, and are divided into two groups, the Teda and the Dasa.

Tibenham, par., Eng., Norfolk, S. div., 14 m. SW. by S. Norwich, 2 m. NW. Tivetshall stn., P.O. P. <750.

Tiber, Italian **Tevere,** ancient *Tiberis*, riv., central Italy, rises in the Tuscan Apennines, 5 m. N. Pieve San-Stefano, and flows SSE. as far as Barberini, within 20 m. of Rome, where it turns SW. and enters the Mediterranean, 17 m. below Rome, by two mouths, which enclose a small delta, the ancient *Isola Sacra*. It is navigable at certain seasons as far as the confluence of the Nera, 30 m. N. Rome. Principal tribs., the Topino, Nera (ancient *Nar*), and Teverone (ancient *Anio*) from the E.; the Nestore, Chiana, and Nepi from the W. Its banks are not picturesque; and the stream, usually sluggish, is rapid in spring, and brings down with it a coloured muddy deposit, which caused it anciently to be termed the 'Yellow Tiber.' At Rome it is about 300 ft. broad. Length, 244 m.; area of basin, 6456 sq. m.; discharge, mean 9400 cubic ft. per second, highest 158,900 cubic ft. per second, lowest 5700 cubic ft. per second.

Tibergent, vil., Algeria, prov., arr., and 34 m. W. Constantine; a prosperous colony, founded in 1881.

Tiberias, Sea of, Lake of Galilee, or **Sea of Gennesaret,** now called by the Arabs **Bahr-et-Tubariya** (Tabariya), lake, Palestine, the second of those traversed by the Jordan, oval in shape, 14 m. long, 7½ m. in extreme width, and 683 ft. below the level of the sea; greatest depth about 156 ft. The lake occupies the bottom of a great basin; it is bounded on the E. by the mountains of Bashan, 2000 ft. high, barren, and furrowed by ravines. On the SW. the shores rise abruptly, and the NW. is occupied by the plain of Gennesaret. From its great depression the climate is hot, and the vegetation tropical. The water of the lake is sweet and clear, and it abounds in fish. On its shores were nine cities and many villages, among them Capernaum, Magdala, and **Tiberias,** of which the last only remains, under the name of **Tubariya** (Tabariya), about the middle of its W. shore, in 32° 47′ N.

Tiberton, par., Eng., Herefordshire, Ross div., 8½ m. W. Hereford, 3 m. ENE. Peterchurch stn. P. <250. See **Madley.**

Tibesti, so called by Arab travellers, native name **Tu** ('rocks'), dist., Sahara, between 22°–18° N. lat., composed of a large mountain group exhibiting an inextricable choas of stones, without a tree; the mountains are intersected by ravines, where water flows during the rains, which fall in the summer only, when the trade-wind from the E. prevails; the floods are rapid, and sometimes dangerous. The climate is hot and dry, but liable to sudden variations of temperature. Vegetation scanty; date palms only grow in certain valleys in the E., and the inhabitants depend mainly on their flocks. The camels of T. are the most valued in E. Sahara; other domestic animals are donkeys (of a small but sturdy breed), goats, and sheep. The inhabitants (Tubu) are a well proportioned, hardy, but cruel race. Except Nachtigal, no European has yet visited the country.

Tibet, extensive region of central Asia, included in the Chinese Empire, stretching from 79° to 103° E., and from the great chain of the Himálayas to nearly 40° N., being separated on the N. by the Altyn Tagh Range from Eastern Turkistan, and on the NE. by the Nan-shan Range from the Chinese prov. of Kansu. **Boundaries,** N., Chinese Turkistan, the desert Gobi, and the Kuku-Nor territory; W., Ladakh, Leh, and the other countries of 'Little Tibet'; E., China proper; and S., the territories of Burmah, British India, Bhután, Sikkim, Nepál, and the Punjab. Length from E. to W., 1400 m.; breadth, 600 m. It is traversed from W. to E., between about 36° and 37° N., by the Kuenlun Mts. In the E. the Dangla Range, stretching from about 90° to 97° E., in about lat. 33°, with an average elevation estimated at about 20,000 ft., forms an important climatic barrier, intercepting the moisture-carrying monsoon winds from the SW., and the same effect is exercised by the rugged range further E., in a somewhat more northerly lat. (about 34° in the NW. to 33° in the SE.), to the S. of the upper Hwang-ho. The W. part is a lofty tableland, with a very dry climate, cold, but not severe; and the lower limit of the snow-line is higher on the N. than on the S. slope of the Himálayas. The highest plains are more than 15,000 ft. above the sea. Captain Bower, in his journey across Tibet in 1891-92, from Ladakh to Batang and Tachien-lu (W. to E.), never recorded an alt. below 16,000 from the Lanak Pass in about 79½° E. to 86° E., none below 15,000 between 86° and 87° E., and as far as 95° E. the alts. recorded by him are mainly from 14,000 to 16,000 ft. The N. to S. routes across middle Tibet generally show alts. of from 13,000 to 20,000 ft. In the NE., between the Kuenlun Mts. and S. Kuku-Nor Range, there is a vast region known as the Tsaidam (though the name is specially applied to a great marsh in the S. of the region), where the alt. is about 9000 ft., but beyond that, between the S. Kuku-Nor Range and the Nan-shan (in the area containing the Kuku-Nor lake), it rises to nearly 11,000 ft. In the SE., E. of 96° E., and S. of 32° N., the surface is deeply cut by the upper valleys of the Indo-Chinese and some Chinese **rivers** (including the Yangtse-kiang), all running more or less S. Besides these rivers the Hwang-ho, the Indus, Sutlej, and Brahmaputra all rise in Tibet. Tibet contains many **lakes,** some of which are of great size. Besides Kuku-Nor, the principal are Tengri-Nor, Palti, Motel-thung, Kyaring Cho, Pangong, Oring-Nor, Jaring-(Charing or Zharing) Nor, &c. The land in W. Tibet, so far as has been discovered, is very bare of trees, or large vegetable products; yet it abounds with game and other wild **animals,** and numerous flocks of sheep and goats, the hairy wool of which is used for the manufacture of shawls and other fine fabrics in Kashmír. The yak (*Poëphagus grunniens*) and several other kinds of cattle are reared; horses, mules, and sheep are used as beasts of burden. A fine race of dogs, and the musk deer, a small species, are natives of Tibet. Barley, peas, and wheat are the chief **crops** raised; garden vegetables and fruits are in little variety, and the inhabitants live more by pastoral than agricultural pursuits. Clay-slate, granite, quartz, and limestone are constituents of the mountain ranges; borax in great quantity, nitre, rock-salt, lead, silver, copper, gold, turquoise, and lapis-lazuli are among the **mineral products;** but the great scarcity of fuel forms a serious obstacle to mining and the reduction of metals. Near Gartok there are extensive gold-fields. **Manufactures** of woollens, sacking, and other woven fabrics are pretty general, and much cloth is sent from Lhasa into China. The **traffic** through Tibet is extensive, and mostly monopolised by the government and officers of state. The trade with NW. China is conducted at Lhasa and Sinning, a town of the Chinese province Kansu, where the Tibetan caravans exchange the native produce and Indian goods for tea, silver, bullion, brocades, fruits, tobacco, quicksilver, cinnabar, furs, porcelain, musical instruments, pearls, and corals. A large tea trade with Tibet is carried on from Yachon-fu, in western Süchwan, by way of Tachien-lu. Nepál and Bhután derive all their Chinese goods through Tibet; and from the former and Bengal, English and Indian piece goods, sugar, tobacco, indigo, paper, rice, spices, sandal-wood, and gums are received; from Assam, silk, iron, and stick lac; from Chinese Turkistan, horses and camels; from Ladakh, dried fruits, shawls, gamboge, saffron, copper, tobacco, and timber. Trade with British India is carried on by a series of passes through Sikkim, by the Lipu Lek pass leading to the NW. Provs., and by other routes; but till lately British subjects were not allowed to enter Tibet, and trade was greatly restricted. By a special convention, however, the customs station of Yatung, near the Sikkim frontier, was opened on 1st May 1894 to British subjects, who are to be allowed to reside there and carry on trade without other restriction than the payment of customs duties. The roads and bridges are far inferior to those of China. Tibet, which became subordinate to China in 1648, is politically divided into E., or Hither, and W., or Ulterior Tibet, each ruled by a minister from Peking, in conjunction with the ecclesiastical heads of the country, the Dalai-lama, at Lhasa, the E. capital, and the Teshu-lama, at Shigatse, the W. capital. Tibet is the headquarters of Lamaism or northern Buddhism. The country abounds with temples and monasteries.

Tibi, maritime tn., Philippine Is., Luzon I., 134 m. SE. Manila; has hot springs. P. 13,400.

Tibi, tn., Spain, Valencia, prov. and 12 m. NNW. Alicante, dist. Jijona; about 6 m. below, at the mouth of a gorge, is Pantano de T., a vast reservoir confined by a dike.

Ticino (in Ger. and French **Tessin**), cant., Switzd., on the Italian slopes of the Alps, which separate it on the N. from the cants. Valais, Uri, and Grisons, having S. and E. Lombardy and Grisons, and W. Piedmont. It originally belonged to Italy, but was taken by the Swiss in 1512. It is almost entirely mountainous, and is wholly drained by the T. and its tribs., the largest of which is La Maggia. Its S. part comprises the larger portion of the Lake of Lugano, with the N. extremity of Lago Maggiore. Climate very various, according to elevation. Principal crops, wheat, maize, rye, tobacco, chestnuts, wine, and silk. The transit trade between Italy and Switzerland is considerable. The inhabitants emigrate to neighbouring countries, to the number of about 10,000 annually. Principal towns, Bellinzona (the cap.), Lugano, Locarno (both of which, till the decree of Feb. 10, 1878, had the right to the position of cap. alternately with Bellinzona), and Faido. T. holds the eighteenth place in the Swiss Confederation. It has recently made progress, to which the opening of the St. Gothard Rly. has contributed. Area, 1088 sq. m. P. (1870) 119,600; (1888) 127,000. See **Switzerland,** table.

Ticino, riv., Switzd. and Italy, rises near the Nufenen Pass, in the Swiss cant. of T., and winds E. and SE. to the head of Lago Maggiore, traverses that lake, and after issuing from it in the S., forms part of the boundary between Piedmont and Lombardy, flows past Pavia, and finally enters the Po a few miles below that town. It is far the largest of the tribs. of this river, and without it, say the boatmen, 'il Po non sarebbe Po.' In its lower part it forms many islands, and supplies the canal Naviglio Grande. Length, 154 m.; area of basin, 2791 sq. m.; discharge, mean 14,500 cubic ft. per second, high estimated at 190,700 cubic ft. per second.

Ticinum, city, Italy. See **Pavia.**

Tidikelt, dist., Africa, western Sahara, E. of Tuat, containing a group of oases, the chief of which is Ain Salah; it constitutes a depression stretching W. to E. between the neighbouring plateaux. The climate is excessively hot, and very little rain falls, but there is a good supply of subterranean water. The oases stretch from ENE. to WSW., the rest of the country being either scrub (unusually luxuriant for the Sahara) or low plateaux and valleys. Important transit-trade, centred chiefly at Ksar-el-Arab, the central settlement of Ain Salah. The population is composed of two elements, Arab nomads and the settled of mixed race.

Tiel, tn. and river-port, Holland, prov. Gelderland, on the r. bk. of the Waal, 14 m. NNE. Bois-le-Duc; trade in grain. It was a considerable port in the Middle Ages. P. (comm.) 9900.

Tien, Chinese, 'shop,' 'inn,' 'tea-house;' also 'small lake' or 'swamp.'

Tienchih (locally **Kunming**), large lake, China, Yünnan, to the S. of Yünnan-fu, drained through an artificial channel W. then N. into the Yangtse.

Tienen, Belgium. See **Tirlemont.**

Tien-Gemeten, small isl. in the Haringvliet, Holland, prov. S. Holland.

Tienpai, tn., on the S. ct. of China, prov. Kwangtung, in 111° 17′ E.

Tienrana, riv., Celebes. See **Tempe.**

Tienshu-shan, mts., China, prov. Pechili, 25 m. NW. Peking; celebrated for the royal necropolis of Shisanling (thirteen graves), or 'tombs of the Ming.' Alt. 2625–3280 ft.

Tientsin-fu, city and treaty-port, China, prov. Pechili, on the Pei-ho, 70 m. SE. by S. the port of Peking; the city stands on a mound, and has been open to foreign trade since the treaty of 1860, the plain around being often submerged during the rainy season. It is unpaved and dirty, and liable to outbreaks of cholera, typhus, and smallpox. Two miles below the city is the 'concession,' or quarter for foreigners, which is now of quite a western aspect; almost every European nation, as well as the United States, is here represented by a consul. Tientsin-fu

victuals the greater part of the provs. of Pechili and Shansi; it is the general salt depôt and centre of the most active relations with a considerable part of Mongolia and Russian Baikal. Chief imports, rice, stuffs, opium, metals, European ironmongery in exchange for raw wool and cotton, skins, furs, and camels' hair. It shows more signs of progress than perhaps any other city of China; a cotton-spinning factory has recently been founded; since 1886 a railway connects T. with Taku and Kaiping, coal centre, 62 m. NE.; and one is projected to unite T. with Tungchou, 12 m. E. Peking. There are no docks or quays. Mean temp., yr. 55.2° F., Jan. 26.9°, July 81.2°.

Tientsin-ho, riv., China. See **Pei-ho.**

Tienyen, maritime vil., NE. Tongking, 47 m. NE. Kwangyen. The depth of the roadstead, sheltered on the E. by the large isl. of Kebao, has given rise to projects for the establishment of a port.

Tiercé, tn., France, dep. Maine-et-Loire, arr. and 11 m. NNE. Angers. P. <2000.

Tiermaclane, PM.O., Ire., co. Clare, 6 m. from Ennis, 3 m. from Clare Castle stn.

Tiermas, tn., Spain, prov. Saragossa, dist. Sos, 30 m. ESE. Pamplona. P. <2000.

Tierra Amarilla, vil., U.S., New Mexico, Rio Arriba co., 80 m. NW. by N. Santa Fé. P. <1500.

Tierra de Campos, natural region in N. and NW. Spain, forming a slightly undulating plateau; soil fertile, but depending for its productiveness on the abundance and duration of the rains.

Tierra del Fuego ('the Land of Fire'), the most southerly region of S. America, consisting of five large islands—King Charles' South Land, Clarence I., Desolation, Hoste, and Navarin, and numerous smaller islands. It is separated from S. Patagonia by the Strait of Magellan, the whole between 52° 30′ and 56° 0′ S., 65° and 75° W. Its E. part is level, and in some places pretty well wooded; its W. is rugged, and some peaks rise to 4000 ft., comprising several volcanoes (whence the name). Birch and evergreens are the chief trees. The inhabitants, who live by fishing and hunting, are among the lowest in the scale of human beings. The climate is moist and cold. As a terr. or government of the Argentine Republic, formed as a result of the treaty of delimitation between that country and Chili in 1881, it embraces that part of the island situated E. of 68° 52′ W. Area, 8126 sq. m.

Tierra Firme, name given by the discoverers to the N. shore of the S. American continent, as distinguished from the islands; in a more restricted sense, the name is still sometimes applied to the extremity of the American isthmus, where S. America begins.

Tiesi, tn., Sardinia, prov. Sassari, 17 m. ESE. Alghero. P. <4000.

Tietar, riv., Spain, New Castille, flows WSW. at the S. base of the Sierra de Gredos to the Tagus, which it joins to the W. of 6° W.; current undisturbed; water not abundant in summer. Alt. at source, 2430 ft.; length, 109 m.

Tiete, tn. and rly. stn., Brazil, São Paulo, on the Rio T. (length, 745 m.), 110 m. WNW. Santos.

Tietjerksteradeel, comm., Netherlands, prov. Friesland. P. 14,000.

Tievemore, P.O., Ire., co. Donegal, 5 m. from Pettigoe.

Tievenaness, P.O., Ire., 7 m. from Cootehill (co. Cavan).

Tieveskeelta, electoral div., Ire., co. Donegal, dist. Killybegs.

Tiffa, tribe, central Morocco, about 45 m. E. Morocco, on a terr. about 35 m. in length E. to W., and 30 m. N. to S.; this tribe consists of five portions, with distinct names.

Tiffield, par., Eng., S. div. of Northamptonshire, 7 m. SW. by S. Northampton, 1⅛ m. NNW. Towcester stn., P.O. P. <250.

Tiffin, city, U.S., Ohio, Seneca co., on Sandusky R., 42 m. SSE. Toledo; manufactures agricultural implements, &c. Seat of Heidelberg College. P. (1880) 7900; (1890) 10,800.

Tiflis, govt., Russia, Transcaucasia, has Kutais on W., Terek and Daghestan on NE., Elisabethpol on E. and S., and Kars on SW. Its NE. boundary is the part of the main Caucasus range which contains the highest peaks [**Caucasus**]. In the NW. it has the Mesques Mts., and in the SW. the Anti-Caucasus, part of the govt. (dist. Akhaltsykh) extending over the plateau, where it embraces the high valley of the upper Kura, bounded in the N. by the Wakhan Mts. and parts of the Anti-Caucasus, 5000–10,000 ft. high. The slopes of these mountains cover most of the terr., while the waterless Shirak and Kara-ez steppes extend along the L bk. of the Kura below T. The govt. is rich in minerals; gold has been found and extracted in small quantities near T., as has also some silver ore; iron is obtained at Chatakh, and copper at Alaverd-Shamblug and Akhtal; naphtha is extracted in dist. Signakh; rock-salt has been discovered in several spots. Watered by the Kura and its tribs., Liakhva, Aragva, Iora, and Alazañ, the water of which is much used for irrigation. Forests in the mountains. The climate may be characterised by the following for T.: yr. 34.6° F., Jan. 31.5°, July 76°; while for the hilly tracts Kvinam is typical: yr. 33° F., Jan. 5°, August 35°. The population consists chiefly of Georgians (345,500), Imeretians (6300), Armenians (156,200), Tatars (72,400), Ossetes (72,000), Greeks (21,900), Russians (21,500), and some Kurds, Tushins, and Jews. The soil on the mountain slopes is very well cultivated, even in the high valleys. Cereals are grown everywhere, sometimes up to a level of 7000–8000 ft.; vineyards and gardens are kept in a beautiful state in Kahetia and Akhaltsykh. Some silk-worm culture; cattle-breeding on the Steppes. A great variety of domestic trades in towns and villages. Divided into nine dists.: Tiflis, Akhalkalaki, Akhaltsykh, Borchala, Dusheti, Gori, Signakh, Telav, and Tioneti. Area, 15,306 sq. m. P. (1869) 599,300; (1892) 911,640.

Tiflis, cap. of the above govt., and cap. of the lieutenancy of Caucasia, is situated 41° 42′ N., 44° 50′ E., 1979 m. SE. of St. Petersburg, on both banks of Kura R., in a picturesque depression surrounded on all sides except the N. by mountains 2100–2400 ft. high, the alt. of the bridge over the Kura being 1350 ft. The vil. *Tpilisi* ('warm waters'), situated on this spot, became the cap. of Georgia in 455, under the Christian King Vakhtang Guroslan. It was for many centuries the stronghold of Eastern Christianity, against the Persians first, and later on against the Moslem invasion altogether; but was many times taken by the invaders, and kept by them for numbers of years in succession. From the 18th century the Lezghins, too, began to make raids upon it, the more so as it had been taken by the Turks in 1724. This was the beginning of Russian intervention, especially after the Persians had taken T. in 1795. A Russian garrison has occupied it since 1799, and Georgia was incorporated with the Russian Empire by a special treaty of union. The population of T. consists now chiefly of Armenians, Georgians, Russians, and Persians. The Sion cathedral of T., founded by King Vakhtang Guroslan, contains several relics of the past, as also St. David's church, founded in 1318. Four bridges span the Kura. The city is well built in its central parts, and is continually embellished, but is crowded in its poorer parts. It has a great variety of educational institutions, an observatory, a rich museum, and several scientific societies. Manufactures are in their infancy, but a great variety of petty industries are carried on. Considerable trade with Russia, Asia, and W. Europe. P. (1830) 25,290; (1850) 34,890; (1864–65) 60,100 in winter, and 71,050 in summer; (1892) 146,790.

Tifra, div., Algeria, prov. Constantine, arr. and 22 m. SW. Bougie; has sulphureous spring 185° F.

Tig, Water of, small riv., Scot., S. Ayrshire, flows first N. then W. through Glen T. to the riv. Stinchar, which it joins about 3 m. above its mouth.

Tigani ('frying-pan'), small seapt., Turkey, on S. side of isl. of Samos, towards E. end, so called from the shape of its harbour; built on the site of the commercial quarter of the ancient Samos.

Tiger Bay, small bay, Portuguese W. Africa, in 14° 11′ S.

Tigeretskiya Alps. See **Altai.**

Tiger Island, small isl., to the N. of Ger. New Guinea, in about 1° 45′ S., 142° 47′ E.

Tigerville, vil., U.S., S. Dakota, Pennington co., about 20 m. NE. Custer, in the Black Hills. P. <1500.

Tiggi, oasis, E. Sahara, Borku, the most N. in the region of Bodele; has many date-palms.

Tigharry, PM.O., Scot., Inverness-shire, North Uist I., Outer Hebrides, 8 m. from Loch Eport.

Tighe's Hill, postal-tp., New South Wales, Cumberland co., in 33° 45′ S., 151° 40′ E.; a suburb of Newcastle, included in the municip. of Wickham. Has soap and candle and copper-smelting works. P. <1500.

Tighnabruaich, vil., Scot., Argyllshire, on the W. shore of the Kyles of Bute, 11 m. SE. Ardrishaig, PMT.O. P. <750.

Tigil, riv., Russia, E. Siberia, Kamchatka Penin., flows 120 m. W. and NW. into the Sea of Okhotsk; navigable. **Tigilsk** village on it, 20 m. above its mouth.

Tigmi, plateau, Sahara. See **Tademait.**

Tignes, vil., France, dep. Savoie, arr. Moutiers, 12 m. SSE. Bourg-St.-Maurice; tourist centre for the neighbouring mountain region. P. <2000.

Tigranocertes, ancient tn. See **Sört.**

Tigranogird, tn., Asiatic Turkey. See **Diarbekir.**

Tigre, large natural dist., Abyssinia, occupying all the N. region of the Abyssinian plateau N. of the deep defile of the Takazze. At one time the political centre of the Abyssinian kingdom, and subsequently independent, it is now nominally subject to King Menelik of Shoa; the N. portion, however, has been attached more or less effectually by the Italians to their colony of Eritrea. Atsaga (9310 ft.), in the N. prov. of Hamasen, is now the cap. of T., and other chief towns are Senafe, Adigerat, Adua, and Antalo; at Axum are ruins of a former important town. Its surface is composed in great part of trachytic or basaltic lavas, with an ochreous layer, no doubt formed by their decomposition. All the waters of T. flow to the Atbara by the Mareb and Takazze, which flow in deep and narrow fissures. Average height of plateau over 6560 ft.

Tigre, or **El Tigre,** vil., Argentine Republic, on an island in the delta of the Paraná, 19 m. NW. Buenos Aires; much frequented in summer by the inhabitants of Buenos Aires.

Tigre, or **Piguena,** riv., S. America, Ecuador, joins the Amazon, 40 m. W. the influx of the Ucayali, after a SE. course of 350 m.

Tigri, salt lake or sebkha, E. Morocco, about 15 m. W. Algerian frontier.

Tigris, riv., Asiatic Turkey, vilayets of Diarbekir, Mosul, and Bagdad. Its principal or western headwater rises, under the name of Shat (Turkish Dijle, Armenian Dikla), in the extreme NW. of the vilayet of Diarbekir, a little to the N. of that point in the Euphrates, where it abruptly changes its course from ESE. to SW., flows first E., passing S. of Lake Geljik, SE. and S. to the city of Diarbekir, where it is 220 yards wide during flood; here it turns to the E., and flows in this direction 100 m. to Til, in 37° 43′ N., 41° 46′ E., where it receives the eastern headwater, the Bohtan Su (or Chai), a shorter but more abundant stream flowing W. from a point about 20 m. S. of Van. It then turns S., and about 30 m. lower down it enters the plains at Jezire. Its course is then generally SE. till it joins the Euphrates. In 36° N. it receives the Zab-el-Kebir, or Great Zab, and 60 m. lower the Zab-el-Asfal, or Little Zab, both from the E.; at this place it forces its way through the Hamrin Hills. Below Bagdad it is joined by the Diala or Shirwan, which rises in the mountains of Hamadan, about 35° N., 48° E. The T. has now a very winding course for 98 m. to Kut-el-Amara, where it bifurcates: the smaller branch, Shat-el-Hai, flows S., and joins the Euphrates; while the main branch flows first NE. for 25 m., and then resumes its general SE. direction to Korna, where it unites with the Euphrates to form the Shat-el-Arab. Total course estimated at 1150 m.; its distance from the Euphrates varies from 23 to 178 m., the region between them being the ancient *Mesopotamia*. The ruins of ancient *Nineveh, Seleucia, Ctesiphon,* &c., are on its banks. The stream brings down vast quantities of mud deposit, and in the upper part of its course especially it is very rapid, but it is stated to be navigable for vessels drawing 4 ft. of water from the Shat-el-Arab to the ruins of Opis, 50 m. N. of Bagdad. Regular communication is maintained by steamers of 3–4 ft. draught to Bagdad, 4–6 days being required for the journey up-stream from Busrah, 3–5 for that down-stream. The discharge of the T. at Bagdad has been estimated at upwards of 160,000 cubic ft. per second, or more than twice that of the Euphrates in the same latitude, that of the Shat-el-Arab at 295,000 cubic ft. The area of the joint basin is estimated at 266,000 sq. m.

Tiguabo, vil., Cuba, about 30 m. ENE. Santiago de Cuba; in the neighbourhood some of the Indians of Cuba still survive.

Tigutso, lake, Tibet, 75 m. SE. Lhasa, between the two chains of the Himálayas. Alt. 15,500 ft.

Tih, region, Sinai. See **El Tyh.**

Tihama. See **Arabia.**

Tihany, vil., Hungary, co. Zala, 21 m. E. Tapolcza; has an ancient abbey, founded 1054, which possesses a vast library. P. <2000.

Tihule, pass, Isthmus of Panama, pointed out as a favourable route for a canal between the two oceans. Alt. only 465 ft.

Tihwa-chou, Chinese name for **Urumtsi** (*q.v.*).

Tijára, tn., India, Rájputána, 50 m. SSW. Delhi. P. (1881) 7700.

Tijucas, seapt., Brazil. See **São Sebastião.**

Tikal, site of ruins, Central America, Guatemala, 44 m. ENE. Sacluc or Libertad.

Tikári, municip., Brit. India, Bengal, dist. and 17 m. NW. Gayá. P. 11,500; Hindus, 8900; Moham. 2600.

Tike, or **Romanzoff,** isl., Pacific, in the N. of the Tuamotu group, in about 15° S., 144½° W.

Tikehau, or **Krusenstern,** isl., Pacific, in the W. of the Tuamotu group, in about 148° 15′ W., crossed by 15° S.

Tikhoryetskaya, Cossack vil., Russia, N. Caucasia, prov. Kubañ, 125 m. NW. Stavropol, on Tikhaya R. P. 8670.

Tikhvin, dist. tn., Russia, govt. and 134 m. NE. Novgorod, on Tikhvinka R.; flour-mills distilleries; considerable navigation. P. 6600.

Tikhvinskaya Sistema, one of the three systems of canals and rivs., Russia, by which the upper Volga is connected with the Gulf of Finland. It begins on the Volga, at its junction with the Mologa, at Rybinsk; then follows up the Mologa and its trib. Chagodoshcha, which is connected by the **Tikhvinskiy Canal** with the **Tikhvinka,** a trib. of Lake Ladoga. The Ladoga Canal, along the S. ct. of the lake, connects the Tikhvinka with the Neva. Total length of the system 442 m., or 551 m. from Volga to St. Petersburg. Over 11,000 vessels, transporting goods to the value of nearly £5,000,000, traverse this system every year.

Tikillin, par., Ire., co. and 3 m. NW. Wexford, bar. E. Shelmaliere. P. <750.

Tikjöb, vil., Denmark, Seeland, 8 m. NE. Frederiksborg. P. with Hornbäk and Hellebäk, 6600.

Tikki-Tikki. See **Akka.**

Tiklat, the ancient *Tubusuptus,* site of ruins, Algeria, prov. Constantine, 19 m. SW. Bougie.

Tiknock, tnld., Ire., co. Carlow, bar. and par. Rathvilly. P. <250.

Tikorangi, post-tn., New Zealand, North I., Clifton co., 15 m. from New Plymouth by road and rail. P. <1500.

Tikota, tn., India, Bombay, in native state Jath, 10 m. W. Bijápur. P. (1881) 5900.

Tikri, tn., Brit. India, NW. Provs., dist. and 26 m. NW. by W. Meerut. P. 6700; Hindus, 5200; Moham. 900.

Tikvesh, or **Tekush,** country, Turkey in Europe, NW. vilayet Salonica, on r. bk. of the Vardar; the principal localities are Negotin and Kavadar; noted for its wine.

Tilala, mt. pass, E. Tibet, in Zayul or Dzayul Mts., which separate the basin of the Lutse-kiang from that of the Brahmaputra. Alt. 16,110 ft. (according to the Pundit A. K.).

Tilberthwaite, mt. vale, Eng., N. Lancashire, 3 m. N. Coniston; has slate quarries.

Tilbrook, par., Eng., on the E. border of Bedfordshire, Biggleswade div., 12 m. N. by E. Bedford, 1 m. SW. by S. Kimbolton stn., P.O. P. <500.

Tilburg, tn., Holland, prov. N. Brabant, 14 m. SW. Bois-le-Duc; has manufactures of cloth and woollens. P. (comm.) 34,000.

Tilbury, rly. stn., Canada, Ontario, Kent co., 32 m. E. by S. Windsor. **Tilbury, East,** post-vil., 4 m. E. by S. P. <1500.

Tilbury, vil., Eng., Essex, Saffron Walden div., 10½ m. N. Braintree, 1½ m. N. by E. Yeldham stn. See **Ovington.**

Tilbury, East and **West,** two adjoining pars., Eng., Essex. East T., SE. div., on the Thames, 13 m. SE. by E. Romford, PMT.O. (**T.**), and P.O. (**East T.**). P. 500. West T., on the London, Tilbury, and Southend Rly., with a stn. (**Low Street**), PM.O. P. <750.

Tilbury Fort and Docks, on l. bk. of the Thames, opposite Gravesend, 1½ m. SW. of West T., with a stn. (**T.**) on the London, Tilbury, and Southend Rly., strongly fortified, enclosed by a moat in a marshy tract, which may be wholly laid under water. It was originally erected during the reign of Henry VIII. The tidal basin (17½ ac.) is available at all states of the tide, and has a depth of 45 ft. at ordinary springs, and 40 ft. at ordinary tides. The four docks offer a joint area of 54 ac., and a joint length of 12,984 ft. of quayage; the main dock has an area of 25 ac. **T. Docks** stn. is 1 m. NW., on the same railway.

Tilbury juxta Clare, par., Eng., Essex, 3 m. S. Clare. P. <250.

Timadanin, tn., Sahara, dist. Reggan, 332 m. SW. El Golea; one of the most important markets of Tuat. Breeding of camels and sheep.

Timah (of Judah), place named in O. T. See **Tibna.**

Timahoe, par., Ire., P.O. See **Fossy.**

Timahoe, par., Ire., co. Kildare, bar. Clane, on the Grand Canal, 2 m. NW. Robertstown; 9896 ac. P. <750.

Timakova, Dutch New Guinea. See **Timoraka.**

Timanskiy Kryazh, range of mts., NE. Russia, watershed between Pechora and Dvina. The **Timanskiy Bereg** is the name given to the coast of Arctic Ocean from Svyatoi Nos to the estuary of Pechora, and the *tundras* inland are known as **Timanskaya Tundra.**

Timao, port, China. See **Shangchwan.**

Timaru, seapt., New Zealand, South I., Geraldine co., on the E. ct., 50 m. N. by E. Oamaru, in 44° 23′ S.; manufactures agricultural implements. The tidal harbour (area, 50 ac.) has a depth at entrance at low water ordinary springs of 22 ft., alongside ord nary springs, high water 19–27 ft., low water 13–21 ft. The harbour, which is formed by a mole (2350 ft. long) on the N., and a concrete breakwater on the S., has no bar. Dredging s being carried on (1894). P. <4000.

Timassin and **Timassinin,** oases, Sahara. See **Temassin** and **Temassinin.**

Timavo, riv., Carniola. See **Reka.**

Timbalier, a long low isl., U.S., Louisiana, in the N. of the Gulf of Mexico, off the S. of Terre Bonne co., at the mouth of **T. Bay,** in about 90° 17′–26′ W.

Timbang, isl., Brit. N. Borneo, in Sandakan Harbour, E. ct.

Timbarra, goldfields tp., New South Wales, Drake co., in 28° 58′ S., 152° 30′ E.; tin has also been found. P. <1500.

Timbebas, Recife, a group of coral reefs on the E. ct. of Brazil, in 17° 25′ S.

Timberland, par., Eng., Lincolnshire, N. Kesteven div., 12½ m. SE. Lincoln, 2 m. E. of its stn. (**Scopwick and T.**) on the G. E. & G. N. Joint Rly., P.O. P. <500.

Timberscombe, par., Eng., Somerset, Wellington div., 18 m. N. Tiverton, P.O. P. <500.

Timble, Great and **Little,** two adjoining pars., Eng., Yorkshire, W. Riding, Otley div., 7½ m. W. by S. Harrogate, 4½ m. NE. Ben Rhydding stn. P. (of each) <250.

Timbo, colony, Argentine Republic, Santa Fé, 115 m. SW. by S. Corrientes.

Timbo, cap. of Futa Jallon, French W. Africa, in 10° 40′ N., 11° 43′ W.; has a large mosque. First visited by Watt and Winterbottom in 1794.

Timboro, volcano, Sumbawa I., E. Archipelago; great eruption in 1815, before which date it is said to have been very much higher. Alt. 9040 ft.

Timbuctoo, gold-mining vil., U.S., California, Yuba co., 18 m. E. Maryville, near Yuba R. P. <1500.

Timbuktu, or **Timbuctoo,** in French spelling **Tombouctou,** tn., W. Africa, in the Sahara, on the border of the slightly elevated tableland to the N. of the swamps and channels connected with the Niger, about 9 m. N. of the main stream, in 16° 49′ N., 2° 52′ W. (Caron, 1887), near the point where the river changes its course from NE. to E. To this situation the town owes all its importance. The neighbourhood is almost entirely unproductive, and the town is dependent for all necessaries on imports (mainly from Massina), but its position makes it a focus of caravan routes (from Algeria and Morocco to Tuat and thence SSW.), as well as of the Niger traffic in two directions. River ports, Kabara, 6 m., and Koriume, 9 m. distant). Manufactures are of little importance, but there is a large trade in salt (from Taudeni, about 350 m. due N.), kola-nuts, gums, ostrich feathers, and manufactured articles; the total amount roughly estimated at upwards of 50,000 tons. Trade chiefly by barter; small bags of gold-dust (each about 60 grains) and cowries being used, however, to some extent as money. The town is naturally a dependency of Massina, but its possession is constantly disputed by the plundering Tuareg of the Sahara. It is now in the French sphere of influence. Alt. 800 ft. (Lenz). P. estimated by Lenz (1880) at less than 20,000 (including environs); estimated by Caron (1887) at less than 5000.

Timduin, tn., S. Morocco, prov. Sus. P. 2000.

Time, tn., Wasulu, western Sudan, 9° 15′ N., 7° 0′ W.

Timene, country, E. Africa, inhabited by a tribe of the same name, who, to some extent, cultivate the soil. Length E. to W. 90 m.; N. to S., 50 m.

Timgad, site in Algeria, prov. and about 65 m. S. by W. Constantine, on one of the spurs of Aures, with numerous ruins of the ancient Roman *Thamugas*, a colony of veterans formed after the victories of Trajan over the Parthians. It has paved streets, a forum ornamented with statues, temples, fountains, &c.

Timimun, tn., French Sahara, cap. dist. T., 224 m. SW. El Golea, surrounded by a vast battlemented wall; cultivation of fruit-trees, cereals, and vegetables. The inhabitants work the salt, alum, and saltpetre found in the dist. P. 6600.

Timle, vil., Asia Minor, on the N. ct., 97 m. W. Sinope.

Timmi, the most prosperous dist. of Tuat, French Sahara, about 300 m. SW. El Golea; has numerous troops of camels; date-palms, vegetables, fruits, tobacco, &c.; active trade.

Timmonsville, vil., U.S., S. Carolina, Darlington co., 68 m. E. by N. Columbia. P. <1500.

Timnah, place named in O. T. See **Tibneh.**

Timnath Heres, vil., Palestine. See **Kefr Hâris.**

Timogue, par., Ire., Queen's co., bar. and 2 m. SW. Stradbally, on riv. Straid. P. <250.

Timok, riv., Balkan Penin., formed by the union of the Tergovishki T. and the Sverlishki T., forms part of the boundary between Bulgaria and Servia, and joins the Danube after a NE. course, 18 m. NNW. Widin. Length, 84 m. from the source of the Sverlishki T.; area of basin, 1830 sq. m.

Timok, circle, Servia, covered with mountain ranges; considerably enlarged in 1890. Area, 808 sq. m.

Timoleague, anciently *Teachmolaga*, after an abbot who died here about 660 A.D., par. and tn., Ire., S. co. Cork, bars. E. Carbery, E. div., Iblane and Barryroe, 11 m. WSW. Kinsale, at the head of Courtmacsherry Bay; has remains of a Franciscan abbey (14th and 15th centuries). PMT.O. Par. P. <1000; tn. P. <500.

Timolin, par., Ire., SE. co. Kildare, bars. Narragh and Reban E., 7 m. E. Athy, 3 m. from Grange Con stn. P. <750.

Timoney, electoral div., Ire., NE. co. Tipperary, bar. Ikerrin, 14 m. SE. by S. Parsonstown.

Timoole, par., Ire., co. Meath, bar. Skreen, on Nanny Water, 3 m. SW. Duleek. P. <250.

Timor, or **Timur,** isl., Malay Archipelago, the most easterly of the Sunda chain, between 8° 0′ and 10° 20′ S., 123° 30′ and 127° 0′ E., separated from Australia by the Timor Sea. The SW. part of the island belongs to the Dutch (cap. Kupang), the NE. part to the Portuguese (cap. Deli, on the N. ct., the best port). It is traversed by ranges of mountains (up to 11,500 ft.), showing few traces of volcanic activity. The N. side is the better watered, and has the richer vegetation; but as a whole, both flora and fauna are poor compared with other islands of the archipelago. The S. side shows affinities with Australia. The soil is not very fertile, and the dryness during half the year is unfavourable to cultivation. Principal exports are sandal-wood, bees'-wax, cattle, horses, maize, and sago, in return for muskets, gunpowder, hardwares, calicoes, and other British manufactures, besides rice, arrack, and native produce from Java and Macassar. Sago is the chief article of food; millet, maize, yams, sweet potatoes, and cotton are grown; iron, gold, copper, and rock-salt are met with, but no mines are wrought. Pearls are fished off the SW. extremity of the island. The population is composed of three native groups, and in the ports are Malays, Bughis, Chinese, some Dutch, and the mixed race called 'black Portuguese.' There is no black or Papuan population at Timor as was formerly believed, but negroid characteristics appear amongst the Timorians. Length, 340 m.; breadth, 40–60 m.; area, 11,696 sq. m. Dutch possessions 5190 sq. m., the rest Portuguese. P. estimated at 600,000 (Wagner and Supan); 786,100 (Reclus).

Timor, mining vil., Victoria, Talbot co., on T. Creek, 35 m. SW. Sandhurst. Here is the Duke and T. mine, with the most extensive pumping machinery in Victoria. P. <1500.

Timoraka, or Timakova, dist., on S. ct. of Dutch New Guinea, in about 137°–139° E.

Timor-Laut, or **Tenimber,** isl., Malay Archipelago, between 7° 10′ and 8° 30′ S., 131°–131° 40′ E., 250 m. NE. Timor. Surface mountainous and wooded. The natives give the name of T.-L. to two large islands only, Yamdena and Selaru; they call the rest Tenimber. These islands generally have an alt. of only a few feet. Owing to the calcareous nature of the soil there are few running streams, and much of the surface is barren and uninhabited. The natives, who are almost independent, resemble the Malays rather than the Papuans. Exports trepang and pearl oysters; imports woollen goods, iron and copper articles, and pottery. Area, 2124 sq. m. P. 19,300.

Timotes, vil., Venezuela, Los Andes, 290 m. WSW. Carácas.

Timperley, par., Eng., Cheshire, Altrincham div., 7 m. W. by S. Stockport, on the L. & NW. R. and (**West T.**) on Cheshire Lines Rly., PMT.O. P. <2500.

Timsbury, par., Eng., Hampshire, New Forest div., on the Anton, 9 m. WSW. Winchester, 1½ m. SE. Mottisfont stn. P. <250.

Timsbury, par., Eng., Somerset, N. div., 6½ m. SW. by W. Bath, 1 m. W. Camerton stn., PMT.O. P. <1500.

Timtelas, dist., Algeria, prov., arr., and 34 m. SW. Constantine; has Roman remains.

Timur, isl. See **Timor.**

Tinzulin, oasis, Sahara, 120 m. SW. Morocco, on r. bk. of the Wed Draa.

Tioga, railway stn., Canada, Ontario, Simcoe co., 50 m. NW. by N. Toronto.

Tioga, riv., U.S., rises in the N. of Pennsylvania, and flows SW. then N. into New York, in which state it joins the Chemung above Corning, about 16 m. WNW. Elmira.

Tioga, bor., U.S., Pennsylvania, T. co., on Tioga R., 84 m. NW. by N. Scranton. P. <1500.

Tioge, name given to the river which enters Lake Ngami, central S. Africa, and which is either the lower course or a branch of the Kubango or Okavango; its course is exceedingly tortuous. In the dry season its bed is quite empty, except where stagnant pools are formed.

Tioken, isl., Pacific, in the N. of the Tuamotu group, in about 14° 15′ S., crossed by 145° W.

Tionesta, bor., U.S., Pennsylvania, Forest co., on Allegheny R., 55 m. SE. by S. Erie. P. <1500.

Tiong, tn., French Sudan, Niene or Niendugu, 68 m. SW. Sikasso, surrounded by large earth walls, but now contains only 500 inhabitants.

Tioughnioga, riv., U.S., New York, flows S. to the Susquehanna, which it joins on the r. bk. at Binghamton. Length about 80 m.

Tipaza, vil. and small port, Algeria, on the N. ct., arr. and 36 m. WSW. Algiers; has splendid vines. The port, open to NE. and NW., offers anchorage in about 6 fathoms; not safe; lighthouse. Site of Roman colony, *W. Tipasa.* P. <2000.

Tiphsah, place named in O. T. See **Tafsah.**

Tipitapa, tn., Central America, Nicaragua, 15 m. ENE. Managua.

Tippah, co., U.S., Mississippi, in the NE., on the N. frontier, crossed in the W. by 89° W.

Tippecanoe, co., U.S., Indiana, between 41° and 40° N., crossed in the W. by 87° W., traversed by Wabash R.

Tippecanoe, vil., U.S., Ohio, Miami co., on Great Miami R., 65 m. NNE. Cincinnati. P. <1500.

Tippecanoe River, U.S., Indiana, issues from T. Lake in E. of Kosciusko co., flows SW. into Wabash R. in White co. Length about 200 m.

Tipper, par., Ire., co. Kildare, bar. N. Naas, 2 m. SE. and containing part of town of Naas. P. <500.

Tipperah, dist., Brit. India, in the SE. of Bengal (*q.v.*), Chittagong div.

Tipperary, inland co., Ire., prov. Munster, partly in the Shannon basin, on W. and N., but mostly on S. and E., sloping to St. George's Channel, and contains 4 parl. divs., as in the following table:—

Baronies.	Acres.	Pop. 1891.
Eliogarty	90,258	17,023
Ikerrin	69,805	10,840
Kilnamanagh, Upper	59,990	9,542
Ormond, Lower	127,223	17,496
Ormond, Upper	79,472	9,594
Owney and Arra	85,495	11,725
Total of North Riding	512,243	76,220
Clanwilliam	115,960	24,139
Iffa and Offa, East	57,134	21,340
Iffa and Offa, West	117,176	16,986
Kilnamanagh, Lower	42,042	5,637
Middlethird	113,642	15,971
Slievardagh	90,773	12,895
Total of South Riding	536,727	96,968
Total, Tipperary	1,048,970[1]	173,188

[1] Exclusive of 12,762 ac. under the larger rivers and lakes.

The watershed between is a continuation of the Slieve Bloom Range to NE. The surface is mainly an undulating plain, part of the great central Carboniferous system, of limestone formation, and presents much fine scenery, particularly in the valley of the Suir. On the Kilkenny border the hills are coalstone shales and sandstones, while the Knockmealdown Mts., S. border reaching 2609 ft., consist of clay slate; the Galtees, SW., reach 3008 ft.; NW. is a range of Silurian and sandstone, with Keeper's Hill, 2265 ft. The chief river, watering the southern slope of the county, is the Suir, rising in Devil's Bit Mt. near Templemore, where the Nore also rises to flow SE. through Kilkenny. The coal-measures in this county, about 20 m. long, are part of the Leinster coalfield, anthracite with thin seams, worked to a small extent at Thurles, Lisnamrock. Slate is worked at Carrick-on-Suir and Nenagh. As a natural curiosity the stalactite caves at Mitchelstown are much visited. The staple occupation is in tillage, pasturage, and dairy-farming, this county being one of the most fertile dists. in Ireland owing to the rich calcareous loam—*e.g.*, 'the Golden Vale,' the dist. in which the county town stands. It has a larger percentage of area under cultivation than any county except Down. Milk-condensing is now carried on on a large scale at Clonmel. For agricultural statistics, see **Appendix,** pp. 10–12. The railway communication is excellent; G. S. & W., with branch of the Limerick and Waterford Rly., besides other branches. Henry II., in 1172, received at Cashel the homage of O'Brien, King of Thomond; and in 1210 King John converted the dist. into a county, which in the 14th century and afterwards was held as a county palatine by the earls and dukes of Ormonde. Two round towers, at Roscrea and on the notable rock of Cashel, an abrupt mass of limestone; some important old castles and ecclesiastical ruins, especially Holy Cross. The county is divided for parliamentary purposes into 4 divisions (East T., P. 44,700; Mid T., P. 43,900; North T., P. 43,400; South T., P. 41,000), each returning 1 member. It contains the towns Clonmel (partly in Waterford), Tipperary, Carrick-on-Suir, Nenagh, and Thurles. See **Ireland,** table.

Tipperary, par., civic and market tn., Ire., SW. co. T., bar. Clanwilliam, 11 m. W. by S. Cashel, on the Waterford and Limerick Rly. Its only relic of antiquity is the gateway of the Austin Friary, founded in the reign of Henry III. Market-days, Th. and S. Par. 4363 ac., P. <5000; tn. P. 6400.

Tirano, tn., Italy, Lombardy, prov. Sondrio, on the Adda, 43 m. NE. by N. Bergamo; ½ m. W. is the church of the Madonna of T., much frequented place of pilgrimage. P. 6100.

Tiraspol, dist. tn., Russia, govt. Kherson, 73 m. by rail NW. Odessa, on l. bk. Dniester; good gardens; flour-mills, tobacco factories; considerable trade. P. 22,300.

Tirawley, bar., Ire., in the N. of co. Mayo.

Tirband-i-Turkistan, mt. chain, Afghanistan, running mainly E. and W. between the Murghab and the Balkh R., in about 35° 20′ N. lat.

Tircahan, electoral div., Ire., Cavan, dist. Swanlinbar.

Tire, tn., Asia Minor, at the N. foot of the Juma Dagh, 39 m. SE. by E. Smyrna, terminus of a branch railway.

Tire, or **Tira,** tn., Turkey in Asia, vilayet and sanjak Smyrna. P. 14,500; Moham. 8200; Orthodox Greeks, 6000.

Tireboli, the ancient *Tarabulus,* seapt., Asia Minor, on the N. ct., vilayet and 48 m. W. Trebizond. The dist. abounds in copper, silver, and other ores, which were worked in ancient times, but are now neglected. P. 8000; Moham. 5600; Orthodox Greeks, 2000 (Cuinet).

Tiree, or **Tyree,** one of the Inner Hebrides, Scot., co. Argyll, of which it is the most W. portion, 20 m. WNW. Iona. Length, 13 m.; breadth varies to 6½ m. Shores greatly indented; surface low, having a mean height of 20 ft. above the sea; and it is destitute of wood. It contains numerous small lakes, is generally fertile, and has a plain of 1560 ac. of rich pasture land in its centre. Barley, oats, and potatoes are grown. Cattle-rearing, fishing, and the export of poultry and eggs are the chief resources of the population. The village of Hynish, at its S. end, is a station of the Northern Lights, and has quarries from which Skerryvore lighthouse (10 m. SW.) was built. T., with the islet Skerryvore, forms a par. PMT.O. (**Tiree**). 18,942 ac. P.<2500; (isl.) 2449.

Tireh, tn., Asia Minor, 39 m. ESE. Smyrna, divided into quarters separated by wooded ravines, and surrounded by orchards and vineyards.

Tireragh, bar., Ire., in the NW. of co. Sligo.

Tirerrill, bar., Ire., in the E. of co. Sligo.

Tir Evan, par., Wales, Denbighshire, union and 8½ m. SE. Llanwrst, on riv. Conway; 8937 ac. P.<500.

Tirgoviṣte, tn., Roumania, prov. Prahova, on the Ialomiţa, 27 m. W. Ploescî (Ployeshti); has important arsenal and historic ruins. P. 8300.

Tîrgu Frumos, tn., Roumania. See **Târgul-Frumos.**

Tîrgu Jiului, tn., Roumania, cap. prov. Gorjiu, on the Jiulŭ, 47 m. ENE. Orsova. P.<5000.

Tîrgu-Ocna, tn., Roumania. See **Ocna.**

Tirhoot, isl., Persian Gulf. See **Tarut.**

Tirhugh, bar., Ire., co. Donegal.

Tiriberskaya Bay, Russia, Arctic Ocean, on the coast of Lapland, 69° 11′ N., 35° 9′ E., 12 m. ESE. from Kildin I.

Tirioło, tn., Italy, Calabrie, prov. and 5 m. NW. Catanzaro; has silk-culture, and coal and iron mines. T. stands on the site of ancient *Thurium.* P.<4000.

Tiris, maritime terr., W. Sahara, N. of Arguin Bay. There are no streams, and no settled inhabitants, but from October to May it is covered with pasturage, to which the tribes for long distances round bring their flocks.

Tirkane, P.O., Ire., 3 m. from Maghera (co. Londonderry).

Tirkeeran, bar., Ire., in the W. of co. Londonderry.

Tirkelly, tnld., Ire., co. Down, bar. Upper Iveagh, Lower Half, Drumballyroney par. P.<250.

Tirkennedy, bar., Ire., in the E. of co. Fermanagh.

Tirlemont, Flemish **Tienen,** tn., Belgium, prov. Brabant, on the Great Greete, arr. and 12 m. ESE. Louvain, 25 m. E. by S. Brussels; has cotton and wool spinning; trade in beer, grain, wool, and cattle; formerly of greater importance than at present, but suffered much in various wars. P. (comm.) 16,000.

Tirley, par., Eng., Gloucestershire, div. and 3½ m. SW. by W. Tewkesbury, on the r. bk. of the Severn, P.O. P.<500.

Tirmacspird, electoral div., Ire., Fermanagh, dist. Ederny.

Tirnovo, Bulgarian spelling **Trnovo,** improperly **Tirnova,** tn., Bulgaria, cap. prov. T., at N. base of Balkans, 45 m. N. Stara Zagora (Eski-Saghra), situated on a group of rock terraces washed at their base by the Jantra. It is divided into a Christian quarter on a hill, and a Mussulman quarter in the valley; an important market. Population almost entirely Bulgarian, the Turks, formerly equal in number to the Bulgarians, having been reduced in 1888 to 688. P. 11,300.

Tirnovo, tn., Turkey in Europe, sanjak Kirk-Kilise, 36 m. S. Burgas.

Tirol (or **Tyrol**) **and Vorarlberg** (ancient *Rhætia,* and a part of *Noricum*), a crownland of the Austrian Empire, with the title of county, about one-half larger than Wales, between 45° 39′ 30″ and 47° 45′ 15″ N., 9° 35′ and 12° 55′ E., comprising all the Austrian Alps W. of Salzburg and Carinthia, only about one-tenth of the country being level. The Oetzthal, Stubai, and Zillerthal Alps, which connect the Rhætian Alps of Switzerland with the Hohe Tauern in the E. of T., where they attain their culminating point (Gross-Glockner, 12,455 ft.), on the frontiers of T., Salzburg, and Styria, and separate the valley of the Inn in the N. from the valleys of the Drave and Adige in the S., are the principal series of mountains, rising far above the snow-line; but the highest of the crownland, the Ortlerspitze (12,810 ft.) belongs to a group lying SW. of the Adige, on the frontier of Lombardy. Probably one-tenth of the surface of T. is always covered with snow. Besides the Inn, Drave, and Adige, with their affluents, the NW. part, Vorarlberg, is watered by the Ill and Bregenz, flowing into the Lake of Constance, which forms the NW. boundary. Small lakes are numerous, and the N. part of the Lake of Garda is in the T. Climate severe in the uplands; mean temp. of year at Innsbruck 48.8° F., and at Botzen 55.4°; the narrow valleys of the S., however, have a warm climate, similar to that of the adjacent part of Lombardy. Some maize, wheat, and pulse are grown in the lower valleys, and buckwheat, rye, and oats on the mountain-sides; but the corn raised is not sufficient for home consumption, and the chief wealth of the rural population is in their cattle and other live stock. Wine and silk are the products of the southern provinces. The rearing of canary birds is pursued on a large scale in the valley of the Inn, and most parts of Europe are supplied with singing-birds from the T. The wolf, bear, wild boar, marmot, and chamois inhabit the mountain dists. The mining industry has long been important, chiefly in the basin of the Inn below Innsbruck (the NE. of the crownland). In the 15th and 16th centuries silver and copper mines attained such importance in the dist. (especially round Schwaz, Rattenberg, and Kitzbühel), that T. was regarded as the richest of the Austrian crownlands; but now the only minerals of any importance are iron, zinc, salt, lignite, lead, and sulphur. The beds of iron ore are continuations of the much more productive beds occuring in graywackes in Lower Austria and Upper Styria, whence they extend W. into the T. as far as Schwaz (Inn valley, NE. of Innsbruck), in the neighbourhood of which iron ore is smelted (at Jenbach and Pillersee). Lignite (Eocene) occurs chiefly in the Häring field (lower Inn valley). Hall, a few miles below Innsbruck, is one of the chief salt-producing centres of the Austrian dominions. Zinc is obtained principally in the Passeier-thal, SE. of the Oetzthal Alps. There are numerous mineral springs. Silks are manufactured in the S. (Rovereto); iron goods, cottons, linens,

leather, and wooden articles are made at Innsbruck, &c.; glass and paper are other manufactured products. The transit trade between Germany and Italy is important, occupying many of the population; the principal routes from N. to S. are by the Reschenscheideck (in the W.) and the Brenner (in the middle), from SW. to NE. by the Stelvio Pass (in the SW.), and from E. to W. by the Arlberg (in the NW.) and the Puster-thal (in the SE.). [**Alps,** PASSES, **III.** (11), **IV.** (1*a*), (2), and (3).] Many of the inhabitants emigrate annually as labourers into the neighbouring countries. Nearly all are Roman Catholics, under ten bishops, suffragans of the Archbishop of Salzburg. T. has its own diet of one chamber. The population are mainly German-speaking; but in the S., in the valley of the lower Adige and its tribs. (Sulzberg and Fleims valleys), Italian is spoken; and in a small tract E. of the lower Eisack, between the German and Italian dists., the so-called Ladini speak a dialect allied to the Romansh of the Grisons. Cap. Innsbruck; the only other towns of importance are Trient and Botzen. T. was originally the name of a castle above Meran, which is mentioned about 400 A.D. under the Latin form *Teriolis*, and became the seat of counts. The terr. passed into the possession of the house of Habsburg in the 13th century, and its inhabitants are among the most attached to the Imperial rule in the Austrian Empire. Area, 11,308 sq. m. P. (1890) 929,000. See **Austria,** table.

Tiroran, P.O., Scot., near Oban, Argyllshire, 8 m. from Pennyghael.

Tir Phil, stn., Wales, Glamorganshire, on the L. & NW. R., adjoining New Tredegar, 6 m. ESE. Merthyr-Tydfil.

Titicaca, Lake, the most elevated and one of the largest lakes of S. America, on the boundary between Peru and Bolivia,

in a wide valley of the Andes, between 15° 12′ and 16° 20′ S., 68° 35′ and 70° 2′ W. Celebrated as the cradle of Peruvian civilisation. Elevation of surface above the ocean variously estimated from 12,500 to 12,800 ft.; greatest depth according to Agassiz, 925 ft. Shape very irregular; it has several extensive bays, enclosed by projecting penins. To the N. the shores are flat, but to the E. the mountains rise abruptly from the coast. It receives several small rivers, and discharges its surplus waters southward by the riv. Desaguadero. The water is fresh, but of bad taste. Several species of fish abound. Steamers ply on it. The railway from La Paz to Cuzco passes along its W. shore. It contains many small mountainous islands, on one of which, named Titicaca, towards its S. extremity, the last Inca dynasty is said to have had its origin. Steam navigation introduced in 1893. Estimated area, 3261 sq. m.; length, 120 m.; average breadth, 40 m.

Titicus, settlement, U.S., Connecticut, Fairfield co., 18 m. WNW. Bridgeford.

Tlal-pujahua-de-Bayon, vil., SW. Mexico, state Michoacan, 16 m. ESE. Maravatio. P. (comm.) 8400.

Tlapa, tn., Mexico, Guerrero, 100 m. S. by W. Puebla. P. (comm.) 5400.

Tlatelulco, one of the two towns of which the city of Mexico consisted before the Spanish conquest.

Tlaxcala, one of the central states of Mexico, between the federal district of Mexico and Puebla.

Tlaxcala, tn., Mexico, state T., 18 m. N. Puebla. It has a cathedral, and a magnificent Franciscan convent; and was the cap. of the republic allied with Cortes against Montezuma, and then contained 300,000 inhabitants. P. 7000.

Tlaxco, tn., Mexico, Tlaxcala, 39 m. N. Puebla. P. 8000.

Tlaxiaco, tn., Mexico, state of Oaxaca. P. (comm.) 7000.

Tlemsen, French spelling **Tlemcen,** tn., Algeria, cap. arr. T., 70 m. SW. by S. Oran. Its gardens abound in fig and other fruit trees, the plain yields rich harvests of cereals, and the vine is grown. The ancient walls, now in ruins, once enclosed a much larger area. European merchants are said to have been formerly settled here in large numbers, and to have carried on an extensive commerce with the interior. Its numerous mosques have now fallen into decay. Various antiquarian remains have been collected in a museum. Suburbs of T. are Sidi-bu-Medin and Mansura, places of note in Algerian history. Alt. 2703 ft. Mean temp., yr. 60.2° F., Jan. 47.6°, July 77.3°; rfall. (5 yrs.), 18.98 in. P. 19,700.

Tlets, ruins of the Roman settlement of *Seriana,* Algeria, prov. Constantine, 12 m. N. Batna; French colony.

Tlingits, or **Thlinkets,** also called **Kolooshes, Koluishes,** or **Koluisks,** the name of the native tribes of south-eastern Alaska; totemists. Estimated in 1869 at 12,000-15,000; in 1880 numbered 6437; in 1890, 4457.

Tlumacz, tn., Austria, crownland Galicia, 54 m. SW. by S. Tarnopol. P.<5000.

Tlumatschau, tn., Austria, Moravia, dist. Napagedl. P.<3000.

Tmai, vil., Egypt. See **Tell-et-Tmei.**

Tmolos, ancient name of the Boz-dagh, mt. chain, Asia Minor, E. of Smyrna.

Tō, or **Tu,** tn., China, prov. Shantung, 120 m. SSW. Tientsin, on the Grand Canal.

To, a mouth of the Iráwadi, Lower Burma, also known as China Bakir.

Tó, Hungarian, 'lake.'

Toachi, riv., Ecuador. See **Esmeraldas.**

Toad Mountain. See **Nelson,** Brit. Columbia.

Toad's Cove, fishing settlement, Newfoundland, 26 m. from St. John's.

Toames, P.O., Ire., co. Cork, 5 m. from Macroom.

Toano, vil., U.S., Nevada, Elko co., 65 m. SSW. of the NE. corner of the state, on the Central Pacific Railroad. Alt. 5973 ft. (R.R.). P. <1500.

Toatutia, tn., Formosa, residence of foreign merchants trading in the port of Tamsui.

Toau, or **Elizabeth,** isls., Pacific, Tuamotu group, in 16° S., 146° W. Area, 5 sq. m.

Toba, maritime tn. and excellent small port, Japan, 70 m. ESE. Kyoto. P. <5000.

Toba, lake, about 50 m. long, in the N. of the isl. of Sumatra, crossed by 2½° N., drained E. by one of the headstreams of the Assahan. It is divided into two basins by a penin., 25 m. long, stretching from the W. shore. The mountains surrounding the lake are very abrupt. Cultivation of rice, maize, pepper, cotton, tobacco, &c. Greatest depth found by Modigliani. Alt. 1475 ft.; average breadth, 16 m.

Tobago, picturesque British isl., W. Indies, to the NE. of Trinidad, to which it has been joined since 1889. T. has no docks. Man-o'-War Bay forms a good harbour. Sugar is the staple crop. Alt. 1900 ft.; length, 26 m.; greatest width, 7½ m.; area about 115 sq. m. P. (1891) 18,400.

Tobago Islands, a group of islets, W. Indies, Virgin Is., in 64° 50′ W., to the NE. of St. Thomas.

Toba Inlet, Canada, prov. Brit. Columbia, stretches NE. from Desolation Sound.

Toba Plateau, an elevated region, Afghanistan, to the N. o the British dist. of Pishin, in about 31° N., 66⅔°–67⅔° E., more properly the eastern portion of this region (alt. about 7800 ft.), separated from **Tabin,** the western portion (alt. about 7200 ft.), by a narrow line of hills. *Proc. R. G. S.,* 1880, pp. 623–24, map, p. 272.

Tobarra, tn., Spain, prov. and 30 m. SSE. Albacete, dist. Hellin. P. 7600.

Tobas, wild Indians, Bolivia and Paraguay, in Gran Chaco, N. of Pilcomayo. In their dist. Dr. Crevaux and his companions were murdered in 1882.

Tobaty, vil., Paraguay, 36 m. E. by N. Asuncion.

Tobelbad, health resort, Austria, Styria, 7 m. SSW. Graz. P. <2000.

Tobercurry, tn., Ire., S. co. and 18 m. SW. by S. Sligo, bar. Leyny, 10 m. from Ballymote stn., PMT.O. (**Tubbercurry**). P. <1000.

Tobermoney, P.O., Ire., co. Down, 3 m. from Downpatrick.

Tobermore, tn., Ire., SE. co. Londonderry, bar. Loughinsholin, 12 m. N. Cookstown, 3 m. ENE. Draperstown, PMT.O. (**Tubbermore**). P. <500.

Tobermory, vil., Scot., Argyllshire, at the head of T. Bay, in the NE. of Mull; has a landlocked harbour; regular communication with Skye, Lewis, and the Clyde, and daily mail-boat to Oban. PMT.O. P. <1500.

Tobernea, electoral div., Ire., Limerick, dist. Kilmallock.

Toberonochy, vil., Scot., Argyllshire, on E. ct. of Luing I., 15 m. SSW. Oban.

Toberpatrick, East and **West,** two electoral divs., Ire., Sligo, dist. Skreen.

Toberroe, tnld., Ire., co. Galway, bar. Dunmore, Kilconla par. P. <250.

Tobhar, tn., Middle Egypt, prov. Fayum, 9 m. W. Medinet-el-Fayum. P. <5000.

Tobi, isl., Pacific. See **Lord North.**

Tobinstown, P.O., Ire., 5 m. from Tullow (co. Carlow).

Tobique River, riv., Canada, in the NW., New Brunswick, flows SW. into the riv. St. John, which it enters a little below the mouth of the Aroostook.

Tobitschau, tn., Austria, Moravia, on riv. March, 11 m. S. by E. Olmütz. A battle was fought here between the Prussians and Austrians, July 15, 1866. P. <3000.

Toblach, vil., Austria, Tirol, in the Paster-thal, 46 m. ENE. Botzen; much frequented summer resort, with bathing establishment. P. <2000.

Toblino, small lake, Tirol, 7 m. W. Trent, in the valley of the Sarca, of which its outlet is a l. bk. branch.

Toboali, tn., Eastern Archipelago, in the S. of Banka Is., on the coast.

Tobol, riv., Russia, provs. Turgai, Orenburg, and Tobolsk, rises in S. Urals, at an alt. of 1070 ft., flows NE., joins Irtysh opposite Tobolsk. Its l. bk. tribs., Ayat, Ui, Iset with Miyas, Tura (450 m.), upon which stands Tyumeñ and Tavda (650 m.), are large rivers. Length, 805 m.

Tobolsk, govt., Russia, W. Siberia, extends from Akmolinsk and Semipalatinsk in S. to Arctic Ocean in N., having Orenburg, Perm, Vologda, and Archangel on W., and Tomsk and Yeniseisk on E., and thus occupying an area four and a half times as large as the United Kingdom. It touches the Arctic Ocean from Kara R. to Taz Bay, including the large Yalmal Penin. between the Kara Sea and the Bay of the Ob′, which penetrates for 550 m. into the mainland, and receives another long outlet, the Tazovskaya (or Taz) Bay. The N. Urals, 3000 to 5540 ft. high, separate Tobolsk from European Russia, N. of 61° 30′, while further S. their E. slopes are included in Perm. The remainder of Tobolsk are lowlands, only a few hundred feet above the sea-level—fertile prairies in S., including the Tobol and Ishim steppes in SW., and the Baraba steppes in SE.; marshy forests in middle and N., and treeless *tundras* near the Arctic coast. Owing to the warm summer, and the fertility of the steppes, the S. parts of govt. Tobolsk are getting rapidly colonised by Russian immigrants, and now have more than 1,000,000 Russians, as against less than 20,000 aborigines. The middle parts of Tobolsk are covered with forests (*taiga*), often marshy (*urmans*), and are only inhabited along the courses of the rivers (about 450,000 inhabitants, 32,000 aborigines). The *tundras* beyond the Arctic Circle are only visited by nomadic Hyperborean and Finnish stems. The climate is very severe and wet, the average temps. at Ishim, Tobolsk, Narym, and Berezov being: yr. 32°, 31.8°, 28°, and 24°; Jan. −4°, −2°, −8°, −8.3°; July 68° to 62°. In the *tundras* the average yearly temps. sink to 15°, and even 7°. Tobolsk is watered by the Ob′ and its numerous tribs., navigated for six months. Many lakes in S. rapidly desiccating. Population chiefly Russian (over 94 per cent.), the remainder being about 24,000 Ostyaks, 7000 Samoyedes, 6000 Voguls, and about 40,000 Tatars and Turkish stems in S. Agriculture is largely carried on in S.; extensive cattle-breeding (frequent murrains). Considerable fishing, hunting; industries insignificant; brisk trade. Divided into ten dists.: Tobolsk, Berezov, Ishim, Kurgan, Surgut, Tara, Turinsk, Tyukalinsk, Tyumeñ, and Yalutorovsk. Apart from Tyumeñ (36,800 inhabitants) and Tobolsk (22,600), all towns have less than 10,000 inhabitants. Area, 539,660. P. (1870) 1,086,850,; (1889) 1,313,400; (1894) estimated at 1,500,000.

Tobolsk, cap. of above govt., on r. bk. of Irtysh, nearly opposite its junction with Tobol R., 1535 m. E. of Moscow. Formerly cap. of W. Siberia, is now an out-of-the-way town, visited only by steamers plying from Tyumeñ to Tomsk. It has a 'kreml,' an imitation of the 'kreml' of Moscow, built by Swedish prisoners under Peter I., and several educational institutions. The lower part of the town is unhealthy; brisk trade in corn, salt, and fish. Alt. 355 ft. Mean temp., yr. 33.3° F., Jan. 1.9°, July 67.8°. P. (1880) 20,130; (1891) 22,650.

Toboso, El, tn., Spain, New Castille, prov. and 60 m. SE. Toledo, dist. Quintanar de la Orden; immortalised in *Don Quixote.* P. <2000.

Tobosos, tribe, N. Mexico, in part of Coahuila state.

Tobruk, port, Tripoli, prov. Barca, 236 m. E. Benghazi; the largest vessels can anchor here, and a breakwater at the entrance of the bay would make it an excellent port.

Tobuai-Manu, isl., Pacific. See **Tapamanoa.**

Tobyhanna, vil., U.S., Pennsylvania, Monroe co., 21 m. SE. by S. Scranton. P. <1500.

Tocaima, vil., Colombia, Cundinamarca, 40 m. W. by S. Bogotá; has very rich copper and gold mines, formerly worked; in the neighbourhood are hot springs.

Tocantins, riv., Brazil, states Goyaz and Para; rises by many heads near Goyaz, in 16° S., 47° to 50° W., flows N., and near 6° S. it is joined by the Araguaya, a river of superior size and greater length, the united stream, however, retaining the name Tocantins until a little N. of 2° S., when, after joining a channel by which communication with the Amazon is maintained, it takes the name Para, and flows, by a wide estuary, near the town of the same name into the Atlantic. An interchange of commodities between Para and Goyaz is effected by means of boats, but navigation is rendered difficult by the numerous rapids and narrows, and the upward voyage from Para to Porto Imperial (10° S.) occupies four to five months. One of the principal rapids is that of Itaboca, in about 3° 16′ S. lat. Length, from source of T. to the sea, 2283 m.

Toccoa, tn., U.S., Georgia, Habersham co., 67 m. SW. Greenville by rail. P. <1500.

Tocco da Casauria, tn., Italy, prov. and 19 m. SW. Chieti. P. 5400.

Toce, Toccia, or **Tosa,** riv., N. Italy, rises in the Alps, near the Simplon, and after a S. and W. course of 50 m. enters Lake Maggiore on its W. side, 3 m. E. Gravellona, where it receives

the surplus waters of Lake Orta. In its upper valley, known as the Val Formazza, is the waterfall known as the cascade of Frua or Della Tosa, the most powerful cataract of the Alps. Lower down the valley widens and takes the name Val d' Ossola (chief town Domo d' Ossola).

Tochi, riv., Afghanistan. See **Gambila.**

Tofts, West, par., Eng., Norfolk, SW. div., 21 m. ENE. Ely, 5 m. NE. Brandon stn. P. <250.

Toftwood, P.O., Eng., 2 m. from Dereham, Norfolk.

Togean Islands, group of islets, Malay Archipelago, in the Gulf of Tomini, E. ct. Celebes.

Toggenburg, dist., Switzd., cant. St. Gall, in the upper valley of the Thur; ruled till 1436 by its own counts.

Toghblane, P.O., Ire., 3 m. SW. Hillsborough, co. Down.

Togher, electoral div., Ire., co. Wicklow, dist. Annamoe.

Togher, electoral div., Ire., NW. co. Wicklow, bar. Lower Talbotstown, 11 m. SE. Naas.

Togo, tn., Ger. W. Africa, Togo-land, on the E. shore of Lake Togo, 38 m. W. by S. Whydah.

Togo-land, Ger. colony in W. Africa, between the British Gold Coast possessions (*g.v.*) and Dahome (*q.v.*). The coast-belt is low and unhealthy (Togo lagoon), but in the interior the country rises, reaching in the Akposso or Obuso Mts. an alt. of 2600 ft. Rivers: Oti, Asukoko (both tribs. of Volta), Sio, Haho, and upper Mono. The country is fertile, and inhabited by various negro tribes engaged in agriculture (maize, ground-nuts) and commerce. The chief exports are palm-oil and palm-kernels. Principal trading stations: Lome, Bagida, Little Popo, Togo, Bey, Porto Seguro. Area estimated at 19,000 sq. m. P. at 300,000. [**H. G. S.**]

Togstone, par., Eng., Northumberland, Wansbeck div., 7½ m. SE. by S. Alnwick, 2 m. ENE. Acklington (for Felton) stn. P. 500.

Togus, U.S. reservation, in state of Maine, Kennebec co., 5 m. SE. Augusta; contains the E. branch of the National Home for Disabled Soldiers, accommodating 2500 on an estate of 1700 ac. P. <1500.

Toguz (or **Tokus**) **Daban Mountains,** range of the Kuenlun system, trending from WSW. to ENE., in about lat. 37°–37° 40′ N., and long. 85½°–88° E. It has several high passes, from 14,760 to 15,250 ft. in height; highest point 'Pic du Kremlin,' alt. 19,600 ft.

Tohána, municip., Brit. India, Punjab, dist. Hissár, 70 m. SW. Ambála. P. <5000.

Tokachi, or **Tokatsi,** riv., Japan, Yezo, flows SE., and enters the Pacific by two mouths in 42° 40′–43′ N.

Tokaido, one of the nine great divs. of old Japan, comprising the S. central old provs. (kuni) of Honshiu, mainly on the Pacific.

Tokaj, tn., Hungary. See **Tokay.**

Tokajik, pass, leading across the Rhodope Mts., Turkey, from Gümürjina to the valley of the Sögüdlü (trib. Arda), in 41° 16′ N., 25° 26′ E.

Tokar, small fortified city in upper Ethiopia, about 70 m. S. Sawkin (Suakim), on the way to Kassala, on r. bk. of the Khor Baraka, where the riv. Barka breaks up into a number of irrigation canals. P. 4000; increased at the seasons of sowing and reaping to about 20,000.

Tokarimoi, tn., Japan. See **Mororan.**

Tokat, tn., Asia Minor, 125 m. NNE. Kaisarieh, vilayet Sivas; it is surrounded on three sides by hills, and built amid trees and orchards. It has manufactures of calico, dyeing works, tanneries, and large government foundry for copper, now, after an existence of thirty years, disused on account of the cost of carriage from the mines of Armenia and Kurdistan. It was a great commercial centre in the Middle Ages. T., formerly

called *Phazemon*, succeeded the ancient *Comana Pontica*, which stood 6 m. to the NE. P. 29,900; Sunnite Mohani. 17,500; Gregorian Armenians, 9000 (Cuinet).

Tokata, cape, New Zealand. See **Nugget Point.**

Tokatsi, riv., Japan. See **Tokachi.**

Tokatsi-dake, mt., Japan, in extreme N. of prov. T. Alt. 8200 ft.

Tokay, Hungarian spelling **Tokaj,** tn., Hungary, prov. Zemplen, on the Theiss, 40 m. S. by E. Kaschau; has famous wines, the produce of Mount T. Alt. 370 ft. P. (comm.)<5000.

Tokela, or **Tokelau.** See **Union Islands.**

Tokelau Reef, off S. ct. of Vanua Levu I., Fiji Is., with lagoons; the soil has little fertility; fauna and flora are very limited. The natives are fishers and sailors, but do not cultivate the soil.

Töke-Terebes, comm., Hungary, co. Zemplen, dist. Gálszécs. P.<5000.

Tokmak, dist. tn., Russian Turkistan, prov. Semiryechensk, on r. bk. of the Chu, 170 m. WSW. Vyernyi. P.<5000.

Tokmak, Great, vil., Russia, govt. Taurida, 73 m. NW. Berdyansk, on Molochnaya R. P. 8000.

Tokmasu, riv., Asia Minor, flows SE. and E., and joins the Euphrates at the great bend below the junction of its two branches.

Tokomairiro, large agricultural plain, New Zealand, South I. See **Milton.**

Tokosha, vil., E. Africa, Somali-land, 4 m. WSW. Zeila.

Toktokoto, tn., China. See **Hokou.**

Toktonaiulanmuren, riv., Tibet, l. bk. trib. of the Murusso or upper Yangtse-kiang, which it joins in about 93° E.

Toku, isl., Pacific, in the N. of the Vavau group, in about 18° 6′ S., 174° 10′ W.

Tokuno, one of the Luchu or Riukiu Is., Japan, N. group. Area, 93 sq. m.

Tokus Daban Mountains. See **Toguz Daban Mountains.**

Tokushima, tn., Japan, Shikoku, 60 m. SW. by S. Kobe. P. (1890) 61,200.

Tokuyama, tn., Japan, 150 m. NE. by E. Nagasaki. P. (1887) 11,500.

Tokyo, cap., Japan, SE. ct. of Honshiu, on T. Bay. The town is of great extent, the oldest part being occupied by the Shiro, or ancient fortress, where a semi-European palace has been built for the emperor, and near which stand the new official residences apart from the bulk of the dwelling-houses. Its rapid development is explained by the fact that it is the natural outlet of all the N. routes. It is a centre of considerable trade and industry; manufactures silk goods, lacquered ware, delft ware, porcelain, and enamelled goods; has machine factories and dockyards, the Ishi Kawajinna dock having a length of 220 ft., breadth at entrance of 42 ft., and depth on sill at high water ordinary springs of 14 ft. Its university is the highest seat of learning in the empire. T. was founded in the 16th century, on the site of a small fishing village, Yedo, and kept this name till 1868. Its name signifies 'capital of the East.' The *fu* or govt. (**Tokyo-fu**) embraces an area of 310 sq. m. Mean temp. (6 yrs., 1881–86), yr. 55.9° F., Jan. 36.7°, Aug. 77.4°; rfall. (10 yrs.), 60.43 in. P. (1879) 595,900; (1890) 1,155,300.

Tokyo Bay, gulf, Japan, SE. ct. of Honshiu, running 50 m. into the land, the city of Tokyo being situated at its NW. extremity.

Tola, riv., N. Mongolia, flows first SW. past the town of Urga, and afterwards N. and NE. by the Orkhon into the Selenga.

Tolaga Bay, post-tn., New Zealand, North I., Cook co., 35 m. from Gisborne by road and rail. P.<1500.

Tolai, riv., S. Mongolia, left branch of the Edzin-göl, trib. of Lake Sobonor.

Tolbooth, eccles. par., Scot., Midlothian, Edinburgh, City par. P.<2000.

Tolchester Beach, popular summer resort, U.S., Maryland, Kent co., on E. shore of Chesapeake Bay, 22 m. N. Baltimore. P.<1500.

Tole, country, E. Africa, Shoa, forming a kind of elevated plateau (average alt. 7875 ft.); near T., the chief locality, an important market is held.

Toledo, tn., Spain, 41 m. SSW. Madrid, cap. prov. T., is situated on a rocky height overhanging the Tagus, and has an excessive climate, very cold in winter, and hot in summer. It is surrounded by a Moorish wall, flanked by numerous towers. Streets and squares are narrow, irregular, ill-paved, and dull. It is the seat of a university, and its cathedral, founded in 587, is the metropolitan church of Spain. The Alcazar, the former residence both of Moorish and Castilian monarchs, was burned by the French in 1808. T. was long famous for its sword blades, but the industry has now fallen into decay, and a modern manufactory of arms has taken its place. Its chief importance now is as an agricultural centre. Its fruits, especially apricots, are celebrated. An amphitheatre and some walls of the ancient *Toletum* still attest its importance under the Romans. It was taken by the Goths in 467, and by the Moors in 714, and retained by the last till 1085, when it was permanently annexed to the crown of Castille. Between the 5th and 9th centuries it was the seat of several general ecclesiastical councils. P. (1860) 17,600; (1887) 20,800.

Toledo, vil., U.S., Arkansas, Dorsey co., 57 m. S. by E. Little Rock. P.<1500.

Toledo, tn., U.S., Iowa, Tama co., 51 m. W. Cedar Rapids. P.<2000.

Toledo, city and port of entry, U.S., Ohio, Lucas co., at mouth of Maumee R., on both sides, at the W. end of Lake Erie; important railway and shipping centre, with large trade in grain and lumber; has a fine harbour. Extensive manufactures, waggon, locomotive, furniture, and iron works. Natural gas, obtained from a point about 55 m. S., is supplied for manufacturing and other purposes. Alt. 651 ft. Mean temp. (24 yrs.), yr. 50.0° F., Jan. 26.0°, July 74.8°; rfall. (24 yrs.), 31.14 in. P. (1850)<4000; (1870) 31,600; (1880) 50,100; (1890) 81,400.

Toledo, vil., U.S., Washington, Lewis co., 40 m. S. Olympia. P.<1500.

Toledo, vil., Uruguay, dep. Canelones, 12 m. NE. Montevideo.

Toledo, Huaca de, celebrated funeral pyramid, N. Peru, 3 m. SW. Truxillo; in it a vast treasure was discovered in the 16th century by the Spaniard whose name it now bears.

Tom Green, co., U.S., Texas, in the W., crossed in the N. by 32° N., and in the W. by 101° W.

Tomhaggard, par., Ire., SE. co. and 9 m. S. by W. Wexford, bar. Bargy, P.O. P. <500.

Tomich, PT.O., Scot., Inverness-shire, on riv. Glass, 24 m. S. by E. of the E. end of Loch Fannich.

Tomies, mt., Ire., middle co. Kerry, near W. shore of Lough Leane, 6 m. WSW. Killarney. Alt. 2413 ft.

Tomils, vil., Switzd., cant. Grisons, 7 m. SW. Chur, in the Domleschg. P. <2000.

Tomini, tn., Eastern Archipelago, Celebes I., at the NW. corner of the **Gulf of T.,** the large gulf between the two penins. stretching eastwards. T. was formerly the cap. of a kingdom, but is now only a hamlet.

Tomino, comm., Spain, Galicia, prov. and 31 m. SW. Pontevedra, dist. Tuy. P. 10,700.

Tomintoul, vil., Scot., Banffshire, 25 m. SW. by S. Keith, and 8 m. SE. Cromdale stn., PMT.O. P. <750.

Tomioka, tn., Japan, Honshiu I., 62 m. NW. by W. Tokyo; has silk-spinning, established 1873 by Paul Brunat. P. <5000.

Tomioka, coast tn., Japan, in E. of Shikoku I., 63 m. SW. by S. Kobe. P. <3000.

Tomnavoulin, P.O., Scot., Banffshire, on Livet Water, 20 m. SW. Keith, and 7 m. SSE. Ballindalloch stn.

Tomohon, large trading vil., NE. Celebes I., 7 m. NW. Tondano.

Tomor, tn., Turkey in Europe, sanjak Berat, 54 m. SE. by S. Durazzo, at the foot of Mount T. (alt. 7915 ft.).

Tomóri, princip., Celebes I., on W. ct.; the interior is covered with wooded mountains; the population consists of Alfurus (or Arafuras).

Tomóri, Gulf of, large bay, Eastern Archipelago, between the middle and SE. penins. of Celebes.

Tömös Pass, SE. Hungary, 9 m. S. Kronstadt; the railway from Kronstadt to Ployeshti (Ploesci) traverses it by a series of tunnels. Height at frontier, 3445 ft.

Tompkins, co., U.S., New York, E. of 77° W., and S. of 43° N.; it contains the upper end of Cayuga Lake.

Tompkinsville, vil., U.S., New York, Richmond co., on NE. shore of Staten I., 6 m. S. by W. New York by steamboat. P. <1500.

Tomregan, par., Ire., cos. Cavan and Fermanagh, bars. Lower Loughtee, Tullyhaw, and Knocknin ny, on riv. Woodford, containing Ballyconnell town; 10,677 ac. P. <2500.

Tom Shot Point, cape, Brit. W. Africa, at the mouth of the Old Calabar R., W. side, in 4° 35′ N., 8° 22′ E.

Tom Shot Town, vil., Brit. W. Africa, on W. shore of the mouth of Old Calabar R., in 4° 40′ N., 8° 18′ E.

Tomsk, govt., Russia, W. Siberia, extending from the frontier of the Chinese prov. Khobdo to the 60th degree of lat., and having Semipalatinsk on SW., Tobolsk on NW., and Yeniseisk

on NE. Includes the **Altai** region (53,000 sq. m.) in S., which offers the same diversity of mountains (up to 10,000 ft.), alpine regions, and fertile valleys as Switzd., on a much greater scale. A strip of elevated plains and prairies, 700 to 1000 ft. of alt., girdles the Altais on NW., offering excellent ground for agriculture, and getting rapidly occupied by immigrants from Russia. A line running SW. to NE., from Lake Gor'koye to Tomsk, separates these plains from the lowlands (300 to 500 ft.), which includes the Baraba steppe in SW., and the marshy *urmans* of the Vasyugan and Narym regions, inhabited chiefly by Ostyaks. Watered by the Ob', formed by Biya and Katuñ, and its tribs., Tom' (450 m.), Chulym, Vasyugan (530 m.), Ket, now connected by canal with the Yenisei, Tym, &c., and the tribs. of the Irtysh, Bukhtarma, Om, Uba, and Tara—all of them important channels of navigation (see **Siberia**). The climate is very cold and very moist, the average temps. at Tomsk, Kainsk, and Barnaul being: yr. 30.2°, 31°, 32.7°; Jan. 4°, 6°, 3.7°; July 65.5°, 68.5°, 62°. The Russian population is rapidly increasing, the indigenes (Altaian and Tomsk Tatars, Telleutes, Mountain Kalmucks, and a few Samoyedes and Ostyaks) only making up 6 per cent. of the total. Agriculture is very productive, especially on the plains and in the Altai region; cattle-breeding, hunting, and fishing; mining, especially in Altais. Considerable trade, especially at T., Barnaul, and Biisk. Divided into six dists.: Tomsk, Barnaul, Biisk (sub-dist. Zmeinogorsk), Kainsk, Kuznetsk, and Mariinsk. Area, 331,159 sq. m. P. (1882) 1,134,750; (1889) 1,299,730.

Tomsk, cap. of above govt., on the Tom', 27 m. above its junction with Ob', 2377 m. E. Moscow. It has lately grown an important city, chiefly in consequence of its being the E. terminus of navigation across Siberia, and a grand entrepôt for goods exported from and imported into Siberia, as well as the seat of the chief proprietors of gold-diggings. It has a university, which contains a good library and museum, and is the seat of a geographical society. Tanneries and manufactures of carriages. P. (1884) 31,380; (1891) 41,630.

Tomskiy, iron-works, Russia, W. Siberia, govt. Tomsk, Altai region, 113 m. E. Barnaul. P. <5000.

Toms River, tn., U.S., New Jersey, Ocean co., 35 m. SE. by E. Trenton, on an inlet (estuary of Toms R.) opening off Barnegat Bay; noted pleasure resort. P. <1500.

Tön, tn., Siam. See **Tern.**

Ton, a people in S. of western Sudan, forming the chief population of the kingdom of Bonduku, NW. of the Ashantis, of whom they seem to be a branch.

Tonala, maritime tn., Mexico, Chiapas, 80 m. E. Tehuantepec, in about 16° 15′ N. P. 7000.

Tonale Pass. See **Alps,** PASSES AND RAILWAYS, **III.** (12).

Tonali. See **Tonolai.**

Tonaro, vil., Tunis, on the NE. shore of the Bay of Tunis, 42 m. ENE. Tunis.

Tonawanda, vil., U.S., New York, Erie co., on the Niagara R. and the S. bank of the Tonawanda Creek, 10 m. N. Buffalo. P. 7100.

Tonawanda, North, vil. opposite, on the N. bank of the T. Creek. P. <5000.

Tonawanda Creek, riv., U.S., New York, in the W., trib. of the Niagara, which it joins on the l. bk. at Tonawanda.

Tong, par. and tn., Eng., Yorkshire, W. Riding, Pudsey div., 3½ m. ESE. Bradford, 1½ m. NE. of its stn. (**Birkenshaw and T.**) on the G. N. R., PM.O. (**T. Street**). P. 6900.

Tong, vil., Scot., Ross-shire, 4 m. NE. Stornoway. P. <750.

Tonga Group, Pacific, formerly known as the **Friendly Islands,** to the S. section of which the name was then applied, traversed by lat. 20° S., long. 175° W. The principal islands or subsidiary groups are Tongatabu, Boscawen, Keppel, Vavao, Hapai, Namuka, and Eua Is., with a variously estimated population, governed by independent chiefs. The islands were discovered by Tasman in 1643, and visited by Cook in 1777, who on account of the disposition of the natives called them the 'Friendly Islands.' Tongatabu, or Tonga I., is the largest of the most southerly of these islands, and the residence of their sovereign; lat. 21° 4′ S., long. 175° 28′ W.; circuit upwards of 50 m. Surface low; soil very fertile. Products comprise yams, plantains, bananas, coffee, copra, coco-nuts, arrow-root. The inhabitants have been mostly converted to Christianity by English missionaries, who have important depôts in the island. Principal towns, Moa and Nukualofa.

Tonga-land, small coast dist. in SE. Africa, situated E. of Swazi-land, and between Zulu-land and Delagoa Bay. It is a low tract of land, inhabited by a Kafir tribe, the Amatonga. The greater part of its coast is taken up by the Kozi lagoon. [**H. G. S.**]

Tonganoxil, vil., U.S., Kansas, co. and 16 m. SW. by S. Leavenworth. P. <1500.

Tongarewa, or **Penrhyn,** isl., Pacific, in the Manihiki group, in about 9° 10′ S., 158° 40′ W., consisting of a reef and lagoon about 37 m. in circumference.

Tongariro, active volcano, New Zealand, North I., Wellington prov., 25 m. SSW. of Lake Taupo. Alt. (rim of crater of Ngauruhoe) 7375 ft.

Tongatabu, isl., Pacific, in the Tonga group, in 21° 8′ S., crossed in the E. by 175° 0′ W.

Tongham, eccles. par., Eng., Surrey, Guildford div., 3½ m. ENE. Farnham, on the L. & SW. R., PMT.O. P. <1500.

Tongking, or in French spelling **Tonquin** or **Tonkin,** the N. division of the kingdom of Annam, forming an integral part of French Indo-China, stretches 250 m. from N. to S., between 20° and 23° 20′ N., and 400 m. E. and W. between 102° and 108° E. The W. and SW. frontiers are not yet definitely laid down, but the SW. border line may be regarded as traversing the watershed between the rivs. Song-bo and Song-ma. The Chinese provs. of Kwangsi and Yünnan lie on the N., the Shan states of Burma on the W., the Laos state of Luang Prabang on the SW., and Annam proper on the S. France claims that all the terr. W. and SW. of the Song-bo, as far as the Mekong and the borders of Luang Prabang, belong to the French 'sphere of influence.' The area is estimated at 40,000 to 50,000 sq. m., or something like England without Yorkshire.

Physical Features.—The bulk of the population are gathered in the delta formed by the principal rivers of the country, the Red R. (Songkoi) and its affluents, the Black R. (Song-bo or Ho-he) and the Clear R. (Song-lo or Tsin-ho), and the Thaibinh. This deltaic region measures 80 m. from SW. to NE. along its sea-front 90 m. deep, going NW. from the sea, and 45 m. wide along its NW. boundary, and has an area of nearly 6000 sq. m.; inhabited by, approximately, 5,000,000 people, or 800 to 850 persons to the sq. m., a density fully equal to that of Brabant in Belgium, the most densely populated dist. in Europe. The low flat region of this delta, cut up by numerous anastomosing river channels and canals, and covered with rice-fields and bamboo-groves, has been formed out of the alluvium brought down by the rivers. The Red R. alone deposits annually a mass equal to seventy thousand million cubic ft., and the land encroaches upon the sea at the average rate of 250 ft. in the year. The rapid increase of the delta is well illustrated by the fact that the cap. city of Hanoi, which is now in a direct line 60 m. from the sea, stood in the 7th century on the coast; and Hongyen, a coast port frequented by the Dutch in the 17th century, is now 35 m. inland. The coast is, of course, flat along the front of the delta; but further NE., up to the Chinese frontier (riv. Mongkai, about 108° E.), it is precipitous and much indented, and fringed, moreover, by a string of fantastically shaped, deeply caverned islands, of which the principal are Kakba (12 m. long, 6–9 m. broad, with mountains 1100 ft.

high), the archipelago of Faitsilong, the Boto Is., and Kebao (20 m. long, 10 m. wide, with mountains reaching 1300 ft.). Behind these islands, and on the coast, are several bays and good anchorages, as Along, Hongai (Port Courbet), Tienyen, Port Parseval and Port Bayard (both in Kakba Is.), and the Bay of Faitsilong. On both N. and SW. the delta is replaced abruptly by mountainous country. On the E., or more correctly NE., side of the Red R. ranges breaking off from the highlands of the Chinese prov. Kwangsi converge S. and SW. upon the delta. They nowhere exceed 7000 ft. in alt., their general height being 3000–4000 ft. On the W. or SW. side of the Red R. the mountains, ramifying extremities of the chains that strike off from the Tibetan plateau, run SE. in two principal lines, between the Red and the Black Rivs. and between this last and the Song-ma R. respectively. These mountains fall from an alt. of 7000 ft. in the NW. to about 1200–1300 ft. in the SE. So far as the **geology** has been investigated, T. appears to be built up of Carboniferous limestones, Devonian sandstones, and schists of a still more ancient date, the strata being deposited from the first-named downwards in the order given. The country is rich in coal-measures; they stretch 120 m. E. and W. between the isl. Kebao and the riv. Thaibinh, in about lat. 21° N., and occur also in the valley of the Red R. (*e.g.*, at Yenbai and Laokai), and in the valley of the Black R. Coal is extracted in the isl. of Kebao and in the vicinity of the Bay of Hongai on the mainland. In addition to this, her most important **mineral wealth,** T. possesses gold, silver, copper, iron, zinc, lead, saltpetre, sulphur, and a little tin and cinnabar; but of these gold and iron alone are worked to any extent, though nearly all are mined. These minerals are found chiefly in the provs. N. of the delta, towards the Chinese prov. of Kwangsi. The **climate** is characterised by two plainly marked seasons, determined by the monsoons, winter (Oct.–March) being the period when the NE. monsoon prevails, and summer the season of the SW. monsoon. During winter the thermometer falls in the delta to 50° F., scarcely ever lower; but in the upland regions to 43° F., and thin ice is sometimes formed. See further, **Haifong** and **Hanoi.** The rainfall averages 65–72 in. annually, of which 46–56 in. fall between May and Sept. Fogs are frequent during the winter months, and destructive typhoons are common both in winter and in summer. The wooded mountainous regions are in general unhealthier than the lowlands, fever and dysentery being endemic in the former, but only occasional in the latter. The **flora** resembles that of S. China, India, and the penin. of Siam and Annam. Mangroves, rattans, areca, and other palms and bamboos are the prevailing forms in the low country. The uplands are in part covered with grass, in part planted with forests, which yield iron-wood, pine-wood, and several varieties of hard timber suitable for cabinet-work, as well as dye-woods, gums, oils (lacquer), and camphor. The **fauna,** like the flora, has closest affinities with that of India and S. China. The elephant is, however, wanting. The domestic animals embrace some oxen, ponies, and buffaloes, these last the common beasts of burden. **Industry** is not very greatly developed. Apart from minerals, the principal products are silks, sugar, paper, oils (castor-oil, sesamum, ground-nut, lacquer), spirits (from rice), pottery, bricks and tiles, iron, copper, and bronze wares, ivory and gold ornaments, and lime. The French have established foundries, shipbuilding yards, breweries, and a few factories for producing common and useful commodities. The rivers form the chief routes of **communication.** But there are a few roads, foremost amongst them the Mandarins' Road, connecting Hue (cap. Annam) with Hanoi, and continued thence NNE. *viâ* Langson to the Chinese frontier. In addition there are 600–700 m. of paths made on the top of the riverine embankments. The only railway (60 m. long) between Phulangthuong (12 m. NE. Bacninh) and Langson was fully opened in 1895. Others are, however, in contemplation, especially a series radiating from Bacninh, *e.g.*, up the valley of the Songkoi to Laokai, to Hanoi, and to Haifong. There are some 2500 m. of telegraph. The sea-going **commerce,** principally with China (Hong-kong), Cambodia, and Singapore, averages £1,200,000 for imports (cotton and hemp yarn to the extent of 20 per cent. of the total, wheat and flour, drugs, opium, tea, machinery, boats, petroleum, pottery, paper, &c.), but fluctuates between £300,000 and £800,000 for exports (silks to the extent of 25 per cent., rice in greatly varying quantities, gambier, oils, and vegetable essences). In this trade France participates to the extent of about 20 per cent. in all. In addition to the sea-going trade, caravans of pack-animals go to and fro between T. and the Chinese prov. of Yünnan, carrying cottons and woollens, salt, tobacco, paper, wood for coffins, sandalwood, areca-nuts, candles, fruits and drugs, and bringing down tin, tea, and opium. This trade is, however, only valued at about £300,000 per annum. Thus the entire commerce of T., including a coasting trade valued at £280,000, barely exceeds 2½ millions sterling. The chief trading **towns** are Hanoi (cap.), Namdinh, Ninhbinh, Bacninh, Haizung, and Haifong. In addition to the first two and the last, the ports of Kwangyen, Laokai, Monkai, Thankwan, Kakba, and Hongai are 'open' to foreign trade. The cap. has a population exceeding 50,000; of the rest, only Namdinh, Haifong, and Bacninh exceed 10,000 inhabitants each. The supreme government is in the hands of the Governor-General of French Indo-China, assisted by the Superior Resident of T. and various administrative officers. Concomitantly with them the Annamese maintain, though strictly subjected to French control, a native administration, at the head of which is the Viceroy of T. The **population** (7 to 7½ millions) consists for the most part of Annamese, who practice the religions (ancestor-worship, Buddhism, and Confucianism), speak the language, and observe the customs (including the use of the same weights, measures, and money), of their compatriots further S. [**Annam**]. The inhabitants of the mountainous dists. (probably less than half a million in all) are mostly Laos, with a few Chinese and Mois. **History.**—The French first interfered in the affairs of T. in 1873. They definitely established themselves in the country from 1882, proclaiming T. a French protectorate in the following year. In 1887 they declared T. to be 'an integral part of French Indo-China.' Between 1883 and 1887 they were engaged in fighting the Black Flag dacoits, who were aided by the Chinese. Dacoity on land and piracy at sea, the pirates' haunts being chiefly in the Faitsilong Archipelago, still (1895) cause disquietude. In June 1895 a convention was concluded settling the Franco-Chinese frontier, and the towns of Meng (? Mengtsu-hsien) and Wuto are said to have been ceded to France, which is at the same time stated to have received permission for the unlimited extension of railways from T. into Chinese terr. There are a great number of recent French books on T., including the *Annuaire de l'Indo-Chine Française.* See map (1 : 4,000,000) in *Geog. Jour.*, 1893. [**J. T. B.**]

Török-Szent-Miklós, comm., Hungary, co. Jász-Nagy-Kun-Szolnok, 40 m. ENE. Kecskemét. P. 18,800.

Toron, vil., Palestine. See **Tibnin.**

Torong, dist., French Sudan, formerly in Samory states; chief place is Bissandugu, former cap. of Samory.

Torontál, co., S. Hungary, forming part of the great Hungarian plain, remarkably continuous and level; its streams are numerous and important, many being navigable and completed by several canals. The soil is very fertile, producing wheat, maize, oats, and good pasture.

Torontál-Vásárhely, comm., Hungary, co. Torontál, dist. Antalfalva. P. <5000.

Toronto ('place of meeting,' which it was two centuries ago for Indians and fur-traders between Lakes Ontario and Huron), city, Canada, cap. Ontario, York co., on the N. side of Lake Ontario, 39 m. NE. of the W. end of the lake. Important educational centre; seat of a university, to which are affiliated various colleges, medical and other; also of a Wesleyan college (removed from Cobourg), Knox College (Presbyterian), M'Master University (Baptist), St. Michael's (Roman Catholic), including a school of science (largely technical), and St. Hilda's College for female art students. Chief seat of wholesale trade of the prov. (exports nearly £30,000,000; imports about £4,000,000). Manufactures rising since the adoption of a protective policy by the Dominion in 1878. Extensive parks and gardens; Rosedale drives noted in America. In September the seat of great fair of the Industrial Association, attended by many thousands, at which field and factory products are exhibited from every part of the Dominion. The dry dock is 198 ft. long, 43 ft. wide at entrance, and has 12 ft. depth on sill at high water ordinary springs. Between 1870–71 and 1892–93 inclusive the closing of the port by ice was never later than Jan. 8th, its opening never earlier than Feb. 13th. In the 18th century the French had a fort (Fort Rouillé) on the site of T. In 1788 the place was known as Fort T., but in 1793 the present town was founded under the name of York (in honour of Frederick, Duke of York, son of George III.). In 1834 it was

incorporated under the name of T., its population being then 9000. Alt. 350 ft. Mean temp., yr. 43.8° F., Jan. 21.6°, July 68.2°; mean rfall. (48 yrs.), 27.5 in.; snowfall, 69.0 in. P. (1847) 21,000; (1871) 56,100; (1881, within the limits of 1891, when the city area was nearly twice as great as in 1881) 96,200; (1891) 181,200; (1895, local census) 188,900.

Toronto, vil., U.S., Kansas, Woodson co., 116 m. SSW. Kansas City. P.<1500.

Toronto, vil., U.S., Ohio, Jefferson co. P.<3000.

Toronto, settlement, U.S., S. Dakota, Deuel co., 123 m. NNE. Yankton.

Toropets, dist. tn., Russia, govt. and 237 m. SE. Pskov, on Toropa R.; one of the oldest towns of Russia, which has suffered much from wars and conflagrations; tanneries. P. 6900.

Toros, tn., Bulgaria, prov. and 27 m. SW. Plevna. P.<3000.

Torosay, par., Scot., Argyllshire, Mull I., on the Sound of Mull and Firth of Lorne; 90,594 ac. P. (including part of Mull I.)<1000.

Torp, vil., Sweden, prov. W. Norrland, 36 m. W. by N. Sundsvall. P. (comm.) 7300.

Torpantau, stn., Wales, Brecknockshire, on the Brecon and Merthyr Rly., 7½ m. S. Brecknock.

Torpenhow and Whitrigg, par., Eng., Cumberland, Penrith div., 11 m. E. by N. Maryport, 2 m. S. Mealsgate stn., P.O. (**T.**). P.<500.

Torphichen (tor-fikh'en), par., Scot., Linlithgowshire, 3½ m. SW. by S. Linlithgow, 1½ m. E. Westfield stn.; formerly a place of importance, having the remains of a preceptory of Knights of St. John. P.O. 9939 ac. P.<2000.

Torphins, eccles. par., Scot., W. Aberdeenshire, 16 m. E. by N. Ballater, on the G. N. of S. R., PMT.O. P.<1000.

Torpoint, eccles. par. and tn., Eng., Cornwall, Bodmin div., on the estuary of the Tamar (the Hamoaze), opposite Devonport, PMT.O. P.<2500.

Torquay, mun. bor. (since 1892), seapt., and health-resort, Eng., Devonshire, Torquay div., 18½ m. S. and in the diocese of Exeter, in a cove, on the N. side of Tor Bay, with stn. on the G. W. R. Till the 19th century it was a small fishing hamlet; but its mild and equable climate, due partly to its sheltered position, has gained it great reputation for the cure of consumption; enhanced as a seaside resort by most picturesque surroundings. The rocks and valleys are covered with terraces and luxuriant gardens; and there are special geological attractions, *e.g.*, Kent's Cavern. Torquay is an important yachting station; the new harbour has an area of 36 ac., and Torbay furnishes anchorage for the largest ships of war. Several marble and terra-cotta works. Mean rfall. (Lamorna, alt. 200 ft., 1866-80), 39 in.; (Babbacombe, alt. 294 ft., 1877–92) 35.49 in. P. (1801) 838; (1851) 7900; (1871) 21,700; (1891) 25,500; parl. div. P. (1891) 57,500.

Torquay, or **East Devonport,** tp., Tasmania, Devon co., on the N. ct., 43 m. WNW. Launceston, 25 m. ESE. Emu Bay, in 146° 17′ E.; copper, iron, and coal occur. P.<1500.

Torquay-by-the-Sea, tp. and watering-place, Queensland, March co., on Pialba Bay (S. part of Hervey Bay), which affords excellent anchorage, 17 m. N. Maryborough. P.<1500.

Torra, tn., Sudan, Darfur, 87 m. SW. El-Fasher; it is regarded as the second cap. of the country, and here the kings of Darfur are buried.

Torralba, tn., Spain, New Castille, prov., dist., and 9 m. ENE. Ciudad Real. P. (comm.)<5000.

Torrance, vil., Scot., Lanarkshire, 2 m. SE. East Kilbride; coal mined.

Torrance and Wester Balgrochan, vil., Scot., Stirlingshire, on the Kelvin, 6 m. NNE. Glasgow, with a stn. (**Torrance**) on the N. B. R., P.O. (**Torrance**). P.<500.

Torran Rocks, group of islets, Scot., Argyllshire, in 56° 13′–15′ N., to the SW. of Mull.

Torre, Italian and Spanish, 'tower.'

Torre, suburb of Torquay, Eng., Devonshire, on the G. W. R.

Torre Pero Gil, tn., Spain, Andalusia, prov. and 31 m. NE. Jaen, dist. Ubeda. P. (comm.) 5700.

Torres, tn., Spain, Andalusia, prov. and 12 m. E. Jaen, dist. Mancha Real. P. (comm.)<4000.

Torre Santa Susanna, tn., Italy, Apulia, prov. Lecce, 15 m. SW. Brindisi. P.<4000.

Torres Islands, group in N. of New Hebrides, forming a chain of five islands, in 166° 30′ E., 13°–13° 30′ S. Area of group, 51 sq. m.

Torres Novas, tn., Portugal, prov. Estremadura, dist. Santarem, 20 m. W. Abrantes; has cotton spinning and weaving, and numbers of olive trees. P. 8100.

Torres Strait, in S. Pacific Ocean, between New Guinea I. and Cape York, the N. extremity of Australia, in 9° 20′–10° 40′ N., 142° 30′ E.; is one maze of shoals, reefs, and islands, the principal of which are Prince of Wales and Clarence Is. Torres discovered it in 1606, and Cook sailed through it in 1770. Its navigation, always thought difficult, has, from the survey of Captain King, been ascertained to be quite practicable. In its narrowest part it has seldom more than 12 or 14 fathoms water, and the bottom in clear weather is everywhere visible. The navigation channel mostly used is that lying immediately to the N. of the Prince of Wales group, just N. of the mainland of Queensland (separated therefrom by Endeavour Strait). To this group belongs Thursday I., with Port Kennedy. All the islands in the strait belong to Queensland. Width, 80 m.

Torres Vedras, tn., Portugal, prov. and 26 m. N. by W. Lisbon; celebrated for the lines of fortification constructed by Wellington in 1810. P.<5000.

Torretta, tn., Sicily, prov. and 7 m. W. by N. Palermo. P.<5000.

Torrevieja de la Mata, tn., E. ct. Spain, prov. Alicante, dist. Orihuela, 24 m. E. Murcia; roadstead dangerous, but frequented by coasters carrying salt from the mines of Orihuela. P. (comm.) 7700.

Torr Head, cape, Ire., on NE. ct. of co. Antrim, in 55° 12′ N.

Torrice, vil., Italy, prov. Rome, 3 m. E. Frosinone. P. (comm.)<4000.

Torricella Peligna, tn., Italy, Abruzzi e Molise, prov. and 23 m. S. by E. Chieti. P.<5000.

Torricella Sicura, vil., Italy, prov. and 3 m. W. Teramo or Abruzzo Ulteriore. P. (comm.)<4000.

Torridge, riv., Eng., in the NW. of Devonshire, rises on the border of Cornwall, about 3 m. from the coast, flows E., SE., E., and finally NNW., and, passing Torrington and Bideford, enters the estuary of the Tawe near its mouth.

Torridon, hamlet, Scot., Ross-shire, on the W. ct., near the mouth of the short riv. Torridon, and at the head of the inlet of Loch T. (length, 13 m.; breadth, 3 m.), which is divided by a narrow strait into two, Upper Loch T., stretching E. and W., and Lower Loch T. (the upper part of which is known as Loch Shieldaig), opening to the NW. PM.O.

Toulinguet, Newfoundland. See **Twillingate.**

Toulois, name applied sometimes to the whole of the diocese of Toul, France, but more strictly only to the territorial domains of the bishops of Toul.

Toulon, in full **Toulon-sur-Mer,** military and naval port of France, and a fortified town of the first class, dep. Var, cap. arr.

T., on a bay of the Mediterranean, 40 m. SW. Draguignan; lat. of observatory 43° 7′ 5″ N., long. 5° 56′ 0″ E. It is defended by numerous powerful forts and batteries along the shores and on the adjacent heights. The port has an easy entrance, and is well sheltered; the quay has 14–16 ft. of water. Around the harbour are immense magazines and arsenals, shipbuilding docks, rope and sail-works, and the convict prison, usually occupied by 4000–5000 culprits. The town possesses a cathedral, naval hospital and schools, museums, &c.; has iron and copper foundries and workshops; exports wine, brandy, oil, fruit, &c.; imports wood, coal, hemp, salt. T. was originally a Roman colony (*Telo Martius*), where the Romans established a trade in purple dye, hence the name *Martius*. It was taken by the Constable of Bourbon in 1524, and by the Emperor Charles V. in 1536. It was given up to the English in August 1793; in December of the same year it was taken by the French republicans after a memorable siege, during which Napoleon I. commenced his military career. Mean temp., Jan. 46.4° F., July 77.0°. Comm. P. (1872) 69,127; tn. P. 59,808; (1891) 77,700.

Toulon, vil., U.S., Illinois, Stark co., 30 m. NW. by N. Peoria. P.<1500.

Toulon-sur-Arroux, tn., France, dep. Saône-et-Loire, arr. Charolles, 15 m. SW. by W. Le Creuzot. P.<2000.

Toulouse, ancient *Tolosa*, city, France, cap. dep. Haute-Garonne, cap. arr. T., on the Garonne, on the Canal-du-Midi, and on the railway to Cette, 130 m. SE. Bordeaux, 29 m. S. by E. Montauban. Lat. of new observatory 43° 36′ 45.3″ N., long. 1° 27′ 24″ E. The town is subject to serious inundations (*e.g.*, 1855, 1875). The most celebrated edifice is the capitol, said to have been founded in the time of Galba, but much of it is comparatively modern. T. has a cathedral, a university academy, school of artillery, an academy of 'floral games,' national academy of sciences, older than that of Paris, and many important monuments and works of art, particularly the church of St. Sernin, one of the most beautiful Roman basilicas in existence, and a library of 65,000 volumes. It is the entrepôt for the commerce between the interior of France and Spain, and has a national manufacture of tobacco, a cannon foundry, iron and copper foundries, carriage factories, and manufactures paper, stained glass, and many other articles; has brandy distilleries, and great trade in grain and wine. It is one of the most ancient cities of Gaul, and was for some time cap. of the Visigoths. In 1732 it was taken by the Saracens. The battle of Toulouse, in which Wellington defeated the French under Soult, was fought on April 10, 1814. Alt. 636 ft. Mean temp., yr. 54.8° F., Jan. 41.0°, July 71.2°; rfall. 23.62 in. Comm. P. (1872) 124,852; city P. 114,025; (1891) 149,800.

Toulouse, vil., France, dep. Jura, arr. Lons-le-Saunier, 1 m. ESE. Sellières; iron-mine worked. P.<2000.

Tranninh, mountainous region, Indo-China penin., Laos country, very undulating, including some fertile plateaux, between 18° 30′–20° 20′ **N.** Approximate area, 5800 sq. m.

Tranquebar, seapt. tn., Brit. India, Madras, dist. Tanjore, on the E. ct., 22 m. N. Negapatam. The S. Indian Rly. has diverted trade from T. to Negapatam. It has a curious old fort enclosing all the European houses; the first Protestant mission settlement in India. The Danish Company obtained T. in 1616. P. <5600.

Tranquille, stn., Canada, prov. Brit. Columbia, on the C. P. R., about 120° 40′ W., 1240 m. by rail W. Winnipeg, 242 m. E. Vancouver.

Trans-Alai Mountains. See **Alai** and **Pamirs.**

Trans-Andine Railway. See **Uspallata.**

Transbaikalia (Zabaikalskaya Oblast), prov. of Russia, E. Siberia, to the E. of Lake Baikal, has Irkutsk on W., Yakutsk on N., Amur on E., and Mongolia on S. The Yablonovoi Mts., which run NE. from the sources of the Kerulen to the bend of Olekma, in 56° N., separating the higher terrace of the High Plateau from the lower terrace, divide it into two parts. The higher terrace is fringed on the NW. by a high border ridge, which reaches 6900 ft. in Khamardaban (in the S. of Lake Baikal), and is pierced by the broad valley of the Selenga, which bifurcates and makes two broad trenches, leading from Lake Baikal to Urga on the S., and to Verkhneudinsk on the E. Further NE. the north-western border ridge of the higher terrace appears as the Barguzin Mts., 7000–8000 ft. high (on l. bk. of Barguzin R.), and the South Muya and Chara Mts. (6000–7000 ft.). Apart from the first-named bifurcated trench and the valleys of the Chikoi and Khilok which join it, the higher terrace of the plateau is quite unsuitable for agricultural settlements. It attains a level of 3000–3500 ft., and the low ranges of hills which intersect it rise 1500–2000 ft. above the plateau. It is partly covered with forests, marshes, and prairies. The Yablonovoi Khrebet, 5000–6000 ft. high (8250 ft. in Sokhondo Mt.), separates this upper terrace from the lower terrace, which has an alt. of 2000–2500 ft., and both for its climate and vegetation (Daurian flora) is an intermediate link between Siberia and the Amur region. It is intersected by several parallel ridges of mountains, running SW. to NE. (Nerchinsk Mts., Arguñ Mts.), containing the silver and lead mines of Nerchinsk, as well as rich deposits of auriferous alluvium and diluvium, and representing folds of Devonian and perhaps Silurian deposits, with Jurassic fresh-water, and occasionally coal-bearing deposits, in their valleys. Transbaikalia is watered by the affluents of Lake Baikal: the Selenga, which receives the Chikoi, Khilok, and Uda, the Barguzin and the upper Angara, the Vitim (an affluent of the Lena), and its tribs., the Karenga, Tsipa (rich gold-diggings), Muya, Kalar, and Kalakan; and the affluents of the Amur, Shilka (formed by Onon and Chita), and Arguñ, on the frontier with Mongolia. Of lakes, it has Lake Baikal on its W. boundary, Gusinoye on SW., Baunt in N., and very many small lakes. The climate of Transbaikalia is best characterised by the following average temps.: Kultuk, yr. 33°, Jan. −1°, July 62°; Selenginsk, yr. 35°, Jan. −10°, July 76°; yearly rfall. 4.6 in.; Barguzin, yr. 32.5°, Jan. −22°, July 72°; Chita, yr. 32°, Jan. −15°, July 75°; yearly rfall. 12.6 in.; Nerchinskiy Zavod (53 yrs.), yr. 31°, Jan. −17°, July 72°; yearly rfall. 12.2 in. (summer and autumn, 10.9 in.). Population very sparse, but pretty dense in certain valleys, and increasing on the lower terrace (Nerchinsk). Russians mixed with nearly 150,000 Buryats and Tunguses. Agriculture very insufficient, except among the Nonconformists in SW. Cattle-breeding everywhere, the horses grazing on the prairies all the winter through, but suffering much from snowstorms in spring. Hunting and considerable fishing in Lake Baikal (value £20,000). Gold-digging in the dist. of Nerchinsk, on the upper Tsipa, and in SW. A few silver-mines of the crown. Almost no manufactures. Active trade with Mongolia. Tea trade at Kyatkhta, and transport of tea. Only two main roads cross Transbaikalia; one goes from Irkutsk round the S. ct. of Lake Baikal, where it has been cut through the mountains, to the mouth of the Selenga, and thence S. to Kyakhta and E. to Chita. From Chita it is continued on to Nerchinsk and Sryetensk, whence navigation begins to the Amur. Another road leads from Chita to the Arguñ prairies and Nerchinskiy Zavod. The remainder are mere bridle paths. The Baikal is crossed by sledge in winter, and by steamer in summer, to avoid the great bend of the highroad around the lake. The Siberian Rly. meets accordingly with great difficulties around Lake Baikal and on the lower Shilka. Divided into five dists.: Chita (cap. of prov.), Barguzin, Nerchinsk, Selenginsk, and Verkhneudinsk, all merely large villages. Kyakhta, Nerchinskiy Zavod, and Sryetensk are next in importance. Large convict prison at Kara. Area, 236,868 sq. m. P. (1882) 497,760; (1890) 545,340.

Transcaspian Territory (Zakasplyskaya Oblast), terr. recently annexed by Russia, in the E. of the Caspian Sea, is bounded on the N. by prov. Uralsk, on NE. by Khiva and Bukhara, on SE. by Afghan Turkistan, and on S. by the highlands of Afghanistan and Khorassan. The Kopet-dagh (or Kopepet-dagh), a chain 600 m. long and 2000 to 5000 ft. high, bearing the names of Kuryanin-kara and Great Balkans in the vicinity of the Caspian, and of Little Balkans, Kyuren-dagh, Kopepet-dagh, Kosty-dagh, Asilma, and Zaryn-kul Mts. further SE., separates it from the highlands of Khorassan, with a broad valley between this chain and the border ridge of the Iranian plateau (Altah-dagh and Binahend, 9000 to 11,000 ft.), two rivers flowing in opposite directions in this valley, the Atrek into the Caspian, and the Keshef-rud into the Murgh-ab. This outer wall of the Khorassan plateau, similar in structure to the Caucasus chain, of which it also maintains the direction, rises steeply above the T. deserts to 6000 and 9000 ft. in the SE. (with passes 5000 to 8500 ft., and seldom only 3500 ft.), and from 2000 to 6000 ft. towards the Caspian. A löess terrace, Atok ('mountain base'), ranging 10 to 20 m. in width, borders it, and is very fertile when it is irrigated by water drawn from the streams flowing from the mountains. Along this strip of land the oases of the terr. are disposed (Kizil-arvat, Akhal, Askabad, Lutfabad, Kaakhka, and Sarakhs). Another oasis occurs at Merv, on the area watered by canals drawn from the Murgh-ab, and in the W. of it the small oasis of Tejeñ, watered by Tejeñ R., or Heri-Rud. Apart from these narrow strips of irrigated land, the T. terr. is a desert, covered with shifting sands in the W., with *barkhans* or *dunes,* now mostly motionless and covered with vegetation, elsewhere, and with *takyrs,* or surface covered with clay, hard in dry weather, and often impassable after heavy rains. In these *takyrs* wells are sunk along the caravan routes, while their outer borders are diversified by copses of tamarisk. Very numerous *shors,* or elongated depressions, their bottom covered with sand impregnated with brackish

water, intersect the desert, appearing like old beds of rivers, but they are in reality the remains of elongated brackish lakes. The chief of them is the Uzboi, which runs S. from the delta of the Amu to the Igdy well, and thence westwards to the Caspian, and was once considered as an old bed of the Amu (Oxus), which was supposed to have flowed into the Caspian at a time when this sea had already been reduced to its present narrow limits. Countless other *shors* intersecting the Transcaspian desert were also taken for old beds of rivers. It is now known that the supposed old bed of the Oxus, as far as the **Sary-kamysh** lakes (a depression 130 m. long, 70 m. wide, and 280 ft. below the level of Lake Aral at its bottom; filled with Aral-Caspian shells), which is only 135 m. from Lake Aral, was formerly occupied by the Caspian, and at a later epoch by elongated brackish lakes, which continued to subsist at the foot of the Ust'-Urt plateau (the Chink), while the Caspian was slowly retreating to its present limits. Numerous traces of the Caspian having formerly penetrated far to the E. so as to receive the Syr and the Amu are found also in other parts of T. Terr. The Kelif-Uzboi in the S. is a survival of that period as regards the Amu, at a period when it joined the Murgh-ab and the Tejeñ before entering the Caspian, which then extended eastwards to about 60° E. Population consists of 255,000 Turkomans, 44,400 Kirghizes mostly on the Ust'-Urt, 9400 Persians (at Luftabad and Shilgyan) and Caucasian Tatars, about 3400 Armenians and some 2200 other indigenes, and 22,000 Russian peasants, settled in the villages Hermab, Kozelnoye, Kul-kulab, and Skobelevka. Until lately the chief occupation of the Turkomans was cattle-breeding, with some agriculture, and robbery. Their bands ravaged the villages of Afghan Turkistan. Since the Russian conquest in 1887 they have settled down to agriculture in the oases and cattle-breeding. The Akhal and Arakadzh oases (Atok) have nearly 42,000 Tekke-Turkomans, who grow wheat, barley, lucerne, and some cotton, and have begun sericulture. The oasis of Merv is inhabited by nearly 160,000 Akhal-Tekkes, and the Tejeñ oasis has about 7500 inhabitants. The terr. about Sarakhs (Badghiz, SW. Turkomania), a plateau about 2000 ft. high, intersected by hills rising 500 to 600 ft. above it, and fertile on the slopes of the Borkhut Mts., and along the courses of the rivers, is occupied by some 60,000 Saryks in the oases Yol-otun and Penjdeh, while nearly 5000 tents of Salors are the population of the Sarakhs oasis. On the Caspian littoral the dist. of Krasnovodsk has nearly 15,500 settled inhabitants, and about 3050 tents of nomad Turkomans, the chief settlements being Krasnovodsk, Fort Mikhailovsk, and Chikishlyar, close to mouth of Atrek. The other dist. of the Caspian littoral, Mangishlak, includes the Ust'-Urt plateau; chief town, Alexandrovsk. The oases are divided into three dists.: Ashkabad, Merv, and Tejeñ. A railway has lately been built from Uzun-ada, on the Caspian (regular steam communication with Baku), *viâ* Kizil-arvat, Ashkabad, and Kaakhka, to Merv, and thence to Charjui on the Amu, Bukhara, and Samarkand, whence the line is continued to Andijan, in Fergana, and Tashkend. Area, 214,237 sq. m. P. (1889) exclusive of military, 276,710.

Transcaucasia. See **Caucasus, General Lieutenancy of.**

Transkei, name of all the dists. of Kaffraria between the Kei R. and Natal, one of the most productive regions in this part of Africa; mostly annexed to Cape Colony in and after 1877.

Trarzas, large Moorish tribe, W. Sahara, on r. (or N.) bk. of the Senegal.

Trasacco, tn., Italy, Abruzzi e Molise, prov. Aquila, 38 m. E. Tivoli, formerly on the S. shore of Lake Fucino (*q.v.*). P. <3000.

Trasaghis, comm., Italy, Venetia, prov. Udine, 4 m. W. Gemona. P. <4000.

Trasimeno, lake, central Italy, Umbria, 10 m. W. Perugia. Great victory of Hannibal over the Romans under Flaminius in the vicinity in 217 B.C. Alt. 845 ft.; length, 11 m.; breadth, 8 m.; greatest depth, 25 ft.

Trasparga, comm., Spain, Galicia, prov. and 19 m. NW. Lugo, dist. Villalba. P. 9400.

Traú, tn., Austria, crownland Dalmatia, on the coast, 9 m. W. Spalato. P. <2000.

Traun, riv., Austria, rises on the Gross-Hochkasten, in NW. of Styria, flows first WSW. through the Grundel-see and the Koppen-thal into the head of Lake Hallstadt (Upper Austria), then N. through that lake and **Lake Traun** (Traun-see or Gmunder-see, 8 m. long; depth, 623 ft.; alt. 1385 ft.), and finally into the Danube a few miles below Linz; celebrated for its trout. Length, 100 m.

Traunkirchen, vil., Upper Austria, 32 m. WSW. Steyr, on the W. side of Lake Traun. P. <2000.

Traunstein, tn., Ger., in the SE. of Bavaria, govt. Upper Bavaria, cap. circle T., 19 m. W. by N. Salzburg; has salt springs and baths supplied with salt water by an aqueduct from Reichenhall. Alt. 1940 ft. P. 5300.

Trautenau, tn., Austria, Bohemia, 40 m. ESE. Reichenberg; has flax-spinning and weaving. Victory of Prussians over Austrians, June 27 and 28, 1866. Alt. 1400 ft. P. 11,200.

Travancore, native state in extreme SW. of India, somewhat smaller than Wales, associated with the presidency of Madras, extending from Cape Comorin to 10° 22′ N. (on the coast 9° 48′ N.), where it borders on the state of Cochin, 175 m. N. to S. by 20–70 m. E. to W. Surface mainly mountainous. A strip of flat country, covered with coco-nut and areca-nut palms, and in great part traversed close to the coast (especially in the N.) by a line of navigable lagoons, extends about 10 m. inland, and is succeeded eastwards by the forest-clad Anamalai and Cardamom Hills (so-called), rising in the NE. of the state to the peak of Anamudi or Anaimudi (8850 ft.), and containing cool, healthy, and fertile plateaux, some at the height of more than 7000 ft. The climate is that of the Western Ghâts generally, characterised by abundant rains in the summer monsoon. (See **India,** Climate, more particularly the close of this section on p. 716.) All the products of S. Madras are grown here, and cardamoms may be specially mentioned as an important product of the hills to which they give name. Cap. Trivandrum; chief seaports, Alleppi, Quilon, and Kolachel. The state has long been noted for the high character of its administration. Education is at a far higher level than anywhere else in India, and is rising year by year. Particular attention is paid to female education, which is now superintended by an English lady-graduate. A large part of the revenue is derived from government forests and tobacco. There is a large expenditure on public works, and schemes are now in hand for the reclamation of salt lands in the NW. Area, 6730 sq. m. P. (1891) 2,558,000. See **Madras,** table.

Trave, riv., N. Germany, Holstein and Lübeck terr., flows E. and enters the Gulf of Lübeck (Baltic) at Travemünde, forming the lagoon Binnensee. Length, 70 m.

Travemünde, tn. and watering-place, Ger., outport of Lübeck, at the mouth of the Trave; has a harbour of refuge, and herring fishing. P. <2000.

Travers, vil., Switzd., cant. and 12½ m. W. by S. Neuchâtel. The dist. yields the well-known Val de Travers cement.

Traverse, vil., U.S., Michigan, Grand Traverse co., at the head of the W. Branch of Grand Traverse Bay, 82 m. SW. by S. of the Strait of Mackinac. P. <5000.

Traverse, co., U.S., Minnesota, on the W. frontier, crossed in the extreme N. by 46° N.

Traverse Bay, Grand, U.S., Michigan, in the NE. of Lake Michigan, between the cos. Leelanaw and Antrim, in 45° N.

Traverse Bay, Little, U.S., Michigan, in the NE. of Lake Michigan, in 45° 25′ N.

Traverse Cape, Canada, Prince Edward Island, on the S. ct., in 63° 36′ W.

Traverse Lake, U.S., Minnesota, 175 m. WNW. Minneapolis, stretching 30 m. on the boundary between S. Dakota and Minnesota, drained N. by the Sioux Wood R. into the Red River of the North. Alt. 950 ft. (U.S. Engineer Corps). See **Big Stone Lake.**

Traversette, Col de la. See **Alps,** PASSES AND RAILWAYS, **I.** (6).

Travers Lake, lake, Canada, Ontario, Nipissing dist., 117 m. WNW. Ottawa, drained E. by the riv. Petewawa into the riv. Ottawa.

Trebaseleghe, vil., Italy, Venetia, prov. Padua, 6 m. ENE. Campo San Piero. P. (comm.) <5000.

Trebbia, or **Trebia,** riv., Italy, rises in the Apennines in Liguria, and flows NNE. and N. through Emilia to the Po, which it joins on the r. bk. just above Piacenza; celebrated for the victory of Hannibal over the Romans, B.C. 218. Length, 71 m.; area of basin, 392 sq. m.; discharge, mean 900 cubic ft. per second, highest 35,300 cubic ft. per second.

Trebbin, tn., Prussia, prov. Brandenburg, circle Teltow, 23 m. SSW. Berlin. P. <4000.

Trebechovice, tn., Austria. See **Hohenbruck.**

Trebinjčica, riv., Herzegovina, flows mainly NW. (partly underground), and joins the Narenta 1 m. above Metković; its valley forms the principal line of communication between Montenegro and Herzegovina. Length, 58 m.

Trebinje, the ancient *Tribulium*, fortified tn., Herzegovina, 23 m. ENE. Ragusa; has an important strategic position as key to the valley of the Trebinčica. Alt. 900 ft. P. <2000.

Trebitsch, tn., Austria, Moravia, on riv. Iglawa, 18½ m. SE. Iglaw; has horse fair, and manufacture of cloth. P. 10,800.

Trebizond, or **Trabezon,** Turkish **Tirabzon,** the ancient *Trapesuntum* or *Trapesus*, seapt., in the NE. of Asia Minor, cap. vilayet T., on the Black Sea, 110 m. NW. of Erzerum, in 39° 41′ E. It stands on the slope of a hill facing the sea, enclosed by castellated ramparts which still show the trapezoid form whence the city derived its name; the houses are mostly of one storey, roofed with red tiles, and surrounded by the foliage of gardens and plantations; outside the walls are several suburbs. The mosque of St. Sophia, about 1 m. distant, is a handsome edifice. Its position has in past time given T. great importance as the entrepôt of the trade between Europe and the countries between India and the Black Sea, though this has been at times interrupted, and of late years has declined owing to the opening of other routes. The Persian colony is considerable, and furnishes almost all the workmen who produce the renowned silver filigree work. At this city Xenophon and the Ten Thousand Greeks reached the sea in their memorable retreat. From 1203 until the subversion of the Eastern Empire, T. was the cap. of an independent dominion, extending from the Phasis to the Halys. No port. Mean temp., yr. 58.3° F., Jan. 41.4°, July 74.8°. P. 35,000; Moham. 19,500; Orthodox Greeks, 8200; Armenians, 6000 (Cuinet).

Trenholme Bar, stn., Eng., Yorkshire, N. Riding, on the NE. R., 9½ m. S. Stockton.

Trent, German **Trient,** Italian **Trento,** ancient *Tridentum*, city, Austria, prov. Tirol, cap. dist. T., on l. bk. of the Adige, 13 m. NNE. Roveredo, 32 m. SSW. Botzen, 44 m. N. by E. Verona. It is enclosed by high walls, and has an old castle, the residence of its former prince-bishops, a cathedral, the church of Santa Maria Maggiore, in which the Council of Trent met from 1545 to 1563; manufactures of silks, leather, sugar, glass; traffic in corn, wine, iron, and other produce. Southward of T. the German language gives place to the Italian. T. is an essentially Italian town, said to have been founded by the Etruscans; it became a Roman colony, and has since passed through a great number of hands. It was taken by the French in 1796 and 1797, and was afterwards cap. of the dep. Adige. Alt. 746 ft. Mean temp. of year 54.3° F.; summer 69.6°, winter 35.8°. P. (1869) 17,073; (1890) 21,500.

Trent, riv., Canada, Ontario, issues from the NE. of Lake Rice, and winds into the W. end of the Bay of Quinté.

Trent, riv., Eng., through the centre of which it flows, rises on Biddulph Moor, Staffordshire, N. from Burslem, about 600 ft. above the sea, flows at first SE. through the centre of the co. Stafford to its E. border, and thence mostly NE. and N. through the cos. Derby, Nottingham, and Lincoln, and a little N. Burton-on-Stather joins the Ouse to form the estuary of the Humber. Affluents, the Dove, Derwent, Idle, and Tarn from the N. and W.; Sow, Tame, and Soar from the S.; navigable to Gainsborough for vessels of 200 tons burden, and for barges as high as Burton, 117 m. It is connected with all the rivers of central England by canals, the principal of which

is the Trent and Mersey Canal. The eager or tidal bore is particularly strong even as high as Gainsborough, and sometimes beyond. Total course, 170 m.; its basin has an area of 4082 sq. m.

Trent, stn., Eng., Derbyshire, on the M. R., 9½ m. SE. Derby.

Trent, riv., Eng., Dorsetshire. See **Puddle.**

Trent, P.O., Eng., 2 m. from Nether Compton, Dorsetshire.

Trèves, vil., France, dep. Gard, arr. Le Vigan, 41 m. NW. by N. Montpellier. P.<2000.

Trèves (Ger. **Trier**), city, Prussia, Rhine Prov., circle T., built on the Moselle, in a highly picturesque spot, 60 m. SW. Koblenz, and 48 m. NNE. Metz. Its principal buildings are the cathedral, founded in the 6th century, and containing Christ's reputed coat; the Church of Our Lady, a round Early Gothic structure of date 1227–43; the Provincial Museum (1885–89), with antiquarian and art collections; and the Palace barracks (the archbishop's palace down to 1786). Moreover, there are important survivals of Roman civilisation, as the Imperial Palace; the *Porta Nigra* or Roman gate, part of the ancient defences of the town; the basilica or Palace of Constantine, now an Evangelical church; baths, and an amphitheatre. There is a town library with valuable MSS. T. claims to be the oldest town in the German Empire. It has tanning and a few other industries, and some trade in fruit and wine. In the first century of the Christian era it was an important place, and during the 3rd and 4th centuries frequently the residence (*Augusta Trevirorum*) of the Roman emperors. From the 9th century to 1786 it was the seat of an archbishop, who, from the 13th century, was also one of the seven Electors of the Empire. During the second half of the 17th century it was several times taken by the French, and they kept possession of it from 1794 to 1814. From 1473 to 1797 T. was the seat of a university. Alt. 420 ft. Mean temp., yr. 49.8° F., Jan. 34.7°, July 66.6°. P. (1816) 10,000; (1871) 21,400; (1890) 31,600; comm. P. 36,200.

Trèves-Cunault, vil., France, dep. Maine-et-Loire, arr. Saumur, 3 m. SE. Gennes; 1 m. NW. at the village of Cunault are remains of a large Romanesque church and priory founded in the 8th century. P.<2000.

Trichinopoli (Trinchinopoly, census), municip., Brit. India, Madras, dist. T., 30 m. W. by N. Tanjore, on r. bk. of the Cauvery. It consists of a fort, military cantonment, and seventeen villages, the best known of which is Uraiyúr, at one time the cap. of the Chola kingdom; it has been identified with *Ophthoura*. Its ramparts and ditch have been levelled. Inside the fort is T. Rock, which rises abruptly to a height of 273 ft. above the street at its foot; at the top is a small temple. The annual festival attracts a crowd of pilgrims. Noted for its cigars and beautiful gold jewellery. Has a Roman Catholic college, called St. Joseph's, affiliated with Madras University. Bishop Heber died at T. in 1826. Alt. 275 ft. Mean temp., yr. 82° F., Jan. 76°, May 88°; rfall., yr. 37.1 in., Aug.–Dec. 25.8 in. P. (1881) 84,400; (1891) 90,600; Hindus, 67,200; Moham. 11,000; Christians, 12,300.

Trieste, or **Triest** (*Tergeste*), the principal seapt. city of the Austrian Empire, prov. Küstenland, cap. govt. and circle, on the Gulf of Trieste, at the NE. extremity of the Adriatic Sea, 70 m. ENE. Venice; lat. of lighthouse 45° 38′ 34″ N., long. 13° 45′ 5″ E. It consists of an old town built on the declivity of a steep hill, and the well built new town, bordering the sea, on a plain at its base. Between the old and new town winds the Corso, a spacious thoroughfare, opening successively into several squares. The chief edifices are the new exchange, &c., or Tergesteo, the offices of the Austrian Lloyd's, and the old exchange, adorned with statues and columns in the new town, the Byzantine cathedral and the castle in the old town, and in the suburbs, to the SW., the Revoltella Palace, containing fine paintings and statues. The harbour, formed by a series of moles and breakwaters, lately completed, is secure and convenient; it is bordered by a wide stone quay, close to which vessels of 300 tons burden can anchor. The city is partially intersected by the Maria Theresia Canal, by means of which vessels can load and unload at the doors of the warehouses. T. is the great emporium for the trade of the Austrian Empire by the Adriatic. Until the year 1891 it was a free port, since which date its trade has shown a diminution. Principal exports are corn, rice, wine, oil, sumach, tobacco, wax, hemp, wool, skins, furs, metals, timber, and other produce, but the greater part of its trade is that of transit. It is a depôt for warehousing goods from the Black Sea, Turkey, and Egypt, and has a large mercantile navy. The steamers of the Austrian Lloyd put it in communication with the Levant, the Black Sea, India, and China, and steamships of other nations also make it a port of call. It is a bishop's see, the seat of an imperial academy, &c. Manufactures of liquors, wax-lights, leather, soap, &c.; shipbuilding yards and iron-foundries. Although of importance under the Romans, its modern prosperity dates from its declaration as a free port in 1719. The prov. of T. consists only of the city itself and the surrounding suburbs and villages. Mean temp., yr. 57.1° F., Jan. 40.5°, July 76.3°; rfall. (38 yrs.), 43.86 in. P. (1869) 109,324; (1890) 120,300.

Trinidad, tn., Uruguay. See **Porongos.**

Trinidad, the most southerly of the British W. India Is., Windward group, immediately off the coast of S. America, 13 m. E. of the penin. of Paria, Venezuela, and bounding the Gulf of Paria on the E.; lat. of Port Galera 10° 50′ N., long. 60° 54′ W. Shape oblong, with promontories extending from three of its corners. Length, 50 m.; breadth, 30 m.; area, 1754 sq. m. Its mountain chains run W. to E. continuous with those of the mainland, those along the N. ct. rising to 3000 ft. in elevation, and the central range is flanked on each side by the extensive valleys of the Carony and Ortoire. On the W. ct. are numerous bays, but the N. and E. shores are destitute of harbours. Soil extremely fertile, and the elevated parts are mostly covered with dense forests. The island is seldom subject to drought, and is apparently less unhealthy than many other W. India islands. There are several active mud volcanoes, and a large pitch lake (La Brea). Exports sugar, cacao (the staple productions), molasses, coffee, fruit, and asphalt. A railway and a telegraph line connect Port of Spain and San Fernando, the two largest towns, both on the W. ct. The Port of Spain has the only harbour of commercial importance, but it is one of the best in the W. Indies. The European population consists of English, Germans, French, and Spaniards, but about one-third of the inhabitants are now Indian coolie immigrants, who are introduced at the rate of about 3000 annually. Education is progressing, and is well attended to. Government of the colony (which since the 1st of January 1889 includes the isl. of Tobago) vested in a governor and two councils of four and twelve members. The island was discovered by Columbus in 1498. It belonged for three centuries to Spain, but capitulated to the British under Abercrombie in 1797. Mean temp., Jan. 80.0° F., July 81.0°. P. isl. (1871) 109,600; (1881) 153,100; (1891) 200,000, of whom 70,000 were of East Indian origin; colony P. (1891) 218,400.

Tripoli, Asia Minor. See **Tireboli.**

Tripoli, Tripolis, country in N. Africa, situated between Barka and Tunis. The Turkish vilayet of T. comprises not only the Mediterranean coast-belt, but also the oases of Ghadames, Fezzan, Tümmo, and Gatron. The principal parts of this terr. belong to the Sahara desert (*q.v.*), and the Turkish rule is in most of them merely nominal. The desert plateau of the Hammada-el-Homra in the W., and the mountain ranges Jebel-es-Soda, Jebel Shergija, and Haruj-es-Sod in the E., separate the Mediterranean coast-belt from Fezzan and the other central parts. Chief productions, dates, esparto grass, and salt. Area of the whole vilayet estimated at 350,000 sq. m. P. estimated at 700,000. [**H. G. S.**]

Tripoli, Tarabolos, Tarablüs-i-Gharb, African town, on the Mediterranean, cap. of the Turkish vilayet of Tripoli (*q.v.*). It is a picturesque town, well known as the starting-point of the shortest and best caravan route to the central Sudan, which has been used by many European explorers. Mean temp. (4 yrs., 1819–21, 1855), yr. 69.1° F., Jan. 57.6°, Aug. 80.8°. P. estimated at 40,000. [**H. G. S.**]

Tripoli (Italian form), or **Tarabulus** (Turkish form), tn., Syria, about 2½ m. from its port El Mina, with which it is connected by canal, 40 m. NNE. Beirut. It is surrounded by fine gardens, but the marshy character of its vicinity renders it unhealthy. Houses chiefly of stone, and the town has many remains of antiquity and of Middle Age architecture. T. doubtless owed its name to its consisting of three distinct quarters, which were distinguishable as far back as the Phœnician epoch. Of these the Marina or El Mina, on a projecting point of land bordering the port, is the principal seat of trade. It has been suggested as the future terminus of a railway from Aleppo by Homs and Hamah, with which towns it at present carries on trade by means of camels. Sugar-cane is cultivated in the vicinity. Exports, Spanish grass, ostrich feathers, sponges, ivory, and wool; imports, English goods and colonial produce. It was taken by the Crusaders in 1108, at which time a large and valuable library was consigned to the flames. P. 22–24,000.

Tripolis, or **Tripolitsa,** tn., Greece, prov. Arcadia, 23 m. W. by S. Nauplia; taken by the Greeks in 1821, but retaken and destroyed in 1828 by Ibrahim Pasha. It is the modern representative of the three cities, *Mantinea, Tegea,* and *Pallantium,* traces of all which are found in its vicinity—Mantinea about 6 m. N. by E., Tegea about the same distance, respectively SSE. and due S. P. 10,700.

Tronche, La, tn., France, dep. Isère, on the Isère, arr. and 2 m. NE. Grenoble. P. <3000.

Tronchiennes, comm., Belgium, prov. E. Flanders, on the Scheldt, arr. and 2½ m. W. Ghent. P. <5000.

Trondhjem, fortified seapt. city, Norway, prov. T., 84 m. E. by N. Kristiansund, on T. Fjord, which extends from the Atlantic inland for 80 m., and at its N. extremity communicates with Beitstad Fjord; receives the Orkel, Guul, Nid, Siaker, and Stordal Rivs. T. is the third commercial port in Norway. Principal imports, three-quarters of which are English, corn, coal, and machinery; exports, deals, dried fish, sulphur, and copper. It has the Royal Scientific Society of Norway, founded 1760, with a library of 50,000 vols.; famous cathedral, founded 1093, in which the Norwegian kings are crowned. T. was founded in 996, and till the 16th century was called Nidaros. The S. region of North T. dist. is fertile and well cultivated in the N. and E. The E. is mountainous, covered with forests of conifers, pasture land, and marshes; it occupies a high place for agricultural produce; area, 8791 sq. m. South T. dist. is generally mountainous, the E. part being formed by the plateau of T., while the S. is occupied by spurs of the Dovrefjeld. The N. lower part is the more fertile. The coast is much indented and flanked by numerous islands and islets. Tn. P. (1870) 20,900; (1891) 24,700.

Trondra, isl., Scot., Shetland Is., Tingwall par., divided from the W. ct. of the Mainland by Clift Sound, in 60° 6′–8′ N. Length, 2½ m.; breadth, 1 m. P. 154.

Tronquière, La, vil., France, dep. Lot, arr. Figeac, 61 m. N. Albi. P. <2000.

Tronto, riv., Italy, in the S. of The Marches, partly on the frontier, flows N. and ENE. into the Adriatic. Length, 71 m.; area of basin, 441 sq. m.; discharge, mean 500 cubic ft. per second, highest 39,500 cubic ft. per second.

Tronzano Vercellese, tn., Italy, Piedmont, prov. Novara, 11 m. W. Vercelli. P. (comm.) 5100.

Trool, Loch, lake, Scot., Kirkcudbrightshire, in the W., 8½ m. N. Newton Stewart, drained SW. by the Water of Trool into the Water of Minnoch.

Troon, P.O., Eng., Cornwall, 2 m. from Camborne.

Troon, seapt. tn., Scot., S. Ayrshire, 5 m. S. Irvine, on the G. & SW. R., at the S. end of **T. Bay,** which extends to Saltcoats (7 m.). It is much frequented for sea-bathing; has a good harbour and shipbuilding. P. <3500.

Trooper's Lane, stn., Ire., E. co. Antrim, bar. and 1½ m. W. Carrickfergus, on the Belfast and Northern Counties Rly.

Trow Gill, narrow cleft in the limestone rock, with sheer walls 508 ft. high, traversed by a streamlet, Eng., Yorkshire, W. Riding, W. div.

Trowse with Newton, par., Eng., Norfolk, S. div., 2 m. SE. Norwich, with a stn. (**Trowse**) on the G. E. R., PMT.O. (**T.**) P. <1000; eccles. par. (**T. with Lakenham**) P. <4000.

Troy, ruined city, Asia Minor, rendered famous by the 'Iliad' of Homer, supposed to have stood on a height at the S. extremity of the Plain of Troy, 9 m. SSE. the entrance of the Hellespont from the Ægean Sea. On that height are still some vestiges of ancient walls and cisterns, and around it are numerous artificial mounds. The area has yielded numerous antique remains to the investigations of Professor Schliemann. The **Plain of Troy,** between this and the Hellespont, about 10 m. in length by 3 m. in width, is watered by three rivers, two of which are the Simois and Scamander of antiquity.

Troy, stn., Eng. See **Monmouth.**

Troy, city, U.S., Alabama, Pike co., 42 m. SSE. of Montgomery; has large cotton trade. P. <4000.

Troy, vil., U.S., Illinois, Madison co., 29 m. E. by N. St. Louis (Mo.). P. <1500.

Troy, vil., U.S., Indiana, Perry co., on the r. bk. of the Ohio, 58 m. W. by S. Louisville (Ken.); coal mined. P. <1500.

Troy, vil., U.S., Kansas, Doniphan co., 17 m. N. Atchison. P. <1500.

Troy, vil., U.S., Missouri, Lincoln co., 48 m. NW. by W. St. Louis; rich in mineral deposits, coal, iron, glass-sand. P. <1500.

Troy, city, U.S., New York, Rensselaer co., extends for 3 m. on the l. bk. of Hudson R., 4 m. NE. by N. Albany, connected with West T., on opposite side of the river by an iron bridge 1600 ft. long. It is built on a plain backed by a range of hills 300-400 ft. high. It contains the Rensselaer Polytechnic Institute, is a great railway centre, and has an active trade with New York, to which steamers ply daily. Abundant water-power is afforded by the Hudson, Mohawk, Wynantskill, and Poestenkill streams emptying themselves into the Hudson within the city limits, and along with steam-power is employed in the maintenance of extensive manufactures. There are also large rolling-mills, foundries, and blast-furnaces. The first Bessemer steel-works in America were established here. The shirt and collar business is one of the most extensive in the U.S., employing 1000-6000 hands. T. has also one of the largest manufactures of mathematical instruments. Alt. 16 ft.; 30 ft. (R.R.). P. (1840) 16,300; (1870) 46,500; (1880) 56,700; (1890) 61,000.

Troy, West, vil. opposite, on the r. bk. of the Hudson. P. (1880) 8800; (1890) 13,000.

Troy, vil., U.S., Ohio, Miami co., 69 m. N. by E. Cincinnati. P. <5000.

Tsarevokokshaisk, or **Tsarev,** dist. tn., Russia, govt. and 87 m. NW. Kazañ. P.<2000.

Tsaribrod, Bulgaria. See **Caribrod.**

Tsaritsyn, dist. tn., Russia, govt. and 244 m. SSW. Saratov, on r. bk. Volga, near where it suddenly changes its SW. course to SE.; connected by rail with the railway net of middle Russia, with a branch to Kalach, one of the chief ports on the Don, and itself one of the chief ports on the Volga. No less than 9,000,000 tons of goods (corn, fish, cotton, metals, salt, naphtha, wine, &c.) reach Tsaritsyn, and are either shipped to Astrakhañ or unloaded to be sent by rail to middle Russia and Kalach. Vineyards around the town, which has also mechanical works, flour-mills, and tanneries, and a number of educational institutions. Considerable trade. P. (1861) 6750; (1881) 29,750; (1891) 40,580.

Tsarskoye Selo, dist. tn. and imperial residence, Russia, govt. and 15 m. by rail S. of St. Petersburg; surrounded by several villages, which, like the town itself, are summer resorts for the population of the capital. Imperial palaces surrounded by beautiful parks and gardens. P. 15,850.

Tscherbenei, vil., Prussia, prov. Silesia, govt. Breslau, circle and 17 m. W. Glatz. P.<3000.

Tschingelhorn, mt. See **Alps,** SUBDIVISIONS, **II. B. 1.**

Tschirnau, tn., Prussia, prov. Silesia, circle Guhrau, 23 m. E. by N. Glogau. P.<2000.

Tse, or *tsö,* Chinese, 'small lake,' 'swamp.'

Tsebelda, stem of Abkasians, N. Caucasia, prov. Kubañ, in the main Caucasus range. P. about 9000.

Tsechui-ho, or **Chechui-ho,** riv., SW. China, r. bk. trib. of the Yangtse-kiang, which it joins about 70 m. above Chungking. Length about 280 m.

Tsekhanovets (Polish **Ciechanowiec**), tn., Russia, govt. and 88 m. SW. Grodno, on frontier of Poland. P. 6000.

Tselaova, tn., Turkey in Europe, sanjak Seres, 15 m. N. of the mouth of the Struma.

Tseliuching, tn., centre of a large salt dist., W. China, prov. and 25 m. S. Tse-chou; the annual production of salt is about 600,000 tons.

Tsesarevich, Gulf, Caspian Sea. See **Mertvyi Kultuk.**

Tsetse fly (*Glossina morsitans,* Westw.), poisonous insect, S. Africa, $\frac{1}{16}$ in. long. The tsetse-fly occurs in many territories between the Limpopo R. and the Tanganyika Lake, but it is impossible to define exactly the boundary lines of its occurrence, as they seem to vary considerably. The tsetse-fly kills cattle and horses, but does not affect men, wild animals, goats, and donkeys. It is still uncertain whether the bite itself or a leucomaïne poison in connection therewith is the toxic substance. [**H. G. S.**]

Tseu-kiang, riv., China, prov. Hunan, rises in the Nanshan Mts., flows NE., NW., then NE. into Lake Tungting-hu. Length, 340 m.

Tsia, isl., Greece. See **Keös.**

Tsiafajavona, highest mt. in Madagascar, 37 m. SW. Tananarivo. Alt. 8500–8950 ft.

Tsiam, race, formerly inhabiting all the E. and SE. of Farther India, now only found in some dists. in Annam.

Tsiamdo, Tibet. See **Chamdo.**

Tsicheng, tn., Manchuria, on the r. bk. of the Sungari, at the confluence of the Wukung, 138 m. N. Ninguta.

Tsientang-kiang, riv., China, Chekiang, flows E. then on the whole NE. into the head of Hangchow Bay; navigable for the greater part of its course. See **Hangchow Bay.**

Tsiglina, shoal in Danube. See **Sereth,** riv.

Tsiho-hsien, tn., China, prov. Shantung, on the l. bk. of the Hwang-ho, 170 m. S. by W. Tientsin.

Tsime-hsien, tn., China, prov. Shantung, dep. and 70 m. SE. Laichou-fu; a market for agricultural produce.

Tsimsians, or **Chimsians,** Indian tribe, occupying a penin. in the W. of Brit. Columbia, crossed by 54° 15′ N., 130° 0′ W. See **Metlakahtla.**

Tsinan-chou, tn., China, prov. Fokien, on the E. ct., 45 m. NE. Amoy.

Tsinan-fu, tn., China, prov. Shantung, 175 m. S. Tientsin; has a wall and three circuits of ramparts; manufactures of silk, and trade in imitation precious stones.

Tsin-chou, tn., China, prov. Kansu, 180 m. SE. Lanchou; has silk-weaving and embroidery; trade in tea, tobacco, indigo, and cereals.

Tsin-chou, tn., China, prov. Pechili, 123 m. SW. by W. Tientsin.

Tsin-chou, tn., China, prov. Shansi, 290 m. SW. Tientsin, 135 m. N. by E. Honan.

Tsin-chou, tn., China, near the W. or upper end of the Wei valley, in Kansu, connected by cart and mule road with Lanchou-fu. See *Proc. R. G. S.,* 1890, p. 64.

Tsingchou-fu, tn., China, prov. Shantung, 160 m. WSW. Chifu; former cap. of prov.; has large silk industry.

Tsing-hsien, tn., China, prov. Pechili, on the l. bk. of the Huto-ho, where it is joined by the Grand Canal, 32 m. SSW. Tientsin.

Tsingi-hu, tn., China, prov. Kiangsu, 175 m. N. by E. Nanking.

Tsingphuhian, tn., China, prov. Kiangsu, 24 m. W. by S. Shanghai.

Tsingshuipu, vil., China, in the SE. of Hunan, on the Leikiang, in about 26° 0′ N., 112° 55′ E.; the centre of the coal-trade of the dist. There are iron-works to the S. (*Proc. R. G. S.,* 1880, pp. 160–61).

Tsin-ho, or **Clear River,** riv., Tongking, flows S. then SE. into the Songkoi, which it enters 30 m. above Hanoi.

Tsin-ling-shan, or **Pe-shan,** range of mts., China, in S. of prov. Kansu, part of the E. Kuenlun, trending E. and W., between the Wei and Hwang-ho on the N. and the Han-kiang on the S., and thus separating the basins of the Hwang-ho and Yangtse-kiang; the two slopes enclose a narrow plateau, with an average alt. of 8200 ft. The **Tsin-ling Pass** (alt. 4100 ft.), 47 m. ESE. Si-ngan-fu, leads across these mountains to the Tanho valley (leading to Hankow), and an artificial road leads over the Chaikwan-ling Pass (alt. 6035 ft.), about 120 m. W. Singan-fu, connecting the Wei valley with that of the Han-kiang, and

forming the only practicable road from N. China to the prov. of Süchwan. Both only mule-roads. Highest peak Tapei-shan, alt 11,000–12,140 ft.

Tsiongyangsan, mt., E. ct., Korea, in about 37° N.

Tsipa, riv., E. Siberia, govt. Transbaikalia, rises on E. slope of Barguzin Mts., flows E., over 200 m., on the Vitim plateau at alt. of 3000 to 3500 ft. in a broad marshy valley, piercing a chain of hills in its lower course. Lake Baunt near to it, in its upper course. Gold diggings on its tribs. Chief trib. Tsipakan.

Tsipiana, vil., Greece, prov. Arcadia, 14 m. W. Argos, in the comm. of **Mantineia,** and 4½ m. E. of the site of the ancient *Mantineia.* P. <2000.

Tsirechköl, tn., Turkey in Europe. See **Paizanovo.**

Tsiribihina, riv., W. Madagascar, flows W., and debouches by five branches in 19° 47′ S.; navigable to the escarpment of the central plateau.

Tsitsihar, or **Pukwei,** tn., Manchuria, about 350 m. NNW. Kirin, at the head of navigation on the Nonni; in a well-cultivated plain; cap. prov. Helung-kiang, a miserable town, surrounded by an earthen wall, also the administrative centre for all the Manchu tribes; chief penal settlement for the worst kind of criminals. Alt. 512 ft. P. (1884) 30,000.

Tsiwanchou-fu, maritime tn., China, prov. Fukien, dep. T., 93 m. SW. Foochow-fu; formerly cap. of Fukien. Identified with the city of Zayton of Ibu Batuta, Marco Polo, &c., then a very important port.

Tsivilsk, dist. tn., Russia, govt. and 120 m. W. Kazañ. P. <2000.

Tskhenis-tskhali (Georgian 'horse-river'), riv., Russia, Caucasia, govt. Kutais, r. bk. trib. of Rion, ancient *Hippus;* some lead ores on its banks.

Tsmiakom-khokh, mt., Russia, N. Caucasia, dist. Vladikavkaz, in N. of main range. Alt. 13,567 ft.

Tsna, several rivs. of middle Russia. **1.** Left bank trib. of Pripet, govt. Minsk, 70 m. **2.** Left bank trib. of Oka, govt. Ryazañ, 53 m. **3.** Left bank trib. of Moksha, which it joins 30 m. above its junction with Oka, govt. Tambov; rises in SE. part of this govt., flows N. 295 m. At Morshansk it becomes navigable, but navigation is impeded to a certain extent by shoals, and several windings have been rectified by canals. Very important artery for shipping corn, hempseed, linseed, hemp, tallow, and potash, 100,000 to 150,000 tons every year. Receives several small tribs. **4.** Trib. of Lake Mstino, govt. Tver, rises in same marshes with Volga and W. Düna, flows E. 93 m., forms part of the Vyshnevolotskiy system of canals connecting Volga with Neva.

Tso, 'water.' See *Cho.*

Tsō, tse, Chinese, 'small lake,' 'swamp.

Tso-chou, tn., China, prov. Pechili, 30 m. SW. Peking.

Tsö-chou, tn., China, prov. Shansi, 350 m. SW. Tientsin, 57 m. NNE. Honan.

Tsolo, vil., Cape Colony, dist. Griqua-land East, 127 m. NNE. East London.

Tsomo, vil., Cape Colony, dist. Transkei, 65 m. NNE. King William's Town.

Tsonongbo, Tibetan name of **Lake Kuku-nor.**

Tsophu, tn., China, prov. Kiangsu, 10 m. SSE. Shanghai.

Tsounonthouan, mt., Canada, prov. and 24 m. NW. Quebec. Alt. 2000 ft.

Tsu, tn., Japan, 45 m. ESE. Kyoto, on a bay on the SE. ct. of Honshiu. P. 15,600.

Tsu-chou, tn., China, Süchwan, 76 m. SE. Chengtu-fu.

Tsugar, or **Matsmai,** strait separating Honshiu I. from Yezo I., Japan.

Tsu-ho, navigable riv., China, Pechili, flows ESE. then NE., and enters the Hun-ho about 30 m. above Tientsin.

Tsukubasan, isolated volcanic height, Honshiu I., Japan, 44 m. NNE. Tokyo; its name, 'petrified wave,' is due to its striking outline. Alt. variously given between 2700 and 3610 ft.

Tsuliuching, tn., China, Süchwan, 95 m. SSE. Chengtu-fu, with brine-wells (*Jour. R. G. S.,* 1878, pp. 64–66; *Proc. R. G. S.,* 1886, p. 376).

Tsungming, isl., China, Kiangsu, in the mouth of the Yangtse-kiang, opposite the mouth of the Wusung; also a town on its S. shore; low lying. Length, 44 m.; average breadth, 7 m.

Tsung-ngan-hsien, tn., China, prov. Fukien, 53 m. NW. Kienning-fu; a large tea-market for 'bohea.' P. 100,000.

Tsunhoa-chou, tn., China, prov. Pechili, 88 m. E. by N. Peking.

Tsuni-fu, tn., China, Kweichou, 80 m. NNE. Kweiyang-fu, with coal and iron ores to the S.

Tsuno-shima, small isl. lying off the SW. of Honshiu I., Japan.

Tsurtsuantsiun, tn., China. See **Suchou-fu.**

Tsuruga, tn., Japan, 55 m. NNE. Kyoto; terminus of a branch of the Tokyo-Ozaka Rly. **T. Bay** affords complete shelter to vessels. P. (1887) 11,600.

Tsurugaoka, tn., Japan, Honshiu, 75 m. NE. by N. Niigata. P. 19,600.

Tsurugi-saki, cape, Japan. See **Sagami.**

Tsurukhaitui, Old and **New,** two Cossack vils., Russia, E. Siberia, prov. Transbaikalia, on Chinese frontier, on upper course of Arguñ R., 150 and 175 m. SE. Nerchinsk; trade in brick-tea and cattle with Mongolia. P. (of each) <1000.

Tsuru-shima, isl., in inner Japan sea; has a lighthouse at its NW. point in 33° 45′ N., 132° 37′ E.

Tsushima, or **Tsusima,** two lofty, wooded, volcanic isls., Japan, in strait of Korea, about midway between Korea and Kiushiu, about 35 m. long, united at low water; cap. Izunohara near its S. end, now included in Nagasaki ken. On the W. side, in 34° 20′ N., is a magnificent inlet, nearly landlocked, with several minor inlets, each capable of sheltering whole fleets in deep water close to the shore, and communicating by a narrow channel at high water with the E. ct. Area about 270 sq. m. P. 31,000. See chart, *Jour. R. G. S.,* 1863, p. 178.

Tsutati, tn., China, Süchwan, on the r. bk. of the Tatu-ho, 137 m. SW. Chengtu-fu. Alt. 2465 ft.

Tsuyama, tn., Japan, Honshiu, 75 m. WNW. Kobe. P. 15,200.

Tsyetsyn, Korea. See **Quelpart.**

Tsylma, riv., N. Russia, l. bk. trib. of Pechora, govt. Archangel; rises in the *tundras,* pierces spurs of the Timan ridge, flows E. about 270 m.

Tsymlyanskaya, Cossack vil., Russia, prov. of Don Cossacks, 69 m. SW. of Nizhne-Chirskaya, 100 m. ENE. Novocherkask, on r. bk. Don; surrounded by vineyards; wine exported. P. <5000.

Tsyp Navolok, penin., Russia. See **Rybachiy.**

Tsyusan, group of isls. belonging to the Riukiu group, Japan, N. of 26° N.

Tu, tn., China. See **Tö.**

Tu, dist., Sahara. See **Tibesti.**

Tua, volcano, Andes, on the frontier between Chile and Bolivia, in 20° 35′ S. Alt. 15,980 ft.

Tuá, riv., Portugal, r. bk. trib. of the Douro; not navigable. Length more than 124 m.

Tua, Loch, inlet, Scot., Argyllshire, in the W. of Mull I., communicating at its head with Loch na Keal by the Sound of Ulva.

Tuakau, post-tn., New Zealand, North I., Manukau co., 36 m. from Auckland by road and rail. P. <1500.

Tuam. See **Killala.**

Tuam, electoral div., Ire., Cavan, dist. Hollywell.

Tuam, par. and civic and market-tn., Ire., NE. co. and 17½ m. NNE. Galway, bars. Ballymoe, Clare, and Dunmore, 1½ m. from the l. bk. of the riv. Clare, a stn. on the Athenry and Claremorris Rly.; has Roman Catholic and Protestant cathedrals. The latter, rebuilt during the 19th century, includes the chancel of the old church, erected before 1150. Market-days, W. and S. Par. 25,016 ac., P. 6700; tn. P. <3500.

Tuamarina, post-tn., New Zealand, South I., Marlborough co., 35 m. ESE. Nelson; scene of the massacre of Captain Wakefield and party, 1843. P. <1500.

Tuamotu, in French spelling **Tonamotou** ('extended isls.'), a group of low coral isls. in the S. Pacific, between 14° and 24° S. and 135° and 150° W., forming a dependency of the French possession of Tahiti; about 80 in number (exclusive of innumerable rocks), all atolls except three (Makareka, Tikei, and Rekareka), the largest, Rairoa and Fakarava, with a length of 110 and 100 m. respectively, but with so narrow land surfaces that the whole group has an area of only about 330 sq. m. (not much larger than the isl. of Anglesey). The French resident has his seat at Rotoana on the isl. of Fakarava, one of the nearest to Tahiti. The group was discovered by Bougainville, who called them the Low Is. Cook afterwards named them the Dangerous Is. The original native name was Pomotu Is. ('islands of the night'), which the people of Tahiti, after bringing them into subjection, changed to Paumotu ('subjugated islands'); which again was officially changed by the French to Tuamotu. P. 7–8000, of whom about 50 Europeans.

Tuan, Tongkinese, 'custom-house.'

Tuanae, or **Maurua,** isl., Pacific, Society group, in about 152° 10′ W. and 16° 25′ S.

Tuanaka, isl., Pacific, in the S. of Cook group.

Tuan-an, bay, Annam. See **Hué.**

Tuapeka, co., New Zealand, South I., crossed in the S. by 46° S., between 169° and 170° E. See **Lawrence.**

Tuareg, sometimes spelt **Tawarik** and in other ways, in the singular Targi, Arab name of the Berber people inhabiting a large portion of the western Sahara, grouped into four confederacies, one, the Azjer, inhabiting the oases in the NE. on the plateau of Tassili immediately to the W. of Fezzan; a second, the Ahaggar, inhabiting the Hogar plateau to the W. of the former and S. of Algeria; a third inhabiting the oases of Air, further S.; and the fourth in the SW., inhabiting the highland region of Adrar (Aderar) and the plains of Asawad N. of the great bend of the Niger.

Tuat, Sahara. See **Twat.**

Tuba, tn., French W. Africa, Futa Jallon, in 11° 30′ N., 12° 30′ W.; an important centre of Islamism.

Tuba, tn., French Sudan, cap. of Markadugu, 84 m. NE.

Bammako, centre of a group of seven villages, each of which is an important commercial centre; principal trade is in horses. P. <2000.

Tuba, riv., Russia, E. Siberia, govt. Yeniseisk, Minusinsk region; rises from confluence of gold-bearing Amyl and Kizir, both rising in Sayans, flows W. and joins Yenisei from right, after having watered the **Tuba Mts.,** covered with rich meadows, and inhabited by the Turkish stem of **Tubintses.** Uigur inscriptions from Jenghiz Khan's times on crags on its banks; iron ores on its trib. Irba. Length, 170 m.

Tubai, or **Motu-Iti,** isl., Pacific, Society group, in about 16° 17′ S., 151° 50′ W.

Tuban, tn., Java, on the N. ct., in about 112° 7′ E., 65 m. NW. by N. Surabaya; an important port, already famous in the time of the Hindu dominion.

Tubarão, vil., Brazil, Santa Catharina, on the riv. T., 178 m. NE. Porto Alegre. P. <3000.

Tubariya, or **Et Tubariya,** vil., Palestine, on the W. shore of the Bahr-et-Tubariya, or Sea of Tiberias, *Tiberias* in the N. T., 32° 47′ N., 35° 32′ E., 15½ m. ENE. Nazareth.

Tubaru, tn. and commercial port, Molucca Is., Halmahera I., 37 m. NNE. Gamukunora. P. (1885) <5000.

Tubâs, vil., Palestine, *Thebes* in the O. T., 32° 19′ N., 35° 22′ E., 10 m. NE. Nablus.

Tub Bataha, reefs in Sulu Sea, between the Philippine Is. and Borneo, in 8° 50′ N., 120° E.

Tubber, stn., Ire., co. Galway, on the Waterford and Limerick Rly., 5½ m. S. Gort, P.O.

Tubber, P.O., Ire., 3 m. from Moate, co. Westmeath.

Tubbercurry, PMT.O., Ire., co. Sligo. See **Tobercurry.**

Tubbrid, par., Ire., S. co. Tipperary, bar. Iffa and Offa West, 11 m. W. by S. Clonmel; 12,573 ac. P. <1500.

Tubbridbrittain, par., Ire., co. Kilkenny, bar. Crannagh, 5 m. SW. Freshford; 4140 ac. P. <500.

Tubbrit, electoral div., Ire., Westmeath, dist. Athlone No. 1.

Tübingen, tn., Ger., kgd. Württemberg, Black Forest circle, beautifully situated on a ridge between the Neckar and Ammer valleys, on the l. bk. of the Neckar, which receives the Steinlach, 18 m. SSW. Stuttgart. Has a university founded, 1477, by Duke Eberhard im Bart, chairs for Protestant and Roman Catholic theology, the former of which became celebrated under Baur (1826), the founder of the so-called T. school of theology. Its castle, Hohentübingen, contains the university library of 300,000 vols., and an observatory; manufactures physical and surgical instruments, chemical apparatus, &c. Ceded to Württemberg, 1342. Birthplace of the poet Uhland (1787–1862). P. 13,200; comm. P. 13,300.

Tubize, comm., Belgium, prov. Brabant, arr. Nivelles, on the Senne, 12 m. SW. by S. Brussels. P. <5000.

Tubney, par., Eng., Berkshire, 4 m. W. Abingdon. P. <250.

Tubrid, electoral div., Ire., Kerry, dist. Ardfert.

Tubuai, or **Austral Islands,** group of seven isls., Pacific, crossed by 150° W., 25° S.; Tubuai I. is in about 149½° W., 23° 25′ S.; all except one are of volcanic formation. Principal products, the banana, orange, manioc, cotton, tobacco, sugar-cane, and taro. Some of the islands became French along with the Society Is., but others were not formally annexed till 1889. Area of group, 110 sq. m.

Tu'burí, or **Tu'furí,** country, central Africa, E. of Adamawa, S. of 10° N., W. of 15° E. The **T. swamp** in the E. of the country, in 15° E., becomes in the rainy season, according to Barth, a lake 60 m. long, connecting the Benue with the Serbevuel. Its discoverer, Vogel, considered that it discharged both to the Logone and to the Benue by the Mayo-Kebbi, but the exploration of the latter by Macdonald in 1890 seems to prove that it has no connection with the marsh.

Tubusuptus, ruins, Algeria. See **Tiklat.**

Tucacas, seapt., Venezuela, Lara, in about 68° 20′ W.; port of the Aroa copper-mines, with which it is connected by rail.

Tuchan, tn., France, dep. Aude, arr. Carcassonne, 16 m. NW. by N. Perpignan. P. <2000.

Tuchel, tn., Prussia, prov. W. Prussia, cap. circle T., 32 m. N. by W. Bromberg. P. <3000.

Tuchla, vil., Austria, crownland Galicia, 30 m. S. Drohobycz, on the Trans-Carpathian Rly., connecting Stryi with Munkacs.

Tuckahoe, vil., U.S., New Jersey, Cape Mayo co., on Tuckahoe R. P. <1500.

Tuckahoe, vil., U.S., New York, W. Chester co., on the l. bk. of Hudson R., 20 m. NNE. New York. P. <1500.

Tuckahoe Creek, riv., U.S., Maryland, flows S. into the head of Choptank R., an eastern inlet of Chesapeake Bay.

Tuckenhay, P.O., Eng., Devonshire, 4 m. SW. Totnes.

Tucker, co., U.S., W. Virginia, in the NE., to the E. of 80° W., and crossed in the S. by 39° N.; with coal-mines.

Tucker Beach, seaside resort, below Barnegat Inlet, U.S., New Jersey. P. <1500.

Tuckernuck Island, U.S., Massachusetts, Nantucket co., N. of the W. end of Nantucket I.

Tuckerton, vil., U.S., New Jersey, Burlington co., 47 m. SE. by E. Philadelphia (Penn.); has large trade in fish. P. <1500.

Tuck Hill, eccles. par., Eng., Shropshire and Staffordshire, Alveley and Claverley and Bobbington and Enville pars. P. <500.

Tucking Mill, eccles. par., Eng., Cornwall, Illogan and Camborne pars. P. <4500.

Tuckmill, electoral div., Ire., Wicklow, dist. Baltinglass.

Tucopia, isl., Pacific, in about 12⅜° S., 168° 40′ E.

Tucson, city, U.S., Arizona, Pima co., 128 m. NW. by W. from the SE. corner of the terr.; seat of the Territorial University, founded by the Jesuits in 1560. Chief business, mining and farming. Alt. 2370 ft. Mean temp. (14 yrs.), yr. 69.5° F., Jan. 49.9°, July 88.4°; rfall., yr. 12.11 in., July–Aug. 5.24 in. P. 5200.

Tucuche, highest point in Trinidad, in the centre of the N. range. Alt. 2990 ft.

Tucuman, tn. and stn., Argentine Republic, cap. prov. T., 320 m. N. by W. Córdoba, in 26° 50′ S.; the busiest and most populous town in the N. of the republic. It has a cathedral, Jesuits' college, and trade in oxen and mules sent into Bolivia. Here the independence of the provs. of La Plata basin was first proclaimed, and the first congress of the republic was held in 1816. Alt. 1475 ft. Mean temp. (7 yrs., 1873–85), yr. 66.9° F., Jan. 77.7°, July 54.0°; mean rfall. (16 yrs., 1873–88), yr. 38.2 in., April–Sept. 4.8 in. P. (1869) 17,400; (1889) 25,000.

Tucuman, prov. in the NW. of the Argentine Republic, the smallest, but relatively the most populous of all the provs., rather more than one-fourth of the size of Eng., cap. T. Surface, mountainous to the W., where it is separated from the neighbouring prov. of Catamarca by the perennially snow-clad range of Aconquija, rising to upwards of 15,000 ft., more or less level in the E., with the prevailing slope of the republic from NW. to SE., the plains and lower grounds occupying nearly three-fourths of the entire area. The influence of the Sierra Aconquija in promoting condensation of moisture is shown in the relatively large rainfall (at the town of Tucuman 38 in. annually), which, with the facilities afforded for irrigation by the mountain streams, makes the agriculture of the prov., in particular the cultivation of sugar-cane, of high importance. Next in importance is maize; and rice, tobacco, wheat, lucerne, and the vine are also cultivated. Mining industry is insignificant. The name is said to be derived from *Tucma,* meaning 'land without end,' applied by the Incas to the Gran Chaco. See **Argentine Republic,** table.

Tucumbu, vil., Paraguay, on the Paraguay, 2 m. S. Asuncion. P. <2000.

Tucuyús, isl., Brazil, in the mouth of the Amazon, crossed in the extreme W. by 52° W.

Tuddenham, par., Eng., Suffolk, Mildenhall union, 3 m. NE. by N. Ipswich, div. and 5 m. W. Woodbridge, 1½ m. ENE. Westerfield stn., P.O. P. <500.

Tuddenham, East and **North,** two adjoining pars., Eng., Norfolk, Mid div., the latter 11½ m. W. by N. Norwich, 4 m. E. East Dereham. East T., P.O., P. <500; North T. P. <500. See **Honingham.**

Tudela, tn., Spain, prov. Navarra, cap. dist. T., 60 m. W. Huesca, on the r. bk. of the Ebro, here crossed by a stone bridge of 17 arches. Has trade in alfa, gathered in the neighbouring mountains, and oil from the numerous olive-trees in the vicinity; has a cathedral, and Latin and medical schools. Some miles above, a resounding fall is formed by a dam across the Ebro, built to store up the water for the famous imperial canal. Birthplace of the celebrated traveller Benjamin of Tudela, 12th century. P. (comm.) 9200.

Tumsar, municip., Brit. India, Central Provs., dist. Bhandárá, 40 m. ENE. Nágpur; manufactures coarse cotton cloth. P. 7600; Hindus, 7000.

Tumuc Humac, mt. chains, Guiana, separating the basins of the Maroni and Oyapock from that of the Amazon, and Dutch and French Guiana from Brazil; explored by Henri Coudreau in 1888. Highest point Timotakem, alt. 2620 ft.

Tumut, tn. in rich agricultural dist., New South Wales, Wynyard co., 100 m. WSW. Goulburn, on riv. Tumut, which flows into the Murrumbidgee near Gundagai, in 148° 6′ E., after a course of 80 m. P. <1500.

Tun, Chinese, 'military station.'

Tun, tn., Persia, prov. Khorassan, 73 m. ENE. Tebbes; exports silk, tobacco, and opium. At the present day it falls far short of the glowing accounts of former times.

Tuna, insignificant port, Brit. India, Bombay, Cutch state, in 23° 2′ N., 70° 10′ E.

Tuna, vil., Sweden, prov. and 62 m. N. Kalmar; trade in wood planks. P. (comm.) <4000.

Tuna, Stora, vil., Sweden, prov. Kopparberg, 11 m. SSW. Falun. P. (comm.) 10,400.

Tunaberg, vil., Sweden, prov. and 9 m. SSW. Nyköping; has mines of copper, iron, lead, and cobalt. P. (comm.) <3000.

Tunas, vil., Cuba, S. ct., 218 m. SE. by E. Havana, in 79° 28′ W.

Tunbridge, or **Tonbridge,** par. and tn., Eng., Kent, T. div., on the Medway, 5 m. N. Tunbridge Wells, with a stn. **(Tonbridge Junction)** on the SE. R.; it is a quiet old town, with five stone bridges over as many arms of the Medway; has a richly endowed grammar-school with a commercial school attached, and was long noted for manufacture of toys and turned wares. Par. 14,611 ac., P. 41,800; tn. P. 10,100; parl. div. P. 72,400.

Tunbridge, post-tn., Tasmania, Somerset co., 51 m. S. by E. Launceston. P. <1500.

Tunbridge, tn., U.S., Vermont, Orange co., 25 m. S. Montpelier, on White R. P. <1500.

Tunbridge Wells, mun. bor. (since 1889) and market-tn., Eng., Kent (Tunbridge div.) and Sussex, 5 m. SSW. Tunbridge, in the diocese of Canterbury, on SE. R. and S. Coast Rly.; occupying a valley of the Weald, with a breezy common behind of 170 ac. The S. and SW. aspect, commanding pleasant prospects and a healthy climate, combined with the natural wells of chalybeate water, here rendered the place a fashionable resort, especially during the 18th century. Since 1835 T. W. has steadily grown, partly because it has been chosen by many gentlemen from London and elsewhere as a country residence. The 'season' is from July to September. The local industry is in 'Tunbridge ware,' viz., work-boxes and toys, &c., made of beech, holly, &c., and inlaid. Market-days, Tu., F., and S. Tn. P. (1801) 3000; (1871) 19,400; mun. bor. P. (1891) 27,900.

Tundergarth, par., Scot., Dumfriesshire, 6 m. E. by S. Lochmaben, 2½ m. E. by S. Lockerbie stn.; 10,482 ac. P. <500.

Tundras, vast regions of a marshy character, with a most inhospitable climate, in the N. of Siberia (*q.v.*).

Tundža, riv. See **Tunja.**

Tune, vil., Norway, prov. Christiania, 16 m. NW. Frederikshald; has antiquarian remains. P. (comm.) 7000.

Tung, Chinese, 'east.'

Tunga, or **Ain Tunga,** vast ruins of the ancient *Thignica,* N. Africa, 50 m. WSW. of Tunis.

Tunga, riv., S. India. See **Bhadra.**

Tungamah, post-tn., Victoria, Moira co., 61 m. W. by S. Albury; in grain-growing dist.; gold has been found in vicinity. P. <1500.

Tungao, tn., China, prov. Kwangtung, on the SE. ct., 40 m. SW. Swatow.

Tungchang-fu, tn., China, prov. Shantung, 190 m. SSW. Tientsin, on the Grand Canal; important mart for merchandise. One of the oldest cities in China.

Tung Chieng Kum, tn., French Indo-China, 85 m. E. by S. Luang Prabang. Alt, 2593 ft.

Tungchingchang, tn., Manchuria, 23 m. SSW. Ninguta.

Tung-chou, tn., China, Pechili, on the r. bk. of the Sha-ho, at its confluence with the Pei-ho, 20 m. E. Peking; important entrepôt in the tea-trade between Tientsin and Kalgan. A canal connects the Sha-ho with Peking, of which T. is the port. There is great traffic by boats both on the river and the canal, but the canal navigation is very difficult; much merchandise is also sent to the interior by land, but the town is falling into decay.

Tungchwan, city, China, Yünnan, 105 m. NE. by N. Yünnan-fu, in a fertile plain bounded on the W. by hills containing the most celebrated copper-mines in China.

Tunghai ('Eastern sea'), Chinese name of that part of the China Sea between China and the Riukiu Is.

Tunghi, bay, Portuguese E. Africa, in 10° 45′ S., 20 m. S. of the mouth of the Rovuma. The bay was, in 1886–88, a subject of contest between the sultan of Zanzibar and the Portuguese government, but on Germany taking over the terr. of the former on the mainland, the rights of the Portuguese were recognised. The maritime town of T. on this bay was bombarded in 1886 by the Portuguese, who have built a new town (Palma) further W.

Tung-ho, or **Tatu-ho,** riv., rises in the E. of Tibet, flows S. into the Chinese prov. of Süchwan, and then E. to the Min, which it joins at Kiating-fu, in 29° 33′ N., 104° 0′ E.; navigable from Tsutati, where it turns eastwards, but having its navigation obstructed by many rapids and other obstructions below that point. *Supp. Papers R. G. S.,* i. p. 45.

Tunghwa-hsien, coal-mines. See **Manchuria.**

Tunghwang-hsien, tn., China. See **Sachu.**

Tungjen-fu, tn., China, in the E. of Kweichou, 160 m. NE. by E. Kweiyang-fu; has gold and iron mines.

Tung-kiang, riv., China, prov. Kwangtung, flows S. and SW. to the Pei-kiang; a much frequented route for the transport of sugar, rice, &c.; navigable to Hoyuan for large junks. Length about 280 m.

Tungkiatsun, tn., China, prov. Shantung, on the E. ct., 108 m. SSW. Chifu.

Tungkun, tn., China, prov. Kwangtung, 40 m. E. by S. Canton.

Tungkwan-fu, tn., China, Süchwan, 67 m. ENE. Chengtu-fu.

Tungkwan-fu, tn., China, Yünnan, 105 m. NNE. Yünnan-fu; a dist. rich in copper lies to the W.

Tungkwang, tn., China, prov. Pechili, on the Grand Canal, 90 m. S. by W. Tientsin.

Tungkwanting, tn., China, prov. Shensi, on the r. bk. of the Hwang-ho, at the point where that river changes its course from S. to E., on the border of the provs. of Shansi and Honan. It occupies an important strategic position, and is therefore fortified.

Tungliang-hsien, tn., China, Süchwan, 35 m. NW. Chungking.

Tung-ngan, tn., China, prov. Pechili, 40 m. SSE. Peking.

Tungsansheng, country, Asia. See **Manchuria.**

Tungting-hu, largest lake in China, prov. Hunan, contains several islands, one of which is floating, and formed of trees and drift. The lake supports many fishermen. It receives several large rivers, and communicates at its N. extremity with the Yangtse-kiang. It serves as a reservoir for the drainage of almost all the prov. of Hunan, and its area and form vary much according to the amount of water in the rivers. Area about 1930 sq. m.; 250 m. in circuit. Length, 75 m.; breadth varies from 20–37 m.

Tungtsu-hsien, tn., China, Kweichou, 113 m. S. by E. Chungking.

Tungurahua, prov., Ecuador, between provs. Chimborazo and Leon; owes its name to the snow-clad volcano T., of which the height is variously estimated between 16,270 and 16,770 ft.; its section is perfect to the truncation of the summit. In 1886 it shot out ashes.

Tunguru, former Egyptian station, on W. shore of Lake Albert Nyanza, 16 m. from the place where the Nile issues from the lake.

Tunguses, a Manchurian stem occupying a terr. of no less than 1,900,000 sq. m. in E. Siberia, on the High Plateau and its Pacific slope, *i.e.,* from the Yenisei to the Sea of Okhotsk, and from the Chinese frontier to the Arctic Ocean, as well as on Sakhalin I. They came originally from Manchuria, whence they were repulsed W. and N. by the Mongols under Jenghiz Khan. They are a very intelligent, lively, and staunch race of men, living a nomad life in the forests of the highlands, and finding their living chiefly in hunting and fishing. For transporting their

tents and furniture they mostly keep reindeer and a few horses. About 2500 of them are christened, and are settled agriculturists in E. Transbaikalia; a few work for the gold-diggings. P. estimated at about 20,000.

Tunguska, Middle, or **Podkamennaya,** riv., E. Siberia, govt. Yeniseisk, r. bk. trib. of Yenisei, which it joins half way between the Upper Tunguska (Angara) and the Nizhnyaya Tunguska, under 61° 35′ N.; rises in 56° N., flows N. and W. about 820 m. Ice-bound in beginning of October, remains frozen till end of May.

Tunguska, Nizhnyaya (Lower), riv., E. Siberia, govts. Irkutsk, Yakutsk, and Yeniseisk, large r. bk. trib. of Yenisei, rises very near to the middle Lena, from which it is only 20 m. distant, near Kirensk, flows NNW., and after junction with Ilimpeya, towards the W., joining Yenisei under 65° 47′ N., at Monastyrskoye village, near Turukhansk; graphite mines 300 m. above its mouth. Navigation meets with some obstacles from rapids; freezes in beginning of October. Length about 1680 m.

Tunguska, Upper, name assumed by **Angara** (*q.v.*) in its lower course.

Tunguzskiy, range of mts., E. Siberia, govt. Yeniseisk, runs SE. to NW., between dists. Yeniseisk and Turukhansk, and is continued further N. under the name of Syverma; granite, syenites, crystalline, slates, and eruptive rocks. Average alt. 2500 ft.

Tungwa, tn., W. Africa, Congo Free State, 92 m. S. by W. Leopoldville.

Tuni, tn., Brit. India, Madras, Godávari dist., 55 m. SW. by W. Vizagapatam. P. 7700; Hindus, 7500.

Tunica, co., U.S., Mississippi, in the extreme NW., bounded on the W. by the Mississippi.

Tunis, Tumsia, Jezirat-el-Maghreb ('Isle of the West,' or **Afrikia** of the Arabs), one of the old Barbary states, corresponding to the Roman province of Africa, since 1881 a protectorate of France, the Resident-general of which exercises all real authority in the Bey's name. Its boundaries on the W. are Algeria, on the N. the Mediterranean, on the E. the eastern part of same sea, on SE. Tripoli, and on S. the Sahara, its extension on the S. direction being indefinite. T. is an E. prolongation of Algeria (*q.v.*), and in its physical features resembles that colony. The Atlas valleys are fertile and well watered, with extensive cork woods, the N. and S. ranges being separated by the rich basin of the Mejerda (ancient *Bagradas*), the most important river of N. Africa. Through the extensive valley (ancient *Zeugitana*) runs the railway from Algeria to Tunis, which is dotted with Roman ruins like the rest of the country. Other regions are also fertile, but where streams from the plateau enter between two branches of Jebel Aures do not reach the sea they form permanent 'shotts' (brackish lakes) and marshy 'sinks,' or 'sebkas,' dried up in summer. The Tunisian Sahara also abounds in rich well-populated oases. The thermometer at Tunis city rarely rises to 92°, the mean temp. of winter or the rainy season (Jan.–March) being 60°. The chief towns are all of great antiquity, mostly Berber or Arab, founded on those of the Roman colonists. Tunis is the largest. In the N. the other towns of importance are Susa (ancient *Hadrumetum*), Sfax (ancient *Taphroura*), and Bizerta (ancient *Hippo Zarytus*), a naval arsenal. On E. coast are Hammamet, Monastir (ancient *Ruspina*), Mahadia (ancient *Turris Hannibalis*) (the old cap. of the Fatamite dynasty), and Gabes (ancient *Tapace*). Inland are Kairwan, a holy city, until recently *tabu* to Christians and Jews. Sbeitla (ancient *Sufetula*), remarkable for Roman remains, Beja (ancient *Vaga*), great corn-market of El Kef (*Sicca Veneria*, later *Colonia Julia Coita Nova*), a 'castle in the air,' perched on the side of a lofty volcanic rock. Of Carthage nothing now remains above ground except fragments of cisterns and an aqueduct. The commerce of T. is chiefly in olive-oil, esparto grass, wheat, sponges, barley, and fruit, more especially dates. Exports above £1,000,000, imports about £1,500,000; from Great Britain £114,000, to Great Britain £85,000. After many vicissitudes, the office of Bey (under the Turkish Sultan) became hereditary in the family of Murad, a Corsican renegade, who governed from 1631 to 1702. From 1702 to 1705 Ibrahim, last of the Beys chosen by the Janisaries, held power. He was succeeded by Hosain ben Ali, son of a Greek renegade, in whose descendants the beylik continues. But for many years the suzerainty of the Bey to the Ottoman Sultan was only nominal, and in 1881 the French, under the pretence of the Algerian frontier being raided by the Krumir, a Berber tribe, virtually annexed, or 'protected,' the regency, without regarding Turkey's shadowy claim to it. Area about 44,920 sq. m. P. 1,500,000, mostly Arabs and Berbers, the 45,000 Europeans comprising many French, Italians, and Maltese.

Tunis, city, cap. of the regency of T., situated on an isthmus between the Lake (Bahira or Baheira) of Tunis on the E., and the shallow, generallyi n great part dry, salt lagoon known as the Sebkha-el-Sejumi (Sedjoumi) on the W., in 36° 48′ N., 10° 10′ E. The Bahira, about 23 m. in extent, in ancient times an excellent natural harbour, is now extremely shallow, mostly only 12–18 in., at its deepest perhaps 6 ft. in depth, but is now traversed by a canal, with a total length of rather more than 7 m., and a depth of 22–23 ft., connecting T. with its port of Goletta, and continued seawards between breakwaters. The ancient city of T., distinguished as the Medina ('city'), contains the Kasba, an old Arab building enlarged in the time of the Spaniards, a large quadrangular castle formerly used as a prison for Christian slaves and now occupied by the French garrison, a palace of the Bey, and other buildings of an Arab character, and is separated by the Sea-Gate (Bab-el-Bahar) from the European quarter, called by the French La Marine, where a Roman Catholic cathedral has been in progress since 1881. T. long enjoyed a reputation for salubrity, but, as might be expected from the situation, this reputation has been belied by French experience. Dysentery is endemic; diseases of the liver are common, and the French garrison suffers heavily every year from typhoid fever and diphtheria. Mean rfall. (46 yrs.), 12.2 in. P. 145,000; Jews, 45,000; French, 11,000; Maltese and Italians, 8000.

Tunja, ancient *Hunza*, tn., Colombia, Boyaca, 80 m. NE. by N. Bogotá; it contains the University of Boyaca, normal schools, and colleges. In the neighbourhood is a copper-mine, and in the town are hot springs celebrated in Colombia. T. was the cap. of a powerful kingdom before the Spanish conquest. P. 8000.

Tunja (Slavonic spelling **Tundža**), riv., Balkan Penin., rises in Eastern Roumelia, in the Balkan Mts., and flows E. and S. to the Maritsa, which it joins on the l. bk. at Adrianople. Length, 161 m.; area of basin, 3255 sq. m. See **Černa Gora** and **Tulovsko-Polje.**

Tunjer, powerful Arab tribe, Sudan, in Darfur and Wadai.

Tunka Mountains, or **Tunka Alps,** Russia, E. Siberia, govt. Irkutsk, a range of mountains rising above the limits of tree vegetation (5000–7000 ft.), which runs parallel to the Sayans, being separated from the border ridge of the High Plateau by the valley of the Irkut. They have an abrupt slope towards this valley, while in the N. the Kitoi Alps run parallel to the Tunka Alps. Snow-clad for ten months, and intersected by but a very few passes. The middle parts of the valley of the Irkut are known as the **Tunka depression,** which is covered with rich prairies (eruptions of lava), and has **Tunkinskoye** or **Tunka,** Cossack vil., on the l. bk. of Irkut, at an alt. of 2300 ft. P. <1000.

Tunkhannock, bor., U.S., Pennsylvania, Wyoming co., on the N. Branch of the Susquehanna R., 18 m. NW. by W. Scranton; shipping point for the dist. P. <1500.

Tunnack, post-tn., Tasmania, Monmouth co., 30 m. NNE. Hobart. P. <1500.

Tunnelton, vil., U.S., W. Virginia, Preston co., 19 m. NW. of the SW. corner of Maryland. Alt. 1280 ft. (R.R.). P. <1500.

Tunnyduff, P.O., Ire., 6 m. from Bailieborough, co. Cavan.

Tunstall, par., Eng., Durham, Houghton-le-Spring div., 3 m. S. Sunderland, 1½ m. W. by N. Ryhope stn. P. <5000.

Tunstall, par., Eng., Kent, div. and 7½ m. W. by N. Faversham, 1½ m. SW. Sittingbourn stn. P. <250.

Tunstall, par., Eng., Lancashire, near the l. bk. of the Lune, div. and 11½ m. NE. Lancaster, 1½ m. NE. Arkholme stn., P.O. P. <250.

Tunstall, par., Eng., Norfolk, E. div., 7 m. W. Yarmouth, 1½ m. SSE. Acle stn. P. <250. See **Halvergate.**

Tunstall, market-tn., Eng., Staffordshire, included in the parl. bor. of and 4 m. NNE. Newcastle-under-Lyme, on the N. Staffordshire Rly.; in the town or its vicinity are collieries, potteries, oil and chemical works, and blast-furnaces. Market-days, M. and S. P. 15,700.

Tunstall, par., Eng., Suffolk, Woodbridge div., 14 m. ENE. Ipswich, 2 m. ESE. Wickham Market stn., PMT.O. P. <750; eccles. par. (**T. with Dunningworth**) P. <750.

Tunstall, or **Tunstall in Holderness,** par., Eng., Yorkshire, E. Riding, Holderness div., on the coast, 13½ m. E. Hull, 3 m. NW. by N. Withernsea stn. P. <250.

Tunstall, par., Eng., Yorkshire, N. Riding, div. and 4½ m. SE. Richmond, 3 m. SSW. Catterick Bridge stn. P. <250.

Tunstead, eccles. par., Eng., Lancashire, Middleton div., 6 m. NNW. Rochdale. P. 7000.

Tunstead, par., Eng., Norfolk, E. div., 10½ m. NE. by N. Norwich, 1½ m. S. by E. Worstead stn. P. <500; eccles. par. (**T. with S. Ruston**) <750.

Tunwell, P.O., Eng., Hertfordshire, 2½ m. from Ware.

Tunworth, par., Eng., Hampshire, div. and 3½ m. SE. Basingstoke. P. <250.

Tuogh, par., Ire., co. Limerick, bar. Owneybeg, on riv. Mulkear, 3 m. N. Pallas stn.; 6519 ac. P. <2000.

Tuoghcluggin, par., Ire., co. Limerick, bar. Coonagh, 2 m. NE. Pallas stn. P. <500.

Tuolumne, riv., U.S., California, trib. of San Joaquin, which it joins on the r. bk. in about 37° 35′ N.

Tuolumne, co., U.S., California, intersected by 38° N. and 120° W.

Tuong, riv., Tongking, l. bk. trib. of the Thaibinh, rises in the mountains near Langson, and flows S. into the Thaibinh opposite the Seven Pagodas; navigable for flat-bottomed boats to Phu Langthuong, at the head of the railway to Langson. Length about 75 m.

Tuoro, vil., Italy, prov. and 17 m. WNW. Perugia, on N. shore of Lake Trasimeno. P. <4000.

Tuosist, par., Ire., S. co. Kerry, bar. Glanarought, on Kilmakilloge Harbour, 11 m. SW. Kenmare, P.O.; 39,341 ac. P. <3000.

Tupelo, tn., U.S., Mississippi, Lee co., 100 m. SE. Memphis (Tenn.). Alt. 280 ft. (R.R.). P. <1500.

Tupholme, par., Eng., Lincolnshire, Lindsey div., 7½ m. W. Horncastle. P. <250.

Tupiza, tn., Bolivia, dep. and 140 m. S. Potosi; chief commercial centre with the Argentine Republic; halting-place between Potosi and Jujuy. To the SW. are the important gold-washings of Estarca. P. 3000.

Tupsley, par., Eng., Herefordshire, 2 m. E. by N. Hereford, included in the parl. bor. of Hereford. P. <1500.

Tupton, par., Eng., Derbyshire, div. and 4 m. S. Chesterfield, 1 m. W. Clay Cross stn., P.O., and PM.O. (**New Tupton**). P. <2000.

Tupungato, one of the Andes of Chile, between provs. Santiago and Mendoza, 45 m. E. Santiago, in 33° 25′ S. Alt. 20,270–21,110 ft.

Tupuselei, vil., on S. ct. of Brit. New Guinea, in about 147° 20′ E.

Tuquerres, tn., Colombia, Cauca, 110 m. NE. by N. Quito; the volcano of T. or Azufral (alt. 13,355 ft.), 7 m. W. of the town, has a cupola of almost pure sulphur. Alt. 10,030 ft. P. (dist.) 8500.

Tura, vil., central Africa, Unyamwezi, in 5° 25′ S., 33° 35′ E.

Tura, comm., Hungary, co. Pest-Pilis-Solt-Kis-Kun, dist. Vácz-alsó. P. <5000.

Tura, vil., Brit. India, Assam, dist. Gáro Hills, 73 m. SE. Kuch Behar. Alt. 1300 ft.

Tura, riv., Russia, W. Siberia, govts. Perm and Tobolsk; rises in middle Urals, flows NW., E., and SE., joins Tobol 65 m. below Tyumeñ, which is the head of navigation to Tomsk, Omsk, and the Altais.

Turaiyúr, tn., Brit. India, Madras, dist. and 27 m. N. by W. Trichinopoli. P. 7500; Hindus, 7000.

Turakina, tp., New Zealand, North I., Rangitikei co., 90 m. SE. New Plymouth, 10 m. SE. Wanganui. P. <1500.

Turan, or **Shohan** (the name Turan being unknown to the natives), in French spelling **Tourane,** seapt., Annam, 54 m. SE. by E. Hué, in 16° 4′ N., 108° 12′ E., on the S. side of a fine bay, bounded on the N. and E. by two rocky penins.; mouth of bay 5 m. wide. Formerly a busy commercial place, where several European nations established factories in the 17th century. Occupied by France in 1888. Coal-beds of Nongson in the neighbourhood.

Turan, an ancient expression applied vaguely to the countries of central Asia beyond the Oxus, as opposed to Iran, the corresponding term for the regions SW. of that river (Persia, &c.). Hence the name Turanian has been given generally to the Turkish or Tatar races which inhabit the former region.

Turan, vil. and mineral spring, Russia, E. Siberia, govt. and 170 m. W. Irkutsk, in the valley of Irkut. P. <1000.

Turanga, native name of Poverty Bay, New Zealand, North Is., now entirely disused.

Turate, vil., Italy, Lombardy, prov. and 11 m. S. Como. P. <3000.

Turavanúr, tn., India, Mysore, 60 m. SW. by S. Bellary. P. (1881) <4000.

Turbaco, vil., Colombia, dep. Bolivar, 17 m. ESE. Cartagena. The famous volcanoes of T., sources of gas and mud, have been described by Humboldt, and visited by a number of learned travellers. P. <4000.

Turballe, La, tn. and fishing-port, France, dep. Loire-Inférieure, arr. and 16 m. WNW. St. Nazaire, on Croisic Bay; has sardine fisheries. P. <2000.

Turbat-i-Haidari, tn., Persia, Khorassan, 80 m. SSW. Meshed; fairly important commercial centre.

Turbat-i-Sheikh Jam, tn., Persia, Khorassan, 90 m. SE. by S. Meshed. Alt. 3135 ft.

Turbenthal, vil., Switzd., cant. Zürich, 7½ m. SE. by E. Winterthur. P. (comm.) <3000.

Turbo, maritime vil., Colombia, Cauca, 115 m. NNW. Antioquia.

Turbot, isl., Ire., off W. ct. co. Galway, bar. Ballynahinch. P. 115.

Turchino, Pizzo, mt., Italy, Liguria, near the coast, in the Apennines, 14 m. WNW. Genoa.

Turcomans, or **Turkomans.** See **Transcaspian Terr.**

Turcz, comm., Hungary, co. Ugocsa, dist. Tiszántúli. P. <4000.

Ture, tnld., Ire., NE. co. Donegal, bar. W. Inishowen, 10 m. SW. Moville, on Lough Foyle, 9 m. from Londonderry stn., P.O. P. <250.

Tureia, or **Carysfort,** isls., Pacific, in the Tuamotu group, in about 20¾° S., 138° 15′ W.

Turek, dist. tn., Russian Poland, govt. and 24 m. NE. Kalisz; weaving as domestic trade; oil-works. P. 7700.

Turfan, tn., Eastern Turkistan, 87 m. SE. Urumtsi; called Kunia T. to distinguish it from Uch T., not far from Kashgar. The neighbourhood produces rice, sesame, millet, excellent fruit, and superior cotton, which is exported in great quantities. The present town is only about 120 years old; old T., destroyed four centuries ago, was 30 m. to the W. P. 10,000.

Turgai, prov. of Russian Central Asia, General-Governorship of the Steppes, formerly a part of the Kirghiz Steppe, has Uralsk and Orenburg on W. and N., Akmolinsk on E., and Syr-dariinsk and Sea of Aral on S. This immense terr. includes in its N. corner the low watershed between the rivers flowing into Lake Aral and those flowing N. into the Arctic Ocean. In the W. it covers part of the slopes of the Urals and the Mugojar Hills, nearly 1000 ft. high, which continue the Urals towards the S. and join the Ust-Urt, marking by their steep E. slope the former limits of the Aral basin. In the E. it has the hills running between the Turgai R. and the Sary-su (Akmolinsk). The remainder are steppes and deserts about 300 ft. above the sea, dotted with lakes. Only small relics of old rivers are now seen in this rapidly desiccating terr., namely, the Kara-Turgai, which flows SW., and after having received the Irgiz from the Mugojars is lost in Lake Cholgar-dengiz (Chalkar-dengiz). The former tribs. of the Kara-Turgai (Sary Turgai, Jilanchik) no longer reach it, but are lost in the steppes. The soil is covered with Aral-Caspian sea deposits. Climate very dry and continental; cold winters and very hot summers, the average temp. being, at Irghiz, yr. 41° F., Jan. 7°, July 77°; and at Orsk (govt. Orenburg, near NW. border of Turgai), yr. 39°, Jan. 4°, July 73°; while the yearly rfall. is only 12 in. (3 in. in summer) and 10 in. respectively. Forests occur only on the Mugojar Hills and in the N., while elsewhere only shrubs of the wild cherry and dwarf almond grow on the hill slopes. In the spring the steppes are covered with grass, which is burnt up in summer, while the clayey steppes are clothed with wormwood, and large tracts are covered with shifting sands and salt clays. Population consists of nomadic Kirghizes, with but a few thousands of Russian immigrants. Cattle-breeding is the chief occupation, the Kirghizes retiring in winter to better sheltered places on the Syr, while some 100,000 Kirghizes come in the summer from Turkistan to graze their cattle and horses. Divided into four dists.: Turgai, Iletsk, Irghiz, and Nikolayevsk, the chief towns of which are mere villages, with less than 1000 inhabitants. Area, 176,219 sq. m. P. (1889) 364,660.

Turgai, formerly **Fort Orenburgskoye,** cap. of above prov., 49° 38′ N., 63° 35′ E., 450 m. ESE. Orenburg, on caravan route from this town to Tashkend, and on Kara-Turgai R. P. <1000.

Turin, Italian **Torino,** city, N. Italy, on l. bk. of the Po, at the junction of the Dora Riparia, 76 m. WSW. Milan; lat. 45° 4′ N., long. 7° 48′ E. Though formerly fortified and possessing a fine citadel, it is now an open city, one of the most flourishing and beautiful towns in Italy, in a rich and well-watered plain studded with villas. Near the middle of the city is the Piazza Reale, and from it several fine broad and well-paved streets run at right angles; the Strada del Po, with many lofty palaces, leads to a bridge of five arches over the Po. In the centre of the Piazza del Castello is the ancient castle, the only remaining edifice of the Middle Ages, flanked with towers, and containing the hall of assembly and offices of the senate, royal gallery of pictures, and the astronomical observatory. The finest square is that of Piazza di San Carlo. There are several handsome modern palaces, the Royal Palace and gardens, Palace Carignano, the old palace of the Dukes of Savoy, now converted into the house of assembly for the senate. The cathedral, a Gothic structure of the 15th century, was formerly very wealthy in plate and jewels, which

Napoleon I. sold, and applied the proceeds to embank and build the bridge over the Po. The interior is decorated with frescoes, and contains the tombs of some princes of the house of Savoy. Amongst the monuments erected in honour of celebrated Italians are those of Charles-Albert, Victor-Emmanuel II., Prince Eugene, Gioberti, Balbo, Count Cavour, Garibaldi, and Massimo d'Azeglio, &c. On a hill near the town stands the splendid mausoleum of the house of Savoy. The university, the most frequented in Italy after that of Naples, is attended by more than 2000 students; its ancient library, now the National Library, possesses more than 200,000 volumes and about 3000 manuscripts. The palace of the Academy of Sciences encloses another library, numismatic and zoological collections, picture-gallery, and a valuable museum of Egyptian, Greek, and Roman antiquities. The Academy of Fine Arts also possesses interesting collections. The Royal Museum of Arms is one of the most important in Europe; the Royal Palace has a library of 60,000 volumes. In addition to these, T. has various museums, and several military and technical schools. Owing to its situation, which commands the passes of the W. Alps, T. has always been a place of considerable strategic importance. Its manufactures are chiefly of silks, velvets, ribbons, lace, hosiery, woollen and cotton fabrics, matches, steel and iron wares, stained paper, glass and porcelain, liqueurs, gunpowder, and leather. *Taurasia*, the Celtic predecessor of T., was burnt by Hannibal in 218 B.C. Cæsar made a Roman colony of it, and gave it the name of *Colonia Julia*, changed under Augustus to *Augusta Taurinorum*. After the fall of the Roman Empire it belonged successively to the Heruli, Ostrogoths, Lombards, and Franks. The town rose to importance when the Duke of Savoy, Amadeus V., made it the cap. of his states, 1418. In 1506 the French took it and held it until 1562. In 1640 they captured it again, and in 1706 the same enemy was defeated by Prince Eugene whilst laying siege to its walls. Occupied a third time by the French, under Joubert, in 1798, the city was delivered by the Russians and Austrians under Suwaroff. But after the battle of Marengo, Piedmont was annexed to France and T. dismantled. During the French Empire under Napoleon I., T. was cap. of the dep. Po. In 1814 Victor Emmanuel I. made it the cap. of the kgd. of Sardinia, and from 1861–65 it was cap. of the kgd. of Italy. Birthplace of G. Baretti, philologist and critic, 1716–1789; Princess of Lamballe, 1749–1792; the mathematician Lagrange, 1736-1813; V. Gioberti, philosopher and statesman, 1801–1852; Count Cavour, minister of Victor Emmanuel II., 1810–1861; and D'Azeglio, writer and statesman, 1798–1866. Alt. 906 ft. Mean temp., yr. 54.0° F., Jan. 33.6°, July 73.8°; rfall. (17 yrs.), 32.52 in. P. (1871) 212,644; (1891, estimated) 329,800.

Turkey in Europe.—[1] Sanjaks Constantinople and Chatalja. [2] Sanjaks Adrianople, Kirk-Kilise, Rodosto, Gallipoli, Dede-Agach, Gümürjina. [3] Sanjaks Drama, Seres, Salonica. [4] Sanjaks Monastir (Bitolia), Koritsa, Dibra, Elbasan, Servije. [5] Sanjaks Skoplye and Malesh, Prishtina, Pech, Prizren. [6] Sanjaks Skutari (with Gusinye, which is claimed also by Montenegro), Durazzo (Drach). [7] Sanjaks Berat (with Avlona), Argyrokastron, Liaskovik, Yanina, Preveza. [8] Under Egyptian administration.

Asia Minor.—[1] Sanjaks Skutari and Ismid. [2] Sanjaks Brusa, Kutaia (Kyutahiya), Aïun-Kara-Hissar. [3] Sanjaks Biga, Balikesri. [4] Sanjaks Lemni, Mitilini (Midûllû), Khio (Sakiz), Rhodes. [5] A tributary principality. [6] Sanjaks Smyrna (Izmir), Sarukhan, Aïdin, Denizlû, Menteshe. [7] Sanjaks Sinope, Kastamuni, Kiangri, Boli. [8] Sanjaks Angora, Kishehr, Yozgad, Kasarie. [9] Sanjaks Tekke, Burdur, Hamid (cap. Izbarta), Konia, Nigde. [10] Sanjaks Ich-Ili (cap. Selefke), Adana, Kozan, Jebel Bereket. [11] Sanjaks Sivas, Tokat, Amasia, Kara-Hissar. [12] Sanjaks Janik (cap. Samsun), Trebizond, Gümûshkhane, Lazistan (cap. Riza).

Armenia and Kurdistan.—[1] Sanjaks Bayezid, Erzerum, Erzinggan, Baiburt. [2] Sanjaks Khozat, Mazgird, Kharput, Malatia. [3] Sanjaks Arghana, Diarbekir, Mardin. [4] Sanjaks Sört (Sert), Ginj, Bitlis, Mush. [5] Sanjaks Hakkiari, Albak, Giavar.

Mesopotamia (with El Haza).—[1] Sanjaks Mosul, Sherizor (cap. Kerkuk), Suleimania. [2] Sanjaks Bagdad, Kerbela, Hille, Muntefik (cap. Suk-esh-Sheiyuk), Amara, Busra (Bussora), El Haza or Nejer.

Syria.—[1] Sanjaks Aleppo, Ufra, Zor (cap. Deir). [2] Sanjaks Damascus, Hauran, and mutessarifilik Hama. [3] Sanjaks Latakia, Tripoli (Tarabolus), Beirut, Acre (Akka). [4] Independent mutessarifliks.

The present article is confined to Turkey in Europe, geographically, not politically, regarded. Crete, and the isl. of Thasos, as well as certain maritime tracts in the NW. of Asia Minor, are all reckoned politically to Turkey in Europe; but the last really belong to Asia, and the first two are treated of separately. Geographically, Turkey in Europe contains about 65,000 sq. m., approximately only three-fourths of the area of Great Britain. The **boundaries** are the Black Sea (for 120

m.) on the E., the Bosporus, the Sea of Marmora, and the Dardanelles (the three for 200 m.) on the SE., the Ægean Sea (750 m.) and Greece (180 m.) on the S., the Adriatic (350 m.) and Montenegro (180 m.) on the W., Bosnia (70 m.) on the NW., and Servia (290 m.) and E. Roumelia (*i.e.*, S. Bulgaria, 450 m.) on the N. The Black Sea coast is uniform and unbroken. The S. ct. (Ægean) is indented by the Gulfs of Xeros, Enos, Kara-Agach, Kavala, Rendina(Orphani), Hierisos, Hagion Oros, Kassandra, and Salonica—the last five penetrating into the great penin. of Chalcidice. The Adriatic coast presents the Gulf of Arta, the sheltered channel between the mainland and the isl. of Corfu, the bays of Valona and Durazzo, and the Gulf of Drin. The complex and manifold features of the **orography** have not yet, from want of precise and detailed observations, been reduced to an organic system. It is barely possible to do more than enumerate the principal outstanding characters. In the W. numerous short chains (general elevation 7500 ft.) run nearly parallel to the Adriatic coast, *i.e.*, from NW. to SE., the loftiest and steepest lying immediately W. and E. (Peristeri, 7740 ft.) of Lake Okhrida, and being continued S. in the Pindus chain (8450 ft. in Smolika). Further E., between E. Roumelia and Macedonia, the main range of the Rhodope (the Dospad-Dagh, 7550 ft.) has a more W. to E. direction; but there are prominent chains running SE., *e.g.*, Perim-Dagh (8800 ft.), between Macedonia and Thrace. The Istranzha-Dagh (3400 ft.), in the extreme E. of Thrace, has the same direction, viz., parallel to the coast of the Black Sea. But there is yet another class of mountain chains, very closely intermingled with the above, generally trending from SW. to NE. Of these the more noteworthy are the N. Albanian Alps (7530 ft.), crossing from N. Albania into Kossovo, the Shar-Dagh (9800 ft.) and Kara-Dagh (5090 ft.) further S., between 41½° and 42⅚° N., and several short ranges (Titarion, 6160 ft.; Nije-Koshuf Planina, 7270 ft.; Boz-Dagh, 2620 ft.; Kara-Balkan, 6550 ft., &c.) round the Gulf of Salonica and the root of the Chalcidice Penin. Others, but of lower elevation, occur parallel to the Sea of Marmora (Kuru-Dagh, 2380 ft.; and Tekir-Dagh, 3020 ft.). Mount Olympus (4485 ft.) is shared between T. and Greece. With one exception the **rivers** are either torrential, or their channels are choked with sand or mud; the only stream that is navigable is the Maritsa, and that only in its lower course. Besides this river, the Kara-su, Struma (Mesta), and Vardar flow S. or SE. into the Ægean Sea. The Inje Kara-su has a general E. direction into the Gulf of Salonica. Several short streams reach the Adriatic, mostly by W. courses, as the Arta (Arakhthos), Kalamas, Viosa, Semeni, Shkumbi, Arzen, Mat, and Drin. The Lim and the Tara (the frontier stream with Montenegro) go NW. to the Drina, and so to the Danube. The Sitnisa or upper Ibar rises on Shar-Dagh, drains Kossovo, and contributes its waters to the Morava, which also has other head-streams on the Kara-Dagh. These remotest arteries of the Balkan Penin. interpenetrate one another in a most bewildering way, so that the watershed between the Ægean and the Black Sea basins is formed by a very low ridge lying between the Shar-Planina and the Kara-Dagh. T. has several mountain lakes and coast lagoons—of the former, Scutari (in part), Okhrida, Prespa, Svirina, Kastoria, Kotorsko (or Ostrovo), all in Albania; Yania (Yanina) in Epirus; and Doriyan in Macedonia:—of the latter, Terkos, beside the Black Sea; Enos, Yala, Buru, Takhyno, Beshik, Aivasil, Yenizhe, near or alongside the Ægean shores; and Logalu and Tsukaria (N. of Gulf of Arta), Vivari, Avlona (Valona), Kavarsta, Drach (Durazzo), on the Adriatic coast. The **geology** is but imperfectly known. The Albanian Alps, Shar-Dagh, and others of the Albanian high ranges, resemble the sterile, bare, rugged limestone region of the **Karst** (*q.v.*). The Rhodope and Perim-Dagh are principally of Secondary and Tertiary age, with indications of volcanic activity. The Pindus ranges are mostly composed of sandstones of the same periods. T. is on the whole greatly favoured in the matter of **climate.** She is in great part sheltered by the Balkans against the cold NE. winds from Russia, and her valleys and plateaux are open to the sunny south. The mountainous regions have, of course, a rigorous winter, and in summer their confined valleys become heated like furnaces. But the plains and uplands of Macedonia and Thrace are genial and delightful, the intense heat of summer being for the most part tempered by sea-breezes. Nevertheless the neighbourhood of the coast lagoons is considered unhealthy. S. of the Balkans the thermometer seldom falls below 31° F. The winter range is 32° to 48° F., the summer range 71½° to 82½°. Rainfall in Macedonia and Thrace 28 in., but less in the Maritsa valley; in the W. mountains, 40 in. The **products** differ according to elevation and situation. The high plateaux and mountains are in part (*e.g.*, Albania, Rhodope Mts., and Perim-Dagh) covered with forests, chiefly of oak, pine, fir, beech, chestnut, and walnut, and in part supply excellent pasture (especially on the Pindus ranges, the Thracian uplands, and the plateaux of Kossovo), on which large flocks of goats and sheep are fed. The lower hills, the higher valleys, and the uplands yield cereals (wheat, oats, barley, rye, and sesamum), oleaginous plants, fruits (apple, pear, apricot, peach, chestnut, walnut), the vine, and other products of a temperate clime. In the coast and river plains of Thrace, Macedonia, and W. Albania, wheat, barley, rye, maize, tobacco (exported Macedonia), roses, opium, mulberry, cotton (exported Macedonia), fruits (fig, almond, orange, lemon), olive, vine (valley of Inje Kara-su), and madder grow with little trouble. Agriculture is, however, in a deplorably backward condition, chiefly because of fiscal extortion, ill-government, primitive implements, and the ignorance and rooted conservatism of the people. Buffaloes are the ordinary beasts of burden. Wax and honey are collected in large quantities in the more genial dists. T. is believed to be very wealthy in **minerals,** but next to nothing is done to extract them. A little chrome and antimony are exported from Salonica. However, iron, argentiferous lead, copper, manganese, cinnabar, arsenic, sulphur, and lignite are known to exist, chiefly in the Rhodope Mts. and Perim-Dagh, and on the boundaries of Macedonia and Thrace. Coal occurs in the Shar-Dagh. There is but little manufacturing **industry** on the W. European systems. The most important are flour-mills, machine-shops, government tobacco factories, silk, cotton, and wool spinning mills, soap-works, tanneries, and hosiery factories, confined almost entirely to Constantinople, Adrianople, and Salonica. But there are several flourishing native and domestic industries, as the making of laces and trimmings (Salonica, Seres, &c.), gold and silver filigree work (exported Ushkub, also Prizren), and coppersmith's work in Macedonia; coarse cloth at Adrianople; fire-arms in Kossovo (Prishtina, Prizren, Jakova, Ushkub); saddlery and leather goods in Albania (Scutari and Dibra), and at Janina. The principal **means of communication** are roads and railways; but neither are anything like adequate to the needs of the country. Some 800–900 m. of roads, not always passable, connect the chief towns together, *e.g.*, Constantinople and Adrianople; Adrianople and the Ægean coast down the Maritsa valley; Constantinople and Salonica *viâ* Rodosto and the Ægean seaboard; Salonica and Prishtina; Salonica and Monastir, and thence to Drach *viâ* Okhrida; Salonica and Larissa in Greece; Köprülü and Preveza *viâ* Monastir and Yania; Yania and Scutari *viâ* Berat, Elbasan, and Tirana; Scutari and Prizren, and thence to Yenipazar; Yenipazar and Prishtina. The natural difficulties caused by the mountain ranges are overcome by passes, the more important of which are the valley of the Struma (1086 ft., little used), and the route Ushkub-Kumanovo-Köstendil, over a pass of 2238 ft., between Macedonia and W. Bulgaria; the valleys of the Vardar and (Servian) Morava over a pass of 1302 ft.; the plains of Ushkub and Kossovo by the pass of Kachanik (1558 ft.), between the Shar-Dagh and Kara-Dagh; the pass of Radohoja (3496 ft.), connecting Okhrida with the valley of the Shkumbi in Albania; the valley of the Drin, communicating by a pass of 800 ft. between Scutari and Prizren (difficult); and the pass of Metsovon (3757 ft.) in Epirus, over which go the routes connecting Yania with Monastir, and with Trikkala in Greece. T. possesses, moreover, three trunk-lines of railway—one from Constantinople *viâ* Adrianople to the Bulgarian frontier (220 m.), which is connected through Servia and Hungary with the Austrian, German, and French systems. A branch leaves this line at Kulelü-Burgas (22 m. S. Adrianople) and descends the valley of the Maritsa to Dede-Agach (70 m.). The other two lines start from Salonica. One (205 m.) goes up the Vardar valley as far as Ushkub, and thence connects *viâ* Kumanovo and Vranja (in Servia) with the Servian main line at Nish. From Ushkub a branch penetrates NW. into Kossovo as far as Mitrovitsa (75 m.). The other line connects Salonica with Monastir (135 m.) *viâ* Karaferie (Verria) and Vodena. In 1893 a fourth important line was commenced to connect Constantinople (or rather Ferejik, some 18 m. NE. Dede-Agach) with Salonica by way of the Ægean seaboard, branch lines being run down to the larger seaports. In addition to a regular Turkish **post** system, there is also an Austrian service between the principal towns; and in both Constantinople and Salonica special services are maintained by and for certain of the foreign colonies. The **commerce** of the country is concentrated for the most part in Constantinople and Salonica. The seaports of secondary importance are Rodosto on the Sea of Marmora, Gallipoli on the Dardanelles, Dede-Agach (total trade about ¾ million sterling), Porto-Lagos, and Kavala (trade ½–¾ million sterling) on the Ægean, Salakhora and Preveza on the Gulf of Arta, Hagioi Saranta (Santi Quaranta), Avlona, Drach (Durazzo) and San Giovanni di Medua on the Adriatic coast. The aggregate trade of the entire Turkish Empire[1] is put down at 18½–22½ millions sterling for imports, and at 11½–14 millions for exports. In this England shares to the extent of 41–45 per cent. of the imports and 37–45 per cent. of the exports, Austria 19 and 8 per cent., France 12¼ and 29 per cent., and Russia 7½ and 2 per cent. respectively. Constantinople may probably claim one-quarter of the imports and the same proportion of the exports. The principal non-European ports are Trebizond, Samsun, Ismid, Smyrna, Messina, Alexandretta, Beirut, Haifa, the ports

[1] For Turkey in Europe separately no trustworthy estimate exists.

of Crete, Benghazi, Jaffa, Suez, Alexandria, Tripolis, Jeddah, and Busra (see these several articles; also **Egypt**). The imports into European Turkey consist principally of cottons and other textiles, wheat and flour, iron and steel goods, machinery, sugar, petroleum, glass, dyes and drugs, paper, skins, chemicals, rice, coffee, spirits, &c.; and the exports of cereals, fruits, tobacco, silk and silkworm cocoons, wool, skins, wine and raisins, olive-oil, gall-nuts, and carpets. The unit of **money** is the piaster (= 2d.), 100 piasters = 1 lira, 40 para = 1 piaster, and 18½ piasters = 1 silver mejidye. The silver beshlik (= 2½ piasters) and altilik (= 5 piasters) are also in use. The metrical system of **weights and measures** has been employed since 1871, but the former standards are still in use, viz., the oka = 2¾ lbs. avoir.; the kile = ⅞ 1 bushel; and the pik Halebi (Aleppo ell) = 2½ ft. The head of the **government** is the hereditary and absolute sultan or padishah, who is also at the same time the supreme authority in the religious system of Islam, the prevaling creed of the empire. In civil affairs he is assisted by the grand-vizier and by a privy council of ministers, who preside each over some important department of state; and in matters ecclesiastical by the Sheikh-ul-Islam. The **army** of the empire, reorganised by German officers since 1878, comprises on a peace-footing more than 180,000 men. In addition to these, there is a large militia and a corps of gendarmerie. Service is compulsory upon all Mohammedans, three or four years in the active list, with three or two in the reserve; for the militia the term is eight years, and six more in the reserve. Service in the **navy** is compulsory for twelve years in all, including the reserve. The fleet embraces thirty or forty vessels, none of great weight or power, and a small fleet of torpedo boats. The **population** is extremely heterogeneous. The ruling race are the Osmanlis or Ottoman Turks, who probably number nearly 2,000,000 in all. They live chiefly in the large towns. Next to them in point of numbers come the Slavs (nearly 2,000,000), who in Kossovo, Yenipazar, and N. Macedonia are mostly pure Servians, in other parts of Macedonia and in Thrace either Bulgarians or Bulgarised Servians (Gopčević); these people are agriculturists and live-stock breeders. Large number of Greeks (merchants, bankers, statesmen, restaurant-keepers, and so forth) live in the large towns and along the shores of the Ægean. Albania is inhabited by half a million to a million Albanians (Arnauts), who follow pastoral and agricultural pursuits. About 180,000 Zinzars (pastoral Walachians), dwell in the mountains between Macedonia and Epirus. The residue consists of 150,000 Jews, principally settled in Salonica, and 50,000 to 100,000 Gipsies. All the Turks, 370,000 Albanians, and 530,000 Bulgarians and Servians are professors of Islam. The rest of the Slavs, the Greeks, and some 110,000 Albanians are members of the Orthodox Greek Church, under the rule of the patriarch and synod of Constantinople. There are also more than 200,000 Albanian Catholics. The **education** is not of a very high character, despite the fact that all Moslem children above six years of age are obliged to attend school. The Greeks and the Bulgarians maintain numerous schools, frequently of a propagandist type. There are several higher technical and special schools in Constantinople and elsewhere. Most of the large and more important **towns** have been already mentioned. So far as the statistics can be trusted, T. may claim to have one city (the cap., Constantinople) with a population of between one-half to three-quarters of a million inhabitants, one (Salonica) exceeding 125,000, and one (Adrianople) between 50,000 and 100,000; there are twelve others between 10,000 and 50,000. Space will only admit of the merest outline of the **history.** At the period of its widest extent, Turkey in Europe embraced those dists. of the ancient world which were known as Thracia, Macedonia, Epirus, Mœsia, Dacia, and Illyria. The earliest inhabitants S. of the Danube of which we have knowledge were various related tribes of the Aryan stock, as the Thracians, Illyrians, Pelasgi, Leleges, and others. About five hundred years before the birth of Christ the Persian monarch Darius conquered Thrace and Macedonia, but left untouched the uncivilised Illyrian mountaineers on the W. During the first half of the following century the Persian armies traversed these countries more than once in their unsuccessful attempts to subjugate Greece. In the 4th century B.C. Macedonia became, under Philip, and his greater son Alexander, the predominant power N. of Greece; but early in the next century Epirus, under the rule of Pyrrhus, shared the supremacy (on the W. side) of the penin. with the Macedonian king. Philip II. of Macedonia allied himself with Hannibal, the great enemy of Rome (216 B.C.), and eventually (142 B.C.) his kingdom was made a Roman prov. Epirus and Illyria had already fallen under the dominion of Rome in consequence of a war which broke out in 168 B.C. Mœsia, which was originally occupied by Thracian tribes, was invaded and settled by Gauls in the 4th and 3rd centuries, and conquered by Rome in the 1st century B.C. At Philippi, in Macedonia, the republican chiefs of ancient Rome were overthrown by the first of the long line of emperors. Dacia, a Thracian country like Mœsia, was made a Roman prov. early in the 2nd century, but was abandoned by the Emperor Aurelian in the middle of the succeeding century. About the same period the barbarians began to show themselves in this part of the world, by invading Mœsia in 253. On the division of the Roman world in 364, the Balkan Penin. became the centre of the Byzantine or Eastern Empire, Constantinople having been founded some thirty years previously. Shortly afterwards the Goths, who had already established themselves in Mœsia and Dacia, were allowed to settle in Thrace. But already a new enemy had appeared in the terrible Huns, whose king, Attila, ravaged the empire in the middle of the 5th century. Other barbarian invasions followed in quick succession—by the Ostrogoths in the end of the 5th century, by the Huns and Slavs in the middle of the 6th century, by the Avars and Bulgarians in the 7th. In the 7th century, too, the Mohammedan califs first appeared before the walls of Constantinople; and in the 9th came the Varangians (Vikings) from Russia. The Bulgarians, after maintaining their independence for three centuries, submitted to the Eastern emperor in 1017. Thirty years later the Turks—not the Ottomans (Osmanlis), but their predecessors, the Seljuks—invaded the Byzantine Empire for the first time. The second half of the 11th century is marked by the inroads of the Sicilian Normans under Robert Guiscard, and the marches of the Crusaders' armies through the territories of the empire. The power of the Ottoman Turks, who established themselves in Asia Minor in the 13th century, dates from the first half of the 14th century. Before its close they had made themselves masters of the Balkan Penin., though they did not win possession of Constantinople until 1453. In 1828 the Ottoman race began to lose its hold upon the penin., in that Greece succeeded in asserting her independence. Roumania followed suit in 1866, and her example was quickly copied by Servia. The treaty of Berlin in 1878 made Servia definitively independent, put Bosnia and Herzegovina under Austrian rule, enlarged the territory of Montenegro, and made Bulgaria semi-independent. Eastern Roumelia was wrested from the Turks in 1885, and joined to Bulgaria. At the present time the Bulgarians are actively fostering a movement for the ultimate annexation of Macedonia. Map of the Balkan Penin. (1 : 300,000) by the Austrian Military Topographical Institute (1876, onwards). [**J. T. B.**]

Türkisch-Becse, vil., Hungary. See **Becse, Török.**

Turkistan. Much confusion prevails as to what part of the immense terr. of central Asia has to be comprised under this name. It would be in accordance with modern geographical research (*Encyclopædia Britannica,* ninth edition, vol. xxiii., p. 631, *seq.*), to apply the name of **Central Asia** to the immense terr. which lies to the E. of the Caspian Sea and the Ust'-urt plateau, and limited on the N. by the water-parting between the Irtysh and Lake Aral, continued E. by the Great or Ektagh Altai, on the E. by eastern Gobi, and on the S. by the northern border of the Khor plateau (Altyn-tagh and Kuenlun), the Hindu Kush and the Kopet-dagh. This territory would include W. Turkistan, E. Turkistan, Dzungaria, and E. Gobi. Under this view, **West Turkistan** includes an immense trapezoidal depression, 1100 m. long SW. to NE., and 900 m. from NW. to SE., lying at the angle where the High Plateau of E. Asia meets the Iranian plateau, as also the girdle of alpine tracts which fringe the NW. borders of the High Plateau, and in the valleys and along the base of which, bordered by a girdle of fertile loess, the Turkish and partly Iranian populations of Turkistan find a fertile soil, and the water necessary for irrigation. It has the Pamirs in the SE. and the Transcaspian Terr. in the SW., both of these having their own physical features. Most of this terr. belongs to Russia, namely, the Governor-Generalship of Turkistan, the Aral-Caspian slope of the Governor-Generalship of the **Steppes** and the Transcaspian Terr.; while Khiva and Bukhara, with its vassal khanates, are in reality vassal states to Russia. The remainder of the terr. is occupied by khanates vassal to Afghanistan, and by the Chinese prov. of Kulja. **East Turkistan** appears under this view as the depression in the high plateau which has the high eastern (unnamed) border-range of the Pamirs on the W., eastern Tian Shan on the N., the western Gobi on the E., and the border-ridges of the Tibet plateau (Kuenlun and Altyn-tagh) on the S. Finally the name of Dzungaria must be applied to the terr., limited by the Tarbagatai, Altai-nauru, Irdyn-ula, and Artsa-bogdo Mts., and opening NW. to the plains and lowlands of the Kirghiz Steppe.

West Turkistan, taken in the above limits, covers nearly 1,680,000 sq. m., and has a population of nearly 8,500,000. **Surface.**—It is sharply divided into two parts: the **highland region,** which covers an area nearly 1000 m. long from SW. to NE., and nearly 270 m. wide. It is bordered by the Hindu Kush, which runs SW. to NE. from at least the latitude of Kabul to Tash-kurgan (37° 45′ N., 75° 0′ E.); the plateaux of the Pamirs, bordered by the Trans-Alai Mts. on the NW., and attaining 23,000 ft. in Kaufmann Peak; and the Chinghiz-tau Mts. on the NE. It includes the broad Alai valley which lies at (northern) slope of the Trans-Alai, and is fringed on the N. by the Alai-tagh; and a girdle, 150–180 m. in width, of Alpine tracts flanking the Pamirs on the NW., consisting of shorter chains of mountains, reaching 11,000 to 20,000 ft., snow clad, feeding large glaciers, and separated from each other by deep valleys, which may be described as the **Tian Shan** Highlands. Most of these chains run SW. to NE., or WSW. to ENE., but several chains and upheavals of more recent origin cross them in a nearly perpendicular direction, and project from the Alpine belt towards the NW. (Nura-tau, Kara-tau, Chu-and-Ili Mts., Tarbagatai and Chingiz-tau). A series of depressions—Balkh, Fergana, Issyk-kul, and Kulja—appear in the Alpine belt, following each other in a NE. direction. The **plains** of West T. cover nearly 650,000 sq. m., and consist of two terraces: the 1000 to 1500 ft. high plains, and the lowlands which skirt them on the NW., and are only 400 to 150 ft. high, or sink below the level of the sea. These plains may be divided in another way into two sections—those of Lake Balkhash and Ala-kul, over 1000 ft. of altitude, and the much lower plains and deserts of the Aral-Caspian depression, which mostly have been submerged during Post-Pliocene times. The whole of the plains' region is rapidly desiccating, and the rapidity of desiccation is especially marked in the Aral-Caspian region. **Geology.**—The highlands of West T. are built up of granites, syenites, and porphyries, covered with Azoic gneisses and metamorphic slates. The chief valleys have been excavated during the Silurian, Devonian, Carboniferous, and Permian periods, when the plateaux were surrounded by the sea, whose deposits now fringe the plateaux. Jurassic, Cretaceous, and Tertiary deposits fill the lower parts of these valleys. Towards the end of the Tertiary period a vast sea covered the lowlands, and during the Post-Pliocene period it broke up into several parts. The Aral-Caspian depression remained under the sea during the Quaternary period, and its deposits are now found 200 m. N. and 90 m. E. of Lake Aral, till finally it broke up into a series of separate lakes, now rapidly desiccating. The **climate** of West T. is very severe, January being as cold as in S. Norway, and the summer as hot as in Persia. Snow falls over the lowlands of the Syr for several months, and for two months at Tashkend. The average temperatures are as follows:—

	Latitude.	Altitude.	Average Temp.			Rain in Inches.
			Year.	Jan.	July.	
		Feet.				
Akmolinsk . .	51° 12′	1020	29°	0°	69°	9.2
Semipalatinsk .	50° 24′	590	27°	−1°	72°	7.7
Kazala . . .	45° 45′	160	45°	11°	78°	6.1
Kulja . . .	43° 51′	2100	49°	14°	76°	...
Nukus . . .	42° 27′	215	53°	19°	80°	2.9
Tashkend . .	41° 19′	1480	58°	29°	77°	11.3
Krasnovodsk .	40° 00′	−70	60°	36°	83°	...

The **population** of West T. is very mixed. The Ural-Altaians, or Turanians, are the dominant element [**Russia**], and consist of Turcomans in the Transcaspian region, Bukharians, Kirghizes, Uzbegs, and Sarts. The Kara-kalpaks (about 50,000 in West T.) have mostly been driven out to the Steppes of Astrakhan. The **Kirghizes** (K. Kazaks, Kara-K., and Burutes) occupy the Steppes. The Turco-Tatar Uzbegs, who speak a pure Jagatai dialect, but are mixed with Persians, as well as the Kirghizes and the Mongols, lead a semi-nomadic life—those of them who live in towns being known as Sarts, and containing a great admixture of Persian blood; while those Sarts who were settled in the Kulja region are better known as Taranchi. Some 20,000 Dzungans live in the Ili valley. The Mongolian branch is represented by Kalmuks and Turguts in the NE. and Kulja. The Aryans are represented by the Tajiks (Tajak), who are Sunnite Mussulmans, live in towns, and form the intellectual element in the country. The Russians (apart from the military) number about 90,000, and consist of Cossacks and of a number of lately immigrated peasants. **Agriculture** is the general occupation of the settled population. Wheat, barley, millet, peas, lentils, rice, sorghum, and lucerne are the chief crops; rye and oats in the N. The loess forms a fertile soil, and the fields are well irrigated. Cotton, especially American, has lately been largely grown for export, and over 1,000,000 cwt. of raw cotton is exported every year. The kitchen and fruit gardens of the Mussulmans are admirably kept. Sericulture chiefly in Fergana. Cattle-breeding is extensively carried on, especially by the Kirghizes. Cattle and its produce is largely exported. West T. possesses a considerable **mineral wealth**: silver, lead, and iron ores are known, but are not worked on account of want of fuel. Several inferior coal-beds are known. There are many salt lakes, but salt is imported. **Industry,** carried on by means of machinery, is limited to a few factories for dressing raw cotton, and a few distilleries; but a great variety of industries are carried on as domestic trades. There is an active export trade in raw cotton and silk, especially at Tashkend and Bukhara, and in cattle and their produce, in the Steppes manufactured goods being imported. Some trade is also carried on with China. For the **cities** see the different above-mentioned subdivisions.

Turkistan, Eastern, called also **Chinese Turkistan,** and formerly **Kashgaria,** is a shallow depression (4500–2500 ft.) of the high lands of central Asia, occupied for the most part by the basin of the riv. Tarim, which flows into Lob-nor (*q.v.*), and by the W. portion of the great desert of Gobi (*q.v.*). It is surrounded by the Kuenlun, Altyn-tagh, and Nan Shan Mts. on the S., by the Pamir plateau on the W., and by the Tian Shan Mts. on the N. Between Kashmír and E. T. the passes range at alts. of 9000 to 18,500 ft.; S. of Lob-nor, in the Altyn-tagh, at 12,000 to 17,000 ft.; and at 7000 to 15,000 ft. up into the Pamir plateau. Besides Lob-nor, there are in E. T. the lakes of Sary-kamish, Bagrach-kul (into which drains the Khaidugol), Shar-nor, and Khua-khaisy. The climate is extremely cold in winter (Jan. mean temp., 17.6° F.), and intensely hot (July mean temp., 82.4° F.), accompanied by blinding dust-storms, in summer. The whole of this region is almost rainless (8 in.), and consequently all but a small portion of the surface is a vast desert, with only oases fed by river water at the base of the mountains, these oases being larger and closer together in the W. than in the E., where they are generally separated from one another by 15 or 20 m. of desert. Poplars, tamarinds, willows, roses, and the mountain ash are the principal varieties of flora. There are excellent pasture-grounds in the mountains, where the people feed their sheep, yaks, buffaloes, camels, horses, and asses. The fauna embraces the wild horse, ass, ox, camel, and sheep, the tiger, panther, lynx, wolf, fox, wild boar, deer, antelopes, hare, swans, and wild fowl. The oases are fertile, and produce wheat, barley, maize, millet, rice, cotton, flax, hemp, opium, fruits (including grapes, olives, figs), melons and pumpkins, and silk. Jade and gold are the principal minerals—jade, in the form of nephrite, occurring largely in the gorges of the Yarkand valley in the Pamirs; gold chiefly on the N. slopes of the Kuenlun [**Surgak**]. Coal, copper, lead, alum, and salt occur between Ak-su and Turfan in the N., the first and last being extracted. Iron occurs in the Kuenlun Mts. One of the two great historical routes between China and W. Asia traverse E. T., that namely on the S. side of the Tian Shan Mts. (the Tian Shan-Nanlu route), entering Russian terr. by the Terek-Davan Pass (12,500 ft.), W. of Kashgar. Other routes cross the Kuenlun Mts. into Kashmír (passes already alluded to). The manufacturing industry is confined to coarse cottons, felts, carpets, bricks, and paper. The silk industry of Yarkand is almost extinct. Trade is carried on principally with Russian Fergana and with India. The population are (Persian) Tajiks in the Pamir valleys, Mongols (Kalmucks) in the E., and Turks in other parts; but the Turks are far from being of pure blood. Islam has been the predominant religion since the 10th century, when it supplanted Buddhism. Turkish is the prevailing language. Chief towns, Turfan (cap.), Khami, Barkul, Pichan, Urumtsi, Karashar, Kurla, Kucha, Ak-su, Kashgar, Yarkand, Khotan, Cherchen, Sachou, and Ngansi-chou (An-si). E. T. is the original home of the Turkish Hiung-nu or Huns. China ruled the country from the 2nd century B.C. down to the 13th century A.D., when it was subdued by the Mongols. In 1757 the Chinese secured a fresh hold upon this region, and have maintained it down to the present time, though from 1864 to 1877 Yakub Beg ruled strongly at Kashgar. Total P. 6-900,000.

Turkistan, Governor-Generalship of, terr. of the Russian Empire, in central Asia, consists of the following subdivisions:—

Provinces.	Area E. sq. m.	Pop. (1890).	Density per sq. m.
Semiryechensk . .	152,280	671,878	4
Syr-dariinsk . .	194,853	1,214,300	6
Samarkand . . .	26,627	750,000	28
Fergana . . .	35,654	775,600	22
Total . .	409,414	3,411,778	8

Turks, a generic name applied to several tribes and races of people in Asia and Europe, who all agree in speaking dialects of the Turkish language, and are in great part members of the Turkish division of the Ural-Altaic family. The principal divisions or tribes included under the name are: the Yakuts, in the extreme NE. of Siberia; the Tatars, on the frontiers of E. Siberia, W. Siberia, and Mongolia, in E. or Chinese Turkistan, in E. and S. Russia, and in the Caucasus; the Kirghiz and Uzbegs, in central Asia; the Bashkirs in E. Russia; the Turcomans, in Russian Turkistan and Persia; and the Osmanli Turks, in Turkey in Europe and Asia Minor. The majority are Mohammedans. See the several articles.

Turks Islands, the most SE. of the Bahamas, W. Indies, in the Atlantic Ocean; there are but two islands, Grand Turk (7 sq. m., P. 2500) and Salt Cay (2½ sq. m., P. 700); latitude of lighthouse on Grand Turk I. 21° 31′ N., long. 71° 8′ W. Chief products, salt, fish, and tortoises; annexed to the colony of Jamaica in 1874. There are no wharves or quays. Vessels, which lie outside the reef, are loaded and discharged by lighters. See **Caicos Islands.**

Tus, or **Tuz,** site of ruins, Persia, 14 m. NNW. Meshed. It was the cap. of Khorassan, and one of the most celebrated towns in the East. Here Harun-al-Rashid died in 809, and Firdusi, the Persian poet, was born (940) and died (1020).

Tusa, tn., Sicily, prov. Messina, 7 m. WNW. Mistretta. P. 5400.

Tusapan, dist., Mexico, state Vera Cruz, 31 m. W. Papantla, 110 m. NE. Mexico, with remains of native architecture.

Tusaun, vil., Switzd. See **Thusis.**

Tuscaloosa, city, U.S., Alabama, T. co., on the l. bk. of the Black Warrior R., at the head of steamboat navigation, 50 m. WSW. of Birmingham. The cap. of Alabama from 1826 to 1847. Seat of university, established 1831. Alt. 181 ft. (R.R.). P. <5000.

Tuscan Springs, springs, U.S., California, in a small valley of the Sierra Nevada, Tehama co., 7 m. E. of Red Bluff; much valued on account of their curative properties.

Tuscany, Italian **Toscana,** the ancient *Etruria*, a former gd.-duchy of Italy, annexed in 1860 to the kingdom of Sardinia, and now forming a div. (*compartimento territoriale*) of the kingdom of Italy. It is composed (1) of a terr., W. of the main ridge of the Apennines, 120 m. long N. to S., stretching from about 44° 0′ N. (near the mouth of the Gulf of Spezia) to about 42° 20′ N. (penin. of Monte Argentario), with a width of 70–100 m., divided into the four maritime provs. of Lucca, Pisa, Leghorn, and Grosseto, and the three inland provs. of Florence, Arezzo, and Siena; (2) a tongue projecting northwards to about 44½° N., between Liguria and the Apennines, till 1860 a part of the duchy of Modena, now forming the prov. of Massa e Carrara; and (3) of the islands of Elba, Pianosa, Montecristo, all belonging to prov. Leghorn, and Giglio belonging to prov. Grosseto. The greater part of the surface is mountainous [**Apennines, B.**], or at least hilly, the only considerable inland plains being that stretching about 20 m. NW. from Florence to Pistoja, and that of the Val di Chiana stretching about the same distance S. from Arezzo to Lake Trasimeno; the principal coast plains that of Pisa, at the mouths of the Arno and Serchio, and that of Grosseto, at the mouth of the Ombrone. The principal mountains detached from the main chain of the Apennines are Mount Amiata (5655 ft.), a trachytic mass in the S., on borders of provs. Grosseto and Siena; Le Cornate (3475 ft.), on borders of provs. Grosseto and Pisa; and the Apuan Alps (6385 ft.), in prov. Massa e Carrara, separated from the main chain of the Apennines chiefly by the narrow valley of the upper Serchio. The principal rivers are the Arno, Cecina, Ombrone, and Serchio, the former receiving nearly all the streams from the S. slope of the Apennines, and flowing to the Mediterranean. The Tiber rises in the E. of T. The canal of Chiana unites the riv. Tiber with the Arno. T. has no lakes of any extent, but numerous pools and extensive marshes. The climate is mild and salubrious [**Florence, Leghorn, Siena**], except in the **Maremma,** a marshy dist., extending along the S. ct., and covering nearly one-sixth part of its superficies, the malaria from which produces pestilential fevers, on which account it is in places nearly deserted. The area in which malaria is at its worst (in which the mortality due to this cause exceeded on the average of the three years 1890–92, 8 per 1000) is a comparatively small dist. round Grosseto, at the mouth of the Ombrone, and here important amelioration works have been carried out under the direction of the state over an area of 17,000 ac., to embrace, when completed, an area of about 25,000 ac., and expected to benefit an area 20–30 times as great. The once notoriously unhealthy area of the Val di Chiana (*q.v.*) has now been completely reclaimed. The principal cereals are wheat and maize, the former occupying about three times the area of the latter. The cultivation of the vine is rapidly extending as in other parts of Italy, now occupying an area nearly twice as great as that so occupied on the average of the five years 1870–74. The wine produced is generally of inferior quality, but the Chianti and Montepulciano wines have a high reputation. The culture of oil is prosecuted with great care, and Lucca and Florence oil are celebrated. Tobacco is largely cultivated in provs. Arezzo and Siena (Val di Chiana), and raw silk is produced in considerable quantity in those of Lucca, Florence, Arezzo, and Siena. Mules and sheep are of superior breeds, and herds of cattle are pastured in the drained portions of the Maremma. Shipbuilding is carried on at Leghorn, the chief seaport. T. is celebrated for its mineral riches, and the number of its mineral and thermal springs. The chief mineral products are iron ore, mercury, boracic acid, copper, and salt, besides the famous statuary marbles of the Apuan Alps (Carrara and Massa). Iron ore is chiefly obtained from the island of Elba, where nearly 200,000 tons of excellent hematite are annually produced from mines dotted over the E. and SE. ct. Mercury is produced in prov. Grosseto from Cretaceous or Eocene deposits resting on the slopes of Mount Amiata. Boracic acid is produced round Le Cornate in the comms. of Castelnuovo, Val di Cecina, and Pomerance (prov. Pisa), and Massa Marittima and Montieri (prov. Grosseto). Copper is mainly mined in the same dists., and salt is largely extracted from brine in the comm. of Volterra (prov. Pisa). Among other minerals may be mentioned lignite, the chief deposits of which are in prov. Arezzo (about midway between Florence and the town of Arezzo), and in the NW. of prov. Grosseto. Alabaster is produced near Volterra and elsewhere in prov. Pisa. There are frequented watering-places at Montecatini (near frontier of prov. Lucca, E. of the town of Lucca), and at Lucca itself. The principal manufactures are silks, in which T. maintains its celebrity. Florence is the principal seat of the silk manufactures. There are silk-works also at Siena, Pistoja, and Prato. The making of straw hats has greatly declined, although still important, especially in the vicinity of Florence, where great numbers of the peasantry are employed in preparing the straw. They have long formed an extensive article of export, especially to England and the United States. Florence, Prato, Pistoja, Pisa, and Leghorn are the principal centres of this manufacture. The other branches of industry comprise the manufacture of glass and crystal, articles in marble, alabaster, iron, brass, porcelain, coral, and wax; of linen, cotton, and cutlery; printing and tanning. It was in T. that the art of painting was revived in the Middle Ages—artists then studied not in the academy, but in the workshop; the goldsmith's craft was the chief school. Pisa, Siena, and Florence are the seats of universities. See **Italy,** table, &c.

Tuscarawas, co., U.S., Ohio, in the E., crossed by 40½° N. and 81½° W.

Tuscarawas, riv., U.S., Ohio, in the E., rises in the NE., in Summit co., and flows S. then SW. and S. to Zanesville, where it unites with the Licking to form the Muskingum R.

Tuticorin, municip., Brit. India, Madras, on the Gulf of Manar, dist. and 35 m. E. by N. Tinnevelli; formerly important, stands second in Madras Presidency in value of its foreign trade. Shank or conch shells are found along the coast; the fishery is under government management. The pearl fishery has been abandoned. The harbour is well sheltered; depth at entrance to and in port at ordinary springs, high water 14 ft., low water 12 ft. P. 25,100; Hindus, 14,900; Christians, 7600.

Tutiula, isl., S. Pacific, Samoan group, crossed by 170° 45′ W., 14° 20′ S.; contains on its S. ct. the admirable harbour of Pango-pango.

Tutnall and Cobley, par., Eng., Worcestershire, on border of the Droitwich and E. divs., 2 m. E. Bromsgrove. P. <750.

Tutoko, Mount, New Zealand, South I., near Martin's Bay. Alt. 8000 ft.

Tutotepec, maritime vil., Mexico, state of and 90 m. SW. Oaxaca, near Lake Chacahua; before the arrival of the Spaniards a populous town, where a celebrated fair was held.

Tutoya, vil. and port, Brazil, Maranhão, near the coast, in 42° 17′ W., 136 m. E. by S. Maranham.

Tutrakan, or **Turtukal,** fortified tn., Bulgaria, prov. Rustchuk, on the Danube, 32 m. W. by S. Silistria; has fisheries and trade in cereals. P. 7900.

Tutshill, vil., Eng., Gloucestershire, PMT.O. See **Tidenham.**

Tuttington, par., Eng., Norfolk, N. div., 9½ m. S. Crome, 2 m. W. by S. Felmingham stn., P.O. P.<250.

Tuttlingen, tn., Ger., kgd. Würtemberg, Black Forest circle, 39 m. S. by W. Tübingen; manufactures cutlery, shoe-makers' tools, surgical instruments, &c. Alt. 2110 ft. P. (1818) 4300; (1890) 9800.

Tutuila, or **Pago-pago,** isl., Pacific Ocean, in 14° 19′ N., 170° 37′ W.; surface mountainous. Matafoa is a peak with an alt. of 2327 ft. The harbour Pago-pago nearly divides it into two penins. Length, 11 m.; area, 15 sq. m.

Tutuquen, tn., Chile, prov. Curicó. P.<2000.

Tütz, tn., Prussia, in the SW. of prov. W. Prussia, circle Deutsch Krone, 75 m. W. Bromberg. P. (comm.)<3000.

Tutzing, vil., Ger., kgd. Bavaria, govt. Upper Bavaria, on the W. side of the Würm-See (lake), circle and 21 m. SW. Munich. P.<2000.

Tuvutha, isl., in Lau group, Fiji Is., S. of Exploring Is., in 17° 40′ S., 178° 48′ W.

Tuxford, par. and market-tn., Eng., Nottinghamshire, Bassetlaw div., 11 m. SE. by E. Worksop, on the G. N. R.; has a free grammar-school; trade in hops grown in the neighbourhood. PMT.O. Market-day, M. P.<1000.

Tuxpan, vil. and port, Mexico, Vera Cruz, on the E. ct., 155 m. NE. Mexico, in 18° 55′ N.; communicating with the sea by the dangerous bar of Cabellos Blancos. It is proposed to connect T. with Tampico by a navigation canal fed by Lake Tamiahua and other coast marshes. Near T. are petroleum wells. Rfall. (5 yrs.), 57 in. P. (comm.) 6800.

Tuxtla, or **Tuxtla Gutierrez,** tn., Mexico, Chiapas, 44 m. WSW. San Cristobal. P. 7000.

Tuxtla San Andrés, comm., Mexico, state of and 90 m. SE. Vera Cruz. P. 13,000.

Tuxtla Santiago, comm., Mexico, a few miles NW. of Tuxtla San Andrés, Vera Cruz. P. 11,000.

Tuy, tn., Spain, prov. Pontevedra, cap. dist. T., on the Miño, 14 m. S. by E. Vigo. Suffragan bishopric of Santiago; has a cathedral, and manufactures of celebrated preserves. Climate delightful; 6 m. above the town are mineral springs. P. (comm.) 11,300.

Tuyenkwan, tn., Tongking, on r. bk. Tsino-ho, 70 m. NW. Hanoi, cap. of prov. of same name.

Tuyün-fu, tn., China, Kweichou, 50 m. ESE. Kweiyang-fu.

Tuz Göl (or **Chöllü**), 'salt lake,' the ancient *Palus Tattæus*, large salt lake, Asia Minor, pash. Karaman, its centre being in 38° 40′ N., 33° 30′ E. It receives some small rivers, but even in winter it is shallow, and in summer the water evaporates until almost completely dried up. Its E. banks are inhabited by settled Turkomans, its W. by predatory Kurds. Length, 45 m.; breadth varies to 16 m.; area about 695 sq. m.; alt. 2525 ft.

Tuzla, tn., Cyprus. See **Larnaca.**

Tuzla, Dolnja, tn., Bosnia, cap. prov. D. T. (very mountainous; area, 3470 sq. m.), 49 m. N. by E. Sarajevo. Alt. 909 ft. Mean temp., yr. 48.3° F., Jan. 28.1°, July 68.0°. P. 7200. **Tuzla, Gornje,** vil., 5 m. E. by N.

Tuzör (French spelling **Touzeur**), the ancient *Thusurus*, tn. and oasis, Tunis, near the N. shore of the Shot el Jerid, 160 m. SW. Kairwan.

Tvedestrand, tn., Norway, prov. Nedenäs, on the S. ct., 15 m. NE. Arndal. P.<2000.

Tver, govt., central Russia, on the upper Volga, has Pskov and Novgorod on W. and N., Yaroslavl and Vladimir on E., Moscow and Smolensk on S.; occupies the S. slope of the Valdai Hills, which is a plateau 800–1000 ft. high, dotted with lakes, much cut by ravines, and therefore of hilly aspect. The Volga, W. Düna, and Msta take origin in its highest north-western part. Rocks, Silurian, Devonian, and Carboniferous, thickly covered with boulder-clay. Watered by upper Volga and its several navigable tribs., the Msta, which flows into Lake Ilmeñ, and the upper course of W. Dvina, all connected together by canals, along which an active navigation is carried on. Climate wet and severe, the average temps. at Tver being, yr. 41.5° F., Jan. 11°, July 67°. Forests cover about 800,000 ac. Population Great Russians, with some 110,000 Karelians. Agriculture insufficient for population, rye being imported, while barley and oats are exported. Manufactures rapidly increasing—cotton, leather, spirits, and flour being their chief products, and Tver occupying the seventh rank among the govts. of European Russia for its manufactures (£2,500,000). Considerable development of village industries—boots, leather goods, all sorts of wooden goods, boat-building, nails, locks, various hardware, agricultural implements, felt goods, weaving, lace making, &c. Divided into twelve dists.: Tver, Byezhetsk, Kalyazin, Kashin, Korcheva, Ostashkov, Rzhev, Staritsa, Torzhok, Vesiegonsk, Vyshniy Volochok, and Zubtsov. Area, 25,225 sq. m. P. (1872) 1,567,300; (1890) 1,791,000.

Tver, cap. of above govt., is an old town situated 102 m. by rail NW. of Moscow, on both banks of Volga (the two parts connected by a floating bridge), at its junction with Tvertsa, which enters into the Vyshnevolotsk system of canals. Old imperial palace. Cotton-mills; nail-making and hosiery as domestic trades; considerable traffic by rail and water, and brisk commerce. P. (1872) 41,600; (1891) 41,700.

Tving, vil., Sweden, prov. Blekinge, 11 m. NNW. Karlskrona. The outer and inner harbours are both deep enough for the largest vessels. P. (comm.)<5000.

Twaft, P.O., Scot., Orkney Is., 3 m. from Birsay.

Twal, principal port of Kei Is., Malay Archipelago, an important commercial centre.

Twambrooks, vil., Cheshire. See **Witton with Twambrooks.**

Twan-te, tn., Lower Burma, dist. Hanthawadi, 13 m. WSW. Rangoon, with which town it is connected by a canal; noted for earthenware jars. In the neighbourhood is Shwe San-daw pagoda, greatly venerated by the Talaings. P.<5000.

Twat, group of oases, W. Sahara, S. of Algeria. The name is sometimes applied collectively to the whole group of oases in the Sahara S. of prov. Oran, but more frequently in a more restricted sense to those in the valley of the Wed Messaud or Wed Saura, S. of those of Gurara, and W. of those of Tidikelt, in about 26° 40′–28° 30′ N. and 0° 30′ E., in a depression or basin extending N. to S., enclosed by large dunes. There is abundance of subterranean water, which filters through the earth on the S. slope of the Atlas Mts. Country very fertile and rich in productions, chiefly dates; also barley, wheat, sorghum, cotton, henna, tobacco, and hemp. T. comprises a number of separate dists., each including several distinct towns or villages. The most important centres are Adrar, Tamentit, Timadanin, &c.

Twatt, P.O., Scot., Orkney Is., Harray and Birsay par., 11 m. N. Stromness.

Twatutla, China, Formosa. See **Tamsui,** riv.

Twechar, vil., Scot., Dumbartonshire, on the Forth and Clyde Canal, 2 m. SW. Kilsyth. P.<1000.

Tweed, vil., Canada, Ontario, Hastings co., on the riv. Moira and a railway, 46 m. WNW. Kingston. P.<1500.

Tweed, riv. of Scot. and Eng., which drains almost all the E. portion of the Scottish Lowlands. It rises at Tweedshaws, S. extremity of Peeblesshire, 1500 ft. above the sea, flows NE. and E. through the cos. Peebles, Selkirk, and Roxburgh, then between Berwickshire on the N. and the English co. Northumberland on the S., and finally enters the North Sea at Berwick after a course of 96 m., in which it traverses a basin estimated at 1870 sq. m., or larger than that of any other Scottish river except the Tay. Principal affluents, the Yarrow, Ettrick, Teviot, and Till from the S.; Biggar, Eddleston, Gala, Leader, and Adder from the N. Before reaching Peebles it has completed 1000 ft. of descent, and in the remaining part of its course it has generally a very gentle current. It is tidal to Norham Castle, 10 m. from the sea, but navigable only in its last 6 m. for boats of 30 tons burden, and the traffic on its waters is mostly confined to Berwick. The Tweed and Clyde take their origin in the same mountain range. The Biggar, an affluent of the Tweed, is separated from the Clyde by a level boggy tract only 6 m. across; they could be easily connected by a canal. The salmon fisheries of the Tweed were formerly of more value than at present.

Tweeddale, old name of Peeblesshire, Scot.

Tweed Heads, tp., New South Wales, Rous co., on Tweed R., 427 m. N. Sydney by road and rail. P.<1500.

Tweedmouth, par., Eng., Northumberland, at the mouth of the Tweed, div. and 1 m. S. Berwick-upon-Tweed, on the NE. R., opposite Berwick, of which it forms a suburb connected by a stone bridge; has salmon fishery, and manufactures of steam-engines, mill machinery, sailcloth, &c. P.<5000.

Tyne, riv., Eng., co. Northumberland, the W. and S. parts of which it drains, is formed by the junction of South and North T. at Hexham, whence it flows E. to the North Sea. From Wylam it forms the boundary between Northumberland and Durham. The **South Tyne** springs from the slopes of Cross Fell. It rises in the series of rocks denominated (by Phillips) 'Yoredale' rocks, flows N. to the great 90-fathom dyke, then E. along the depression to the junction with the North T. The stream is rich with border associations; castles and peel-houses (ancient fortified cattle retreats) crowd the landscape, and several interesting villages are on the line of the water-course. Willimonstwick Castle is the birthplace of Ridley. Near Bardon mill is *Borcovicus*, a splendid Roman station, and much of the Roman wall. At Hexham are Roman, Saxon, and monastic remains. The tribs. should be explored for the picturesque and rich historical associations. The **North Tyne** is darker, swifter, bolder. It rises on the border line a little beyond Keilder Castle, in the Scar-limestone series of the Carboniferous formation; it traverses the coal-beds of the Plashetts dist., crosses the great Whin Sill below Wark, and then traverses a portion of Yoredale rocks to the junction; the valley is one of the most attractive spots in N. of England. Near to Keilder the red deer last roamed wild in England. The trib. Reed rises from the flanks of Carter Fell, passes two important Roman stations, the battlefield of Otterburn, and is twice crossed by the Roman road, the Watling Street. Wark is the centre of one of the greatest baronies in the kingdom. Chollerfod is a good centre for exploration. Great beauty here; the river also crosses the line of the Roman wall, and here is a bridge hoary with seventeen centuries. On Warden Hill is an ancient British fortification. After the junction the river passes through the Millstone Grit series, till, at Stocksfield, it cuts through the lower parts of the coal-measures, over which it flows for 20 m. to Tynemouth, near the junction of the coal-measures and the Permian rocks. The places of interest from Hexham to Newcastle are—Dilston Hall and the Devil's Water; Beaufront, Sandhoe, and Aydon Castle, near Corbridge; Prudhoe Castle, and opposite Ovingham, a place of rare beauty; Wylam, the birthplace of George Stephenson; Ryton and Blaydon, where the navigation begins; and hence furnaces, foundries, and factories line both sides of the river to Tynemouth. At Scotswood are a railway and suspension bridges; these are close to Newcastle. Besides Newcastle and Gateshead, there are on the T. the two important towns of North and South Shields, one at each side of the mouth of the river. The so-called port of Newcastle extends from Sparhawke (a rock in the sea) 17 m. to Heddon; over this distance the tide flows. In 1850 the corporation of Newcastle obtained an Act of Parliament to transfer to commissioners the conservation and management of the river and port. 'The Tyne Improvement Commissioners' consist of four for life, and fourteen elected annually—six by the town council of Newcastle, two do. Gateshead, three do. North Shields, three do. South Shields. The four for life are ultimately to be two, nominated by the Admiralty. (For the statistics of shipping of the **Tyne Ports,** see **Appendix,** p. 13.) Length of the T. to Hexham 35 m., to head of North T. 80 m. Drains 1100 sq. m. The railway runs parallel to T. and South T. from the mouth to Haltwhistle. Salmon fishery has decreased of late years. The Derwent is a trib. of some magnitude, and joins the T. just below Blaydon. See **Shields, South.**

Tyne, small riv., Scot. See **Haddingtonshire.**

Tyne Dock, stn., Eng., Durham, on the NE. R., in the parl. bor. of South Shields.

Tynehead, P.O., Scot., Midlothian, on Tyne Water, 6 m. SE. Dalkeith, on the N. B. R.

Tynemouth (tīn′mŭth; tīne′mŭth is an incorrect modern pronunciation), parl. bor., mun. bor. (reincorporated 1849), seapt., and market-tn., Eng., Northumberland, 8 m. ENE. and in the diocese of Newcastle, on a promontory at the mouth of the Tyne, l. bk., with a stn. on a branch of the NE. R. Many of the recent streets and terraces are well built; a pier half a mile in length protects the harbour. The sands are about a mile long, and overlooked by picturesque cliffs. The only antiquities are the gateway of a castle (11th century), and the ruins of an ancient priory (7th century) and its church (11th–14th century). The chief public buildings are the Assembly Rooms and the Aquarium, the bor. municipal buildings being in North Shields, which is one of the five townships composing the mun. bor. Cullercoats is another, joined to T. by the Grand Parade. A public park (at North Shields) was opened in 1885. Shipbuilding is carried on, and there are rope and sail works, besides important fisheries, the town employing steam and sailing boats. £81,000 was recently spent in improving the fish-quays. In Saxon times T. was a noted burial-place for princes and bishops. In modern days it is the chief watering-place of Northumberland. Market-day, S. Parl. and mun. bor. P. (1801)<4000; (1851) 29,200; (1871) 38,900; (1891) 46,600.

Tyrone, inland co., Ire., in the middle of prov. Ulster, divided into eight baronies, as shown in the following table:—

Baronies.	Acres.	P. 1891.
Clogher	97,569	18,827
Dungannon, Lower	42,795	9,841
Dungannon, Middle	87,771	33,560
Dungannon, Upper	85,996	23,366
Omagh, East	132,539	29,276
Omagh, West	93,322	13,653
Strabane, Lower	117,669	26,768
Strabane, Upper	121,282	16,110
Total	778,943[1]	171,401

[1] Exclusive of 27,714 ac. under the larger rivers and lakes.

It is chiefly watered by the Mourne, which flows N. to join the Foyle and its affluents, with a portion in the basin of the Blackwater, which flows E. to Lough Neagh, towards which it is flat, though in other parts hilly, and often picturesque, rising to mountainous ranges in N. and S. The Sperrin Mts., in NE., have Sawell (2240 ft.) and Meenard (2061 ft.). N. of Omagh is a smaller range (1780 ft.), and S. of Clogher, on the Monaghan border, a range rising to 1265 ft. The geological formations are, in N., mica slate, with a mixture of primary limestone; in centre, Old Red Sandstone; in NW., yellow sandstone, which is also found SW. on the Fermanagh border. The coal-measures of this county, 6 m. long, between Lough Neagh and Dungannon, show many faults in the strata; chiefly worked at Dungannon, Annagher, Coal Island, Derry. Fire-clay is worked at Dungannon. The only tillage is in the lower dists.; but the hill farms are noted for pasturage. T. has a larger percentage of area under cultivation than any other Irish county, except only Down and Tipperary. The amount of flax is important. See table of agricultural statistics, **Appendix,** pp. 10–12. Communications: G. N. R., Lough Neagh and Ulster Canal; both the Foyle and Blackwater are navigable for boats. Manufactures linens and coarse woollens, earthenware, soap, &c.; some breweries and distilleries, flour and oat-meal mills. The name of Tyrone is for *Tyr Eogain* ('the Land of Owen'), Eogain being that son of Niel of the Nine Hostages from whom were descended the O'Niels, one of whom was created Earl of Tyrone by Henry VIII. This county at the Revolution was held by the forces of James II. The antiquities include three cromlechs, many raths, some ruined castles, &c. Clogher gives name to a see both in the Protestant Episcopal and Roman Catholic churches. The chief towns are Strabane, Omagh (the county town), Dungannon, and Cookstown. The county returns four members to Parliament. It is in the dioceses of Armagh, Derry, and Clogher. Parl. divs. P., **North T.,** 42,400; **Mid T.,** 43,400; **East T.,** 44,800; **South T.,** 40,800.

Tyrone, bor., U.S., Pennsylvania, Blair co., 76 m. WNW. Harrisburg, and 14 m. NE. by N. Altoona; shipping station for produce of surrounding dist. P. <5000.

Tyrrel, or **Tyrrell,** lake, Victoria, co. Karkarooc, receives surplus waters of the Avoca, crossed by 35° 20′ S. and 142° 50′ E. Area about 67 sq. m.

Tyrrell, co., U.S., N. Carolina, bounded on the N. by Albemarle Sound and on the E. by Alligator R., just W. of 76° W.

Tyrrhenian Sea, the ancient *Tyrrhenum Mare,* is a name given by the ancients, and retained by modern geographers, to that part of the Mediterranean Sea which extends between the coast of Italy and the islands of Corsica, Sardinia, and Sicily.

Uatom, isl., S. Pacific Ocean. See **Man.**

Uba, tn. and rly. stn., Brazil, Minas Geraes, 126 m. N. by E. Rio de Janeiro. Alt. 970 ft. (D.L.). P. 4000.

Uba, riv., Russia, provs. Semipalatinsk and Tomsk, l. bk. trib. of Irtysh, formed in Altai Mts. from confluence of Black and White Uba, flows W., SW., and S., and joins the Irtysh at **Ubinskaya** vil., 80 m. above Semipalatinsk; 180 m. long. **Uba Mts.,** chain of the Altais, 40 m. long, southern border ridge of Korgon plateau.

Ubanggi (**Ubangi,** or **Ubanghi**), also known in parts of its course as **Mobanggi** (near its mouth), **Dua** (between about 19° and 20° E.), **Koyu** (between about 21° and 22° E.), and in its upper course as **Makua** and **Welle,** one of the largest rivs. of central Africa, a r. bk. trib. of the Congo. The part of it first discovered was the Welle, by Schweinfurth in 1870. The Makua, a lower portion of the river, was explored in parts about ten or eleven years later by Junker, who ultimately reached a point on it in about 23° 10′ E., a little S. of 4° 0′ N. His explorations served to identify the Welle and Makua. The mouth was first seen in April 1884 by Captain Hanssens, and in 1885–86 was explored by Grenfell for about 400 m. up, where he was stopped by the Zongo rapids in about 4° 20′ N. In 1888 Vangèle, having passed these rapids in a sternwheel steamer,

succeeded in reaching a point in about 4° 25′ N., 22° 0′ E., or little more than a degree from Junker's furthest point on the Makua, thus rendering the identity of the two streams highly probable, and two or three years later this interval also was explored, and their identity definitely established. The river is not yet explored to its source, but it may be taken as formed by the union of several headstreams in about 3½° N., 28° E. From this point it pursues a more or less westerly and slightly northerly course to about 5° 10′ N., 19° 40′ E., flowing generally through a very populous country. It then turns somewhat abruptly towards the S., soon forming the difficult Zongo rapids, and, after approaching to within a few miles of the Congo in about 0° 30′ N., finally enters that river in about 0° 30′ S., 17° 50′ E. From 22° 45′ E. it forms the N. and NW. frontier of the Congo Free State.

Ubaque, vil., Colombia, Cundinamarca, 12 m. SE. Bogotá.

Ubate, tn., Colombia, dep. Cundinamarca, 56 m. NNE. Bogotá, on the pilgrim route from Chiquinquira. P. (dist.) 7300.

Ubinas, volcano, Peru, dep. and 59 m. NNW. Moquegua. In 1600 the scene of a terrible eruption, which, besides destroying several villages near, overthrew great part of Arequipa, 45 m. distant.

Ubley, par., Eng., Somerset, N. div., 8 m. N. by W. Wells, P.O. P. 250.

Ubrique, tn., Spain, prov. Cadiz, dist. Grazalema, 41 m. E. Jerez. P. (comm.) 6300.

Ubsa Nor, lake, NW. Mongolia, 140 m. NNE. Kobdo, N. of 50° N., crossed by 92° E. The water is salt and bitter, containing the sulphates of magnesia and soda as well as common salt. Depth about 6 ft.; area about 1500 sq. m.

Ubujwe, dist., equatorial Africa, W. of Lake Tanganyika, and N. of Lukuga.

Ubwari, penin. in Lake Tanganyika, central Africa, jutting about 35 m. northwards from its W. side near the N. end.

Ucayali, riv., Peru, one of the principal headstreams of the Amazon. It originates on the E. side of the Andes, a little S. of 15° S., and a little E. of 72° W., and forms the **Apurimac,** which flows NW. as far as lat. 11½° S. At that point, where it receives from the left the important trib. of Mantaro, it rolls on with a volume equal to 42,000 cubic ft. a second, and turns to the N.; the united currents take the name of Ene, and are joined on the left by the Perene, important as being a prolongation of the route from Lima to the plain, and thence to the Amazon. After receiving the Perene, the Ene takes the name of **Tambo,** and after a sharp turn to the E. receives the Quillabamba, a river composed of two main streams, the Urubamba, which rises nearly as far S. as the Apurimac and flows parallel with it, and the Paucartambo. Thereafter the principal river is known as the Ucayali. Below its confluence with Quillabamba, the river pursues a winding course, flowing in an enormous bed; in this part the U. only receives one important affluent, the Pachitea. Steamboats ascend without difficulty as high as Sarayacu, in about 6½° S. The U. joins the Maranon below Nauta, in 4° 30′ S. Alt. 1230 ft. Total length probably exceeds 1200 m. See A. Ross in *Proc. R. G. S.*, 1892, p. 382, map, p. 432.

Ufa, riv., E. Russia, govts. Ufa and Perm, r. bk. trib. of Byelaya; considerable shipping. Receives Ufalei and many other tribs. Length about 430 m.

Ufa, govt., SE. Russia, on W. slope of Urals, has Vyatka and Perm on N., Orenburg on E. and S., Samara and Kazañ on W. The series of parallel chains of S. Urals, 2500 to 5040 ft. high (Iremel peak), occupy its E. part, and the valleys between them are the seat of mining and metallurgy. In the S. it covers the Obshchiy Syrt plateau, which joins the S. Urals by a range of elevated plains (Ufa plateau) 1000 to 1500 ft. high. It gently slopes towards the Kama, and its very fertile broad valleys are getting rapidly occupied by Russian settlers. Watered by the navigable Byelaya, trib. of Kama, and its tribs., Tanyp and Ufa, also navigable. The Kama flows on its W. border. Forests cover nearly one-half of the surface. Climate extreme, the average temps. being: at Ufa, yr. 37°, Jan. 5.5°, July 68°; at Zlatoust observatory, yr. 32.2°, Jan. 2°, July 62°; yearly rfall. 19 in.; much smaller in the Steppes. Population consists of Great Russians (33 per cent. in 1882), whose numbers are rapidly increasing, Bashkirs (45 per cent.), Tatars (8 per cent.), Cheremisses, Chuvashes, Mordves, and Votyaks. Over 100,000 Russians were formerly mining serfs, and now live chiefly by mining, which is progressing, Zlatoust being its chief centre (Satkinsk, Yurezañ, Katav-Ivanovsk iron-works). Flour-mills, distilleries, tanneries; exports of cereals, cattle, and animal produce; animated fairs. Divided into six dists.: Ufa, Belebei, Biisk, Menzelinsk, Sterlitamsk, and Zlatoust. Cholny and Berezovka are important loading places on Kama. Area, 47,112 sq. m. P. (1865) 1,291,020; (1882) 1,793,260; (1890) 2,039,300.

Ufa, cap. of above govt., at the confluence of U. and Byelaya, 326 m. by rail ENE. Samara, on Siberian Rly.; considerable trade. P. (1884) 25,660; (1891) 34,000.

Ufaleiskiy, Upper, iron-works and gold-diggings, Russia, Perm, 73 m. SSW. Ekaterinburg, on Ufalei R. P. 7300.

Ufaleiskiy, Lower, 7 m. from above. P.<3000.

Ufenau, or **Ufnau,** small isl., Switzd., in Lake Zürich, W. of the bridge uniting Pfäffikon to Rapperschwyl, belonging to Einsiedeln abbey. Ulrich von Hutten died here in 1523.

Ufer, German, 'a border' or 'shore.' See *Ufer.*

Ugala, a country of equatorial Africa, on the E. ct. of Lake Victoria Nyanza, from the mouth of the Igucha R. northwards to the isl. Usuguru.

Ugala, Ugalla, Ugara, dist., equatorial Africa, E. of Lake Tanganyika, crossed by 5° S., between 31° and 32° E.

Uganda, terr., central Africa, situated NW. and W. of the Victoria Nyanza, between the upper Nile and the 30th degree E. long. The Sese Is. of the Victoria Nyanza belong to U., and the surrounding countries (Usoga, Unyoro, Ankori, and Karagwe) are tributary to U. The southern and western parts are mountainous; the northern form widely extending plains (covered with forests), sloping gradually towards the Nile valley. The majority of the inhabitants are an agricultural Bantu tribe, the Waganda; a Nuba tribe, the light-coloured Wahuma, engaged in pastoral pursuits, are met with in the W. parts of the country. U. is very fertile, bananas, maize, millet, and batatas being the principal agricultural products. The Waganda are very intelligent, and their native industries are highly developed. Chief exports, ivory, gum, and hides. Iron ore occurs in various parts of the country. Long-continued internal feuds and wars have devastated the southern parts of U. Places of importance, Rubaga and Mengo. U. belongs to British E. Africa (*q.v.*). Area estimated at 50,000 sq. m. P. estimated at 2,750,000 (Stanley). [**H. G. S.**]

Uilskoye, small fort on it, at junction of several Steppe roads.

Uinta, co., U.S., Utah, in the NE. corner of the terr., partly bounded and traversed by Green R.

Uinta, co., U.S., Wyoming, forming the whole of the western strip of the state outside the Yellowstone National Park.

Uinta Mountains, range, U.S., Utah, running E. from the Wahsatch Mts. for about 150 m.; chief summits, Emmons Peak, 13,624 ft.; Gilbert Peak, 13,687 ft.; Wilson's Peak, 13,300 ft.

Uisg, Loch, lake, Scot., Argyllshire, in the SE. of Mull I., drained W. into Loch Buy; 2 m. long, by ½ m. wide.

Uiskaya, Cossack vil., Russia, govt. Orenburg, terr. of Orenburg Cossacks, 73 m. E. of Troitsk, on the Ui R. P. <5000.

Uist, North and **South,** two isls. and pars. of the Outer Hebrides, Scot., Inverness-shire. North U., 2½ m. N. the isl. Benbecula, and separated on the NE. from Harris by the Sound of Harris, 8 m. across. Shape very irregular. Its E. part is a dreary, marshy moorland, indented by Lochs Maddy and Eport, and containing several inland lochs. Its W. part is hilly or mountainous, comprising some tracts of fertile land. Greatest alt. 1133 ft.; length, 17 m.; breadth, 3–12 m. With **Baleshare and Illeray, Boveray, Grimisay** (part), **Heisker, Hut, Kirkibost, Levera, Mhorgay, Monach, Rousay,** and **Vallay** it forms a par., having an area of 75,431 ac., P. <4500; isl. P. 3231. South U., the largest island of the Outer Hebrides, S. of Harris, separated from Benbecula on the N. by a rocky strait 1 m. across. Its E. ct. is indented by lochs; it contains several lochs, and a band of fertile country borders its W. ct.; elsewhere it is an alluvial peat plain interspersed with mountains, amongst which Mount Hecla rises to 2500 or 3000 ft. above the sea, and Ben More has an alt. of 2035 ft. Length, 22 m.; greatest breadth, 8 m. With the isls. **Benbecula, Eriskay, Fladda, Grimisay** (part), **Calvay,** and **Wlay** it forms a par. of 90,099 ac., P. 5800; isl. P. 3708. Population of both islands poor, and chiefly engaged in fishing, rural labour, and cattle-rearing.

Uitenhage, tn., Cape Colony, cap. dist. U., 20 m. NNW. Port Elizabeth; noted for its wool-washeries and fruit; has some large railway workshops. Mean rfall. (22 yrs.), 15.87 in. P. 5300.

Uitgeest, vil., Holland, prov. N. Holland, 7 m. SSW. Alkmaar. P. (comm.) <3000.

Uithoorn, vil., Holland, prov. N. Holland, 9 m. S. Amsterdam. P. (comm.) <3000.

Uithuizen, vil., Holland, prov. and 15 m. NNE. Groningen. P. <2000.

Ultzenberg, mission station, Cape Colony, dist. Tulbagh.

Új, Hungarian, 'new.'

Ujain, tn., Central India, Gwalior. See **Ujjain.**

Uj-Arad, comm., Hungary, co. Temes, dist. U.-A., on l. bk. Maros, opposite Ó-Arad. P. 5600.

Ujbánya, tn., Hungary. See **Königsberg.**

Uj-Bessenyö, comm., Hungary, co. Temes, dist. Központ. P. <4000.

Uj-Pest, Ger. **Neupest,** comm., Hungary, left or E. bank of the Danube, a little above Budapest, of which it is a suburb. P. 23,500; including **Rákos-Palota,** 30,000.

Ujszász, comm., Hungary, co. Pest-Pilis-Solt-Kis-Kun, dist. Kecskemét. P. <4000.

Uj-Szent-Anna, comm., Hungary, co. Arad, dist. Vilagos. P. 5600.

Uj-Verbász, comm., Hungary, prov. Bács-Bodrog, on the Franzens-Kanal, 25 m. NNW. Neusatz. P. 5900.

Ujvidek, Hungary. See **Neusatz.**

Ukala, tn., central Africa, Kavirondo, to the NE. of Lake Victoria Nyanza, in 0° 20′ N., 34° 45′ E.

Ukamba, region, Brit. E. Africa, to the S. of the headwaters of the Tana.

Ukami, dist., Ger. E. Africa, crossed by 7° S. and 38° E.

Ukara, or **Kilegi,** isl., in S. of Victoria Nyanza, N. of Ukerewe I., crossed by 1° 50′ S., 33° 10′ E.

Ukari, central Sudan. Same as **Wukari.**

Ukassa, cataracts, upper Congo. See **Msendua.**

Ukawendi, region, central Africa, on the E. side of Lake Tanganyika, crossed about the middle by 6° S.

Üker, riv., Prussia. See **Ücker.**

Ukerejie, or **Ukeredi,** riv., E. ct. Africa. See **Lindi.**

Ukerewe Lake. See **Victoria Nyanza.**

Ükermünde, Prussia. See **Ückermünde.**

Ukholovo, vil., Russia, govt. and 65 m. SSW. Ryazañ, 17 m. from Ryazsk railway junction; trade in grain. P. <5000.

Ukiah, city, U.S., California, Mendocino co., 110 m. NNW. San Francisco; with hot and cold medicinal springs, much frequented. P. <2000

U-kiang, riv., China. See **Wu-kiang.**

Ukli, tn., Brit. India, Bombay, dist. and 15 m. SE. by E. Bijápur. P. <5000.

Ukraina, usually in English **Ukraine** ('border land'), former name of the parts of Moscow Tsardom which lay on its W., S., and E. boundaries; composed of the Polish Ukraina, which included present Little Russia even as far as Kursk; the Southern Ukraina, beginning at Kyazañ; and the Siberian Ukraina. Now the name of Ukraina is reserved to the Little Russian provs., more especially on the l. bk. of the Dnieper (*Hetmanshchina*), but the name of **Ukrainians** is extended to all the Little Russian speaking population of SW. Russia and Poland, and partly also to the so-called 'Ruthenians' in East Galicia.

Ukuhere, dist., equatorial Africa. Same as **Ukwere.**

Ukumbi, French mission station, central Africa, on the E. side of Smyth Sound, Lake Victoria Nyanza, in about 2° 47′ S.

Ukunongo, region, central Africa, crossed about the middle by 7° S., 32° E.

Ukwere, dist., Ger. E. Africa, crossed about the middle by 6° 35′ S., and 38° 35′ E.

Ukyr (Mongolian, 'cow'), lake and vil., Russia, Transbaikalia, on the W. slope of the Yablonovoi ridge, on highway to and 80 m. WNW. of Chita. P. <2000.

Ul, riv., India, Oudh, rises in 28° 21′ N., 80° 27′ E., flows S. by E. into the Chauka, which it enters in Sítápur dist. in 27° 42′ N., 81° 13′ E. Length, 110 m.

Ulad, Arabic, 'tribe.' See *Uled.*

Ulala, vil., Russia, W. Siberia, govt. Tomsk, Altai region, 63 m. E. Biisk; seat of Altaian mission. Alt. 1300 ft. Mean temp., yr. 34.2° F., Jan. 1.0°, July 68.6°.

Ulam, goldfield, Queensland, about 29 m. from Rockhampton by road and rail. P. <1500.

Ulanga, or **Uranga,** riv., Ger. E. Africa, one of the two headstreams of the Rufiji explored by Count Pfeil in 1866, rises in about 9° S., E. of 35° E., and flows on the whole E., describing, however, a great curve to the N. through a swampy and extremely unhealthy rice-growing plain (almost entirely inundated in the rainy season) between the Lipingo Mts. on the S. and the Uhehe Mts. on the N., the numerous streams from which on both sides keep the river well filled with water even in the driest season. See *Petermann's Mitteil.*, 1886, pp. 357–60, and plate 18.

Ulankom, tn., NW. Mongolia, SW. of Lake Ubsa Nor. Alt. 3040 ft.

Ulanmuren, riv., China. Same as **Datung-gol.**

Ulanów, tn., Austria, crownland Galicia, on riv. San, 53 m. S. by W. Lublin (Poland). P. <4000.

Ulapes, settlement, Argentine Republic, Rioja, 120 m. W. Córdoba.

Ularara, co., New South Wales, crossed by 30° S., and bounded on the E. by Paroo R.

Ulba, riv., Russia, W. Siberia, r. bk. trib. of the Irtysh, 110 m. long; rises in the Altais from the **Ulbinskiye Byelki,** a range of snow-clad mountains in the SW. Altais, rising to 6631 ft. in Mount Krestovaya.

Ulbo, vil., Austria, crownland Dalmatia, on an island of the same name, 28 m. NW. Zara. P. <2000.

Ulbster, P.O., Scot., Caithness, on the E. ct., 6 m. SSW. Wick.

Ulceby, par., Eng., Lincolnshire, N. Lindsey div., 11 m. WNW. Grimsby, on the M. S. & L. R., PMT.O., and PM.O. (**U. Village**). P. <1000.

Ulceby, par., Eng., Lincolnshire, S. Lindsey div., 11 m. SE. by S. Louth, 2½ m. WNW. Willoughby stn. P. <250; eccles. par. (**U. with Fordington**) P. <250.

Ulcombe, par., Eng., Kent, Medway div., 7 m. SE. Maidstone, 2½ m. SW. Harrietsham stn., P.O. (**Ulcomb**). P. <750.

Uldale, par., Eng., Cumberland, Penrith div., on the Ellen, 8½ m. N. by W. Keswick, P.O.; 5814 ac. P. <250.

Uleåborg (Finnish **Oulu**), govt. of Finland, including nearly half of the grand-duchy, on the N. of Kuopio to near Varanger Fjord. Consists of **Laponia** (16,000 sq. m.), covered with plateaux 1000–1200 ft. high, and of N. portion of **Österbotten** —fertile lowlands on the Gulf of Bothnia, rising to 1500–1640 ft. in the plateaux of Suomenselkä and Kajana. Rivs. Kemi, Uleå, and Torneå (on Swedish frontier); lakes: Uleå-träsk, Kemi, and Enare (550 sq. m.). Area, 63,970 sq. m. P. (1892) 252,250. Chief towns: Uleåborg, on Gulf of Bothnia, 498 m. by rail N. Helsingfors, at the mouth of Uleå R., P. 13,050; Torneå, 13 m. from the mouth of Torneå R., P. <2000; Brahestad, on Gulf of Bothnia, P. <5000; and Kajana, on Uleå-träsk, where an active trade, especially in timber, is carried on. Mean temp., yr. 35.3° F., Feb. 13.8°, July 61.8°. P. <2000.

Uled, Ulad, Arabic, 'tribe,' prefix to names of a large number of tribes.

Uled Nail, large confederation of tribes, Algeria, prov. Algiers, occupying the high plains, steppes, and valleys of a great part of the prov. between the Tell and Sahara; chief centre, Jelfa. P. (comm. Jelfa) 150,000.

Uled Raffa, oasis, Africa, western Sahara, to the NW. of Tuat, in about 28° 45′ N., 0° 12′ W.

Uled Ramun, tn., Algeria, 16 m. SSE. Constantine. P. <2000.

Uley, par., Eng., Gloucestershire, Stroud div., 3½ m. NE. by N. Wotton-under-Edge, 2 m. ENE. Dursley, PMT.O. P. <1000; eccles. par. (**U. with Owlpen**) P. <1500.

Ulfer-chai, riv., Asia Minor. See **Abullonia** (lake).

Ulf Islands, two small islands off the E. ct. of Sweden, prov. Vesternorrland, in about 63° N.; areas, 5½ and 2½ sq. m. respectively.

Ulfö, isl., off N. ct. of Norway. See **Hadselö.**

Ulgham, par., Eng., Northumberland, Wansbeck div., on the Lyne, 4½ m. NNE. Morpeth, 1½ m. SW. Widdrington stn., P.O. P. <750.

Uliarus, isl., Atlantic. See **Oléron, Île d'.**

Ulkasutai, tn., Mongolia, in 47° 44′ N., 96° 54′ E., in a large deep valley bordered E. and W. by the spurs of the Khangai and traversed by the Dzagistai, on the r. bk. of which stands the trading town of Maimachin (not to be confounded with the other Maimachin opposite Kyakhta). Its fortress, built 1765, forms an almost perfect square; within the citadel are the houses of the governor-general and lieutenants. P. 4000 (Ney Elias).

Ulid, tribe in Tripoli, N. Africa.

Ulie, isls., Pacific. See **Wolea.**

Ulikare, vil., eastern Sudan, terr. of the Baris, 25 m. S. Gondokoro.

Ulithi, or **Mackenzie Islands,** Pacific Ocean, in the Caroline group, crossed by 10° N., 140° E.

Uliveto, vil., Italy, Tuscany, prov. and 6 m. ESE. Pisa; has mineral springs resembling those of Vichy, and much frequented thermal establishment. P. <2000.

Uljcin, Montenegro. See **Dulcigno.**

Ulla, riv., in the NW. of Spain, flowing W., mainly on the common frontier of provs. Corunna and Pontevedra, into the Atlantic Ocean (the Ria de Arosa).

Ulladulla, seapt. tp., New South Wales, St. Vincent co., on the coast, 60 m. SE. Goulburn, in 35° 18′ S.; has good harbour, and pier with iron lighthouse 54 ft. high. P. <2000.

Ullanes, electoral div., Ire., co. Cork.

Ullapool, vil., Scot., Cromartyshire, in the SW., on the E. shore of Loch Broom, 6½ m. NNW. of the head of the loch; visited by tourists; has a safe harbour. The inhabitants are mostly employed in fishing. PMT.O. P. <1000.

Umarpur Niwán, vil., Brit. India, NW. Provs., dist. and 4 m. W. Allahábád; contains the cemetery for European troops. P. (1881) <5000.

Umat, vil., Assam. See **Lá-ká-dong.**

Umatilla, vil., U.S., Oregon, U. co., at the confluence of the U. and Columbia Rivs., 113 m. W. of the NE. corner of the state. Alt. 340 ft. Mean temp., yr. 52.9° F., Jan. 32.3°, July 74.0°; rfall. (5 yrs.), 9.81 in. P. <1500.

Umba, riv., in the N. of Ger. E. Africa, flows SE. into the Indian Ocean, which it enters by two arms enclosing the seaport of Wanga, in 4° 38′ S.

Umbagog Lake, U.S., partly in the NE. of New Hampshire, and partly in the NW. of Maine, one of the Rangeley Lakes, drained W. into the Androscoggin R. Length, 18 m.; greatest breadth, 10 m.

Umballa, city, Brit. India, Punjab. See **Ambála.**

Umbargáon, tn. and port, Brit. India, Bombay, dist. Thána, on the W. ct., 87 m. N. Bombay. P. <5000.

Umbelosi, riv., S. Africa, flows E. from Swazi-land into Portuguese terr., and enters the head of Delagoa Bay.

Umberleigh, stn., Eng., Devonshire, on the L. & SW. R., 7 m. SSE. Barnstaple, P.O.

Umbertide, tn., Italy, Umbria, on the Tiber, prov. and 13 m. N. by W. Perugia. P. 3000.

Umboi, Sir George Rook, or **Rook,** isl., Bismarck Archipelago, between the W. end of Neu-Pommern (New Britain) and the mainland of New Guinea, crossed by 5½° S., 148° E.

Umbrella Range, mts., New Zealand, South I., prov. Otago, running 37 m. NNE. to SSW., separating Southland co. from Tuapeka.

Umbria, territorial div. of Italy, comprising part of the former States of the Church, W. of the Apennines, lying E. of Tuscany, forms now the prov. of Perugia. Surface mountainous, the Apennines in the N. and E., and the Sabine Mts. in the S.; but they enclose several fine valleys. The large Lake of Trasimeno, in the W. of U., is entirely drained by the Tiber, which forms a great part of the SW. boundary. Climate generally healthy, except around the Lake of Perugia. The soil in the valley is well cultivated, yielding wheat, wine, and olive-oil, besides maize, leguminous plants, mulberries, and fruit. The mountain tracts are covered with rich pasture. The only important mineral is lignite (two beds of about 2500 ac. in all), 4–5 m. W. Spoleto, worked since 1881. The chief products of industrial activity are silks, wines, olive-oil, iron, and paper. Area, 3658 sq. m. P. (1881) 572,000. See **Italy,** table.

Umbugwe, dist., Ger. E. Africa, crossed about the middle by 4½° S., 35° E.

Umeå, tn., Sweden, prov. Vesterbotten, near the mouth of the U. Elf, 112 m. NE. Hernösand; depth at entrance to port, 23 ft.; alongside quays, 18–19 ft.; good anchorage inside of Bredskär. Mean temp., yr. 35.0° F., Feb. 15.8°, July 58.2°; rfall. 22.67 in. P. <4000.

Um-el-Ketef, gulf, W. ct. of Red Sea, between 23° 51′–23° 59′ N., S. of Ras Benas, which is its E. horn. It is the port of the ancient *Berenice.*

Umerbia, or **Um-er-rbia,** riv., Morocco, flows W. then NW., and enters the Atlantic at Azemur, in 33° 18′ N.; not navigable.

Um-es-Shell, valley, N. Africa, Tripoli, extending from Jebel-es-Soda NNE. to the coast near the Gulf of Cabes. Length, 310 m.

Umfull, riv., Brit. S. Africa, flows NNW. from Mashona-land and joins the Sanyati. The U. goldfield (centre Hartley Hill) is on its headwaters.

Umgeni, the dist. of Natal which contains Pietermaritzburg, the capital.

Umgeni, riv., S. Africa, Natal, flows SE. and enters the Indian Ocean a little to the N. of Durban.

Umgevenja, riv., Africa. See **Crocodile.**

Umhlangene. Same as **Emhlangen,** Matabili-land.

Umia, small coast riv., Spain, Galicia, prov. Pontevedra, rises 20 m. SE. Santiago, and flows SW. past the thermal springs of Caldas de Reyes, falling into the ria or estuary of Arosa 9 m. WNW. Pontevedra.

Umkomanzi, riv., S. Africa, Natal, flows SE. into the Indian Ocean, which it enters in about 30° 13′ S.

Umkulukavu, riv., Africa. See **Mikati.**

Umlatusi, riv., S. Africa, Zulu-land, flows ESE. into the Indian Ocean in about 28° 55′ S.

Umlazi, vil., Natal, on the Umlazi R., 10 m. SW. Durban.

Umlazi, riv., S. Africa, Natal, flows ESE. into the Indian Ocean a few miles to the S. of Durban.

Umlazi, a maritime div. of Natal, containing Durban.

Umma, place named in O. T. See **Alma.**

Umma, electoral div., Ire., co. Westmeath, dist. Moate.

Umm Deimneh, site, Palestine, *Madmannah* in the O. T., 31° 22′ N., 34° 56′ E., 15 m. SW. El Khulil (ancient Hebron).

Umm Delneh, site, Palestine, probably the (Waters of) *Dimon* of the O. T., 31½° o′ N., 35° 50′ E., 21 m. S. the ancient Heshbon.

Umm Deineh, site, Palestine, *Madmen* in the O. T., 31° 36′ N., 35° 56′ E., 15 m. SE. by S. ancient Heshbon.

Umm el Jerâr, site, Palestine, *Gerar* in the O. T., 31° 24′ N., 34° 26′ E., 6½ m. S. by W. Ghuzzeh (ancient Gaza).

Umm er Rumâmîn, ruins, Palestine, *En Rimmon* in the O. T., 31° 22′ N., 34° 51′ E., 10 m. NNE. Beersheba.

Umm Jina, site, Palestine, *Engannim* in the O. T., 34° 45′ N., 34° 57′ E., 15 m. W. Jerusalem.

Umm Tôba, site, Palestine, *Netophah* in the O. T., 31° 44′ N., 35° 14′ E., 3 m. S. by E. Jerusalem.

Umpferstedt, vil., Ger., gd.-duchy Saxe-Weimar, 3 m. E. by S. Weimar. P. <2000.

Umpqua (ŭmp'kwaw), riv., U.S., Oregon, in the SW., rises in the S. of Douglas co., in the Cascade Mts., flows N. then WNW. to the Pacific, into which it empties itself, in 43° 40′ N. Length about 200 m. The rainfall at U. city, at its mouth, is (6 yrs.) 67.4 in.

Um'rbia, riv., Morocco. See **Umerbia.**

Umrer, municip., Brit. India, Central Provs., dist. and 25 m. SSE. Nágpur; manufactures fine cotton cloth. P. 15,200; Hindus, 14,300.

Umreth, tn., Brit. India, Bombay, dist. Kaira, in 22° 41′ N., 73° 11′ E. P. 15,600; Hindus, 13,800.

Umri, tn., Central India, Gwalior, 105 m. N. by W. Bhopál.

Umsengaisi, riv., S. Africa, flows N. from Mashona-land into the Zambezi, which it joins in about 31° 15′ E.

Umta, tn., India, Bombay, Gujarát, Baroda state. P. (1881) 5800.

Umtamvuna, riv., SE. Africa, flows SE. into the Indian Ocean; it marks the frontier between Natal and Pondo-land.

Umtasa's (Kraal), vil., Brit. E. Africa, near the E. frontier, a few miles WNW. of Massikesse, in about 18° 45′ S., 32° 37′ E.; only important as mentioned under the name of Mutassa in the Anglo-Portuguese convention of June 1891 as falling within the British line. Alt. 4170 ft. (Swan, *ab.*).

Umtata, tn., Cape Colony, dist. U., 110 m. NNE. East London. P. <1500.

Umtata, riv., SE. Africa, flows SE. into the Indian Ocean, which it enters in 31° 55′ S., separating Pondo-land from Tembu-land.

Umtwalumi, short riv., Natal, entering the Atlantic in 30° 27′ S.

Umur Fakih, vil., Bulgaria, Eastern Roumelia, prov. Sliven, 29 m. SW. Burgas.

Umuryeri, small seapt., Asiatic Turkey, on the Bosporus, opposite Böyukdere, 11 m. NNE. Constantinople.

Umvolosi, riv., S. Africa, Zulu-land, formed by the union of the Black and White U., flows SE. into St. Lucia Bay.

Umvoti, a div. on the NE. frontier of Natal, crossed in the E. by 31° E., traversed by the Umvoti R., which flows ESE. nto the Indian Ocean a little to the S. of the Tugela.

Umzimkulu, riv., SE. Africa, flows SE. from Bushmans Nek in the Drakensbergen, on the frontier of Basuto-land, flows SE. mainly on the frontier of Natal and Griqua-land East, and then through Natal, and enters the Indian Ocean at Port Shepstone, in 30° 43′ S.

Umzimvubu, or **St. John's River,** riv., SE. Africa, rises in the Drakensbergen, near the source of the Umzimkulu, and flows first S. through Griqua-land East, then SE. through Pondo-land, and enters the Indian Ocean in 31° 37′ S.

Umzinga, mt., Natal, 75 m. N. Pietermaritzburg.

Umzinga, dist., on the E. frontier of Natal, in the angle between the Buffalo and Tugela Rivs.

Umzinto, seat of administration of Alexandra co., Natal, near the coast, 37 m. SW. Durban.

Umzinyati, or **Buffalo River,** SE. Africa, forms the NE. boundary of the Brit. terr. of Natal, and joins the Tugela 50 m. from its mouth in the Indian Ocean.

Umzumbi, vil., Natal, 60 m. SW. Durban.

Una, vil., E. ct. Brazil, Bahia, in 15° 10′ S.

Una, vil., Brazil, state of and 35 m. W. by S. São Paulo.

Una, tn., Brit. India, Punjab, dist. Hoshiárpur, 60 m. WNW. Simla. P. <5000.

Una and Delwára, tn., India, Káthiáwár Penin., 10 m. NNE. Diu; the ancient town of Una, in Sanskrit Unat Dúrg, was close to the present town, then known as Delwára. Owing to a slaughter of the Bráhmans, the population moved into Delwára, hereafter called Una. Afterwards, when U. had fallen under Mohammedan rule, a new town was founded about 3 m. S., and to this the name of Delwára was given. Una, P. (1881) 6000; Delwára, P. <4000.

Unadilla, riv., U.S., New York, in the S., flows S. to the Susquehanna, which it joins on the r. bk. about 75° 25′ W.

Unadilla, vil., U.S., New York, Otsego co., on Susquehanna R., 55 m. S. by W. Utica. P. <1500.

Unai Pass, Afghanistan. See **Paghman Hills.**

Unaka Mountains. See **Appalachian Mountains, B. I.**

Unalaska, the most important of the Aleutian Is., between 166° and 168° W., just S. of 54° N.; contains the volcanic mass of Makushin (5960 ft.). The chief station U. or Iliuliuk is on the N. shore. Has monthly communication with Sitka, 1250 m. distant. On its N. shore is **Iliuliuk** ('the curving beach'), a place with about 300 inhabitants, port of entry for all ships passing in or out of Bering Sea. Mean temp. (9 yrs., 1827–34, 1867, 1871–73), yr. 38.5° F., Jan. 29.3°, Aug. 57.0°.

Unanderra, postal-vil., New South Wales, Camden co., in 34° 17′ S., 150° 59′ E. P. <1500.

Unao, municip., Brit. India, Oudh, cap. dist. U., 10 m. NE. Cawnpur. P. 12,800; Hindus, 8200; Moham. 4500.

Unapool, inn, Scot., Sutherlandshire, at the mouth of Loch Glencoul, 10½ m. WNW. of the head of Loch Shin.

Unare, riv., Venezuela, enters the Caribbean Sea 40 m. W. Barcelona; near its source is the village U. Length, 120 m.

Unartok, or **Rensselaer Bay,** bay, W. ct. Greenland, in extreme NE. of Smith Sound, and S. of Kane Basin.

Unchehra, tn., Central India, Nagode state. P. 5400; Hindus, 4300; Moham. 900.

Uncompahgre, riv., U.S., Colorado, in the SW., trib. of the Gunnison, which it joins on the l. bk. at Delta, a little to the W. of 108° W.

Uncompahgre Peak, mt., U.S., Colorado, Gunnison co., at the E. end of the Uncompahgre Mts., 120 m. NE. of the SW. corner of the state. Alt. 14,235 ft. (Hayden); 14,408 ft. (Wheeler).

Unde, vil., Portuguese E. Africa, upon the r. bk. of the Rovuma, in 37° 10′ E.

Unden, lake, Sweden, prov. Skaraborg, occupying the middle of the isthmus which separates Lakes Vener and Vetter, and flowing into the latter through Lake Viken. Length, 10 m.; breadth, 7 m.; area, 39 sq. m.

Undenaes, vil., Sweden, prov. Skaraborg, 20 m. E. Mariestad, near the E. ct. of Lake Vilken. P. (comm.) 5500.

Underbarrow and Bradley Field, par., Eng., Westmorland, div. and 3½ m. W. Kendal, PM.O. (**U.**); 5122 ac. P. <500.

Undercliff, picturesque maritime tract, Isle of Wight, extending along its S. ct. from Niton, 5 m. E. to Bonchurch; formed by a landslip from chalk cliffs, which form an abrupt wall 90 to 120 ft. in height. Average width, ¾ m.

Underdale, vil., S. Australia, co. and 2½ m. W. Adelaide by road; in a wine-growing dist. P. <1500.

Underhill, Baptist mission station on the Congo, between Boma and Vivi; fever cases numerous and severe.

Underhill, tn., U.S., Vermont, Chittenden co., 27 m. NW. Montpelier. P. <1500.

Undermilbeck, par., Eng., Westmorland, on E. side of Lake Windermere, containing Bowness village; 4183 ac. P. <2500.

Underriver, eccles. par., Eng., Kent, Seal par., P.O. P. <250.

Underskiddaw, par., Eng., Cumberland, Cockermouth union, 6 m. NW. Keswick; 6026 ac. P. <500.

Underwood, part of par., Eng., Derbyshire. See **Offcote and Underwood.**

Underwood, PM.O., Eng., co. and 9 m. NW. Nottinghamshire, 3 m. from Eastwood stn.

Underwood, post-tn., Tasmania, Dorset co., 11 m. NNE. Launceston. P. <1500.

Undi, vil., Portuguese E. Africa, on a small height 62 m. N. of the Zambezi, in 14° 39′ S., 32° 7′ E.

Undine, post-settlement, Canada, New Brunswick, Victoria co., 80 m. SSW. of the W. end of Chaleur Bay.

Undy, par., Eng., Monmouthshire, S. div., 8 m. E. Newport, 1½ m. E. Manor stn. P. <500.

Unexpected Island, another name of **Gower Island,** Ger. New Guinea.

Unga, small isl. with coal-mine and gold-mine, on the S. of the Alaska Penin., in 160° 40′ W.

Ungama, or **Formosa Bay,** the large bay in Brit. E. Africa, to the N. of 3° S., which receives the Tana R.

Ungarisch-Altenburg. See **Altenburg, Ungarisch-.**

Ungarisch-Brod, tn., Austria, Moravia, 43 m. SSE. Olmütz, and 5 m. WNW. Hluck. P. <5000.

Ungarisch-Hradisch, tn., Austria, Moravia, 38 m. S. by E. Olmütz. P. <4000.

Ungarisch-Ostra, tn., Austria, Moravia, dist. U.-O. P. <4000.

Ungarn, German name for Hungary.

Ungeni, tn., Russia, prov. Bessarabia, 218 m. by rail NW. Odessa, on l. bk. Pruth, near Roumanian frontier.

Unghéni, vil., Roumania, Moldavia, 9 m. ENE. Yassy, on r. bk. of the Pruth; summer resort for the inhabitants of Yassy.

Ungvár, tn. with magistracy, Hungary, cap. prov. Ung, 48 m. E. by S. Kaschau; has mineral spring; Greek Catholic bishopric; fine cathedral; trade in wine, wood, and pottery. Alt. 463 ft. Mean temp., yr. 48.6° F., Jan. 26.4°, July 69.0°. P. 11,800.

Unhaes da Serra, vil., Portugal, Beira, 31 m. NNW. Castelho Branco, at S. base of the highest summit of the Serra da Estrella; has important sulphureous mineral springs. P. <2000.

Unhoscht, tn., Austria, Bohemia, 12½ m. W. Prague. P. <3000.

Uniana, Pic d', isolated hill, Colombia, in plain of and on l. bk. of the Orinoco, in the heights of Atures. Alt. 1910 ft.

Uniao, tn., Brazil, state Ceará, on l. bk. of the riv. Jaguaribe, 40 m. from the bar.

Unicoi, co., U.S., Tennessee, on the E. frontier, crossed in the S. by 36° N.

Unie, small isl., Austria, Dalmatia, co. and 58 m. NW. Zara, at E. entrance of the Quarnero; has a lighthouse. Area, 6 sq. m.

Unieh, or **Unia,** maritime tn., Asia Minor, vilayet Trebizond, on the N. ct., 126 m. ESE. Sinope; has considerable trade with Constantinople and the Crimea. P. 10,000; Orthodox Greeks, 5000; Moham. 3000; Armenians, 2000 (Cuinet).

Unimak, isl., at the W. end of the Alaska Penin., N. America; contains two volcanoes, Shishaldin (upwards of 8000 ft.) and Pogromnaia (5500 ft.). Shishaldin is first known to have been in eruption in 1690; again in 1826 and 1827. **U. Pass,** at the W. end of the island, is one of the more frequented channels into the Bering Sea.

Unimarca, Lake, S. basin of Lake Titicaca, belonging to Peru and Bolivia. See **Titicaca.**

Union, isl., Canada, Vancouver I. See **Kyuquot Sound.**

Union, tn., Chile, prov. and 37 m. SSE. Valdivia, cap. dep. U. P. <2000.

Union, vil., Costa Rica, 7 m. E. by N. San José.

Union, tn., Cuba, 53 m. ESE. Havana.

Union, or **Tokela Islands,** Pacific, 9° S., 171½° W.

Union, vil., Paraguay, 79 m. ENE. Asuncion. P. <2000.

Union, mining tp., S. Australia, N. Terr., Rosebery co., 110 m. SSE. Palmerston. P. <1500.

Union, co., U.S., Arkansas, on the S. frontier, and bounded on the NE. and E. by Ouachita R.

Union, vil., U.S., Connecticut, New Haven co., 16 m. NNW. New Haven. P. <1500.

Union, co., U.S., Georgia, on N. frontier, and crossed by 84° W.

Union, co., U.S., Illinois, on W. frontier, and between 37° and 38° N.

Unionville, tn., U.S., Missouri, Putnam co., 112 m. NE. by E. St. Joseph. P. <1500.

Unionville, vil., U.S., Nebraska, co. and 20 m. S. Humboldt; mining dist. P. <1500.

United Kingdom, The, is the official designation of the British Isles, comprising the three kingdoms of England, Scotland, and Ireland, and the principality of Wales, with the Isle of Man and the Channel Is. as dependencies. By its position and configuration, the U. K. is peculiarly well adapted to be a great commercial centre. Amongst the many conditions which contribute to its supremacy in this respect are its position nearly in the centre of the land hemisphere, with free access by water to the remotest parts of the earth; the numerous indentations in its coasts affording good harbours for the largest vessels; the facilities for communication presented by navigable rivers, canals, and a vast network of railways; and the rich stores of coal and iron which exist in proximity to each other and also to the coast. Other factors are its strong and free government, and the temperate climate, which admits of labour being carried on at all seasons.

The following Table shows the Population in Thousands and one Decimal of a Thousand (00 omitted) of the Four Countries of the U. K. at each successive Census, with the Mean Rate of Increase or Decrease per Cent. per Annum between the Censuses.

	March 10, 1801.	May 27, 1811.	May 28, 1821.	May 29, 1831.	June 7, 1841.	March 31, 1851.	April 8, 1861.	April 3, 1871.	April 4, 1881.	April 6, 1891.

[1] In the case of Ireland, the populations (1821–51) are inclusive of army, navy, and merchant seamen on shore and in port estimated to the middle of each year; those for 1861–91 are the census populations, exclusive of army and navy.
[2] Inclusive of Isle of Man and Channel Is., and army, navy, and merchant seamen, natives of the U. K. abroad.

Climate.—Being under the influence of sea-currents from the SW. (the Gulf Stream drift) and winds from the same direction, whose temperature is to a large extent kept up by these currents, the mean annual temperature of the British Isles is equal to that of countries in much lower latitudes on the continent of Europe, while the winter temperature is much higher. The mean annual temperature of the central parts of the archipelago is about 49° F., that of Unst, in Shetland, being 44.5°, and of Cornwall, in the extreme S., 51.5°. The small difference between the mean temperatures of the hottest and coldest months throughout the islands is still more striking. At Thurso, on the Pentland Firth, the mean Jan. temperature is 37.5°, July 56.3°; at Plymouth, Jan. 42.4°, July 61.9°; at Valentia (Kerry) 45.3°, July 59.1°. Prevailing winds for nine months of the year, SW., W., and NW. From March to May, ENE. and N. winds prevail. The average rainfall is about 34 in., but in this case there is a wide diversity at different stations. Though variable, the climate of Britain is found, from tables of longevity, to be one of the most salubrious in the world; while the very general cultivation and drainage of the soil have removed those maladies that originate in marsh effluvia. The indigenous flora and fauna of the British Isles partake of the character of that of the contiguous parts of Europe, and contain no species peculiar to that archipelago, from which it is inferred that these islands must have been connected by land with the mainland of Europe at a period subsequent to the Ice Age, when the entire surface as far S. as the Thames valley was buried under a thick sheet of ice, and the climate of the areas that remained ice-free must have been unfit to support the vegetable life regarded as indigenous. Of wild animals, the fox, badger, wild cat, stoat, martin, otter, squirrel, hedgehog, dormouse, mole, mouse, hare, and rabbit are the principal. The stag and fallow deer are still abundant in several localities, where they are preserved; bittern, eagle, and other birds of prey are becoming more rare. An examination of the **agricultural statistics** given in the **Appendix** (pp. 7–12) shows that the relative areas under the various classes of crops varies greatly in the different divs. of the U. K. The proportion per thousand acres of area under corn crops in England is nearly three times that in Scotland, two and a half times that in Ireland, and more than twice that in Wales; the area under green crops is more than twice that in Scotland, three times that in Wales, and one-third more than in Ireland. The proportionate area under artificial grasses 'for hay' is in England more than twice that in Scotland, but that 'not for hay' is little more than half, while the proportionate area under permanent pasture is nearly six times that in Scotland, five and a half that in Ireland, and slightly lower than in Wales. Of the total area, England has 76 per cent. under cultivation, Wales 60 per cent., Scotland 25 per cent., and Ireland 24 per cent.; of the area under cultivation, 14.9 per cent. is in England occupied by owners, 12.6 per cent. in Scotland, and 11.7 per cent. in Wales. **The mineral productions** of the U. K. are very important, the principal being coal and iron. The total value of the coal and metals produced in 1872 was stated to be £68.4,[1] and in 1882, £88.0; in 1882 it was estimated at only £70.4, an apparent decline, due not to lessened production, but to a different method then adopted for ascertaining the value of coal. In 1892 the value was £84.8, but in the following year it fell to £73.0. During this period the total value was highest (£100.8) in 1890, lowest (£55.8) in 1886. Of the total production in 1892, the share of England was 71 per cent., of Wales 16 per cent., of Scotland 12 per cent., of Ireland .5 per cent., and of the Isle of Man .1 per cent. Coal formed nearly 78 per cent., and pig iron 20 per cent., leaving only 2 per cent. as the value of all other metalliferous minerals; of these the principal are tin, lead, and zinc, but of none does the value reach £1.0. The value of coal produced in England, Wales, and Scotland was, respectively, £46.4, £11.8, and £7.8; the production of Ireland was insignificant. Of iron ore, England produces about 87 per cent. Of non-metalliferous minerals, the principal are stone, slate, clays, salt, and oil-shale. Stone, clays, and salt are obtained chiefly in England, slate in Wales, and oil-shale in Scotland; other minerals are obtained in small quantities. See also table showing the growth of the coal production of the U. K. and other countries, **Appendix**, p. 14.

Manufactures.—From the table below it will be seen that while the number of factories shows only a slight increase (about

[1] Thousands (000's) omitted.

6 per cent.) on 1870, there is very considerable advance in the producing power, as shown by the increased number of spindles, looms, and persons employed. Of the special factories, cotton shows substantial progress; the number of woollen factories has decreased, but the capacity for production has increased; flax-mills show a decline in every part, with the exception of an increase of power-looms; in silk factories the decline is very decided; while jute, hosiery, and lace factories all show considerable advance. **Internal communication** is provided for, in addition to rivers and canals, by an extensive system of railways, which in the more populous parts form a network of lines. There are besides good roads. The remarkable expansion of British **commerce** during the 19th century is seen at a glance from the following table, which shows in £ millions the value of the import and export trade at various periods from 1802 to 1894:—

Table showing the Total Value in £ millions of the Imports and Exports of the U. K. in 1802, *the Annual Average for the Seven Quinquennial Periods* 1856–60 *to* 1886–90, *and in* 1894.

Years.	Imports. Total Value (in £ millions).	Exports, British Produce. Total Value (in £ millions).	Exports, Foreign and Colonial Produce.	Total Value of Exports.
1802 . .	31.4	27.0	19.0	...
1856–60 . .	182.9	124.2	24.8	148.0
1861–65 . .	247.6	144.4	46.4	190.8
1866–70 . .	292.8	187.8	46.9	234.7
1871–75 . .	360.2	239.5	58.2	297.7
1876–80 . .	382.5	201.4	56.6	258.0
1881–85 . .	399.9	232.3	63.0	295.3
1886–90 . .	389.6	236.3	62.2	298.5
1894 . .	408.5	216.2	58.0	274.0

During this period the total trade has increased nearly tenfold, though, as will be seen, the advance since the period 1876–80 has been comparatively small. This, however, is true only of values. When quantities are compared, the principal commodities still show a rapid growth. The nearly continuous increase in the excess of the value of imports over exports is very noticeable. As regards the countries with which trade is chiefly carried on, we find that the twelve leading countries whence imports were derived, in 1892, were U.S. (25 per cent.), France (10.2), Australasia (7.2), Brit. India (7.2), Holland (6.8), Germany (6.0), Belgium (4.0), Russia (3.5), N. American colonies (3.4), Sweden and Norway (2.8), Spain (2.7), and Egypt (2.5), together making up about 82 per cent.; of the imports, the respective values ranging from £108,000,000 to £11,000,000. The twelve leading countries to which were sent the exports, with their respective shares, were U.S. (14.2), Germany (10.2), Brit. India (9.9), Australasia (7.4), Holland (5.3), Belgium (4.4), Russia (3.0), Cape of Good Hope (2.9), N. American colonies (2.9), Brazil (2.8), Turkey (2.3), together making about 73 per cent. of the exports. In 1802, six imports or groups of imports and five exports had each a value exceeding £1,000,000; these were in order, imports—sugar, coffee, linen, cotton, corn, and provisions, ranging from £5,800,000 to £1,000,000; exports—cotton goods, woollens, iron, and refined sugar, values ranging from £7,100,000 to £1,500,000. In 1892, nine imports and five exports each exceeded £10,000,000; imports—corn, cotton, wool, sugar, wood, butter, silk manufactures, bacon and hams, and tea, values ranging from £58,700,000 to £10,000,000; exports—cotton manufactures and yarn, woollen manufactures and yarn, iron and steel, coals, and machinery, values £66,000,000 to £13,900,000. More than two-thirds of the cotton comes from the U.S.; Egypt follows with about one-fifth that of the U.S., then India and Brazil. The Australasian colonies furnish more than two-thirds of the wool which we import, and a great part of the remainder comes from Cape Colony. The trade in grain, and above all in wheat, is of peculiar interest. During the 18th century the British exports of wheat usually exceeded the imports, as indicated in the following table:—

Table showing the Exports and Imports of Wheat and Wheat-Flour in various Years, 1697–1800.[1]

Year.	England.		Year.	Great Britain.	
	Export.	Import.		Export.	Import.
	Quarters.	Quarters.		Quarters.	Quarters.

1750	947,602	279	...	...	...

[1] *Accounts and Papers*, xii., 1814, vol. 169, p. 157.

During the 19th century the annual value of the corn and flour imported increased more than fiftyfold. In 1802 it was £1,200,000; in 1852, £14,200,000; in 1872, £51,700,000; in 1883, £67,600,000 (the highest point reached); and in 1894, £48,200,000. The following table shows the imports of wheat (including flour) and maize in 1872, 1882, 1892:—

Year.	Wheat and Wheat-Flour[1] (Millions).		Year.	Maize (Millions).	
	£	Cwts.[2]		£	Cwts.
1872	30.2	47.6	1872	8.7	24.5
1882	44.9	80.8	1882	6.5	18.3
1892	37.1	95.6	1892	9.4	35.4
1894	25.9	96.7	1894	8.0	35.4

[1] Seventy-two of flour reckoned as equal to 100 of wheat.
[2] For comparison with the table given for the 18th century, one quarter may be taken as equal to 4.3 cwts.

The value of the wheat imported during the above period reached its maximum in 1882, and its minimum (£27,900,000) in 1876, in which year the importation of maize reached its highest value, £12,800,000, the lowest being £6,500,000 in 1882. The continuous increase in the quantity of the wheat and flour imports is shown by the following annual averages for the eight quinquennial periods after the middle of the 19th century:—

	1851–55.	1856–60.	1861–65.	1866–70.
Million cwts.	20.11	23.59	34.65	37.27
	1871–75.	1876–80.	1881–85.	1886–90.
Million cwts.	51.45	64.83	77.29	79.62

The supplies of wheat and wheat-flour are derived chiefly from the U.S. (about ⅔), Russia, India, British N. America, the Argentine Republic, Chile, and Australasia; maize from the U.S. (about ¾), Roumania, Russia, and the Argentine Republic. Turning now to the **exports**, we find that the total value of the textiles shows a marked decline; the value of cotton manufactures exported in 1892 was nearly 12 per cent. less than in 1872, and nearly 15 per cent. less than in 1881, when the export reached its highest point, £65,900,000. The woollen manufactures show a still greater decline in value, the total fall being from £32,400,000 in 1872 to £17,900,000 in 1892, and only once (in 1889) since 1875 has the total value exceeded £21,000,000; the lowest, £15,900,000, was touched in 1879. Linen manufactures have likewise declined from £8,200,000 in 1872 to £5,200,000 in 1892. The value of iron and steel exported declined during the same period from £36,000,000 to £21,800,000. The value of machinery increased from £8,200,000 to £13,900,000, and that of coal exported from £10,400,000 to £14,400,000. The growth of British **merchant shipping** during the 19th century has been very remarkable. In 1802 the total tonnage of vessels (British and foreign) cleared outwards from ports in the U.K. (exclusive of vessels trading between Ireland and foreign ports) was 2,084,154; in 1830 the total tonnage was 2,860,515 (of which British shipping formed 73 per cent.), an increase for the twenty-eight years of 37 per cent. From this period, however, the advance was much more rapid. In 1850 the total tonnage of vessels cleared had risen to 7,404,588, an increase of 159 per cent.—more than four times that during the longer period, 1802–30. The proportion of British shipping to the total was now 64 per cent., although the actual increase was 125 per cent. In 1870 the total tonnage cleared amounted to 18,526,818, an increase of 150 per cent., greatest in British vessels, which now formed 68 per cent. of the total. In 1892 the total tonnage had risen to 38,194,251, an increase of 106 per cent., British vessels still taking the lead with a share of 71.5 per cent. of the total tonnage. Thus the total tonnage of vessels cleared outwards from U.K. ports was in 1892 rather more than five times that of 1850, the tonnage of British shipping alone being nearly six times that of 1850, notwithstanding that alterations in registration and the system of measurement have made the British tonnage since 1854 to appear less as compared with previous years than otherwise it would have done. During the period 1870 to 1892 the number of vessels steadily employed declined, owing partly to the building of larger vessels, and partly to the more rapid voyages accomplished by steam-vessels. Thus while in 1870 the number of registered vessels employed in the home and foreign trade was 22,180, with an average tonnage of 250, in 1892 the number was 16,828, with an average tonnage of 496; in 1870 steamers formed about 10 per cent. of the vessels, in 1892, 36 per cent. The preponderating share of British shipping in the commerce of the world is shown by the fact that, whereas in 1892 the total tonnage for the British Empire was 10,268,198, and that for the U.K. alone (included in the foregoing) 8,664,754, the total tonnage of the merchant navies of the five European countries next in maritime importance (German Empire, Norway, France, Italy, and Sweden) and the United States (oversea vessels only) amounted together to only 7,514,180, about seven-eighths that of the U.K. alone, and little more than two-thirds that of the British Empire (Parl. Report, 1894, *Tables showing the Progress of Mer-*

chant Shipping, 1893). The great importance which the **coal-trade** has for centuries had with respect to the entire commerce, first of England and now of Great Britain generally, has been strikingly set forth by Jevons and Sir Rawson Rawson, and is indicated for the second half of the 19th century in the following table:—

Tonnage Employed in Exporting Coal from the United Kingdom.

Average of Years.	Coal Exported. Millions of Tons.		Millions of Tons cleared from British Ports with Cargoes (Foreign and Colonial Trade).		Percentage of Tonnage required for Coal.
	Weight.	Tonnage required for Shipment.[1]	Total.	Exclusive of Coal.	
1854–60	6.1	2.7	9.6	6.9	28.0
1861–65	8.5	3.8	12.0	8.2	31.4
1866–70	10.7	4.7	15.4	10.7	30.8
1871–75	13.4	5.9	19.5	13.6	30.3
1876–80	16.5	7.3	22.5	15.2	32.3
1881–85	22.1	9.8	28.5	18.7	34.2
1886–90	26.8	11.8	31.6	19.8	37.3
1891–94	30.9	13.7	34.2	20.6	39.9

[1] The proportion of tonnage weight to tonnage capacity taken, in accordance with the practice of Sir Rawson Rawson, as = about 20 : 9.

As the coal trade favours in many cases the import trade of the country by ensuring to ships a cargo outwards, so the vast import trade of the country favours the coal-trade by increasing the chance of a cargo homewards.

The **government** of the U. K. is a constitutional monarchy, the executive being vested in the Sovereign, who acts through responsible ministers, collectively known as the Cabinet. The legislative authority is vested in Parliament, which consists of two Houses—the House of Lords and the House of Commons; the former (now numbering about 570) comprises Peers sitting by hereditary right, other Peers created by the Sovereign, 16 representative Peers for Scotland, and 28 elective Peers for Ireland, the two archbishops, and certain bishops. The House of Commons comprises representatives from the counties (knights of the shire) and from the cities and burghs, chosen by the registered electors, the voting being by secret ballot. The number of members is now 670, of whom 495 represent English, 72 Scotch, and 103 Irish constituencies. The normal duration of Parliament is seven years, but political changes usually necessitate an earlier dissolution. **Finance.**—The revenue is derived mainly from customs and excise duties, stamps, income and other property taxes, and the post-office. **Military service** is not compulsory; the strength of the force (which is recruited by enlistment) must be sanctioned by annual vote of Parliament. Auxiliary forces are the Militia, Yeomanry Cavalry, Volunteer Corps, and Army Reserve. The Navy is a perpetual establishment under the control of the Board of Admiralty. The established **religion** of England is Protestant Episcopal, and that of Scotland Presbyterian, but there is entire freedom for all forms of worship. There is no established church in Ireland. **Education.**—The following table gives statistics of the primary schools in the U. K.:—

Education.—*Table of Primary Schools in the United Kingdom.*

[1] Including, in 1870, Isle of Man schools and Roman Catholic schools in Scotland.

Higher education is provided for in England by the universities, of which there are five—Oxford, Cambridge, Durham, the Victoria University, and London University, the last, however, only an examining body, and by several detached colleges. Middle-class education is carried on mainly by private enterprise, but there are many endowed public and grammar schools.

Historical Notes.—Nothing is known historically of Britain before the invasion of Cæsar (B.C. 55, 54), except by a few obscure allusions. It is conjectured to have been originally peopled from the adjoining continent, first by the Celts from Gaul, and afterwards by Teutonic tribes from Germany and Scandinavia. After the invasion of Cæsar, the Romans did not return to Britain for about a century; under Agricola, Antoninus Pius, Severus, Caracalla, it was subdued and occupied till about A.D. 420, when it was abandoned by the Romans. Agricola built forts between the Firths of Forth and Clyde, in order to bound the empire and defend it from the Caledonians; Hadrian erected a mud wall from the Solway Firth to the Tyne; and Severus built a stone wall in the same direction, portions of which still remain. In the reign of Antoninus Pius, Roman dominion was again extended to the limit reached by Agricola, and the rampart known as the wall of Antoninus was then erected. After the termination of the Roman power, the greater part of Britain was conquered by the Saxons, Jutes, and Angles, the latter giving their name to England; this conquest commenced in 449, and occupied about 130 years. In 1066 the Normans made a descent on England, and possessed themselves of a great part of the country. In 1172 Ireland was subdued, and came under British government. In 1203 Wales was united to England. In 1603 the accession of James VI. united the crown of Scotland to that of England. A civil war in Britain terminated in the execution of Charles I. in 1649, followed by a Commonwealth that lasted eleven years, in which Oliver Cromwell assumed the dictatorship. In 1660 monarchy was restored, when Charles II. ascended the throne of his father. William III. was called to the throne after the revolution of 1688. The legislative union of Scotland and England took place in 1707. The legislative union of Ireland with Britain took place in 1800, and was followed next year by the first regular census of the British Isles. See **England, Scotland, Wales, and Ireland.**

United Provinces, another name for the Netherlands or Holland.

United States of America, a republic of North America extending from Canada (*q.v.*) to Mexico and the Gulf of Mexico, and from the Atlantic to the Pacific. The N. boundary corresponds in lat. with Paris, the S. with the first cataract of the Nile at Assuan; but the isothermal lines of the states give a climatic similarity with the region from southern Scandinavia to the northern shores of Africa. The only outlying possession is Alaska (*q.v.*). State, territory, and district are the names of subdivisions, as determined by the form of local government. The table on following page gives the names of the states and territories, with their area and population at different dates.

The following table, in which the states, &c., are grouped geographically, gives the areas with the population in thousands in 1790, the first census year; 1840, the last census preceding the great immigration periods; 1860, the census before the Civil War; and 1890, the last taken, the population per square mile of land area in 1890, and the mean rate of increase per cent. per annum for the periods for which the returns are set down, as far as the populations for the different regions at the beginning and end of these periods are fairly comparable with one another:—

	Area in sq. m.	Population in Thousands.				Pop. per sq.m. 1890.

The **surface** of the United States is pretty evenly divided between a highland area, the western half, and a lowland E. Taking the contour of 2000 ft. as the line of division, we find W. of the 98th meridian 1,313,000 sq. m. of plateau and mountainous area, and only 142,000 sq. m. of lowland; and to the E. 1,506,000 sq. m. of lowland, with only 20,000 sq. m. above 2000 ft. The high land is crossed from N. to S. near its middle by the system of the Rocky Mountains, which form the water-shed between Atlantic and Pacific river systems. It is all included in the area of the western division of the states and territories, and of these Montana, Wyoming, Colorado, and New Mexico are styled the Rocky Mt. region. The separate articles on states and mountains give details of surface. A second series of extensive elevations lies parallel with the Pacific coast from 100 to 150 m. inland—the Cascade and Sierra Nevada Ranges (*q.v.*). These ranges are in the Pacific coast states, Washington, Oregon, and California, in which is also all the limited area of lowland that the W. contains. Nearer the ocean is the low Coast Range. It is broken by the depression of the Strait of Juan de Fuca, communicating with Puget Sound in Washington; the Columbia R. cutting through both the Cascade and coast ranges between Washington and Oregon; and a third great depression containing the Bay of San Francisco, the outlet of the Sacramento and San Joaquin Rivs. in California. Between the Sierra-Cascade and the Rocky Mt. Ranges is the Plateau Belt, from 2000 to 6000 ft. high, with Idaho, Nevada, Utah, and Arizona occupying nearly all its area. Its northern third belongs to the basin of the Columbia, and contains the Blue Mts., a detached mass in eastern Oregon. The central part, called the Great Basin (*q.v.*), has no outlet to the ocean. The southern third belongs to the basin of the Colorado, and is remarkable for the extensive cañons of that stream and some of its tribs. Death Valley and Coahuila Valley, in the SE. of California, are below sea-level. Among other topographical features may be mentioned the great lava fields, extending from the Rockies in Wyoming across the plateau to the W. of the Cascade Range in Washington and Oregon, and occurring also in Nevada, Utah, Arizona, and New Mexico, deeply cut by the cañons of the Shoshone and Yellowstone; the *mesas* or lava-topt tablelands, where sedimentary rocks have remained under the protecting cap of hard eruptive rock (Colorado, New Mexico, Arizona); the geysers of the Yellowstone region (*q.v.*); the Bad Lands of SE. Montana, and the adjacent parts of South Dakota and Wyoming, a region of strangely-weathered sedimentary rocks, which has its parallel in Colorado [**Garden of the Gods**]; the 'Parks' of Colorado; and the salt and alkaline desert-lands in Utah and Nevada, remains of ancient lakes, and the many salt lakes and 'sinks' still existing. To the E. of the Rockies the plateau is termed the Great Plains. It descends gradually, carrying affluents of the Mississippi and rivers of the Gulf system, and it is the characteristic feature of the surface of the western series of the Central states, North and South Dakota, Nebraska, Kansas, Oklahoma, and Texas. In the lowland eastern half of the country there are two areas of high land that are important—one, the Appalachian Mts. (*q.v.*), which form the eastern rim of the basin of the Mississippi, and determine the flow of many

streams of the Atlantic seaboard. All the states of the N. Atlantic and S. Atlantic divisions, except Rhode Island and Florida, have their surface diversified by these ranges. The second is the low plateau in the N. of Minnesota and Wisconsin, upon which rise tribs. of the Mississippi, of Lake Superior, and of the Red River of the North. The generally level character of the E. is well illustrated by the continuous navigability of the rivers, especially of those of the Mississippi system, and by the fact of the four great lakes—Superior, Michigan, Huron, and Erie—differing but 30 ft. in alt. between Duluth and Buffalo. Of the details of topography, attention may be called to (1) the multitude of small lakes (20,000 or more) of the granitic uplands of Minnesota, Wisconsin, Michigan, New York, and Maine; (2) of the series of 'finger' lakes of western New York of glacial origin; (3) the deeply indented rock coast of Maine, with its fringe of granitic islands so like the W. of Scotland; (4) the long sand coasts, islands, and lagoons that extend all the way from Massachusetts along the Atlantic and Gulf of Mexico; (5) the belt of swamp-lands from Virginia to Texas (Great Dismal, Alligator, Okefinokee, the Everglades, and the whole Gulf shore in Louisiana); (6) the 'bottom lands' of the lower Mississippi and many southern streams, the great fertility of which attract cultivators despite the danger of floods; (7) the long escarpment of granitic rock that borders the foot-hills of the Appalachians, S. and E., causing falls in the streams as they leave the upland for the alluvial tide-water country, and hence giving rise to a series of towns with water-power and navigation, from Montgomery (Ala.) to Trenton (N. J.); (8) the prairies, a region of exceptionally rich soil, and treeless, occupied by Illinois, Indiana, southern Michigan and Wisconsin, Iowa and Missouri; (9) the great longitudinal valley of the Appalachians, and the important cross valleys of the Mohawk, Delaware, Potomac, and James Rivs. (see **Appalachian Mts.**).

Geologically, also, there is a marked difference between the eastern and the western sections. The W. has been the scene of great disturbances, its newer Secondary and Tertiary strata have been greatly faulted, eruptions of lava have penetrated them and overflowed great areas, and erosion has taken place on a gigantic scale. Extinct volcanoes exist in the chief mountain ranges and on the plateau. Palæozoic rocks in places lie above those of later date. The Archæan area is very limited, mainly in the Big Horn, Wind R., Rattlesnake, Laramie, and Front Ranges. In the E. the Archæan area extends in a broad belt from Alabama to Pennsylvania, and occupies much of New England and New York (the Adirondacks). It extends W. in Canada, and portions are found both S. and W. of Lake Superior. The narrow slope to the Atlantic is nearly all filled by late formations, Eocene and Neocene; while in the great basin within the Archæan ridge lie mainly Palæozoic formations, Cambrian, Silurian, Devonian, and Carboniferous. Aqueous Pleistocene deposits extend from the mouth of the Ohio to the Gulf, and form its coast. Glacial deposits and the markings of glaciers exist in the NE., in the New England states, and throughout the basin of the St. Lawrence; and similar isolated areas exist in the Rocky, Cascade, and Sierra Ranges. The **climate** of the United States, in the matter of rainfall, divides the country into two halves, much as does the arrangement of the surface. In the western half lack of rain is the characteristic; in the E. an abundance, for the line that marks the fall of 25 in., which is a sufficiency, nearly coincides with that marking the contour of 2000 ft. in the middle of the country (near the 98th meridian). In the low-lying eastern section there is a yearly precipitation of from 25 to 62 in., heaviest along the Gulf of Mexico and the Atlantic; but on the plateau and mountains of the W., where W. winds come dry across the Cascade Range, the Sierras, and cool coast waters, it descends from 25 to even 2½ in. per year. About one-third of Washington and Oregon and northern California, lying W. of the mountains, and swept by winds from the warm drift of the Japan current, receive from 25 to 68 in. The variation of temperature is least in the S. and in the regions of heaviest rainfall; an average difference between July and January of less than 40° exists throughout the Pacific coast belt, in the Gulf states, and along the Atlantic coast to Philadelphia. In the interior and northern part the variation increases, reaching 66° in N. Dakota. The following table shows the rainfall and temperature of typical places:—

	Average Rainfall in ins.	Average Temp. Fahr.		Extremes of Temp.	
		Jan.	July.	Min.	Max.
Astoria (Or.)	86.3	..	..	..	..
San Francisco (Cal.)	22.8	50.4°	58.5°	29.0°	..
Yuma (Arizona)	2.9	53.2°	92.0°	22.0°	118.0°
Denver (Colorado)	14.9	27.8°	73.2°	- 29.0°	105.0°
New Orleans (La.)	63.8	54.1°	82.5°	23.0°	100.4°
Chicago (Ill.)	36.2	25.5°	72.9°	- 30.0°	106.0°
Duluth (Minn.)	32.5	11.9°	66.7°	- 41.0°	99.0°
New York (N. Y.)	43.8	30.3°	73.6°	-6.0°	100.2°
Key West (Fla.)	39.2	70.8°	83.9°	41.0°	100.0°

The **flora** of the United States is distributed in three clearly marked areas, whose boundaries are chiefly determined by the rainfall. In western Washington, Oregon, and California is an area chiefly occupied by conifers, in dense forests. The Douglas fir (*Pseudo-tsuga Douglasii*), the yellow pine (*Pinus ponderosa*), the sugar-pine (*P. lambertiana*), and many other pines. Here are also the Sequoias, the redwood (*S. sempervirens*), and the Big Trees (*S. gigantea*), famous for size, and known only in nine small groves in California. The Port Orford cedar (*Chamæcyparis lawsoniana*) and the Californian laurel (*Umbellularia californica*) are widely distributed. Several oaks have limited range. E. of the Cascade-Sierra Ranges begins the arid area, extending practically to the middle of the country, one of its typical plants, the cactus, being found as far E. as the 98th meridian. Of the Cactaceæ, the prickly pear (*Opuntia*) has the widest range. Another notable genus is the Cereus, of which the *C. giganteus* attains a height of 60 ft. Yuccas, mesquites, and the creosote bush are found in the hot SW.; throughout the great plateau area are the sage brush (*Artemisia tridentata*). On the Rocky Mt. Ranges various limited forest areas exist, including conifers, and also the aspen (*Populus tremuloides*), the scrub oak, black oak, and white oak. The E. and well-watered lowland half is still largely forested. The coniferous belt of Canada merges with a deciduous forest that contains the predominate genera. Such are the sugar-maple, many species of oak, the white oak (*Q. alba*), the red oak (*Q. rubra*), and the live oak (*Q. virens*)—all valuable in manufactures—and the chestnut oak (*Q. prinus*), of which the bark yields tannin. The ashes (*Fraxinus Americana, F. virida, F. pubescens*), the chestnuts, the birch (*B. lutea*), the hickory, black walnut, all furnish timber. Elms, beeches, lindens, locusts abound. In the warmer parts the tulip tree, and farther S. the magnolia, the palmetto, and even mangroves are found. Conifers in the E. include the valuable pines (*P. strobus, P. palustris, P. mitis*), the cypress, the spruce, balsam, hemlock, larch, and cedar. As to the **fauna,** see **America, North.**

Agriculture is the most important occupation, both in respect to gross value of the product and the proportion of the population directly connected therewith. The total value of farm products was in 1889, 2460 million dollars, an increase of 11.11 per cent. since 1880, when the farm population was about 44 per cent. of the total. The low and moist eastern half of the country is especially adapted to farming, about 60 per cent. of the surface of those states wholly E. of the 98th meridian being in farm land. Particularly favoured is Illinois, the prairie state *par excellence*, of which 90 per cent. is farmed; least of all Florida, with its extensive swamps, farms there occupying but 9 per cent. of the surface. Taken as a whole, the eastern agricultural region is the largest area in the world adapted to this pursuit. Three great crop belts are prominent: in the N., where the July temp. averages at least 68° F., wheat and oats predominate, with barley, hops, and potatoes; in the S., between the July isotherms of 78° and 86°, cotton almost excludes every other product, except rice in swamp-lands, sweet potatoes, and a little cane sugar. Between the wheat belt and the cotton belt, and merging into each, is the region of maize and tobacco. The gross amounts of farm produce have increased steadily with the occupancy of new lands to the W. In 1849 the W. boundary of wheat lands was at 81° W. long., in 1859 at 85° 24′, 1869 at 88°, 1877 at 89° 6′. The area in farms amounted in 1890 to 623 million acres, of which three-fourths are owned by the occupants. The yield per acre of grain has decreased, the use of new land leading to carelessness in farming. The average wheat crop is only between 12 and 13 bushels per acre; though in the eastern states, where more careful methods are practised, 35 bushels is not uncommon, and the same relation exists between the eastern and western yields in maize tobacco, and other crops. In quality, the wheat of the Red River valley in North Dakota holds highest rank. The maize crop rose from a yield of 1775 million bushels in 1880 to over 2000 million bushels in 1889; of this crop but 3 per cent. is exported, the greater part being used in the feeding of animals, especially swine. The cotton crop, increasing 65 per cent. from 1861 to 1887, stood in 1890 at 3628 million lbs. According to E. W. Hilgard, this amount could all be grown in the bottom-lands of the state of Mississippi alone if the overflows of the river were prevented, and better methods of cultivation used. The most valuable cotton land is the area of the islands along the coast of South Carolina, especially Edisto I., of which the long staple variety, in amount only about 5,000,000 lbs., is valued at twenty times the ordinary. Of the minor crops, rice is grown on the coast lowlands in South Carolina, Georgia, and Mississippi; hops in New York and the three Pacific states; flax, for the seed, in Minnesota, Kansas, Nebraska, Iowa, and Missouri. Sugar-cane is grown in Louisiana, sugar-beet in Nebraska, Kansas, New Jersey, and Illinois, and maple-sugar obtained in Vermont and New Hampshire. Oranges and other sub-tropical fruits are receiving increasing attention in Florida and California, and in the latter state the production of wine and raisins is steadily increasing. For statistics of the different states, see Table, p. 1634. In the western half of the country

grasing of sheep, cattle, and swine assumes greater importance than agriculture, a large part even of the crops grown being for fodder. Wild grasses of a hundred or more species, clovers, partly wild and partly, the cultivated alfalfa, and shrubs, such as sage (*Eurotia lanata*) and mesquite (*Prosopis juliflora*), resembling the carob of the Mediterranean region, furnish feeding. The capacity, however, of the W. is measured roughly by its proportion of the live stock of the country, which is about one half the sheep, one-third the cattle, and one-sixth the swine. (See *Monograph on Meat Production in United States*, by Clarence Gordon, census of 1880.)

Agriculture in the arid lands, of which the area in 1890 was stated to be 1,331,151 sq. m., is largely dependent upon irrigation, and its very limited scope is seen in the fact that only from one-tenth to one-fourth of one per cent. of the area of Montana, Wyoming, New Mexico, Arizona, Utah, Nevada, and Idaho is irrigated. At present irrigation is limited in its application and usefulness by the ill-defined condition of water rights, carelessness in taking titles, the temporary character of dams and ditches, largely constructed by individual farmers, and by the need of a more comprehensive system and well-defined plan, based upon a general survey of the region, and a determination of proper sites for storage reservoirs. At the outside, it seems that in any event only about 150,000 sq. m. of the arid lands can be redeemed. The total area of the United States may be apportioned as follows: farm lands in cultivation, 17.1 per cent.; forests, 25 per cent.; unoccupied and waste land, waters, and roads, 54.8 per cent. In Europe (for comparison) the percentages are: farms, 35.95 per cent.; forests, 31.29 per cent.; unoccupied, &c., 32.76 per cent. Forestry as a science is not practised, though several states have forestry commissions, and great waste and damage are common.

In **minerals** the United States is rich. Coal formations measure 215,000 sq. m. in the region E. of the Rocky Mts.; and it is estimated that an equally large area exists in the states of the Rockies and those of the Pacific coast. The most productive field is the Appalachian, which extends from Pennsylvania to Alabama inclusive; Pittsburg (Penn.) is the chief centre of production. The Central field is second; it lies in Illinois, Indiana, and Kentucky. Missouri and Iowa are the chief producers in the Western field. Anthracite comes mainly from Pennsylvania, Colorado and New Mexico yielding small amounts. Altogether, at least thirty-three states and terrs. contain coal. (See **Appendix,** p. 14.) The chief supply of iron ore of the United States is derived from the (largely magnetic) beds of Michigan, Minnesota, and Wisconsin, called the Lake Superior region. These yielded in 1892 over half the total output, which was shipped by the lakes chiefly to furnaces fed with coal from the Appalachian and Central fields. Red hematite is the chief ore of the second iron-field, near Birmingham (Alabama), and in close proximity to coal. The Pennsylvanian field, long first, is now third. Other important fields are in New York (around the Adirondacks), Virginia, Tennessee, New Jersey; and smaller amounts are mined in Missouri, Colorado, Oregon, Massachusetts, and other states. In the total amount of pig iron manufactured, the United States now stands first, having in 1892 nearly tripled the output of 1880. Gold is mined in California, Montana, Colorado, Idaho, Nevada, South Dakota, and in small amounts in Oregon, Washington, New Mexico, Arizona, and Utah; silver in Colorado, Montana, Utah, Nevada, and other states adjoining; quicksilver in California; copper chiefly in Montana (silver and copper together) and Michigan, two of the richest copper regions in the world, Arizona, and New Mexico; lead, chiefly with silver, in Colorado and other Rocky Mt. states, and in Missouri; and zinc, nickel, cobalt, and tin in small amounts. Petroleum, of which the United States is chief producer, is obtained from the W. border of the Appalachians, from Lake Erie to Tennessee, chiefly from Pennsylvania; small amounts from California and Colorado. In the great petroleum field natural gas is common, and is employed as fuel in industrial establishments, in houses, and for lighting streets. Salt is obtained from wells in New York, Ohio, West Virginia, and Michigan; rock-salt from Virginia, Louisiana, Texas, and all the states of the plateau W. of the Rockies, where also occur soda and borax. Ohio yields bromine. Rich fertilising materials are got from the phosphate beds of South Carolina and Florida, and the marls of New Jersey. Meerschaum and turquoises are obtained from New Mexico.

Manufactures.—The two great sources of power, coal and rivers, being both by far more abundant and accessible in the eastern half, determine broadly the distribution of manufacturing. Other causes working to the same end are the eastern location of the great iron-beds and cotton-fields, of the hard-wood forests, and much of the evergreen timber land, and also the great facilities for transportation, which favour the retention of the manufacturing population in the seats of early settlement, and the continuation of industries on their earliest foundations, as raw materials were brought from remote fields. The early development of manufacturing in New England was based on water-power (which is still used almost equally with steam E. of the Appalachians). Massachusetts, Rhode Island, Connecticut, New York, New Hampshire, and New Jersey, Pennsylvania, and Delaware lead in manufactured product *per capita*. The cities manufacturing the largest amounts are New York, Philadelphia, Chicago, Brooklyn, St. Louis, Boston, Cincinnati, Baltimore, San Francisco, Pittsburg, and Cleveland. In textiles the United States ranks second to England in total output. The chief seat of the cotton industry is in the New England states, at Lowell, Fall River, Lawrence (Mass.), Providence and Pawtucket (Rhode Island), and Philadelphia. A gradual development nearer the cotton-fields is noteworthy (from 1880 to 1890 nearly 150 per cent. increase in the Southern States), and it is deemed probable that the advantage of cheaper labour may compensate for skill, and enable the coarser grades to be made there successfully. About one-third of the American cotton crop is manufactured in domestic establishments. Woollen goods are made chiefly in the N. Atlantic states, carpets especially in Philadelphia (Penn.) and Lowell (Mass.). Silk, entirely of imported raw materials, is manufactured in Paterson (New Jersey), New York, and Philadelphia. The manufacture of iron and steel is concentrated in centres near the coal supply, chiefly in Pennsylvania (Pittsburg), Illinois (Chicago), and Ohio (Cleveland). The closely allied industry of machinery construction is of extensive development, since the scarcity of labour and great undeveloped national wealth gave stimulus to inventiveness. More than 2000 locomotives have been constructed in a single year, and a great variety of agricultural machines, water-wheels, and steam-engines. A large industry is connected with the change of grain and live stock into forms of food—flour at Minneapolis and St. Louis; dressed meats, lard, &c., at Chicago, St. Louis, and Kansas City (Kan.). Timber is derived chiefly from the coniferous forests of Washington, Minnesota, and Michigan.

Domestic commerce is greatly favoured by the extensive mileage of navigable waters [**Mississippi, Missouri, Ohio**], by the extensive coast-line on E., S., and W., by the great lakes and riv. St. Lawrence bordering on the N., and by the very general level or gradually sloping character of the surface, allowing cheap construction of railways. The chief **canals** are the Erie, from Lake Erie to the Hudson R., with branches to Lake Ontario and Lake Champlain, carrying grain, lumber, and coal chiefly; the Delaware and Hudson, and the Morris and Essex from Pennsylvanian coalfields to the Hudson and New York Bay respectively; the Chesapeake and Ohio, carrying coal from Cumberland (Md.) to Georgetown (D. C.). The Delaware and Raritan, connecting New York and Philadelphia, the Chesapeake and Delaware, connecting the bays so-named, the Albemarle and Chesapeake, from Chesapeake Bay to Albemarle Sound, form a line of inland navigation parallel to the coast. The Illinois and Michigan Canal, from Chicago to the Illinois R., may, if deepened, become an important water-way. The Saint Mary's ship-canal [**Sault Ste. Marie**] has long been of the greatest importance for the lake navigation. Of the rivers of the United States, the Mississippi, from St. Louis, the Hudson, and the St. Lawrence are of most importance in navigation, the great expansion of railways having rendered minor streams unimportant. The following table of the tonnage and freight upon the coast waters, lakes, and rivers shows the relative worth in 1889.

	Registered Tonnage.	Freight moved (Tons).
Atlantic coast . . .	2,794,440	77,597,626
Gulf of Mexico . . .	77,562	2,864,956
Pacific coast . . .	441,939	8,818,363
Great Lakes . . .	926,355	53,424,432
Mississippi Valley . . .	3,393,380	29,405,046

The railway mileage of the different states, &c., is shown in the other particulars in the table on the following page.

The **foreign commerce** is carried on largely through six cities—New York, with 51.14 per cent. (in 1890–91); Boston, 8.57 per cent.; Philadelphia, 5.38 per cent.; Baltimore, 4.91 per cent.; New Orleans, 7.48 per cent.; San Francisco, 5.27 per cent. (See also **Appendix,** pp. 3–5.) The chief exports are of farm products (cotton, meats, grain and flour, cattle, tobacco), petroleum, wood, iron, steel, copper, and leather, and their manufactures. In percentages—agricultural products, 73 per cent.; manufactures, 19 per cent.; forest products, 3.2 per cent.; minerals, 2.5 per cent.; fish, 0.7 per cent. Of the exports, over one-half went to Great Britain, chiefly cotton, grain, and meats. One-tenth of similar products went to Germany, and one-seventh to France. The leading imports were textiles, from Great Britain, France, and Germany; sugar, from Cuba, Hawaii, and Brazil; coffee, from Brazil, Mexico, and Java; chemicals, from Great Britain and Germany; iron and steel manufactures, from Great Britain, Germany, and Belgium; hides and leather, from Great Britain and Argentine; raw silk, from Japan, China, and France; besides tea, tobacco, indiarubber, fruits, jewellery, wines, and wood. Nearly all

[1] Production of anthracite in 1893 in Pennsylvania, 53,968,000 tons.

[2] Includes Idaho, Montana, New Mexico, Oregon, and Utah.

these items show a steady increase in recent years. **Money, Weights, and Measures.**—The standard coin of the United States is the gold dollar of 25.8 grains, .900 fine. Other gold coins are the eagle ($10), the half-eagle ($5), the quarter-eagle ($2½). The dollar (=49.32d., $4.866=£1) is divided into 100 cents, coined in bronze. A silver dollar also is issued, weighing 412.5 grains, .900 fine; and a subsidiary silver coinage, half dollars, quarter dollars, and dimes (=ten cents) containing 345.6 grains per dollar. As the mints are not open to the free coinage of silver, the currency of the country is on a gold basis; all customs and excise dues are payable in either metal, in legal tender notes, or silver certificates. The weights and measures are generally the same as the British, but the old Winchester bushel (0.96944 of an imperial bushel) is still used exclusively, and what is called a 'short ton' of 2000 lbs., as distinguished from the 'long ton' of 2240 lbs., is employed for many purposes. The cwt. is 112 or 100 lbs. The mile and its subdivisions are by a very small fraction (.000023) longer than the English measures.

The **revenue** is derived from duties on imports (about 44 per cent.); excise taxes on liquors, tobacco, &c. (about 34 per cent.); the postal service (15 per cent.); land sales, and minor sources. The standing **army** is limited by statute to 25,000 men. Military and naval service is voluntary. Each state has also a militia organisation; total militia, about 115,000. The total number of males of militia ages, 18 to 44, in 1890 was 13,230,168. Absolute freedom of religious opinion is allowed, and there is no state **religion** or any grant of public money for religious purposes. An approximate classification gives to the membership of the Roman Catholic church 10 per cent. of the population, Methodist 8 per cent., Baptist 7 per cent., Presbyterian 2 per cent., Lutheran 1.8 per cent., and to the Episcopalian, Congregational, Reformed Church, Friends, and Mormon from one-sixth to five-sixths of 1 per cent. The number of Jews has greatly increased of late by immigration from Russia. The general government does not control **education**, except in military and naval schools, and among some Indians. The universities are based on grants from separate states, or on private foundations, frequently denominational. The public school systems are supported by the states and by local taxation. Education has been aided by the general government through large land grants from the public domain; and there is a Commissioner of Education, who collates facts and publishes an annual report and numerous bulletins. Private schools are under no governmental control. Laws for compulsory attendance exist in most states.

Government.—From July 4, 1776, to March 1781 there was no written constitution, the government being carried on by the Continental Congress, which had been summoned to remonstrate with Great Britain; it acted under 'implied war powers.' On March 1, 1781, the Articles of Confederation established a government without any express division of powers, all of which were concentrated in a single organ, called the Congress of the United States. The weakness of this government, which did not have the right of taxing the states, proved the necessity for a strong federal government. A constitution, drawn up by a convention at Philadelphia in 1787, was ratified the following year. On April 30, 1789, Washington was inaugurated as president. Legislative power is vested in a Congress, consisting of a Senate and a House of Representatives. Each state has two senators, and representatives in proportion to population. Executive power is vested in a President, chosen by an Electoral College, to hold office for four years. Judicial power is vested in Districts Courts, Circuit Courts, a Circuit Court of Appeals, and a Supreme Court.

Historical Notes.—The United States came into existence on July 4, 1776, when the Congress of the thirteen colonies of Great Britain signed the Declaration of Independence, dissolving all political connection between them and the mother-country. The War of Independence ended in 1783 with the treaty of Paris, by which Great Britain surrendered her claim to the terr. S. of the Great Lakes between the Atlantic and the Mississippi. Disputes about boundaries and the impressment of American seamen occasioned a second war for independence in 1812; by the treaty of Ghent, 1814, a recognition of sovereignty was secured. In 1803 Louisiana was purchased from France for fifteen million dollars, an increase of 1,200,000 sq. m. W. and N. of the Mississippi. In 1819 Florida was purchased from Spain for five million dollars (59,268 sq. m.). In 1845 Texas, having declared its independence of Mexico, was annexed by Act of Congress, an addition of 262,290 sq. m. A consequence of this annexation was a war with Mexico, 1846–48; by the treaty of Guadalupe, Hidalgo, New Mexico, and Upper California were ceded to the United States (522,568 sq. m.) for fifteen million dollars. In 1853 a second Mexican purchase secured 47,330 sq. m. In 1846 the claim to 58,800 sq. m. N. of the Columbia R. was acknowledged by England. In 1867 Alaska was purchased from Russia for seven million dollars (577,390 sq. m.). The expansion of the national terr. involved the extension of slavery. This was opposed by the Northern States and upheld by the Southern, whose industrial prosperity seemed to depend on the system. In 1820 the Missouri Compromise admitted Missouri to statehood with slavery, but prohibited it for ever in all the remaining terr. of the United States N. of 36° 30′ N. lat. In 1860 the election to the presidency of Abraham Lincoln, the candidate of the Northern States, convinced the South of the threatening supremacy of the anti-slavery policy of the North. Eleven states—South Carolina, Mississippi, Florida, Alabama, Georgia, Louisiana, Texas, Virginia, Arkansas, Tennessee, North Carolina—seceded from the Union, and formed a new government, under the name of the Confederate States of America, with its cap. at Richmond (Va.). A war of four years resulted in the restoration of the Union, and in the addition of the thirteenth, fourteenth, and fifteenth amendments to the Constitution, abolishing slavery, giving citizenship to the negroes, and prohibiting refusal of the suffrage on account of race, colour, or previous condition of servitude. [**C. H. L.**]

Universales Mountains, name often applied to the mountains in SW. of prov. Teruel, Spain, source of the Tagus, Guadalaviar, and Jucar; highest point, Muela de San Juan. Alt. 5280 ft.

University Block, post-tn., S. Australia. See **Custon.**

Unja, tn., India, Baroda, 52 m. N. by W. Ahmadábád; probably the original seat in Gujarát of the Kadwa Kunbís, who now constitute about a third of the population. P. (1881) 10,500.

Unterkahen, vil., Ger., kgd. Würtemberg, Jagst circle, dist. Aalen. P. (comm.)<3000.

Unterlahn, circle, Prussia, on both sides of the Lahn valley.

Unter-Mals, tn., Austria, Tirol, dist. Meran. P.<4000.

Untermhaus, vil., Ger., princip. Reuss of the Younger Line, dist. and 1 m. W. Gera. P.<4000.

Unter Sachsenberg, vil., Ger., kgd. Saxony, circle Zwickau, dist. Auerbach. P.<3000.

Unterseen, tn., Switzd., cant. Bern, 1½ m. NW. by W. Interlaken. P. (comm.)<3000.

Unter-Tannowitz, tn., Moravia, dist. Nikolsburg. P.<3000.

Unter-Themenau, tn., Lower Austria, dist. Feldsberg. P.<3000.

Unter-Türkheim, vil., Ger., kgd. Würtemberg, Neckar circle, dist. Cannstatt. P.<4000.

Unterwalden, cant., Switzd., having N. the Lake of Lucerne, which separates it from cant. Schwiz, elsewhere bounded by cants. Lucerne, Bern, and Uri. It is subdivided into Ob dem Wald, coinciding approximately with the valley of the Aa of Sarnen (area 183 sq. m., P. (1888) 15,000, cap. Sarnen), and Nid dem Wald, coinciding with the valley of the Aa of Engelberg (area 112 sq. m., P. 12,500, cap. Stanz), nearly all Roman Catholics in both dists., and speaking the German language. Highest points—Titlis, at SE. corner, 10,625 ft.; Rothhorn, at SW. corner, 7715 ft.; Brisen, in E., 7895 ft.; and Pilatus, in NW., 7000 ft. The celebrated Brünig Pass (3395 ft.) connects the valley of Sarnen with that of Lake Brienz in cant. Bern. The climate is raw in the uplands, but mild and agreeable towards Lake Lucerne. Forests cover 24 per cent. of the area. Pasturage and dairy husbandry (especially cheese-making) are the chief employments. U. formed, with Uri and Schwiz, early in the 13th century, the nucleus of the Confederation. See **Switzerland,** table.

Unterwesterwald, circle, Prussia, on the Westerwald.

Unthank, par., Eng., Northumberland, 6½ m. NW. Rothbury. P. 8.

Unyamwezi ('country of the moon;' *mwezi*, 'moon,' according to Krapf), country in central Africa, between the Tanganyika and Victoria Lakes. It consists of widely extending plateaux, sloping gradually towards the N., which form the water-parting between the Nile (Victoria Nyanza) and the Congo (see **Tanganyika**, *Lukuga*). U. is one of the most fertile and densely peopled countries of equatorial Africa. The Bantu inhabitants of U., the Wanyamwezi, are engaged in agriculture and commerce; since the times of antiquity the Wanyamwezi have always had trade connections (ivory) with the Zanzibar coast. Tabora, where the trade routes from the Lake Victoria and Lake Tanganyika terrs. unite, is the trading centre of Eastern Central Africa. U. belongs to German E. Africa (*q.v.*). [**H. G. S.**]

Unyango, vil., Portuguese E. Africa, in 12° 50′ S., 35° 30′ E.

Unyanyembe, dist. of Unyamwezi, Ger. E. Africa, S. of 5° S., between 32° and 33° E., covered with innumerable villages surrounded by impenetrable hedges of euphorbia, with an extremely acrid juice. Chief town, Tabor or Kaze.

Unyika, a beautiful tableland in the S. of Ger. E. Africa, between Lakes Nyassa and Rukwa, in about 9° S., 33° E. *Proc. R. G. S.*, 1890, p. 729.

Uny Lelant, par., Eng., Cornwall, St. Ives div., at the head of St. Ives Bay, 3½ m. SE. by S. St. Ives, with a stn. (**Lelant**) on the G. W. R., PMT.O. (**Lelant**). P.<1500. See **Lelant.**

Unyoro, terr. in central Africa, situated NW. of Uganda (*q.v.*), between the Albert and Ibrahim Lakes. The S. parts are hilly, the N. level and covered with forests. The inhabitants of U., the agricultural Wanyoro, are, according to Emin Pasha, the oldest Bantu tribe of the Lake dist., and their language is not only spoken by the surrounding Bantu tribes, but also by the Wahuma (see **Uganda**), belonging to the Nuba race. U. forms part of British E. Africa. Area estimated at 32,000 sq. m. P. unknown. [**H. G. S.**]

Unzha, rivs., Russia, govts. Vologda and Kostroma. **1.** Rises in Vologda, flows SW., SE., and SW. (365 m.), joins Volga from left at Yurievets; receives Mezha (l. bk.) and Neya (r. bk.). Important artery for navigation (from Kologrio). **2.** Left bank trib. of Oka (80 m.).

Uotsu, maritime tn., Japan, isl. of Honshiu, 47 m. ENE. Kanazawa, 14 m. NE. Toyama, on E. side of Bay of Toyama; chief industries, weaving of cotton stuffs, and export of fish. P. 11,500.

Upsala, stn., Canada, prov. Ontario, on the C. P. R., 1080 m. W. Montreal.

Upsala, tn., Sweden, prov. U., 40 m. NNW. Stockholm. U. is divided into two quarters by a little river, the old quarter on the r. bk., with undulating hills, and the new quarter on the lower r. bk. Seat of an archbishop and the Royal Academy of Science, founded 1710. The cathedral, built in the Gothic style, between 1289 and 1435, is one of the most beautiful religious monuments in Scandinavia; it contains the tombs of King Gustavus Vasa, the naturalist Linnæus, and of several celebrated Swedish families—Sture, Brahe, Oxenstjerna. W. of the cathedral is the new University, built 1879–86, founded in 1477 by Sten Sture; it has more than fifty professors, and about 1700 students. The university has collections of zoological specimens, medals, and Northern antiquities, an anatomical museum, and observatory. S. of the university is the first library in Sweden, which counts amongst its greatest treasures the *Codex argenteus,* copy of the old Gothic translation of the four Gospels by Bishop Ulfila, and 7000 MSS. The botanical garden, with the statue of Linnæus, is near. E. of this garden is the castle, begun in 1548 by Gustavus Vasa. In the cemetery is the grave of the poet and historian Geijer (1783–1847). In former times U. was the centre of paganism, and there are remains of tombs, stones, and other primitive monuments of this epoch. The fire in 1702 almost entirely destroyed U. Until the 18th century the Swedish kings were crowned here. **Old U.** is a neighbouring village, 3 m. N.; it was the centre of worship of the Scandinavian gods, and replaced Sigtuna (*q.v.*) as the residence of the pagan kings. Near are three large barrows or burial mounds where, according to tradition, Odin, Thor, and Freya are buried. By the side of these Kungshögar (King's Mounds) is a smaller one called Tingshög, or 'the Hill of the (great) Popular Assembly.' Mean temp., yr. 40.3° F., Feb. 22.9°, July 61.5°; rfall. 21.16 in. P. (1873) 12,100; (1890) 21,500.

Ural, formerly **Yaik,** riv., SE. Russia, enters the Caspian Sea, and makes, on a large part of its course, the boundary between Europe and Asia (European Russia and Governor-Generalship of the Steppes); rises in govt. Orenburg, in the southern spurs of the Karatash Mts. (2082 ft.), flows S.; then, on meeting the Kirghiz plateau, bends W. at Orsk, and S. again at Uralsk; enters Caspian by many branches, forming a large delta; receives Sakmara (r. bk.), Ilek (l. bk.), and many large tribs. For the last 350 m. of its course considerable fishing, the Ural being the only large river in the world given up exclusively to fishing. Length, 1335 m.

Uralla, tp., New South Wales, Sandon co., 45 m. NE. Tamworth; gold-diggings in dist. P. <1500.

Ural Mountains, series of mts., Russia, extending from the Arctic Ocean nearly to the Caspian Sea, and generally considered as a boundary between Europe and Asia. The Urals are not the chain of mountains, nearly 1200 m. long, which they are often represented to be on maps, but consist of a succession of separate upheavals, some having a north-western direction and some a north-eastern, and reaching their maximum heights in a zone which lies, roughly speaking, from N. to S. They consist of the following parts:—**1.** The **Pai-khoi** (Samoyedic, 'Stony ridge'), or Coast Ridge (**Beregovoi Khrebet**), running NNW. and NW. along the shores of the Kara Sea, and continued in the isl. of Vaigach and the S. isl. of Novaya Zemlya. It is separated from the Ural by a marshy *tundra*, 30 m. wide. Its dome-shaped summits rise above the upper limit of tree vegetation; highest summit Vozai-pai, 1312 ft. **2.** The **Obdorsk** or **N. Urals** begin near Kara Bay (Konstantinov Kameñ, 68° 30′ N., 1490 ft.), and run SW. to 64° N. Stony and craggy, steep eastwards, gently sloping W. Have parallel secondary chains. Its summits reach 3600 ft. to 4370 ft., in 66° and 67°; Sablya (64° 47′ N., 5407 ft.), and Teplos-iz (63° 55′ N., 5540 ft.). Covered with dense forests in S.; inhabited by only a few hunters. **3.** The S. part of the Northern Urals, from 64° to 61° N., consists of broad plateaux (*parmas*) stretching NW. to SE., with broad flat valleys and dome-shaped flat summits, only exceptionally higher than 3000 ft. (Yang-tump, 62° 43′ N., 4166 ft.), densely clothed with forests, and uninhabited. **4.** The **Middle Urals,** 61° 0′ (Denezhkin Kameñ, 4238 ft.) to 55° 33′ N. (Tara-tash, 2800 ft.), of a very complicated structure. The **Bogoslovsk Urals,** in the N. portion of that division, seem to consist of several parallel chains running NE., and attain 3000 ft. to 4000 ft. in their summits (Konjakov Kameñ, 5135 ft.); while in the S. of Kachkanar (58° N., 2890 ft.) the Urals have the aspect of broad deeply cut swellings, with valleys running SE., and sloping westwards so gently that the water-parting between the rivers flowing respectively to Russia and to Siberia is only 1180 ft. on the Siberian highway, while Ekaterinburg stands only 300 ft. lower. Dense forests of coniferous and deciduous trees, fertile valleys (black-earth), well peopled, and containing the iron, copper, and gold mines of the Bogoslovsk, Goroblagodat, and Ekaterinburg mining dists. **5.** The **Southern Urals,** 55° 30′ to 51° 0′ N., consist of a series of parallel chains running NE. to SW., with an aggregate width of 65 m. (Ural-tau, Urenga, Iremel, Zigalga, Yaman-tau chains), which attain alts. of from 3375 ft. in Yurma, to 3950 ft. in Tagarma, 5040 ft. in Iremel, and 5400 ft. in Yaman-tau. Picturesque gorges across the chains; forests no longer continuous; rich pasture grounds in the valleys. Of these chains, the Ural-tau is continued further SW. in the Obshchiy Syrt. **6.** It appears also probable that the **Mugojar Hills** (S. of the great bend of Ural R.) and the Jaman-tau (50° N.) must be considered as a continuation of the Ural upheavals. **Geology.**—The main axis of the upheavals consists of a broad strip of granites, syenites, diorites, and porphyries, with subordinate Laurentian and Huronian gneisses and slates; this axis is invariably in the E. part of the mountain region, and is covered, on the Siberian slope, directly by Tertiary and Quaternary deposits; and on the W. slope by Silurian, Devonian, Carboniferous, Permian, and Triassic rocks, manifoldly folded. In climate and distribution of vegetation, the Urals are an important boundary. **Mines and Metallurgy.**—

The Urals are very rich in all sorts of metals and minerals. Gold is obtained both from veins (less than 3000 lb.) and diggings (about 18,000 lb.); platinum, about 7000 lb.; copper, about 50,000 cwts. Iron ore is widely spread, and two-thirds of all blasting furnaces of the Russian Empire are in the Urals, yielding one-half of the iron (about 4,000,000 cwts.) obtained in Russia. Coal-mining of recent origin; nearly 10,000,000 cwt. of salt are extracted. Agriculture and cattle-breeding are very prosperous in Middle and S. Urals, the latter being rapidly colonised by immigrants. Two railways cross the Urals, one from Perm to Ekaterinburg and Tyumeñ, and the other from Samara to Ufa, Zlatoust, and Omsk. The chief cities in the Urals are: Ekaterinburg, Nizhne-Taghilsk, Zlatoust, Neviyansk, Neivinsk in Perm, Votkinsk and Izhevsk in Vyatka, all having over 10,000 inhabitants.

Uralsk, prov., SE. Russia, belonging to the Governor-Generalship of the Steppes, in the N. of the Caspian Sea; has Astrakhañ on W., Samara and Orenburg on N., Turgai and Lake Aral on E., and Transcaspian Terr. on S. Fertile in N., where the slopes of Obshchiy Syrt descend to Ural R., and on the Mugojar Hills—the remainder being dry, sandy, and clayey steppes and deserts, large portions of which are below the level of the ocean. Numerous lakes and old lagoons of the Caspian. Watered by Ural, the two Uzeñs, and the Emba. Climate extreme, with cold winters and hot and dry summers, during which the grass in the steppes is burned. Average temp. at Uralsk, yr. 39.5° F., Jan. 3°, July 73°; yearly rfall. only 7 in. The population consists of (1) the Ural Cossacks (about 90,000, Great Russians), who occupy a separate terr., form a distinct *voisko*, and possess valuable fisheries at the mouth of the Ural, which are allotted every year among the separate villages; (2) Russian immigrant peasants, whose numbers are rapidly increasing (15,000 in 1883, now much more); and (3) Kirghizes, of whom over 400,000 are nomads, and confine themselves to cattle-breeding. Active trade in cattle and its produce, especially with the Kirghizes. Exports of fish, corn, cattle, tallow, hides. Divided into four dists.: Uralsk, Kalmykov, Guriev, and Embinsk (chief town, Temirsk, a small port on Caspian). Area, 139,168 sq. m. P. (1883) 525,330; (1889) 559,550.

Uralsk, cap. of above prov., on Ural R., where it bends to the S., 210 m. WSW. Orenburg, 51° 12′ N., 51° 22′ E.; is about to be connected by railway with Saratov. Considerable trade with Kirghiz Steppe in cattle, sheep, and animal produce, exported to Russia, and manufactured goods imported. Till the Pugacheff rising the chief town of the region was **Yaitskiy Gorodok,** situated 30 m. higher up the Ural R. Alt. 358 ft. Mean temp., yr. 38.2° F., Feb. 4.8°, July 69.6°. P. 20,030.

Uralskoye, tn., Russian Central Asia, now **Irgiz** (*q.v.*).

Urama, dist., Brit. New Guinea, at the mouth of the Fly R. (S. ct.), about 142½°–144° E.

Uramar, or **Oramar,** tn., Turkey in Asia, vilayet and 85 m. SSE. Van, sanjak Hekkiari. P. 3000 (Kurds).

Urambo, vil., central Africa, Unyamwezi, in 4° 40′ S., 32° 14′ E., 125 m. E. Ujiji, station of the London Missionary Society. Alt. 3775 ft.

Uran, tn., Brit. India, Bombay, dist. Thána, on Karanja I., 9 m. SE. Bombay; has large customs-house and spirit-stores at Mora, the port 3 m. N., and numerous distilleries. P. 11,400; Hindus, 9600.

Urana, postal-stn., New South Wales, U. co., 57 m. NW. by N. Albury; an irrigation scheme is projected. P. <1500.

Urandangie, tp., Queensland, Piturie co., in 21° 35′ S., 138° 24′ E. P. <1500.

Uranga, or **Lulanga,** large vil., central Africa, Congo Free State, on l. bk. Congo just below the confluence of the Lulongo, in about 0° 38′ N., 18° 22′ E.; station founded here in 1884. P. 5000.

Uranga, riv., Africa. See **Ulanga.**

Uras, tn., Sardinia, prov. Cagliari, 15 m. SSE. Oristano. P. <3000.

Ura-tyube (Ora-tepe), tn., Russian Turkistan, prov. Syr-daria, 39° 55′ N., 68° 59′ E., 63 m. SW. Khojend, on highway from Fergana to Jizak; a citadel on a hill close by. P. 11,600.

Uravakonda, tn., Brit. India, Madras, dist. Anantápur, 32 m. ESE. Bellary. P. 8600; Hindus, 7100.

Uravell, riv., Russia, Transcaucasia, govt. Tiflis, dist. Akhaltsykh, r. bk. trib. of Kura. Several Georgian and Kurd villages in its gorge, as also the **Uravell** mineral waters, 41° 33′ N., 43° 3′ E., similar to Schwalbach.

Urazova, tn., Russia, govt. Voronezh, 76 m. due E. Kharkov; large fair; entrepôt for and trade in corn. P. 5000.

Urbalacone, vil., Corsica, arr. and 14 m. SE. Ajaccio; has sulphurous springs, recently discovered, with thermal establishment 1 m. SE. Alt. 1260 ft. P. <2000.

Urbana, city, U.S., Illinois, Champaign co., 61 m. NW. Terre Haute (Ind.); seat of the Illinois industrial university. P. <4000.

Urba'na, city, U.S., Ohio, Champaign co., 42 m. W. by N. Columbus, with Swedenborgian university; manufactures of rolling-stock, agricultural and other machinery, carriages and waggons. P. 6500.

Urbania, tn., Italy, The Marches, prov. Pesaro, on riv. Metauro, 34 m. ENE. Arezzo; has pottery manufactures. U., which was called *Castel Durante* till 1624, was celebrated, especially in the 16th century, for its pottery. Bramante, the architect, was born in the neighbourhood in 1444. P. (comm.) 5300.

Urbeis, vil., Ger., govt. Alsace-Lorraine, circle Rappoltsweiler, 10 m. WNW. Kolmar; has cotton and silk weaving. P. (comm.) <5000.

Urbino, tn., Italy, The Marches, prov. Pesaro, 23 m. S. by E. Rimini; has silk-mills, oil-presses, brick-kilns, and manufactures of majolica. The ducal palace, *chef-d'œuvre* of the Renaissance, was begun in 1468 by Frederick Montefeltro. The house in which Raphael was born (1483) has, since 1872, become the property of the Raffaello Academy. U. was from the 13th to the 17th century the seat of a duchy belonging to the Montefeltro family, then to the Rovere family, and was united to the states of the Church in 1631; since 1860 it has formed a part of the kingdom of Italy. Alt. 1480 ft. Rfall. yr. 39.3 in.; in Oct.–Nov. 9.5 in. P. (comm.) 17,200.

Urbion, Pico de, mt., Spain, on the border of provs. Logroño and Soria, 37 m. SW. Logroño.

Urchfont, par., Eng., Wiltshire, Devizes div., 12 m. E. Trowbridge, 4 m. SSE. Devizes stn., P.O.; 6285 ac. P. <1000; eccles. par. (**U. with Stert**) P. <1500.

Urchilla, isl., Caribbean Sea. See **Orchilla.**

Urchub, tn., Servia. See **Prokuplje.**

Urcos, vil., Peru, dep. and 31 m. SE. Cuzco, cap. prov. Quispicanchi. P. (dist.) <5000.

Urda, tn., Spain, New Castille, prov. and 35 m. SSE. Toledo, dist. Madridejos. P. (comm.) <4000.

Urdingen, tn., Prussia, Rhine Prov., on the l. bk. of the Rhine, circle and 4 m. E. by N. Krefeld. P. <5000.

Ure, riv., Eng., Yorkshire, N. Riding, rising in the extreme W. of the Richmond div., and flowing W. and SW. through the N. Riding, past Hawes, Askrigg, Masham, Ripon, and Boroughbridge, until ½ m. below Myton-on-Swale it unites with the Swale to form the Ouse.

Ure, short riv., Scot., Argyllshire, flows W. into the Creran on the N. of Benderloch.

Urega, Uregga, Bulega, or **Malega,** vast region in the E. of the Congo Free State, between the equator and the lat. of the N. end of Lake Tanganyika, bounded on the S. by Manyema.

Uregare, par., Ire., co. Limerick, bars. Coshma and Small-county, on riv. Morning Star, 2 m. SE. Bruff; 4844 ac. P. <1000.

Urenui, post-tn., New Zealand, North I., Clifton co., 20 m. ENE. New Plymouth. P. <1500.

Ureparapara, isl., S. Pacific, N. of Vanua Lava, Banks I.

Urès, tn., Mexico, cap. state Sonora, on l. bk. of the Rio Sonora, in about 29° 20′ N. P. 8000.

Urfa, tn., the ancient *Rohas,* the *Edessa* of the Crusaders, Turkey in Asia, 75 m. SW. by W. Diarbekir, commanded by a fortress or castle founded in the time of Justinian; has flourishing groves and fertile gardens; at the foot of the castle is a copious spring, the ancient *Callirhoe.* Has remains of buildings of the Middle Ages, including ruins of the palace of the princes of Courtenay, suzerains of Edessa in the time of the Crusades. Vilayet Aleppo, cap. sanjak U. P. 55,000; Moham. 40,800; Christians, 13,800 (Cuinet).

Urfahr, tn., Upper Austria, on the l. bk. of the Danube, opposite Linz. P. 6400.

Urga (name of doubtful origin, according to some from Mongol *ugo,* a palace; according to others a corruption of the Mongol name **Hurac** (an enclosure or encampment), in full **Bogdo Lama en Hurac** (enclosure or encampment of the supreme lama), also called **Bogdo Khure,** or **Bogdo Khuren,** tn., N. Mongolia, in about 104° 40′ N., 107° E., situated in a basin surrounded by hills, on the N. side of the plains of Gobi; the sacred city of the Mongols, and an important centre of trade, several routes across the Gobi converging to this point, whence a different mode of carriage is adopted for convenience across the hills and through the valleys to the N. The principal trade route is that from Kalgan, N. China (about 600 m. SE.), to Maimachin and Kiakhta (about 200 m. N.). Alt. 4300 ft. Mean temp., yr. 29.0° F., Jan. 17.2°, July 64.5° P. (Mongol town) about 6000–7000; Chinese town, same distance to the E., about 5000 (Gilmour).

Urgel, fortified tn., Spain. See **Seo de Urgal.**

Urgel, Ulanos, de, plain, Spain, prov. and stretching E. and S. of Lerida. The Urgel Canal (1853–60) takes the water from the Segre at a spot 2 m. below Pons, and carries it over aqueducts and through tunnels, across the Llanos de U., returning to the same river again below Lerida after a course of 90 m. Its network of irrigation channels is more than 2000 m. in length. It also affords 10,000–12,000 horse-power for industrial purposes.

Urglin, par., Ire., N. co., bar. and 3 m. E. Carlow. P. <750.

Urgnano, tn., Italy, Lombardy, prov. and 7 m. SSW. Ber-

gamo, in the plain between the Serio and the Adda; has silk-mills. P. (comm.) <5000.

Urgub, tn., Asia Minor, vilayet Konia, 28 m. W. by S. Kaisarieh and Constantinople, on a deeply eroded tuff plateau, the valleys and gorges of which separate variously shaped hills (many of them conical), the sides of which are pierced with openings leading to artificial caves, formerly the dwellings or sepulchral chambers of aboriginal inhabitants.

Urgut, fort, Russian Turkistan, dist. Zerafshan, 26 m. SE. by E. Samarkand. Alt. 3710 ft. P. 6000.

Uri, cant. Switzd., enclosed by cants. Unterwalden, Schwiz, Glarus, Grisons, Ticino, Valais, and Bern. It consists of the valley of the Reuss and its affluents, sloping down from Mount St. Gothard on its S. border. Other notable heights are Uri Rothstock in the W. (9620 ft.), Galenstock (11,802 ft.), and Dammastock (11,920 ft.) in the SW., and Oberalpstock (10,926 ft.) in the E. The climate is raw in the upper valley of the Reuss and in the side valleys, but mild towards Lake Lucerne. More than one-half of the surface consists of barren rock, or is covered with glaciers. Cattle-rearing is the principal branch of industry, cheese-making and bee-keeping being subsidiary branches. Chief town, Altdorf. U. united with Unterwalden and Schwiz in the 13th century to form the Swiss Confederation. It was the theatre of war between the French and the allied Austrians and Russians in 1799. Area, 415 sq. m. P. (1888) 17,300, nearly all Roman Catholics, and speaking the German language. See **Switzerland,** table.

Uriage, tn., France, dep. Isère, arr. and 6 m. ESE. Grenoble; has a hot sulphur spring, known to the Romans, now greatly valued for children. Charming situation. Alt. 1630 ft. P. <2000.

Urias, Sinus, gulf, Italy. See **Manfredonia.**

Uriconium, ancient tn., Eng. See **Wroxeter.**

Urie Ness, cape, Scot., Shetland Is., in the NW. of Fetlar I., in 0° 55′ W.

Urigi, lake, central Africa, to the W. of Lake Victoria Nyanza, crossed in the N. by 2° S.

Rocha	4,280	22,767	5.3
Salto	4,863	33,567	6.9
San Jose	2,687	30,214	11.2
Soriano	2,192	37,162	16.9
Tacuarembo	8,074	25,838	3.2
Treinta y Tres	3,686	17,773	4.8
Total	72,110	728,447[2]	10.1

Orography and Hydrography.—U. is a country of undulating hills, representing the southernmost slopes of the Brazilian plateaux, surrounded by the alluvial deposits of the estuary of La Plata. The principal river is the Uruguay (*q.v.*), on the W. frontier, and all the middle of the country is occupied by the basin of the chief trib. of that river, the Rio Negro-Tacuarembo-Yi, the W. and NW. limits of which are Sierras

[1] From *Statesman's Year-Book.*

[2] Estimate based on the census of 1891, which showed a population of 708,000, but which is believed to have been so defective as to yield a total about 7 per cent. below the true number. See below.

Sant' Anna (1600 ft.) and Haedo (1310 ft.); the NE. Acegua (the highest, 2036 ft.), E. and SE., Cuchilla Grande (1470 ft.), prolonged southwards by a spur which reaches 1500 ft. in Minas; all the other streams are small (*arroyos*, 'rivulets'). Numerous lakes along the E. ct. (Merim, Mangueira, &c.), and vast swampy regions (*Banados* de la India Muerta, &c.). **Geology.**—The N. and central tracts are Archæan (granite and gneiss, covered with eruptive rocks) and Palæozoic (carboniferous in some points). In the middle riv. Negro, along riv. Uruguay, and to the E. slopes, Tertiary formations appear. Blocks of syenite remain *in situ*, with a false appearance of glacial remains in the middle of the deep sediments of sand and Pampean clay which surround the older rocks, and in which the great fossil mammifers (*Megatherium*) have been discovered. The **minerals** include gold (at Cuñapiru, Peru, San Gregorio, Tomas Cuadra), lead (at Minas, Maldonado, Melo, Arerungua, Sarandi, Yi, Corrales, Monte Averia), manganese (on the Rio Batovi), copper (at Minas, Maldonado, Melo, Godoy, Negro), tin (at Nico Perez), silver (at Yi, Molles), iron (at Penitentes, Rocha), coal (at Las Cañas, Yaguari, Melo), lignite, peat (*Banados*), graphite (at Arerungua, Rosario), amethysts, agates, opals (*Piedras Chinas;* at Salta, Catalan Hills). Numerous mineral waters (Piriapolis, &c.). The **climate** of central U. is very excessive, irregular, and dry. Mean temp. increases one degree (from 62° to 67°) for each degree of lat. between 35° and 30°. There are two distinct seasons, hot (Nov.–April), with the SE. trade winds, cold (May–Oct.). Rains most abundant during the transition from one season to the other. Storms in June with SW. winds (*Pamperos*), or in November with SE. (*Su-estada*). Montevideo, 10 yrs., mean temp. 62° F., Jan. 73°, July 51.8°; max. 105°, min. 21°; rfall. 43 in. in 36 days; relative humidity, 77.3 per cent. On the N., down to the middle riv. Negro, the **flora** is still Brazilian and tropical (*Araucaria Brasiliana, Cocos Yatai, Maté*), with many medicinal, dye, gum, resinous plants. On the S. it belongs to the Pampas region (from the lower Rio Negro–Yi), with grasses of the genera Melica, Bouteloa, Stipa, or merely the solitary *Ombu* (*Ficus ombu*). The algarrobo (*Prosopis*), 30–50 ft. high, quebracho (*Loxopterygiuus*), *Paulinia timbo, Celtis tala*; opuntia and agave are met with everywhere. Poplars, pomegranates, olive trees, eucalyptus, all the fruits and vegetables of S. Europe have been very successfully introduced. The **fauna** (Chilean sub-region (?) of neo-tropical region) is Brazilian, N., and Argentine, S. The American ostrich (*Rhea Nandu*) is now reared in large numbers. The riv. Uruguay, the Plata, and Atlantic coast are very rich in fishes (Maldonado fisheries). The seals (*Otaria*) are diminishing (Lobos Is.). **Ethnography.**—Down to the 18th century the Charruas (Guarani (?), allied to the Minuanes of Parana, resisted the Spaniards, who had easily subjugated the Yaros, Bohanos (riv. Negro mouth), and the Chanas (riv. U. isls.). The population has a good deal of native blood (*chinos*). Some negroes since 1702, but in course of extinction. Slavery abolished in 1830. Thirty per cent. of the actual population are foreign immigrants (Basques, Italians, Brazilians, Argentines, French, English, Germans). **Agricultural Products.**—The principal centres of production are to the SW. of a line from Paysandu to Durazno and Maldonado, and above all around Montevideo, the cap., but there are many new centres (*colonias*) all over the country. The characteristic feature is the vast pastures (*estancias, chacras*); the rearing of cattle (six millions), horses (half a million), sheep (thirteen millions; the merino reared since 1832), and the industries (salt and dry meat extract, dry blood, bones, hides, leather, wool, horse-hair) dependent thereon, the important centres of which (*saladeros*) are on the littoral from Montevideo to riv. U. (Fray Bentos, Liebig Extract of Meat Co.; English since 1864.) Tobacco and wine are grown at Salto, Paysandu, Montevideo. **Means of Communication.**—Railways (since 1869) radiate now from two centres: (1) From (*a*) Montevideo (branch to San José) to Yi, Negro, Tacuarembo valleys, Rivera on the Brazilian border, cross from S. to N. the whole republic; (*b*) Santa Lucia, upper Yi (Nico Perez) valleys, towards riv. Tacuari (Melo) and the NE. border; (*c*) by the littoral to Minas; (2) From riv. U.; (*a*) Paysandu to Salto, branching (*b*) to Santa Rosa; and (*c*) Santo Eugenio (Brazilian border). The principal ports are: (1) Montevideo, Colonia (on the La Plata); (2) (*a*) Higueritas or Nueva Palmira, Carmelo, Independencia, Paysandu, Salto; (*b*) Constituition, Santa Rosa (all on the riv. U.); (3) Soriano, Mercedes (riv. Negro); (4) San Salvador; (5) Paloma, Coronilla, Castillos Grandes, Bucco, Ensenada del Ingles. Regular steamers to Brazil, N. America, Canary Is., the Pacific, Africa, Europe. **Commerce.**—Exports, animal products, *piedras chinas* (Germany). Imports, raw materials, articles of dress, cereals, tobacco, spirits, machinery. Exports and imports, 1862, $17,000,000; 1872, $34,000,000; 1882, $40,000,000; 1892, $46,000,000. Trade principally with Great Britain, then France, Brazil, Argentina, United States, Germany. **Public Institutions.**—Constitution of 1830. President indirectly elected for four years. One senator elected by each department for six years. One deputy (representing 3000 inhabitants) for three years. Army of 25,000; small navy. Roman Catholic, state religion; all others tolerated. Metric system since 1862, but old Spanish measures still in use. Silver *peso*, or *dollar*=4s. 3d. **History.**—The first European explorations and settlements belong to the period 1516–74. In 1680 Colonia de Sacramento was founded by the Portuguese. In 1724 Montevideo was founded by the Spaniards. In 1810–17 took place the war of independence against the Portuguese and Spaniards. In 1824 U. was incorporated to Brazilian Empire under the name of Cisplatina prov., but gained its independence in the war of 1825–28. P. (1825) 80,000; (1883) 520,000; (1891) 750,600; (1892) 800,000. [**J. B. R.**]

Uruguay, riv., S. America, rises in the coast chain Serra Geral, in the Brazilian prov. of Rio Grande do Sul, less than 50 m. from the sea, its upper branches being the Rio das Pelotas, das Canoas, and Marombas. The river flows WNW., separating the Brazilian provs. of Rio Grande do Sul and Santa Catharina; at the confluence of the Peperi Guassu on the right, a little E. of 54° W., it turns to the SW. and forms the frontier between the Argentine Republic and prov. Corrientes on the right side, and the state of Rio Grande do Sul and the U. Republic on the left. All the rivers of the W. half, as well as of the N. of state Rio Grande do Sul, are tribs. of the U., the more important streams being the Ijuhy Guassu, the Piratinim, the Icabaqua, and the Ibicuy-guassu. From U. itself the river receives the Quaraim (N. frontier stream), Arapey, and Rio Negro. It joins the Rio de la Plata in 34° 12′ S. by a mouth 9 m. wide. The largest ships ascend 373 m. from the sea. Navigable to Paysandu for sea-going ships, and to Salto (31° 20′ N.) for coasting vessels. A railway runs past the rapids from Salto to Santa Rosa, whence river steamers can ascend to Uruguayaña in Brazil. Total length, 931 m.

Uruguay, tn., Argentine Republic. See **Concepcion del U.**

Uruguayana, tn. and important fortress, Brazil, state Rio Grande do Sul; celebrated for the battle in 1817 which decided the independence of the Uruguay Republic against the Portuguese. Here, too, in 1865, the Paraguayan general, Estigarribia, was obliged to surrender to Dom Pedro II., Emperor of Brazil. P. 8000.

Uruki, riv., central Africa. See **Ruki.**

Urulga, vil., Russia, E. Siberia, prov. Transbaikalia, 83 m. SW. Nerchinsk, on Ingoda R. P. <2000.

Urumea, small coast riv., Spain, Basque Provs., rising in the mountains of Navarre, flows NNW. into the Bay of Biscay at San Sebastian. Length, 37 m.

Urumia, or **Daria-Shah** ('royal lake'), lake, Persia, prov. Azerbaijan, a landlocked basin, with waters of intense salinity. It is shallow (greatest depth, 46 ft.) and studded with numerous islands, particularly towards the S. The Aji Chai, Jaghatu, Tatau, and Zula are its chief feeders; it has no visible outlet. At various places near the SE. shore so-called springs yield coloured marbles (frequently known as Maraga marble, from a town near the quarries), which are in great repute for ornamental purposes. Alt. 4100 ft.; length, 80–90 m.; breadth, 20–30 m.; area, 1600 sq. m.

Urumia, Urumiyah, shortened by the Christians into **Urmia,** or **Urmi** (Curzon), in Armenian **Vormia,** tn., Persia, prov. Azerbaijan, a few miles from the W. shore of Lake U., 65 m. SW. by W. Tabriz.

Urumtsi, the **Tihwa-chou** of the Chinese, tn., China, 320 m. ESE. Kulja, chiefly important for its strategic position, commanding the only practicable defile for troops with cannon from Dzungaria into E. Turkistan; it is the headquarters of the Chinese government in Turkistan. The town is surrounded by double walls; it appears to consist of nine or ten distinct small fortified towns. Also called **Urumchi.** P. 10–30,000.

Urundi, region, central Africa, at N. end of Lake Tanganyika.

Urungu, or **Uiungu,** the country round the S. end of Lake Tanganyika, Brit. S. Africa.

Urungu, riv., central Asia, western Mongolia, flows WNW. into Lake Ulyungur.

Urun-Islámpur, municip., Brit. India, Bombay, dist. Sátára, 93 m. W. by N. Bijápur. P. (1881) 8900.

Urup, one of the Kurile Is., in the N. Pacific Ocean, immediately N. of Iturup, in 45° 39′ N., 149° 34′ E.; mineral products comprise copper, sulphur, and quartz. Off its N. side are four small islands, producing a good supply of vegetables for shipping. Length, NE. to SW., 50 m.; breadth, 12 m.

Urupskaya, Cossack vil., Russia, N. Caucasia, prov. Kubañ, dist. Labinskaya, 42 m. WSW. Stavropol, on lower course of **Urup R.,** a l. bk. trib. of Kubañ, 10 m. above their junction. P. 9665.

Ururi, tn., Italy, Abruzzi, prov. and 20 m. NNE. Campobasso. P. <4000.

Urus-martan, vil., Russia, N. Caucasia, prov. Terek, dist. Groznyi, in Chechnya. P. 9600.

Urussanga, small riv., Brazil, Santa Catharina, entering the Atlantic in 26° 50′ S.

Urvölgy, vil., Hungary. See **Herrengrund**

Uryankhes, Turkish tribe inhabiting NW. Mongolia, in the upper course of the Yenisei (Bei-khem, Ulu-khem, and Bom-kemchik), and nomads in W. Sayans, Russia. P. about 45,000.

Uryupinskaya, Cossack vil., Russia, prov. of Don Cossacks, chief town of dist. Khoperskiy, on l. bk. of Khoper, 273 m. by highway NE. of Novocherkask; connected by branch railway (22 m.) with Alexikovo stn. on railway to Tsaritsyn. Great fair for cattle, cottons and other textiles, hides, sheep-skins, and metals (returns, £600,000–£1,000,000). Mean temp., yr. 42.8° F., Jan. 12.6°, July 71.6°. P. 9600.

Urzhum, dist. tn., Russia, govt. and 127 m. S. Vyatka; trade in linen exported. P. 6400.

Us, riv., E. Siberia, govt. Yeniseisk, Minusinsk region, r. bk. trib. of Yenisei; rises in Ergik-targak-taiga, as Amyl, from Lake Chornoye. Length about 170 m. Soyot population on its banks.

Usagara, mountainous and fertile country in Ger. E. Africa (*g.v.*), W. of the Zanzibar coast. It is inhabited by an agricultural Bantu tribe, the Wasagara. U. is well adapted for agriculture (maize, millet, bananas) and cattle-rearing. Iron ores occur at various places. [**H. G. S.**]

Usagre, tn., Spain, Estremadura, prov. and 56 m. SE. Badajoz, dist. Fuente de Cantos; has mercury mines. P. (comm.) <3000.

Usambara, mountainous or hilly country in N. of Ger. E. Africa, N. of the Pangani, and bounded on the SW. by the Mkomasi, trib. Pangani, between 38° and 39° E., crossed by 5° S.

Usambiro, dist., equatorial Africa, to the SW. of Lake Victoria Nyanza; station of Church Missionary Society.

Usango, dist., Africa. See **Urori.**

Usaungula, stn., Ger. E. Africa, Usaramo, 74 m. WSW. Dar-es-Salaam.

Usch, tn., Prussia, prov. and 44 m. N. by W. Posen, circle Kolmar-in-Posen, on the riv. Netze, opposite the influx of the Küddow. P. (comm.) <3000.

Uscie Solne, tn., Austria, crownland Galicia, on riv. Raba, 12 m. NNE. Bochnia. P. <3000.

Usedom, tn., Ger., prov. Pomerania, isl. of U., 14 m. W. by S. Swinemünde. At the diet in 1128, Christianity was adopted by the Pomeranians. P. <2000.

Useguha. See **Uzeguha.**

Useke, vil., Ger. E. Africa, Ugogo, in 6° 22′ S., 34° 58′ E.

Useless Bay, S. Chile, on W. side of Tierra del Fuego, crossed by 53° 20′ S., 70° 0′ W.

Useras, tn., Spain, Valencia, prov. and 14 m. NW. Castellon de la Plana, dist. Lucena. P. (comm.) <4000.

Ushak, tn., Asia Minor, 55 m. NE. by E. Alashehr; noted for its manufacture of carpets, which are the finest sold in Smyrna. P. 15,000.

Usha-ling, pass, China. See **Wuso-ling.**

Ushant (French **Ouessant**), isl., France, dep. Finistère, 27 m. W. by N. Brest. At the NW. extremity is a lighthouse, in 48° 28′ N., 5° 8′ W., visible 21½ m. Steep coasts, but there is a small fishing port, **Ouessant** (*g.v.*). Area less than 20 sq. m. P. <3000.

Ushaw Moor, stn., Eng., Durham, on the NE. R., 4 m. W. Durham, PM.O., and PMT.O. (**Ushaw**).

Ushenish Lighthouse, headland, Scot., on E. ct. of S. Uist I., Outer Hebrides, Inverness-shire.

Ushkub, Turkey. See **Üsküb.**

Ushmughzai, pass, Brit. Afghanistan, 19 m. NE. by N. Quetta, now traversed by the railway through the Nari Pass.

Ushnagh, Hill of, Ire., in the SW. of co. Westmeath, 10 m. WSW. Mullingar.

Ushnu, or **Ushnuye,** tn., Persia, Azerbaijan, about 23 m. W. by S. of the SW. corner of Lake Urumia. Alt. 4500 ft.

Ushtaranas, tribe in Brit. Baluchistan, dwelling in the Suláiman Mts., about 31° 15′–30′ N.

Ushuaia, maritime vil., Patagonia, cap. Tierra del Fuego terr., in U. Bay, 54° 52′ S.; has good anchorage; abundant water-supply; land suitable for agriculture and pasturage; cultivation of potatoes, turnips, and even strawberries. An English Protestant mission has been established here since January 1869. Mean temp. (7½ yrs., 1876–82), yr. 42.0° F., Jan. 52.2°, July 30.8°.

Usia, tn., Brit. India, NW. Provs., Ghazipur dist., in 25° 25′ N., 83° 45′ E. P. (1881) 5400.

Using-hu, lake, China, in the SW. angle of prov. Shansi, where the Hwang-ho changes its direction from S. to E., in the midst of a desert plain covered with salt crystals.

Usini, tn., Sardinia, prov. and 5 m. S. Sassari. P. <3000.

Usk, contributory parl. bor., par., and market-tn., Eng., Monmouthshire, on the riv. Usk, which is celebrated for its salmon, 6½ m. E. Pontypool, on the G. W. R.; has ruins of an old castle; the church was originally attached to a Benedictine nunnery founded in the 13th century. PMT.O. Market-day, F. P. <1500. See **Monmouth.**

Usk, par., Ire., co. Kildare, bar. Narragh and Reban East, 6 m. S. Kilcullen. P. <500.

Uska, tn., Brit. India, NW. Provs., dist. Basti, 120 m. N. Benares; centre of trade with Nepál. P. 6600; Hindus, 7500; Moham. 900.

Uskane, par., Ire., co. Tipperary, bar. Lower Ormond, 2 m. NE. Borrisokane; 7656 ac. P. <750.

Uskavagh, Loch, inlet, Scot., Inverness-shire, in the E. of Benbecula I.

Üsküb, or **Uskub** (Turkish), Servian **Skoplje** (**Skoplye**), tn., Turkey in Europe, cap. prov. Ü., on the Vardar, 39 m. ESE. Prizren, one of the most important centres of communication in Turkey; has a citadel, and Roman aqueduct. U. was, under the Romans, the cap. of Dardania. Birthplace of the Emperor Justinian. In 1180 the town was taken by Stefan Nemanya, king of Servia, who lost it again. It was reconquered in 1279 by king Stefan Dushan and made the cap. Alt. 950 ft. P. 22,000; Servians about 11,000; Turks 6000 (G.).

Üsküb, tn., Turkey in Europe, prov. and 9 m. E. Kirk-Kilise, 53 m. S. Burgas.

Usküdar, tn., Turkey in Europe. See **Skutari.**

Uslar, tn., Prussia, prov. Hanover, circle U., 15 m. NW. by W. Göttingen. P. <3000.

Uslon, Upper and **Lower,** two vils., Russia, govt. and 10 m. SW. Kazañ, on opposite bank of Volga. P. 1600 and 1625.

Usmañ, dist. tn., Russia, govt. and 117 m. by rail SW. of Tambov. P. 8200.

Usmawo, dist., central Africa, on the S. of Lake Victoria Nyanza, in about 33° 5′–40° E.

Uso'ga, or **Busoga,** country, central Africa, in British sphere of influence, on N. shore of Lake Victoria Nyanza, W. of Kavirondo, and separated by the Nile from Uganda still further W. On the lake low and swampy, inland broad open valleys alternating with wooded gently sloping rising grounds. A country of great beauty and fertility. Inhabited by people (Wasoga) of a negroid type.

Usolîye, vil., Russia, govt. and 110 m. N. Perm; important river-port on Kama. P. 8000.

Usolîye, salt-works, E. Siberia, govt. and 45 m. below Irkutsk, on the Angara; convict prison. P. <5000.

Usongora, country, central Africa, in British sphere of influence, between Mount Ruwenzori and the N. shore of Lake Albert Edward. Inhabitants (Wasongora) of a rather light colour, akin to the Wahuma.

Uspallata, vil., Argentine Republic, prov. and 40 m. WNW. Mendoza; in the neighbourhood are copper-mines and old lead-mines now abandoned. Alt. 6400 ft. Mean rfall. 7.4 in.

Uspallata Pass, pass across the Andes, in 32° 50′ S., taking its name from the village of U.; alt. 12,330 ft. A metre-gauge railway is now being made across the Andes at this place, and is to cross the chain in a tunnel 3.15 m. long. Alt. at Argentine entrance, 10,425 ft.; at summit, 10,460 ft.; at Chilean entrance, 7295 ft.

Uspenskaya, Cossack vil., Russia, N. Caucasia, prov. Kubañ, 68 m. NW. Stavropol, on Kulala R., and on old highway from Rostov to Stavropol. P. 8140.

Usquert, vil., Holland, prov. and 13 m. N. by E. Groningen. P. <2000.

Usquil, vil., Peru, dep. Libertad, prov. and 9 m. NNE. Otusco. P. (dist.) 8300.

Ussat-les-Bains, vil. and thermal stn., France, dep. Ariège, arr. Foix, 2 m. SSE. Tarascon, on r. bk. of the Ariège; opposite the village above the left shore of the Ariège is the grotto of Lombrives or des Echelles, one of the most remarkable in Foix, celebrated for the large quantity of human bones mixed with other objects which have been obtained. Alt. 1605 ft. P. <2000.

Usseglio, comm., Italy, Piedmont, prov. and 25 m. NW. Turin; rich in iron, cobalt, and copper. P. <2000.

Ussel, tn., France, dep. Corrèze, 41 m. WSW. Clermont-Ferrand, cap. of arr.; has iron ore and granite quarries; distillery. U. was the cap. of the duchy of Ventadour. Alt. 2135 ft. P. <4000.

Usselby, par., Eng., Lincolnshire, E. Lindsey div., 15½ m. SW. Great Grimsby, on the M. S. & L. R. P. <250.

Ussie, Loch, lake, Scot., Ross-shire, 3 m. WSW. Dingwall.

Ussie Valley, P.O., Ross and Cromarty, 3 m. NW. Conon Bridge.

Usson, thermal establishment, France, dep. Ariège. See **Rouze.**

Usuun, name of a race of Turkish origin, still found in the names of certain Kirghiz and Uzbeg tribes.

Ust, Russian. See *Ustiye.*

Ustarits, tn., France, dep. Basses-Pyrénées, arr. and 7 m. S. by E. Bayonne. P. <2000.

Ust-Bukhtarminskaya, vil., Russia, W. Siberia, 167 m. ESE. Semipalatinsk, at junction of Bukhtarma with Irtysh.

Uster, tn., Switzd., cant. and 8 m. E. by S. Zürich; has cotton and silk mills, manufactures of electrical apparatus, and iron foundries. P. (comm.) 7000.

Ustica, isl., Mediterranean, belonging to Italy, off N. ct. of Sicily, 40 m. NNW. Palermo. Soil volcanic and highly fertile, producing corn, wine, and olives. Length, 4 m.; breadth, 2½ m. P. 2000.

Ust-Ilga, vil., E. Siberia, govt. and 200 m. NNE. Irkutsk, on l. bk. Lena; boat-building. P. <1000.

Ustiye, Russian, 'mouth' of a river. In its abbreviated form of *Ust* appears in many names.

Ust-Kamenogorsk, dist. tn., Russia, prov. and 135 m. SE. Semipalatinsk, on r. bk. Irtysh, on highway to Bukhtarma; formerly a fort; trade in cattle. Alt. 1140 ft. P. 6550.

Ust-Katavskiy, iron-works, Russia, govt. and 125 m. (by road) ENE. Upa, at junction of Katav and Yurezañ. P. <5000.

Ust-Kazanskaya, port of and 3 m. from Kazañ, at junction of Kazanka with Volga.

Ust-Kut, Crown salt-works, E. Siberia, govt. Irkutsk, at junction of Kuta with Lena, 172 m. SW. Kirensk; convict prison. P. <2000.

Ust-Labinskoye, Cossack vil., Russia, N. Caucasia, prov. Kubañ, at junction of Laba with Kubañ, 37 m. ENE. Ekaterinodar. P. 5430.

Ust-Labinskaya, peasant vil. close by. P. 1260.

Ust-Maiskaya, vil., E. Siberia, prov. and 207 m. SE. Yakutsk, 60° 25′ N., 134° 30′ E., on the Aldan R., on bridle path to Okhotsk. P. <1000.

Ust-Medvyeditskaya, Cossack vil., Russia, prov. of Don Cossacks, chief town of Medvyeditskiy dist., 265 m. NNE. Novocherkask, on r. bk. Don. P. 14,520.

Ust-Nitsa, or **Ust-Nitsinskaya,** vil., W. Siberia, govt. Tobolsk, 40 m. NW. Tyumeñ, at the junction of Nitsa with Tura; head of highway to Irbit. P. <5000.

Ust-Olenskoye, vil., E. Siberia, govt. Yakutsk, Vilyuisk region, 72° 57′ E., 122° 15′ E., at mouth of Olenek.

Ustou, vil., France, dep. Ariège, arr. and 14 m. SSE. St. Girons; to the S. are rich beds of lead, silver, copper, and zinc, not worked on account of the difficulty of transport. Below are two grottoes, in which bones and objects of the stone age have been found; near one of these grottoes is a spring said to be miraculous. P. <2000.

Ustron, tn., Austria, Silesia, on the Vistula, 43 m. ESE. Troppau; health resort. P. <5000.

Ust-Stryelka, Cossack vil., Russia, 1 m. from junction of Shilka with Arguñ, head of Amur, 53° 19′ N., 121° 50′ E. P. <1000.

Ust-Sysolsk, dist. tn., Russia, govt. and 580 m. NE. Vologda (*viâ* Ustyug and Yarensk), on the l. bk. Sysola, 2 m. above its junction with Vychegda. Alt. 328 ft. Mean temp. (51 yrs., 1817–67), yr. 32.5° F., Jan. 4.6°, July 61.6°. P. <5000.

Ust-Tsylma, vil., Russia, govt. Arkhangelsk, 460 m. ESE. Mezeñ, at junction of Tsylma with Pechora. P. <2000.

Ust-Uda, vil., E. Siberia, govt. and 132 m. N. Irkutsk, on Uda R. P. <2000.

Ust'-Urt, plateau, nearly 92,000 sq. m. in area, and 600 to 1000 ft. high, Russia, Transcaspian Terr., between the N. Caspian and Lake Aral; it falls by an abrupt slope (Chink) to the deserts of the Transcaspian. See **Transcaspian Territory.**

Ust-Yansk, vil., Russia, E. Siberia, govt. Yakutsk, dist. and NNE. Verkhoyansk, at the entrance of the Yana into Arctic Ocean, in 70° 55′ N., 136° 30′ E. Average temp., yr. 0.5° F., winter −35.5°, spring −0.2°, summer 46.5°, autumn 1.0°. P. < 1000.

Ust-Yes, Tatar vil., E. Siberia, govt. Yeniseisk, dist. and 126 m. SW. Minusinsk, at junction of Yes with Abakan. P. <5000.

Ustyug, vil., E. Siberia, govt. Yeniseisk, 27 m. from Krasnoyarsk, on Ustyug R. P. <2000.

Ustyug Velikiy, dist. tn., Russia, govt. and 300 m. NE. Vologda, on highway to Arkhangelsk, on Sukhona, 2½ m. above its junction with the Yug; old colony of Novgorod; manufacture of brushes, &c.; and export of bristles, of boxes, hosiery. Brisk trade in corn, hemp, and flax, bristles, butter, &c. Mean temp. (13 yrs., 1840–52), yr. 34.4° F., Jan. 4.7°, July 66.0°. P. about 10,000.

Ustyuzhna, dist. tn., Russia, govt. and 257 m. E. Novgorod, on Mologa R.; building of barges. P. 7250.

Usu, or **Ushiling,** pass, China, same as **Wusoling.**

Usuguru, isl., in the NE. of Lake Victoria Nyanza, central Africa.

Usui, region, central Africa, to the W. of the SW. end of Lake Victoria Nyanza.

Usuki, tn., Japan, E. ct. Kiushiu I., 110 m. E. by N. Nagasaki. P. 11,400.

Usukuma, region, central Africa, to the SE. of Lake Victoria Nyanza, crossed about the middle by 3° S., and 44° E.

Usulutan, tn., Central America, Salvador, 70 m. SE. by E. San Salvador.

Usumacinta, riv., Central America, rises in Guatemala, near the E. frontier, between 16° and 17° N., flows NW. through the Mexican provs. of Cheapas and Tabasco, and by two arms joins the Grijalva or Tabasco near its mouth. It is also connected by a navigable channel with the Lake Terminos, 50 m. further to the E. Length, 400 m.

Usur Hosur (Usúr, census), tn. and fort, Brit. India, Madras, dist. Salem, 22 m. SE. Bangalore; the remount depôt for the Madras army is 4 m. from Usúr. Alt. 3120 ft. P. 5800; Hindus, 5100.

Usuri, vil., central Africa, Unyamwezi, in 4° 43′ S., 33° 58′ E.

Usuri, large riv., Russian Manchuria, r. bk. trib. of lower Amur, is formed by the junction of Fu-dzi and Sando-ho, in Sikhota-alin Mts., to the NE. of Vladivostok; flows NW., receiving from left the Daubi-ho, and after a course of 90 m. the Sungacha, which flows from Lake Hangka (Khangka) through fertile prairies. From this spot the U. is regularly navigated, and flows NE., first through a hilly fertile region, then through wide marshy tracts dotted with lakes, and again through a chain of wooded mountains which run NE. from Manchuria across the Usuri and along the lower Amur. It joins the Amur in 48° 16′ N., 134° 53′ E., at the vil. of Kazakevicheva, although its mouth is usually considered to be at Khabarovsk. It forms the boundary between Chinese Manchuria in W. and Russia (Maritime Prov.) in E., from its junction with Mureñ. Receives several rivers, Im, Bikin, Khor (For, or Por), from right, Sungacha and Mureñ from left. A line of Cossack villages has been established along the banks of the U. and up the Sungacha to Lake Hangka; but the inhabitants find great difficulties in the thick forests of its lower course, and the marshes of its middle course, especially during the torrential rains of July and August, and the inundations which follow. Only the upper course villages (Sungacha to Ima) are prosperous. A railway from Vladivostok to Khabarovsk is being built along the U.; in 1895 it had reached the mouth of Ima R. Total length of U. and Daubi-ho, 478 m.

Usuri Bay. See **Peter the Great Gulf.**

Usutu, riv., S. Africa, flows E. from Swazi-land into Amatonga-land, where it joins the Pongola to form the Maputa, in about 26° 50′ S.

Usworth, Great and Little, par., Eng., Durham, in the NE. of the Chester-le-Street div., 4½ m. SE. Newcastle, with a stn. (**U.**) on the NE. R., P.O. (**U.**), and PM.O. (**U. Colliery**). P. <5000.

Uta, vil., Sardinia, prov. and 9 m. WNW. Cagliari. P. <2000.

Utah, one of the Rocky Mountain states of the American Union, bounded E. by Colorado, S. by Arizona, W. by Nevada, N. by Idaho. Wyoming cuts out the NE. corner from its otherwise rectangular area, leaving it rather smaller than Great Britain. Settled by the Mormons under Brigham Young a year before the Mexican treaty of 1848 transferred it to U.S. Desire to retain control over the predominantly Mormon population delayed its admission as state till 1894. The surface has a general elevation of some 6000 ft. The Wasatch Mts., forest-clad to the snow-line, with several peaks exceeding 13,000 ft., divide U. into a lesser W. and a larger E. part. In the E. the Uintah Mts., forming the N. boundary from Wyoming, slope S. in a series of elevated plateaux, broken, like the mountains, by the remarkable river cañons. Here are the Uintah and Uncompahgre Indians' reservations, most of which are about (1894) to be sold to settlers. Broken mountains occupy the S. The W. is part of the Great Basin, and chiefly desert, but the strip adjoining the mountains is fertile under irrigation, and chief seat of population. The strip extends from N. border to S. of the freshwater Utah Lake, rich in trout, whose waters run N. by the Jordan River to the Great Salt Lake (*q.v.*). Near the E. coast of this lake are Salt Lake City, the capital, and Ogden, the only cities over 8000. Gentile majorities control these, but the farmers are Mormon, both here and in the few other cultivable valleys. Hay and wheat are the chief products, but unimportant; cattle-raising is possible on plains unfit for cultivation. Climate of different parts varies, rainfall slight, winters usually moderate, but dry hot summers, with frequent cold nights [**Salt Lake City**]. The death-rate from respiratory diseases is high, but that from consumption very low. Rocks of all ages occur, and minerals abound. The gold yield is considerable; the silver mined, 1890–93, averaged $10,484,744 yearly, an amount only Colorado and Montana surpass. Distance of markets prevents the working of cheaper minerals. Carboniferous strata yield no coal, but large areas of later rocks in N. and SE. contain it. Iron and copper occur, the yield of lead is large, and of asphalt important. Salt is obtained from the **Great Salt Lake** borders and elsewhere. Area, 84,970 sq. m. P. 207,900. See **United States,** table. [**W. S.**]

Utah, co., U.S., Utah, crossed by 40° N. and 112° W., and containing U. Lake, a body of fresh water lying S. of Great Salt Lake, to which it is trib. by the river Jordan; abounds in fine trout; 4500 ft. above Salt Lake. Length, 25 m.

Utahs, Utes, or **Yutes,** tribe of the Shoshone Indians, occupying a large reservation in the SW. of Colorado; they number about 1900, and live chiefly by hunting and fishing.

Utaia, more correctly **El-Utaia,** 'the little plain,' oasis, Algeria, 113 m. SW. Constantine.

Utai-shan, China. Same as **Wutai-shan.**

Utakamand (Ootacamund, census), municip., Brit. India, Madras, cap. dist. Nilgiri Hills, 36 m. NNW. Coimbatore; situated on an extensive plateau in an amphitheatre encircled by hills; has an artificial lake. It is the chief sanitarium of the Madras Presidency, and has become the summer headquarters of the government of Madras. A large number of coffee-planters live here. Has the Lawrence Asylum, botanical gardens, the

government cinchona plantations, the Hobart Park, and recreation grounds. Mean temp., yr. 55° F., Jan. 48°, May 59°; rfall. (11 yrs.), yr. 45.8 in., April–Oct. 39.4 in. Alt. 7228 in. P. 15,100; Hindus, 9100; Christians, 4200.

Utopia Lake, Canada, S. of New Brunswick, Charlotte co., near the Bay of Fundy, into which it is drained.

Utraula, municip., Brit. India, Oudh, dist. Gonda, 94 m. ENE. Lucknow; has magnificent groves of mango-trees. P. (1881) 5800.

Utrecht, tn., Netherlands, cap. prov. U., 35 m. E. The Hague, at the place where the Kromme Rijn becomes the Old Rhine, sending out in the N. a canalised arm, the Vecht, and S. the Vaartsche Rijn Canal, which ends at Lek. Has manufactures of cloth, woollen goods, silk, velvet, carpets, pottery, plate-glass, organs, fire-engines, chemical products, carriages, needles, tobacco, salt, gin, and tiles. Seat of a Catholic archbishopric; also of the archbishopric of the Old Catholics. U. is protected by powerful forts, and forms the strategic outpost for Amsterdam on the land side. Its cathedral, built 1254–67, on the site of an old church, was partially destroyed by a hurricane in 1674; it contains the tombs of several bishops. The fine tower, built 1321–82, is 340 ft. high, and has forty-two bells; on its summit is a meteorological observatory. Near the cathedral is the university, founded 1633, with more than 500 students; it has a natural history museum, physiological and physical laboratories, and a rich library with 110,000 vols. and 1500 rare manuscripts. The Pope's House, occupied by the administration, perpetuates the memory of Adrian VI., once provost of U., where he was born, 1459. Amongst the museums of the archbishopric are those of the Society of Arts and Sciences, with a collection of pictures of the U. school, and of antiquities. U. was known to the Romans as *Trajectus ad Rhenum,* and to the Frisians and Franks as *Witteburg.* At the end of the 7th century it became the residence of the powerful prince-bishops. In 1559 the bishopric was made an archbishopric. At U. the union of the seven Netherland provs., which threw off the Spanish yoke, was formed, Jan. 29, 1559; here, too, in 1713, the treaty of peace between France, Spain, England, and Holland was concluded, which put an end to the War of the Spanish Succession. U. was occupied by the French in 1672 and 1795. Mean temp., yr. 47.7° F., Jan. 34.3°, July 63.1°; rfall. (7 yrs.), 30.4 in. P. (1889) 86,000.

Utrecht, tn., S. African Republic, cap. of U. dist., about 135 m. N. Pietermaritzburg (Natal).

Utrera, tn., Spain, prov. and 20 m. SE. Seville, cap. dist. U. The environs are rich in grain, olives, and fruits; has salt springs. P. (comm.) 15,000.

Valais (Ger. **Wallis**), cant., Switzd., in the S., consisting of the upper valley of the Rhone, shut off by the Bernese Alps from cants. Bern and Vaud in the N., and by the Valais or Pennine Alps from Piedmont in the S.; having at its E. extremity cants. Ticino and Uri, and on its W. the French dep. Haute-Savoie. It forms an immense trough, 80 m. in length, and 2 m. wide at the bottom, the mountains on each side being among the highest in Europe; and it is exposed to furious torrents and destructive avalanches. The lateral valleys, the Zermatt and others, on the S. side of the Rhone, are renowned for their beauty, and well cultivated. The climate is rigorous in the higher parts, but mild and agreeable in the lower valley. Cattle-rearing and agriculture are the chief branches of industry. But there is some rearing of silkworms, glass-making, sugar manufacture, and extraction of iron, lead, zinc, and coal. Mineral springs and baths at Leuk, Saxon, Morgias, &c. V. became a member of the Swiss League in the end of the 18th century. Sion is the cap. Under Napoleon I. V. formed the dep. Simplon. Area, 2026 sq. m. P. (1888) 101,900, nearly all Roman Catholics, two-thirds (in the W.) of whom speak French. See **Switzerland,** table.

Valence d'Agenais, tn., France, dep. Tarn-et-Garonne, on the lateral canal of the Garonne, 15 m. ESE. Agen, arr. and 10 m. W. Moissac; has tanning and feather-dressing. P. <3000.

Valencia, par. and isl., Ire., off W. ct. co. Kerry, bar. Iveragh, S. of Dingle Bay, separated from the mainland by a strait 1½ m. in breadth, with a stn. (**Valentia Harbour**) on the G. S. & W. R. It forms the most western harbour in the Brit. Isles, in 51° 55′ N., 10° 19′ W. On it are slate quarries. Here is the terminus of three submarine Atlantic cables belonging to the Anglo-American Telegraph Co., the first two completed in 1866 (when the first, which broke in mid-Atlantic in 1865, was repaired and completed), the third laid in 1880; length to Heart's Content, Newfoundland, the W. landing-place of all three, 1852 m. Difference in long., 2 hours 51 minutes 56 seconds. On Cromwell Point is a lighthouse. Length of isl., 7 m.; breadth, 2 m. Mean temp. (20 yrs.), yr. 51.0° F., Jan. 45.0°, Aug. 59.4°; rfall. (25 yrs.), yr. 56.6 in. PMT.O. 6371 ac. P. 2050.

Valencia, old Moorish kingdom between the Mediterranean (164 m. of coast, 37° 52′–40° 32′ N.) and the E. slopes of the lower terrace of the Castillian plateau from the riv. Cenia to the Monte La Baro. V. retained the name of kingdom and her special laws till 1807, and was divided into three provs. (V., Alicante, Castellon). The inhabitants speak, like the Catalonians, the old Limousin. The country is very mountainous except in the littoral. The principal rivers (Guadalaviar-Turia, Jucar-Cabriel) have very fertile valleys (Huertas de V., Dutilla, Alcira, Ajamesi, Orihuela, La Plana de Castellon), irrigated by the Moorish hydraulic works (*cannas, acequias, azudas*), and producing all kinds of cereals and fruits (orange, olive, almond, mulberry, fig, carob beans, pomegranates; plain of Elche noted for its date-palms); sugar-cane is cultivated; much rice in the swampy lands (very unhealthy); wines (Alicante, La Torre, Vinaroz, Benicarló); grapes and raisins (Denia, Javea, Gandia). Important industrial centres at Alcoy (cloth, cigarette paper), Novelda, Castellon, Benilovilla (silks, esparto ropes and tissues). The minerals include lead, copper (Alicante, Castellon), iron, silver, cobalt (Castellon), coal (Alicante), mercury (Sierra de Espadan, Jativa). Chief ports, Alicante, Valencia-Gráo, Benicarlo, Castellon, Nules, Torre Blanca, Vinaroz. See **Spain.** [**J. B. R.**]

Valencia, the ancient Roman *Valentia Edetanorum*, tn., on riv. Guadalaviar, 3 m. from the sea, in the centre of the most famous *huerta* of Spain, very well irrigated and of inexhaustible fertility, in 38° 29′ N., cap. of prov.; seat of military captain-generalcy; seat of archbishopric (Majorca and Minorca, suffragans), of a university, and colleges of industry, medicine, fine arts; has two libraries (one, 50,000 vols., gallery of paintings); manufactures of silks and velvets. The harbour of El Gráo, at the mouth of the river (26 ft. deep at entrance), has no bar. Vessels load and discharge by means of lighters. Built by Decimus J. Brutus (136 B.C.), and anciently cap. of the Edetani. Conquered by the Goths (413), by the Moors (712). Cap. of independent kingdom (11th century). Conquered by Cid Rui Diaz (1095), by Aragon (1239). Mean temp. (15 yrs.), yr. 62.9° F., Jan. 50.8°, Aug. 78.1°; mean rfall., 17½ in. in 45 days. P. (1860) 107,700; (1887) 170,800.

Valencia, co., U.S., New Mexico, crossed by 35° N. and in the middle by 107° W.

Valencia, reference from Tacarigua Lake.

Valencia, tn., Venezuela, Carabobo, 90 m. W. by S. Carácas. Founded in the middle of the 16th century. V. has several times disputed the rank of cap. with Carácas. A battle fought in 1821 in the plain of Carabobo, SW. of the tn., decided the independence of Venezuela. Half-way between V. and its port, Puerto Cabello, are the thermal springs of Las Trincheras, nearly 194° F. (Hesse-Wartegg). P. (1873) 28,600; (1881) 36,100.

Valencia de Alcántara, fort and tn., Spain, prov. Cáceres, cap. dist. V., near the frontier of Portugal, 28 m. SW. Alcántara, with old walls and a castle. Three or four miles NNW. are some remarkable Roman ruins, remains of a temple of Diana, an aqueduct, &c. P. (comm.) 8200.

Valencia de Don Juan, tn., Spain, prov. and 23 m. S. Leon, cap. dist. V.; has ferruginous springs. P. (comm.) < 3000.

Valencia del Ventoso, tn., Spain, Estremadura, prov. and 47 m. SE. Badajoz, dist. Fuente de Cantos. P. (comm.) < 5000.

Valencia de Mombuey, tn., Spain, prov. Badajoz, dist. Jerez de los Caballeros, on the frontier of Portugal, 48 m. ESE. Evora. P. <2000.

Valenciana, vil., Mexico, state and suburb of Guanajuato; celebrated for its mines; silver-mine 2040 ft. deep, but unfortunately since the War of Independence filled with water.

Valenciennes, fortified tn., France, dep. Nord, cap. arr. V., 18 m. NE. Cambrai; has various academies and museums of antiquities, art, and natural history. The manufacture of lace, to which V. has given its name, has for the last fifty years ceased to be carried on in the town itself, which now produces lawn, cambric, hosiery, metallic cables, &c. Other industries are carried on in the suburbs. The church of Notre Dame is resorted to by pilgrims. V. fell into the hands of the Spaniards in the 16th century, was besieged by Turenne, and delivered by

Condé 1655, and in 1677 was seized by Louis XIV. Birthplace of Baldwin, Count of Flanders, died 1206; the chronicler Froissart, died 1410; the painter Watteau, died 1721. Comm. P. (1872) 24,600; (1891) 28,700.

Valetta, maritime tn., port, and cap. of Malta, on NE. ct.; has great transit trade and large depôt of coal; manufactures silk; headquarters of the British fleet in the Mediterranean. As a port of call inferior to few in the world. The town is mainly built on a rocky penin., projecting NE. between Great and Quarantine Ports; the ground is so uneven that the narrow streets are often connected by stairs. Both the city and the two harbours are defended by walls and forts, hewn in part out of the solid rock. Has four dry docks, the largest of which has a length of 558 ft. on bottom, and a depth on sill at entrance high water ordinary springs of 35½ ft. The powerful fortifications were in great part constructed by the Knights of St. John after they removed to Malta in 1530, though the city of V. was not founded until 1566. It was occupied by the French in 1798, and passed to England in 1801. P. 62,000. See **Malta.**

Valladolid, former name of Morelia (*q.v.*), Mexico, state Michoacan.

Valladolid, tn., Mexico, Yucatan, 100 m. E. by S. Mérida. Its fine cathedral and magnificent Franciscan convent were pillaged by the Indians in 1848. P. 14,000.

Valladolid, a city of Spain, cap. prov. V., on l. bk. of the Pisuerga, at the influx of the Esgueva, 100 m. NW. by N. Madrid; has active and varied industries, including iron foundry, wool weaving, manufactures of cloth, &c., and a great trade in grain. V. was the cap. of Spain before Madrid; the old walls have been replaced by fine promenades. The cathedral, begun in 1585, has not been finished. Other public buildings are the old Dominican convent, now a prison, and the college of San Gregorio, the king's palaces, and the Museum, with some of Rubens' pictures and statues of Berruguete and Hernandez, the University (1346). The Grand Square (Plaza Mayor), built under Philip II., was the scene of the memorable *auto da fé* under Philip II. in 1559. V. was almost entirely destroyed by fire in 1561, and rebuilt by order of Philip II. It was sacked by the French in 1808. Here Columbus died in 1506. Birthplace of King Philip II., died 1598, and of the poet José Zorilla, died 1893. Area of prov. 3043 sq. m. Mean temp., yr. 53.3° F., Jan. 38.0°, Aug. 71.3°; mean rfall. (14 yrs.), yr. 11.85 in. Valona, tn., Turkey in Europe. See **Avlona.**

Valoria la Buena, tn., Spain, prov. Valladolid, cap. dist. V., 15 m. S. Palencia. P. <2000.

Valparaiso, chief seapt. of Chile, cap. prov. and dep. V., 62 m. WNW. Santiago, on the Pacific, in 33° 1′ S. It stands on the (S.) foreshore, runs up the hills behind, and extends NE. towards the seaside resort of **Viña del Mar** (*q.v.*). There are no buildings of note save the public offices. There are, however, arsenals, shipbuilding yards, and a naval college. A statue to Lord Cochrane adorns one of the squares. V. imports some 70 per cent. of the total imports of the country—cottons, woollens, hardware, iron, coal, carpets, tea, boots, beer, and spirits, to the value of £8,500,000. The exports—nitrate, copper, silver, skins, wheat, gold, &c., amount to about one-fifth of the total for all Chile. The bulk of the trade is done with England. V. stands on an open bay and has no wet docks. During the prevalence of N. winds in winter the shipping in the bay (which on other sides is well sheltered) is exposed to heavy seas. Large vessels anchor in 15–30 fathoms. The Custom-House Mole has a depth at high water of 36 ft. outside, 33 ft. inside; at low water outside 33 ft., inside 30 ft. V. was visited in 1835 by a terrible earthquake. Founded by the Spaniard Saavedra, V. was pillaged by Drake in 1578, and by Hawkins in 1594. In 1866 it was bombarded by the Spanish admiral Nuñez, and in 1891 occupied by the Chilean insurgents. Mean temp. (10 yrs., 1863–72), yr. 57.6° F., Jan. 63.0°, July 52.8°; mean rfall. (5 yrs.), yr. 13.5 in. P. (1874) 97,600; (1885) 105,000.

Valparaiso, vil., Mexico, state Zacatecas, 56 m. SW. Fresnillo. P. (comm.) 12,400.

Valparaiso, city, U.S., Indiana, Porter co., 36 m. SE. Chicago (Ill.). P. 5100.

Valsequillo, tn., Canary Is., 15 m. SSE. Las Palmas. P. (comm.) <4000.

Val Sesia, valley, Italy, Piedmont, prov. Novara, watered by the riv. Sesia, running in the main SE. from Monte Rosa. Length about 36 m. The most important places are Varallo, Borgo Sesia, important industrial centre, and Alagna, at the foot of Monte Rosa, tourist resort.

Vals-les-Bains, tn., France, dep. Ardèche, arr. Privas, 3 m. NNW. Aubenas; has silk-mills and mineral springs, the water of which is largely exported in bottles. P. <3000.

Valtellina, in German **Veltlin,** the part of the valley of the Adda, Italy, stretching about 40 m. E. from the upper end of Lake Como.

Valtos, lake, Greece, Acarnania, divided into two parts, Rivios on the S., and Ambrakia on the N., 3 m. S. of the Gulf of Arta. Length, 7 m.

Valtos, vil., Scot., Ross-shire, Lewes I., 34 m. W. Stornoway. P. 500.

Val Tournanche, one of the most important valleys of Aosta, Italy, starting in the N. on the S. slope of Matterhorn, SE. of which the pass of St. Théodule (alt. 10,900 ft.) connects this valley with that of Zermatt. In this valley is the narrow gorge of Busserailles, with several grottoes.

Val Trompia, valley, India. See **Lombardy.**

Valua, or **Saddle Island,** isl., New Hebrides, N. of Banks Is.

Valuiki, dist. tn., Russia, govt. and 142 m. SSW. Voronezh, near l. bk. Oskol R. P. <5000.

Valverde, tn., Canary Is., in NE. of Ferro, dist. Sta. Cruz de Tenerife; has sulphurous waters of Pozo de la Salud ('well of health'), by the sea. In the neighbourhood are grottoes with remains of the native race. P. (comm.) 5900.

Val Verde, co., U.S., Texas, in the SW., on the Rio Grande, crossed by 101° W.

Valverde del Camino, tn., Spain, prov. and 24 m. NNE. Huelva, cap. dist. V. P. (comm.) 6000.

Vámbori, municip., Brit. India, Bombay Presidency, dist. Ahmadnagar. P. 5000; Hindus, 4300.

Vammer, isl., E. Indies, Arru Archipelago, SE. of Ceram; chief port Dobo, on N. ct. Area, 75 sq. m. P. estimated at 2100.

Vamo, isl., W. of Viti Levu, Fiji Is., in 177° 15′ E., 17° 30′ S.

Vamsadhárá, riv., Brit. India, Central Provs., rises in 19° 55′ N., 83° 32′ E., flows SSE. into the Bay of Bengal at Kalingapatam; it irrigates a large tract of land; navigable by country boats for nearly half its length. Length, 170 m.

Van, walled tn., Turkish Armenia, cap. vilayet and sanjak V., about 140 m. SE. Erzerum, and about 1 m. from the E. side of Lake V.; built on an open, level space, surmounted by a citadel crowning a picturesque rock (nummulitic) which rises perpendicularly to a height of about 300 ft., and is pierced with holes and caverns. The suburb of Baglar or Aykerdan ('the gardens') extends for a long distance over the fertile plain. V. has a large Armenian normal school; manufactures of cotton goods, moiré antique for mantles, and soap. Its position is of considerable strategic importance, at the junction of the two military routes from Asia Minor and Mesopotamia; commanding also the approaches from Persia. It abounds in antiquarian remains, with cuneiform and other early inscriptions. Traces still remain of its magnificent palaces attributed to the mythical Semiramis, in spite of the attempts of the Mongols of Tamerlane to destroy them. The dist. S. and E. of the lake was the seat of an Armenian kingdom called Biaina, cap. Duspas, in and after 9th century B.C. P. 30,000; Moham. 16,000; Christians, 13,500.

Van, the ancient *Thospites* or *Arsissa*, large lake without outlet, Turkey in Asia, in W. of vilayet V., crossed by 38½° N., 43° E., 20–40 m. N. to S., 30–50 m. E. to W., longest axis SW. to the head of a gulf in the NE., 75 m.; enclosed by mts., Sipan (or Sipkhan) Dagh on N., Nimrud Dagh on W., less important heights on S and E.; principal towns, V. on E., Akhlat, Eljivas, and Erjish on N., Tadvan on SW. Water not salt in taste, but containing considerable proportion of carbonate of potash, and not drinkable. The level varies by 10–13 ft. according to the abundance or deficiency of rain in periods of years. Alt. variously estimated at 5200, 5360, 5460 ft. Area, estimated at 1425 sq. m.

Van, par., Wales, Glamorganshire, Cardiff union, near Caerphilly; has lead-mines. P. <250. See **Llanidloes.**

Van Alphen, coast riv., S. Australia, N. Terr., debouching on the SW. shore of the Gulf of Carpentaria, in about 137° E.; its course is unexplored. Length probably exceeds 100 m.

Vana-Vana, or **Barrow,** isl., Pacific, in Tuamotu group, in about 20½° S., 139° W.

Vanbu, vil., Tongking, on the upper He-ho, in about 103° 20′ E., with French post.

Van Buren, co., U.S., Arkansas, between 92° and 93° W., and 35° and 36° N.

Van Buren, co., U.S., Tennessee, N. of the parallel of 35° N., and E. of the meridian of 86° W.

Van Buskirk, vil., U.S., New Jersey, Hudson co., 5 m. S. Jersey City by rail, on a penin. between New York and Newark Bays. P. <1500.

Van Camp, vil., U.S., W. Virginia, Wetzel co., on the Ohio, 33 m. S. by W. Wheeling. P. <1500.

Vance, co., U.S., N. Carolina, on the N. frontier, E. of 79° W.

Vanceburg, tn., U.S., Kentucky, Lewis co., on the l. bk. of the Ohio, 75 m. SE. by E. Cincinnati (Ohio); an important shipping point. P. <1500.

Vancouver, tn. and port, Canada, prov. Brit. Columbia, on a slight eminence at mouth of Burrard Inlet (S. side), the western terminus of the C. P. R., 1482 m. by rail W. Winnipeg, 2908 m. from Montreal, 3595 m. from Halifax (N. S.), by the Short line, 3162 m. from New York, as against 3270 m. between San Francisco and New York, 4330 nautical miles from Yokohama, 5890 from Hong-kong. Until May 1886 its site was occupied by dense forests, but it has grown with great rapidity in consequence of the local advantages of its splendid harbour, as well as the natural and political advantages of the trans-continental route of the C. P. R. The distance in statute miles from Liverpool to Hong-kong by Montreal and V. is 12,908 m., by Halifax and V. 13,226 m., as against 13,407 m. by New York and Portland (Or.), and 13,740 m. by New York and San Francisco. Under an agreement between the government of the United Kingdom and that of the Canadian Dominion, a permanent line of first-class steam ships, serving as mail-steamers, and suitable for service as armed cruisers, now plies between V. and Hong-kong by Yokohama. The first mails by this route were delivered in London on May 13, 1891. P. (1889) 11,000; (1891) 13,700.

Vancouver, city, U.S., Washington, Clarke co., 100 m. S. by E. Olympia; headquarters of Columbia military dist.; accessible to large craft. P. <4000.

Vancouver Island, Canada, about half the size of Ireland, between 48° 20′ and 51° N., 123° and 128° 20′ W., forming part of the prov. of British Columbia, from the mainland of which it is separated by Queen Charlotte Sound and the Strait of Georgia. Length from Cape Scott (NW.) to Gonzalez Point (SE.), 270 m.; average breadth, 50 m. Coast deeply indented by gulfs and bays. Climate moist, but healthy [**Victoria, Esquimalt**]. Mountains generally covered with pine, and rise beyond the reach of vegetation; several peaks above 6000 ft., Mount Victoria in the N. half of the island estimated at about 7500 ft. The arable land, producing grain and vegetables as well as fruit, is almost confined to a strip of lowlands, 2–10 m. in width, between the S. and SE. coasts and the mountains, and the settled dists. do not at present extend beyond 49° 15′ N. A few Scottish crofter families have been settled at points favourable for fisheries on the W. coast. Minerals are said to be plentiful, and the most important coal deposits on the Pacific coast are worked at Nanaimo, on the Gulf of Georgia, which is connected by a railway 80 m. long with Victoria, the cap., at the SE. point of the island. Valuable gold deposits are said to have been discovered at Alberni, on the W. coast. V. I. is said to have been discovered in 1592 by Apostolos Valerianos, or Juan de Fuca, a Greek in the service of Spain. In 1778 it was visited by Captain Cook; in 1789 it was proved to be an island by Captain Kendric of Boston, who sailed round it; and it was again circumnavigated in 1792 by Galiano and Valdez, as well as Vancouver, who had been sent over to receive possession of the island on the part of the British from the Spanish. The Spanish governor at the time was named Quadra, and the two agreed to call the island Quadra and V. I., but the Spanish part of the name was gradually dropped. In 1844 the island received the first settlement of the Hudson Bay Company, to which the whole island was assigned in 1849; in 1858 it was bought back by the crown, and remained a separate colony till August 6, 1866, when it was by Act of Parliament united with British Columbia. Area nearly 16,000 sq. m. P., exclusive of natives (1871) 6000; (1881) 17,300; (1891) 36,800. See **Quadra Island.**

Vanne, or **Vannes,** riv., France, rises 9 m. W. Troyes, dep. Aube, flows W. and gains the r. bk. of the Yonne above Sens.

The V. aqueduct is the chief channel conveying to Paris water from Burgundy, dep. Yonne; length, 68 m. Length of river, 37 m.; area of basin, 365 sq. m.

Vannes, port and cap. dep. Morbihan, France, cap. arr. V., 21 m. NE. by E. Quiberon; has a museum of prehistoric and Celtic archæology, a cathedral, and remains of ramparts of the 14th and 15th centuries; dockyards, and various manufactures. Exports oysters, hemp, &c. V. is on the site of the Gaulish town of *Dariorigum*, or *Dariortum*, cap. of the Veneti. The town was one of the three where the States of Brittany alternately assembled. P. (1872) 14,700; (1891) 21,500.

Vannö, isl., Norway, prov. and 34 m. NE. Tromsö. Length, 20 m.; area, 90 sq. m. P. 455.

Van Reenens Pass, pass across the Quathlamba Mts., leading from Natal into Orange Free State, in about 28° 10′ S., on the route of the railway from Ladismith to Harrismith.

Van Rhynsdorp, vil., Cape Colony, dist. Clanwilliam. P. <1500.

Vans, Les, tn., France, dep. Ardèche, arr. Largentière, 41 m. N. by W. Nîmes. P. <2000.

Van-sang, tn., Tongking. See **Ninh-binh.**

Vanse, vil., Norway, prov. and 51 m. WSW. Christiansand, on the North Sea. P. (comm.) 5500.

Vansittart Bay, inlet, on the N. ct. of the Kimberley div. of W. Australia, in 126° 20′ E.

Vanswah, vil., W. Africa, Liberia, 12 m. N. Monrovia, near the N. shore of the mouth of St. Paul R.; commercial centre of the Mandigos.

Vanua Lava, one of the Banks Is., S. Pacific, in 13° 45′–55′ S., just W. of 167° 30′ E.

Vanua Levu, the second largest of the Fiji Is (*q.v.*), NE. of Viti Levu.

Vanua Masi, coral reef, in the E. or Lau group of the Fiji Is., crossed by 18° 0′ S., 178° 25′ W.

Vanua Vatu, one of the Fiji Is., in the Goro Sea, in 18° 23′ S., 179° 17′ W.

Vanutha, isl., group belonging to Ringgold Is., E. of Vanua Levu, Fiji Is., in 16° 30′ S., 179° 40′ W.

Vanves, tn., France, dep. Seine, arr. and 3 m. N. Sceaux, 1 m. from the fortifications of Paris. P. 6000.

Van Wert, city, U.S., Ohio, cap. V. W. co., on the W. frontier, 78 m. SW. Toledo. P. 5500.

Van Zandt, co., U.S., Texas, in the NE., to the S. of 33° N., crossed in the W. by 96° W.

Vaour, vil., France, dep. Tarn, arr. Gaillac, 20 m. NW. by W. Albi. P. <2000.

Vaprio d' Adda, tn., Italy, Lombardy, prov. and 17 m. ENE. Milan, above the r. bk. of the Adda. P. <4000.

Vaqueria, La, vil., Paraguay, 145 m. NE. by E. Asuncion.

Var, maritime dep., SE. France, named from the Var R., which previous to 1860 formed its E. boundary; formed in 1790 out of parts of Lower Provence; divided into three arrs.: Draguignan (cap.), Brignoles, and Toulon. The coast has numerous indentations—Gulf of Giens, Roads of Hyères and Bormes, Cavalaire Bay, and Gulfs of St. Tropez and Fréjus. Off the coast are the **Hyères Is.** Surface comprises two natural divisions, the littoral and the interior; to the former belong the mountains of Maures and Estérel. The Maures, an isolated range (granitic, &c.) with magnificent forests, trends SW. and NE., W. of the Angers; highest points, Dame-des-Anges and La Sauvette (each 2555 ft.). Near Hyères is the chain of the Petites Maures (960 ft.); E. of the Argens is the Estérel (porphyritic, &c.) (2020 ft.). The mountains of the interior, connected directly with the Alpine system, are mainly cretaceous, with sterile plateaux riddled by fissures ('embus' or 'embucs'), into which the rain sinks to issue in the valleys in abundant springs ('foux'), of which the most noted is the Font l'Évêque; culminating point, Pyramide de Lachens (5620 ft.), in the NE.; in the N. the Marges or Mont d'Aguines (5175 ft.) rises above the plain of Canjuers; westward the mountains of V. are connected with those of Bouches-du-Rhône by the plateaux of Rians and the chains of Étoile and St. Baume. About one-sixth of the dep. is drained to the Rhone by the Durance, of which the principal trib. is the Verdon, on N. frontier; the rest of the drainage goes directly to the Mediterranean by the Gapeau, Môle, Argens, Siagne, and other streams. Forests considerable (St. Baume, Sicié, Mount Faron, Val, &c.). Climate very fine; mean temp. about the highest in France; winters very mild, especially in the sheltered coast region, where are frequented winter health resorts [**Draguignan**]. Rainfall below the mean for France. The principal cereal is wheat; the vine covers 7 per cent. of the surface (Malgue, Bandol, Brignoles, Lorgues, &c.), production per acre about two-thirds of the average; in the cultivation of olives the dep. ranks second. Sericulture is important; fruits (oranges, pomegranates, figs, &c.) abundant. Minerals include lignite (Nans, Toulon, Salernes, &c.), a little iron (Ampus, Collobrières, &c.), salt from marshes (near Hyères, and in isl. of Ambiers). Principal manufactures are connected with naval arsenal of Toulon (*q.v.*), shipbuilding (La Seyne, St. Tropez, Bandol). A special industry is the manufacture of corks from native cork-wood (Collobrières, Garde-Freinet). Area, 2234 sq. m. P. (1891) 288,300. See **France,** table.

Var, riv., France, dep. Alpes-Maritimes, rises in the Alps, flows E. and S. into the Mediterranean 4 m. W. by S. Nice; it formerly separated France from Italy. Length, 70 m.; area of basin, 1100 sq. m.

Vara, small riv., Italy, in the E. of Liguria, flows SE. into the Gulf of Genoa about 10 m. ESE. Spezia.

Vara Æstuarium, Scot. See **Moray Firth.**

Varades, tn., France, dep. Loire-Inférieure, near the r. bk. of the Loire, 23 m. W. by S. Angers, arr. and 7 m. E. by N. Ancenis; small port on the Loire. P. <2000.

Varadia, comm., Hungary, co. Temes, dist. Versecz. P. < 4000.

Varais, or **Warasque,** former dist., France, one of the five divs. of Franche-Comté, in modern dep. Doubs.

Varaita, riv., Italy, Piedmont, flows E. from the Cottian Alps, then NE. to the Po, which it joins on the r. bk. 16 m. SSW. Turin.

Varallo, tn., Italy, Piedmont, prov. and 31 m. NW. by N. Novara; contains the celebrated sanctuary of Sacro-Monte. P. <3000.

Varalsö, isl., Norway, Hardanger Fjord, prov. and 27 m. SE. Bergen. Length, 7 m.; area, 17 sq. m.

Varanger Fjord, a deep, wide inlet of the Arctic Ocean, between Russian Lapland and Norway (Finmark), in 69° 40′ N., 30° 11′ E. Mean temp., yr. 28.9° F., Feb. 10.0°, July 52.4°; rfall. (7 yrs.), 13.62 in. The dist. on the S. side of the fjord, called **Sydvaranger,** is praised for its fine scenery.

Varangéville, tn., France, dep. Meurthe-et-Moselle, arr. and 7 m. SE. Nancy; busy port on the Meurthe; has mines of rock-salt, manufactures of soda, &c. P. <2000.

Varano, lagoon, Italy, prov. Foggia, on the Adriatic shore, on N. side of the penin. of Gargano.

Varapodio, vil., Italy, prov. Reggio, 9 m. ESE. Palmi. P. <3000.

Varas, Puerto, bay, Chile, prov. and on S. ct. of Lake Llanquihue, in 41° 20′ S.

Varasd, royal free tn., Hungary, Croatia, cap. co. V. (in extreme NW.), on the Drave, 36 m. NE. by N. Agram. P. 11,100.

Varaville, vil., France, dep. Calvados, arr. and 11 m. NE. Caen, 3 m. from the English Channel; sea-bathing resort. P. <2000.

Varazze, tn. and port, Italy, Liguria, prov. Genoa, on the coast, 6 m. NE. by E. Savona. P. 4000.

Varbada, River, riv., New Guinea, entering the Gulf of Papua in about 145° 45′ E.

Varberg, maritime tn. and port, Sweden, prov. Halland, on the SW. ct., 43 m. S. by E. Gothenburg; chief exports, butter, granite, oats, wood, fish; constructs steamboats; bathing resort. The public quay has a depth of 14½ ft.; the anchorage is open to S. and SW. winds. P. <5000.

Varcar Vakuf, tn., Bosnia, prov. Travnik, 67 m. SW. Brod, 25 m. S. by W. Banjaluka; coal mined. P. <2000.

Vardal, vil., Norway, prov. and 19 m. W. Hamar. P. (comm.) <4000.

Vardar, riv., Turkey in Europe, rises in the SW. of the vilayet Kossovo, and flows NNE. and SE. past Ushkub and Köprülü into the Gulf of Salonica.

Vardari, tn., Turkey, prov. and 11 m. W. Salonica.

Varde, tn., Denmark, in the SW. of Jutland, on the **V. Aa,** prov. Ribe, 32 m. S. by E. Ringkjöbing. P. <5000.

Vardö, maritime tn. and port, Norway, prov. Tromsö, dist. Finmarken, 175 m. ESE. Hammerfest, on Vardö I.; no docks. Exports salt and dried fish, whale and cod oil, guano, &c., to the value of about £80,000 annually. To the W. is the fortress of Vardöhus, built 1310. Mean temp., yr. 32.7° F., Feb. 21.0°, July 47.1°. P. <3000.

Varel, urban comm., Ger., gd.-duchy and 17 m. N. Oldenburg, cap. circle V. P. <5000.

Varela, cape, Annam, on the E. ct., about 12° 53′ N.

Vat-yugan, riv., Russia. See **Vas-yugan.**

Vaubecourt, vil., France, dep. Meuse, on the Aisne, arr. and 12 m. N. by W. Bar-le-Duc. P. <2000.

Vaucelles, S. suburb of Caen, France, dep. Calvados. P. < 5000.

Vauclin, maritime vil., W. Indies, on E. ct. of Martinique I.

Vaucluse, dep., SE. France, owes its name to the Fountain of V.; formed in 1793 out of Venaissin, Orange, and a part of Provence; divided into four arrs.: Avignon (cap.), Apt, Carpentras, and Orange. Surface low in the W., hilly or mountainous throughout the greater part. The Plain of Comtat or Avignon, divided into three sub-plains—Orange, Carpentras, and Cavaillon—occupies about one-third of the dep., rising from a little above the level of the Rhone in the W. to about 330 ft. in the E. The principal mountains are N., the Ventoux, an isolated range of cretaceous formation, bare and arid, containing the highest point in the dep. (6270 ft.); the mountains, or rather plateau, of V., S. of the former (highest point Sommet de Pierre, 3745 ft.), also cretaceous and containing numerous cylindrical depressions ('avens'), supposed to be connected with subterranean water-courses, sometimes of great depth, as the Jean Nouveau, a perpendicular shaft of 535 ft.; still further S. is the Léberon or Lubéron, a well-wooded range, separated from V. by the narrow valley of the Apt, mean alt. 2300–2600 ft., highest point the Lubéron, 3690 ft. The dep. is drained entirely to the Rhone (which forms its W. frontier) by the Lez, Aygues or Eygues, Sorgue, Durance, &c. The Durance bounds the dep. E. and S. for 60 m. Climate warm in sheltered plains and valleys, but in higher parts cold and exposed to the mistral, especially in the Ventoux. The principal cereal is wheat; the vine occupies about 4½ per cent. of the surface (Châteauneuf, Sorgues, Basteau, Sarrians, &c.), production per acre slightly below the average; the olive is widely cultivated in sheltered parts; sericulture is important, and fruit is extensively grown. Minerals include lignite (Méthamis and Piolenc), sulphur (Apt). Manufactures (of little importance) chiefly woollen fabrics. Area, 1381 sq. m. P. (1891) 235,400. See **France,** table.

Vaucluse, vil., France, dep. V., arr. Apt, 16 m. E. Avignon. P. <2000.

Vaucluse, tn., U.S., S. Carolina, Aiken co., 15 m. NE. Augusta (Ga.). P. <1500.

Vaucotte, vil. and bathing resort, France, dep. Seine-Inférieure, arr. Le Havre, 4 m. WSW. Fécamp. P. <2000.

Vaucouleurs, tn., France, dep. Meuse, arr. Commercy, on the l. bk. of the Meuse, 12 m. WSW. Toul; has forges and blast-furnaces; manufactures hosiery and flannel. P. <3000.

Vaud, Ger. **Waadt,** cant., Switzd., lying principally N. and E. of Lake Geneva, being bounded N. by cant. Neuchâtel, E. by cants. Bern and Freiburg, S. by cants. Valais and Geneva, and S. and W. by France. Its highest elevations are in the portion E. of Lake of Geneva, Mount Diablerets reaching 10,670 ft., and the Grand Muveran 10,045 ft. The cant. embraces the greater part of the plain between the Jura and the Alps; consequently 85 per cent. of its area is cultivated, the vine especially being grown to a great extent principally in the Rhone valley and beside Lake of Geneva. Cattle-breeding is an active industry. Manufacturing industry embraces tanning, preparation of condensed milk (Vevey and Lausanne), tobacco and cigars (Vevey and Grandson), clock-making (Jura valleys), musical-boxes (Ste.-Croix), agricultural implements, &c., at Vallorbe. Cap. Lausanne. Ancient lake dwellings have been discovered in the Lakes of Geneva and Neuchâtel, pointing to very early settlements in this region. V. was conquered by Bern in the 16th century, and governed by Bern down to 1798. V. entered the Swiss Confederation in 1803. Area, 1244 sq. m. P. (1888) 251,300, for the most part Protestants speaking French. See **Switzerland,** table.

Vaudier, vil., Italy. See **Valdieri.**

Vaudois. See **Waldenses.**

Vaudreuil. 1. Co., Canada, occupying the N. part of the angle belonging to Quebec between the rivs. St. Lawrence and Ottawa. **2.** Cap. of that co., on the r. bk. of the riv. Ottawa, 25 m. W. by S. Montreal. P. <1500.

Vaughan, post-tn., Victoria, Talbot co., 27 m. S. by W. Sandhurst; in gold-digging dist. P. <1500.

Venaria Reale, tn., Italy, Piedmont, prov. and 5 m. NNW. Turin. P. <5000.

Venasca, vil., Italy, Piedmont, prov. Cuneo, 7½ m. SW. Saluzzo. P. <2000.

Venasque, tn., Spain, Aragon, prov. and 58 m. NE. Huesca, and 12 m. from the French frontier; centre of the most picturesque region of the Spanish Pyrenees. Has trade with Bagnères-de-Luchon in mules, wool, and raisins. Sulphur baths 5½ m. to the N. Alt. 3650 ft. P. <2000.

Vence, the ancient *Ventium*, tn., France, dep. Alpes-Maritimes, arr. Grasse, 9 m. W. by N. Nice; has lignite and coal mines. Its old cathedral, dating from the 10th, 12th, and 15th centuries, contains a large number of works of art. Seat of a bishopric from about 375 to 1790. P. <3000.

Vendée, riv., France, rises near the W. border of dep. Deux-Sèvres, flows SW. past Fontenay-le-Comte, and joins the Sèvre Niortaise above Marans and 10 m. from the sea. Navigable for boats of 20 tons up to Fontenay. Length, 44 m.

Vendée, maritime dep., W. France, traversed by the Vendée R.; formed in 1790 out of parts of Haut Poitou, divided into three arrs.: La Roche-sur-Yon (cap.), Fontenay-le-Comte, and Les Sables d'Olonne. The dep. comprises three natural-divs.: the 'Bocage' (occupying the greater part), the Plain in the S., and the Marsh in the W. The Bocage, composed of the older rocks, rises from W. to E. in a succession of hills and wide plateaux, watered by numerous streams; bushy hedges and lines of trees everywhere bordering the roads and fields give to it a well-wooded aspect; highest in E. near Pouzauges (945 ft.), in the region known as the 'Vendean Alps'; near Herbiers is the Mont des Alouettes (760 ft.), celebrated in the Vendée Wars. The Plain, formed chiefly of oolitic limestone, is of very slight elevation, and with few water-courses. The Marsh, now in great part reclaimed, comprises two divs., the Breton, around the Bay of Bourgneuf in the N., and the Poitevin, the larger, partly in Charente, in the SE.; indented along the coast by small estuaries (*étiers*), and intersected in all directions by drainage canals (*charrauds*), which also afford the principal means of communication. The reclaimed parts are very productive, and separated from the sea by salt marshes. In the Poitevin marsh several calcareous hillocks, formerly islands, rise above the plain, each crowned by a village. Off the coast are the islands of Noirmoutier and Yeu. About one-sixth of the dep. in the N. and NE. is drained to the Loire, chiefly by the Sèvre Nantaise; the rest of the dep. by coast rivers, of which the principal are the Vie and Lay, with its trib. Yon, and in the S. Autise and V., tribs. of the Sèvre Niortaise. Climate subject to extremes in the Bocage; hot in summer in the Plain; humid in the Marsh, where also intermittent fevers prevail. The principal cereal is wheat, widely cultivated; the vine covers 2½ per cent. of the surface (Serigné, Mareuil, Talmont, &c.), but the production per acre is little more than half the average; other crops are forage roots, a little hemp and flax (Doix and Vix), and colza. Minerals, coal in small quantity (Faymoureau, &c.), and marsh-salt (Noirmoutier, &c.). Principal manufactures, textiles; limited production. Area, 2692 sq. m. P. (1891) 442,400. See **France,** table.

Vendeuvre-sur-Barse, tn., France, dep. Aube, arr. Bar-sur-Aube, 19 m. E. by S. Troyes, 10 m. NE. by N. Bar-sur-Seine. P. <2000.

Vendôme, Latin *Vindocinum*, tn., France, dep. Loir-et-Cher, cap. arr. V., on the Loir, 20 m. NW. Blois; has manufactures of cheese and gloves. Its church (12th to 16th centuries) contains some old stained-glass windows; there are remains of an abbey, with steeple 260 ft. high, and also of the castle. V. was in the 11th century a monastic and feudal centre of great importance. Mean temp., yr. 51.3° F., Jan. 37.6°, July 66.9°. P. 6900.

Vendômois, former dist., France, in Orléanais, now chiefly in dep. Loir-et-Cher, cap. Vendôme.

Vendrell, tn., Spain, prov. and 15 m. NE. by E. Tarragona, cap. dist. V. P. 5000.

Venersborg, tn., Sweden, prov. Elfsborg, on the S. side of Lake Wener, 52 m. NNE. Gothenburg. Rfall., yr. 29.32 in. P. 5600.

Venetia (Italian **Venezia**), territorial division of Italy, situated between 44° 46′ and 46° 40′ N., 10° 40′ and 13° 40′ E. From 1815 until 1866 it formed part of the Austrian Empire (see **Lombardo-Venetian Kingdom**). Reunited to Italy in 1866, it now forms the provs. of Belluno, Padua, Rovigo, Treviso, Udine, Venice, Verona, and Vicenza. A ring of mountains, divisions of the Alps (Cadoric, Carnic, Julian), separates the terr. (from W. to E. by way of N.) from Austria. The remaining boundaries are the Adriatic Sea on the S. and E., Emilia on the S., and Lombardy on the W. Between this mountain girdle and the head of the Adriatic stretches a large plain, diversified by the foothills of the Alps and by the Euganean (1920 ft.) and Berici (1310 ft.) ranges. The coast is fringed with lagoons and low islands and peninsulas. The principal rivers are the Po, which forms a great part of the S. boundary, Adige, Brenta, Piave, and Tagliamento, all flowing to the Adriatic; and the Mincio, with Lake Garda separating V. from Lombardy. Nearly all the rivers are navigable, and are connected by canals. The valley of the Po is irrigated and intersected by lakes, rivers, and water-courses, rendering the soil marshy and swampy. In the provs. of Rovigo and Verona (basins of the Po and Adige) extensive drainage works have been carried out by the state under acts of 1882 and 1886. Climate, severe in the mountain regions, temperate and healthy in the plains, except in the vicinity of the lagoons, though often very cold in winter, the lagoons of Venice being sometimes frozen over. The principal cereals grown are maize wheat, and rice, the last named chiefly in the provs. of Verona and Rovigo. The vine is cultivated largely in all provs. except Rovigo. Mulberry-trees, for silk-worm-rearing, are general. The upland valleys make excellent grazing-grounds. Chestnut forests prevail in prov. Udine. Some tobacco is grown in provs. Belluno and Vicenza. The only important minerals are copper at Rivamonte, near Agordo, in the W. of prov. Belluno, and lignite in prov. Vicenza, chiefly in comm. Valdagno. Peat is dug to a considerable extent at Arcugnano, near Vicenza. As regards industries, Venice is famous for her glass, lace, and art furniture and bronzes. Venice and Vicenza are the most important industrial provs., producing silks, hemp, chemicals, and machinery; at Venice, tobacco and laces and iron-foundries; and at Vicenza, woollens, paper, pottery, and straw-plait. In prov. Padua, silks and chemicals are manufactured; cottons in provs. Verona, Venice, and Udine; silks in Treviso and Verona; and hemp in Treviso. There is a

university at Padua. The history of the terr. is practically coincident with that of the city of **Venice** (*q.v.*). Area, 9476 sq. m. P. (1871) 2,739,900; (1881) 2,814,200.

Venev (**Venyov**), dist. tn., Russia, govt. and 32 m. NE. Tula, near Oster R. P. <5000.

Venezuela ('Little Venice,' from the aspect of some Indian villages on the Maracaibo, first seen in 1499), a republic (six and a half times as large as Great Britain), occupying (1°–13° N., 60°–73½° W.) great part of the N. of South America, between the Caribbean Sea (N.), Colombia (W. and S.), Brazil (S.), and British Guiana (E.). E. of 60° W., V. lays claim to large terr., from the delta of riv. Orinoco to riv. Cuyuni-Essequibo (**Guiana, British**). The terr. in the actual occupation of V. is divided into states, &c., as shown in the following table:—

States, &c.	Area in sq. m.	Pop. in Thousands, 1891.	Pop. per sq. m., 1891.
Federal District	45	89	...
Miranda	33,969	485	14
Carabobo	2,984	198	61
Bermudez	32,243	301	9
Zamora	25,212	247	10
Lara	9,296	247	27
Los Andes	14,719	336	23
Falcon and Zulia	36,212	225	6
Bolivar	88,701	50	1
Territories[1]	350,562	146 (?)	...
Total	593,943	2,324	4

[1] Goajira, Alto Orinoco, Amazonas, Colon, Yuruari (reincorporated with the state of Bolivar in 1891), Caura, Armisticio, and Delta.

Orography and Hydrography.—V. comprises the Orinoco plains (*llanos*), in continuation of the Amazon valley around the mountains of Guiana, and partly separated from the Caribbean Sea (N.) by the north-easternmost ranges of the Andes—(1) From riv. Meta to the Atlantic the *llanos* may be divided into three parts: (*a*) on the W., a leaf-like terr. having rivs. Guarico-Orituno, Orinoco-Meta, and Sierra de Merida marking its outline, the riv. Apure (navigable to the foot of the Andes) as its mid-rib, and numberless anastomosed rivers as its veins and veinlets; (*b*) in the centre, a vast expanse of flat and undulating lands (*bancos, mesas, barrancos*), with the Orinoco at its S. extremity, and parallel affluents running into it from the N., or rivers running N. into the delta of the Unare; (*c*) on the E., the large delta of the Orinoco. (2) The rivs. Caroni (S. to N.) and Ventuari (W. to E.) traverse almost entirely the Guiana Mts. (Parima, 4000–6000 ft.; Maravaca, 8200 ft.; Duida, 8100 ft.; Roraima, 7500 ft.), draining them to the Orinoco. (3) The Sierra Nevada de Merida divide the *llanos* from the basins of Lake Maracaibo and the Tocuyo, and are continued by the Silla (9100 ft.) and Cumaná-Paria (6700 ft.) ridges. (4) In the high valley of the Orinoco that river receives the Atabapo, which flows at a short distance from the riv. Guainia-Negro, while the Cassiquiare actually connects the Orinoco and Amazon valleys. From this region (San Fernando) the lower Orinoco, the heart of Guiana, Colombia, and Brazil can be attained by water. The Caroni is connected during the floods with riv. Essequibo, and, through it, with the affluents (Rio Branco, Trombetas) of the lower Amazon. **Geology.**—The Guiana Mts. (SE.) and the central parts of the Andesian ridges (N.) show Archæan gneiss, schists, and Palæozoic rocks (Carboniferous or Permian, Cumaná), on which lie two large strips of Mesozoic formations (principally from the higher Cretaceous) along both sides of the W. and N. cordilleras and of the Orinoco valley, which seems to have been the bed of an old interior sea, now filled with modern and ever-increasing alluvia. There are frequent and terrible earthquakes; many signs of volcanic eruptions. **Minerals.**—Gold was found at Nueva Providencia in 1840, and since 1885 has been produced to the amount of about 900,000 oz. in the valley of riv. Yurari-Cuyuni (Essequibo). Among other minerals are silver (Bermudez, Lara, Andes), copper (Aroa), lead, tin, iron, sulphur, coal (Naricual), petroleum (Merida), bitumen (*brea, alquitran, neme:* in deltas of rivs. Orinoco, Unare, and round Lake Maracaibo), mineral waters (some, Trincheras, at 195°–207° F.), salt, sodium carbonate (*urao, trona*), used in the preparation of tobacco, and phosphates. **Climate.**—V. is under the thermic equator. The hottest terrs. are on the *llanos*, on the N. ct., near Sierra de Merida, and behind the Guiana Mts. (mean temp. 84°; La Guaira, 82°; difference between day and night, 5°). A temperate zone towards 2000 ft. (mean temp. 77°, Carácas, annual, 72°, Jan. 68°, May 92½°), a cold one above 7000 ft. (mean temp. 59°; Merida, 61°), and a very cold above 13,000 ft. (Sierra de Merida, mean temp. 37°); snow is constantly present above 15,000 ft. The trade winds (NNE.), only blowing (Nov.–March) in day-time, are called *brisas;* S. or W. winds (*varinas*) blow in summer. There is no wind in the forests or in the Orinoco valley behind the mountains. Rains are abundant on the slopes under the trade-winds. Alternate wet and dry seasons on the *llanos*. Floods of the Orinoco occur April to Aug. and in Nov. (*de los muertos*). **Flora.**—One half of V. is covered with equatorial forests (delta of riv. Orinoco, basin of Lake Maracaibo, Guiana, and N. mountains). The *llanos* (*bajos*) are covered with savannas (with a very rich flora) intermingled with trees (palms, *Copernicia*, chaparros, *Curatella*, Mimosæ, *Copaifera officinalis*), on the slopes (up to 300 ft., *llanos altos*, and above, *petriles, balcones*) forests become dense (*Sarrapia, Tonga, Dipteris odorata*), until they cover the mountains (in Sierra de Merida up to 10,000 ft.). Some regions sheltered from the trade-winds are very dry. During the dry seasons the *llanos* only show vegetation in the *esteros* of rivers, where some water remains. Cactaceæ and Amaryllidaceæ (*Agave, Fourcroya, Pita*) predominate in many parts of the littoral, arboreal ferns on the slopes facing the Caribbean Sea. Cinchonæ reach as far as Carácas (El Papelon). The high Orinoco regions belong to the *Hylæa* (see **Brazil**). Two **faunas** meet in V.: that of the Colombian highlands (from Merida to Paria), and that of the Amazon and Guianas. There are many species of monkeys in the equatorial forests (never above 10,000 ft.); all the *Felidæ* of S. America and the spectacled bear (*Tremarctos*) (up to 10,000 ft.), the ant-eater, the cabiai, the cuchi-cuchi (*Cercoleptes*), the sloths, the sarigue, fishing cheiropters, also occur. Enormous numbers of aquatic birds frequent the *llanos*. The *guacharo* (*Steatornis caripensis*) is hunted for oil, and for the ingested seeds of *mataca*. Tortoises are plentiful (50,000,000 of eggs annually gathered for oil). Manatees and porpoises ascend the Orinoco. Fishes are extremely abundant in the rivers of the *llanos* (*Lepidosiren paradoxa*, the gymnotus or electric eel) and around Margarita I. (*Perlifera mollusca*). **Ethnography.**—Caribs, Guaianos, Vayamaras, Arecunas, Maimas, immigrants from the S., are the dominant race in Guiana, and extend as far as the basin of Maracaibo (Motilores). From the SW. have come the Nu-Arawak (Maipure), who now occupy the S. banks of riv. Orinoco. The Chibcha (Muyscas, Trinotes, Mucuchies, Cuicas) have entered from the NW., and are now found along the Merida terrs., while from the S. the Amazon tribes (Miranhas, &c.) reach the Venezuelan affluents of the Rio Negro. Many tribes (Otomacos: Apure-Meta; Guaraunos; Delta of Orinoco: Guaicas, Maquiritares, Guahibos) are not yet definitively classified. A race of pygmies (S. of Barquisimeto) has been exterminated. Rock pictures, ceramic remains, and ruins of buildings show the existence of an old civilisation. The permanent **population** is almost entirely concentrated in the fertile valleys of the W. and N. Andesian Cordilleras (Carácas, the cap., alt. 2890–3500 ft., with its port, La Guaira); Valencia, Argua valley, with Puerto Cabello; the Tuy valley, Barquisimeto, Yaracui, Merida, Cumaná (5500 ft.). Ameraca, near Cumaná, has been supposed by some to have originated, in the 15th century, the name of America. The Spanish population is principally of Basque and Catalonian descent. Negroes were very extensively introduced in the time of the slave-trade, but are now almost all *sambos* (of mixed race). There is some modern immigration (*jorungos*) of Canarians, French, Italians, and Germans (some agricultural colonies). The low marshy regions are very unhealthy. Devastating epidemics in the *llanos*, for both men and animals (*derrengaderas, deslomaderas*). **Products.**—Maize (four crops annually) is the staple food. The principal products of culture are coffee (since 1784), cacao (indigenous in Merida), sugar-cane (in the low marshy dists., Maracaibo), tobacco (Cumanacoa, Varinas), cotton, tropical fruits. The principal indegenous products are tonka bean, rubber, copal, sarsaparilla, cinchona (Merida), dividivi (the tannic *Cæsalpinia coriaria*) timber, dye-woods. Great numbers of cattle inhabit the *llanos*, but are sometimes killed in large numbers by the drought. Some domestic industries (leather, *cobijas*) are pursued. About 135,000 sq. m. are agricultural lands. **Means of Communication.**—Railways are bringing into communication the principal centres of population and production with the sea (Carácas with La Guaira, Valencia with Puerto Cabello, Barquisimeto with Tucaras, Trujillo with Ceiba, Merida with Santa Rosa, Rio Chico with Higuerote, Barcelona with Guanta). A railway from Barcelona to the *llanos* in Orinoco is projected, and one is about to be constructed to connect the gold region of the Yuruari (Guasipati) with the Orinoco (Guaiana Viega at the apex of the delta). (See also **Appendix,** pp. 3–5.) Important commercial relations with Colombia (*a*) by the Zulia valley (Cucuta railway); (*b*) by the riv. Meta to Suma Paz; (*c*) the Maracaibo basin by Ocaña with the Magdalena valley. There is an international cable from La Guaira to Curaçao. **Commerce.**—Principal exports: coffee, cacao, copper, timber, dye-woods, phosphates, and cattle hides; imports: flour, salt meat, cottons, and machinery. Total value of exports and imports, 1874, £5,400,000; 1891, £7,000,000. Principal commercial relations with Great Britain, then United States, France, Germany, Colombia, and Spain. **Public Institu-**

tions.—V. is (since 1881) divided into eight states, one federal dist., and (since 1891) seven terrs. A President (by indirect election), and one Congress of two chambers (twenty-four senators and one deputy for every 55,000 inhabitants). The state religion is the Roman Catholic, but all others are tolerated. One archbishop (Carácas), two universities (Carácas, Merida). The army has 6000 to 20,000 (besides, in 1889, some 7000 generals). The metric system is the legal. The *venezolano* is worth 3s. 4d.; the *bolivar*, one franc. **History.**—V. was seen and visited in the last years of the 15th century (Columbus, 1498; Ojeda, 1499). In 1520 the first town was built (Cumaná). V. at first formed part of the presidency (1564), then (18th century) of the viceroyalty of Santa Fé. In 1731 it became the *Capitania general* of Carácas or V. In 1810 began the War of Independence. In 1819 V. and Nueva Granada formed the Republic of Colombia. V. became independent in 1830. P. (1825) 660,000; (1854) 1,560,000; (1882) 2,200,000 (some 325,009 Indians included). [**J. B. R.**]

Vengurla, tn. and seapt. with fort, Brit. India, Bombay, dist. Ratnágiri, on the W. ct., 33 m. NNW. Goa; formerly a retreat for pirates. In 1772 a small factory was established here by the British. The lights from the lighthouses are visible 9 m. distant; the port is closed from mid-June to the end of August. P. 10,100; Hindus, 9000.

Vengurla Rock Lighthouse, Brit. India, Bombay, in 15° 27° N., 53′ 73′ E. The **Vengurla Rocks,** a group of rocky islets, lie 9 m. WNW. of Vengurla. Visible 12 m.

Veniaga, port, China. See **Shangchwan.**

Venice, Italian **Venezia,** German **Venedig,** Latin **Venetia,** fortified city and seapt. of Italy, cap. prov. V. and cap. territorial div. Venetia, stands on some 120 islands (separated by 150 canals and connected by nearly 500 bridges) in the lagoon of V., a vast shallow lake (25 m. long by 6 m. wide) which is separated from the Adriatic by a chain of low, narrow islands, Pellestrina, Malamocco, and Lido (7 m. long, 985 yds. across), Cavallino, and Cortelazzo. A railway viaduct (2¼ m. long), continuing the line from Padua (22 m. W.), connects the city with the mainland. The whole is protected by a girdle of forts, partly situated on the islands and partly on the mainland. For years the cap. of a powerful republic, the first maritime and commercial power of the world, and one of the finest cities in Europe, V. is peculiarly celebrated for its position and construction, its architectural monuments, its artistic treasures, historic fame, and the gay temperament of its inhabitants. In addition to the main island, or rather two main islands, which are parted by the serpentine Grand Canal (2½ m.), the principal thoroughfare of the city, V. includes within her purview the islands of Murano (centre of the glass manufacture), Torcello (with an ancient cathedral and church), Burano (centre of lace-making), Giudecca and San Giorgio Maggiore (immediately S. of the main islands), and San Lazzaro (on which the Armenian Mechitarists have their seminary and printing-press). The buildings that crowd these islands rest on piles driven deep into the clay. Their façades generally front the canals. Communication is maintained by small steamboats and by the pointed, shallow boats called gondolas, which have been in use on these waters for centuries past. The Grand Canal is spanned by the superb bridge of the Rialto, 1591 (in a single arch), the only bridge across it down to the 19th century, and lined by magnificent palaces. Two other (iron) bridges cross this canal. The streets or lanes are for the most part narrow and intricate, and only suited for foot-passengers. The centre of both the architectural glory and the public life of V. is the Square of St. Mark (the patron saint of the city), situated at the seaward end of the Grand Canal. Upon it, and immediately adjacent to it, stand the most important memorials of the constructional and decorative skill of the Venetian artists in brick and stone and glass and pigments of colour. Amongst the most nameworthy are the cathedral of St. Mark, the building of which was begun in the 9th century, and has been going on, more or less, ever since. The sacred edifice, planned in the form of a Greek cross, and constructed in a modified Byzantine style, is one of the marvels of the world, and has been described with surpassing eloquence by Ruskin in his *Stones of Venice.* What gives it such a unique position is the richness of its materials, the magnificence and historic value of its decorations, both inside and outside, and the wealth of art-treasures which have been lavished upon it. The decorations consist chiefly of sculptures and mosaics, the latter set generally in a groundwork of gold. The columns (some of porphyry) as well as the walls are encased all over with marble slabs of the richest colours; the floor is a garden of mosaics; and the roofs of the domes are resplendent with mosaic pictures of the 12th–15th centuries. The treasures contained in this gorgeous church embrace a wonderful retable (*Pala d'Oro*), which is decorated with enamelled pictures set in gold and thickly encrusted with valuable jewels, the whole a work of the 10th–14th century; the treasury shelters one of the most valuable collections of church plate in existence. Beside St. Mark's stands the ducal (Doge's) palace, of Gothic design, built between 1300 and 1559 on the site of an older 9th century edifice. Its W. façade (west the square) and its S. façade (next the sea) are built each of two stories of open colonnades, decorated with costly marbles and sculptures. A large interior courtyard is surrounded by two stories of arcading, the upper of which is reached by a grand Renaissance staircase of the 16th century (the Giant's Staircase). The principal halls or rooms of this palace are adorned with paintings by Tintoretto, Palma, and other masters of the Venetian school, amongst them a series illustrating the great naval victories of V. The palace contains within its interior the precious library of St. Mark (250,000 vols. and 10,000 MSS., some of priceless worth) and an archæological museum (Ramusio's maps and Mauro's map of the world, dated 1457). The other structures in or beside the Square of St. Mark are the Old Palace of the Procurators (rulers) of V., built in the 15th century, and the New Palace of the Procurators (1584), now the Royal (Italian) Palace. Under the same roof with this last was the old library (the books were removed in 1812), erected in 1536, a *chef-d'œuvre* of Sansovino, and the *zecca* or mint (now exchange), where, in the 13th century, the celebrated *ducat* was struck, and from which the *zecchino* or sequin, the ancient gold coin of the republic, derived its name. In front of St. Mark are three bronze pedestals, from which formerly floated the gonfalons of silk and gold, emblematic of the subject dominions of the republic, Crete, Cyprus, and the Morea; and near it are the beautiful square bell-tower, built of brick in 900–1130 (323 ft. high); the clock tower (1496), which, when it strikes two o'clock, assembles every day a vast flock of pigeons, which are fed at the expense of the city of V.; and two granite columns brought from the East in 1126 and set up in their present positions in 1180, one surmounted by the bronze lion of St. Mark, and the other by the statue of St. Theodore (the former patron saint of the city). The little Palace Canal at the side of the Doge's palace is crossed by the handsome Ponta della Paglia (1360), and by the Bridge of Sighs, the latter giving access to the former state prisons (1592–97), with their insufferably hot cells under the leaden roofs (*piombi*), and their shiveringly cold pits (*pozzi*) below the level of the water. V. possesses a multitude of other churches in addition to St. Mark's. Space will only permit of the most noteworthy being mentioned, as St. Peter's, the cathedral church of the Venetian patriarch from 1091 to 1807, rebuilt in the 16th century; the church of the Dominicans (St. John and St. Paul), of the 13th century, the chief burial-place of the Doges; the church of the Franciscans, St. Mary the Glorious, also of the 13th century, with remarkably fine tombs of Venetian generals and a grand picture by Giovanni Bellini; several grand specimens of the Renaissance style, erected in the 16th century by Sansovino and Palladio, notably St. George the Greater; St. Mary of the Miracles (1481–89), lavishly decorated with sculptures and marbles; St. Mary of Safety (1362); and St. James (13th century). The grandest collection of paintings by the great geniuses of the Venetian school—the Bellinis, Carpaccio, Giorgione, the Palmas, Veronese, Tintoretto, Titian, &c.—that the world possesses is preserved in the Academy of Fine Arts. The Correr Museum is also rich in pictures by artists of the native school, and contains interesting collections of majolica, &c. Besides these, there are highly valuable collections of pictures, as well as individual canvasses, in the churches, ancient guild-house, and private palaces, though several of the treasures of the palaces have been dispersed by sale. A bronze equestrian statue to a Venetian captain, Colleoni, modelled (1495) by Verrocchio of Florence, and cast by Leopardi, is esteemed the grandest piece of sculpture of modern times. V. is not only a city of churches, she is also a city of palaces. Perhaps the most beautiful is the *Ca' d'Oro* (Golden House), a rich and elegant specimen of 14th century Gothic, presenting a façade of tiers of small arched arcades, the whole decorated with coloured marbles, traceried windows, delicate carvings, &c. Of the other palatial residences, the former abode of Venetian magnates and merchant-princes, it must suffice to name as specimens of the Early Renaissance of the 15th century the Guisetti, Corner-Spinelli, Trevisan, and Dario; as examples of Sammicheli's work in the Later Renaissance, the Pesaro, Vendramini, Camerlenghi, and Grimani; and the Loredano (municipal offices), Farsetti, Da Mosto, and the *fondaco* (change-house or 'steelyard') of the Turks (now Correr Museum), as illustrating the Byzantine models of the 12th century. One other celebrated structure, or rather establishment, remains to be mentioned, namely, the arsenal, founded in 1104, but frequently enlarged since 1300. During the Middle Ages and the epoch of V.'s greatest splendour her arsenal was the best equipped in Europe, strongly fortified, and of vast extent. It is still in active operation, having shipbuilding yards for ironclads, a cannon-foundry, a school of marine mining, docks, &c., and a very interesting naval museum, which keeps, amongst other historic mementoes, the Bucentaur, the state barge from which the Doge periodically performed the ceremony which married him, the representative of the 'Queen

of the Adriatic,' to that sea. V. was all through her golden days, and is still, the seat of several famous industries, as glass and mosaics, jewellery, and embroidery in gold and silver, silks (damasks and brocades), lace, printing, artistic bronzes; to these have been added in modern times cottons, candles, tobacco, flour, chemicals, a vast number of iron works and furnaces, linens and hemp-cloth, ropes, shipbuilding, tanning, gloves, salt, sulphur, asphalt, &c. During the Middle Ages V. was the principal commercial intermediary between W. Europe and the countries of the East, and consequently took rank as one of the greatest depôts of the world; in particular she carried on an active trade northwards with the prosperous cities of the German Empire, Flanders, and even Scandinavia. At the present day she is outstripped by Trieste alone amongst the trade-centres of the Adriatic; but the commerce is mostly a transit-trade. Cereals, textiles, raw cotton and silk, oils, wines and spirits, with coals, groceries, fruit, hides, hemp, metals, fish, live animals, cheese, timber, and hardware are the chief of the imports (9–10 millions sterling annually), and likewise of the exports (7–8 millions). The lagoon is entered from the sea by three passes or straits, those of Chioggia, Malamocco, and Lido. The second was used for the most part down to 1894, when the Lido passage, which is protected by two breakwaters 9384 and 11,812 ft. long respectively, was made practicable for seagoing vessels by deepening it to 29 ft. Both these passages are protected by jetties, and the channels are carefully managed. Vessels drawing 24 ft. can enter and reach the quays at all tides; quayage about 2920 ft. On Giudecca I. there are some 5900 ft. of additional quayage. During the bathing season the beach of Lido and Malamocco is thronged with visitors. Murano, Burano, Torcello, and other islands in the lagoon are visited by excursionists. Despite its marshy surroundings—for at low tide large tracts in the lagoon are exposed as mud-flats—V. is not altogether an unhealthy city. In this city were born Marco Polo (1254–1324), traveller, and Sebastian Cabot (15th century), explorer; Aldo Manuzio and his sons, famous printers of the 15th and 16th centuries; Cardinal Bembo (1470–1547); Fra Paolo (Sarpi), patriot (1552–1623); Gasparo Gozzi, essayist (1713–1786), and his brother Carlo, dramatist (1722–1806); Goldoni, dramatist (1707–1793); the painters, Gentile Bellini (*ca.* 1424–1507), Giovanni Bellini (*ca.* 1428–1516), Tintoretto (1518–1594), and the younger Palma (1544–1628); the architect Pietro Lombardi (1438–1519), and other members of the same family; and several illustrious doges and captains. The following artists, though not natives of V., are intimately associated with her, being usually accounted members of the Venetian school of painting — Carpaccio, the elder Palma, Pordenone, Giorgione, Titian, and Veronese; as also the architects Palladio, Sansovino, and Sammicheli. Nor must the great characters of Shakespeare be forgotten; to wit, Shylock and Othello; nor the associations called up by the names of Shelley and Byron. Mean temp. (15 yrs.), yr. 56.1° F., Jan. 37.4°, July 76.5°; mean rfall. (1836–91), yr. 30.1 in. P. (1881) 134,800; (1893) estimated at 160,400.

When Attila the Hun ravaged Italy in the 5th century, the inhabitants of the adjacent mainland (*Veneti*) took refuge in the marshy islands off the coast; in the middle of the 7th century these refugees were joined by others who fled before the invading hosts of the Longobardi (Lombards). In the year 810 they founded the city of Venice, and at the same time laid the foundation of St. Mark's. In the close of the 10th century V. made herself mistress of Istria and Dalmatia on the E. side of the Adriatic. During the early crusades the Venetians rendered excellent service, not without great profit to themselves, by conveying the Christian enthusiasts across the Mediterranean; and in 1204 assisted a Western host to capture Constantinople. In the following year they annexed the isl. of Crete, and from this period introduced into Europe the rich stuffs, as well as several of the artistic and industrial processes, of Oriental peoples. The 13th and 14th centuries were signalised by a desperate maritime struggle with the Genoese, in which V. was more than once reduced to the greatest straits; but eventually she emerged triumphant. During the 15th century, when at the height of her prosperity, V. was mistress of most of the neighbouring cities and territories on the mainland of Italy; ruled over the Ionian Is. (conquered during the 15th century) and Cyprus (1473), as well as Crete, Istria, Dalmatia, Epirus, and the Morea (1460); in addition to this, she had trading stations on the Caspian and Black Sea, in Syria, and on the N. ct. of Africa. But her success brought a swarm of enemies about her. Not only did the Turks, newly settled in Europe, prove formidable enemies in the Levant, but a powerful league (the League of Cambrai) was formed against her by the Pope, the Emperor and the King of France, which cost her nearly all her possessions on the mainland. About the same period a severe, and indeed irretrievable, blow was struck at her commercial supremacy by the opening up of the sea-route to India round the Cape of Good Hope. V. did indeed recover her mainland possessions early in the 16th century, and waged long-continued war against the Turks; but she was all the time getting weaker, losing her Levantine conquests one after the other, and ceasing to be a factor of influence amongst the states of Europe. In 1797 the French put an end to the republic, and gave her territory to Austria. In 1805 it was made over to Italy, and was held by the French till 1815, when it reverted to Austria. In 1848 the Venetians revolted, and held the city for several months. V., with her territory, was re-annexed to the new kingdom of Italy in 1866. [**J. T. B.**]

Venice, vil., U.S., Illinois, Madison co., 5 m. N. St. Louis. P. <1500.

Vera, tn., Spain, Navarra, prov., dist., and 31 m. NNW. Pampeluna; has mines of iron ore, copper, and argentiferous lead; foundry. P. (comm.) <3000.

Vera Cruz, principal seapt. tn. of Mexico, in state V. C., on the Gulf and 242 m. ESE. of Mexico. Lat. of lighthouse 19° 11′ 57″ N., long. 96° 8′ 0″ W. The city was three times moved or refounded before the present, the fourth city, was laid out in 1580, opposite the fortified islet of San Juan d'Ulloa. Even the present city occupies a very unhealthy site in the midst of arid fields or marshy ground. Shifting sand-dunes, 150 ft. in height, occur directly outside the outer promenades. During the hot weather yellow fever rages; 'City of the Dead' is one of the names by which V. C. is known in Mexico. It possesses a cathedral, and has wide, straight streets and picturesque houses. Aqueducts carry water to the town from Jamapa R., 6 m. S. of V. C. The fortress, now a prison, is falling in ruins. Exports coffee, ore, tobacco, esparto goods, leather, &c., to the value of about £1,500,000, exclusive of precious metals, or, these included, upwards of £3,000,000. Its largest trade is with England; then come the United States, Germany, and France. The port is little protected from the prevalent violent tempests, and when the N. wind blows ships are obliged to remain out at sea; however, on the SE. a little shelter is afforded near the sandy islet of Sacrificios. The cable in the Gulf of Mexico connects it by Galveston with the telegraphic system of the United States, and by Salina Cruz with the ports of the S. Pacific. It was at V. C. that Cortez landed in 1519. In 1838 the citadel of San Juan d'Ulloa capitulated to the French; in 1847 to the United States general, Scott; in 1862 to the French. The government wharf is 336 ft. long, the railway wharf 720 ft. Mean temp. (3 yrs., 1863-65), yr. 78.9° F., Jan. 70.4°, July 82.9°; mean rfall. (10 yrs.), 174.62 in. P. (1868) 10,000; (1889) 24,000.

Vera Cruz (name given by Cortez, or **Vera Cruz Llave,** from the name of a Spanish general), one of the states of Mexico, along the gulf (for 499 m.) from riv. Tampico to riv. Cupico, in the depression of the isthmus; the lands on the slopes of the central highlands are very fertile. See **Mexico,** table.

Veraguas, tn., Colombia. See **Santiago.**

Veramin, extensive city ruins, Persia, prov. Irak-Ajemi, 35 m. SE. Teheran. The only well-preserved building is a peculiarly shaped tower covered with inscriptions.

Vermois, former dist., France, now in dep. Meurthe-et-Moselle, S. of Nancy.

Vermont, the only New England state of the American Union without any sea-coast, admitted 1791 as first addition to thirteen original states, previously formed part of New York, bounded S. by Massachusetts, W. by New York, N. by Canada, separated E. from New Hampshire by the Connecticut R.; one-third larger than Wales. The Green Mts., whence Vermont's name, traverse the state centrally S. to N. with increasing elevation. Four points exceed 4000 ft.; rounded grassy summits are characteristic, but green forests also explain their name. Abundant sugar maples rank V. first in maple sugar, while valuable hard woods furnish material for an output of sawed and planed lumber of £1,200,000 yearly ; small relative to other states, but Vermont's chief manufacture. The mountains act as a watershed for rivers, which are not navigable, but furnish power for lumber mills and the manufacture of woollen goods and flour, Vermont's second and third products. The winters are long and severe, the summers short, with hot spells [**Burlington**]. Maine alone among the United States has a larger proportion of deaths from consumption, and the death-rate from respiratory diseases is high. The N. two-thirds of the New York boundary is on Lake Champlain, with its fine scenery and summer resorts, and 100 m. of water-front. Through water-routes to Montreal and New York make the lake port Burlington the largest city. Rutland, marble and slate centre, also exceeds 8000. Seven others are larger than Montpelier, the capital. Slow natural increase and the exodus to the W. has kept Vermont's population practically stationary since 1850. Three-fifths of the state is under cultivation ; hay, oats, potatoes, and corn are chief crops, but fruit and dairy farming, especially of the Champlain Valley, are more important. V. ranks fifth in value of cheese, and tenth in butter. The mountains are chiefly gneiss, but most of the rocks are Silurian and Cambrian. V. yields more and finer marble than the remaining states put together, while in slate it is surpassed by Pennsylvania alone, and granite is extensively quarried. Area, 9565 sq. m. P. 332,400. See **United States,** table. [**W. S.**]

Vermont, vil., U.S., Illinois, Fulton co., 52 m. NW. Springfield. P. <1500.

Verona, fortified tn., Italy, Venetia, cap. prov. V., on the Adige, 22 m. NNE. Mantua. It is protected also by a line of forts mostly on the W. side of the Adige. Amongst her many interesting buildings are the cathedral, built in the end of the 12th century, and containing the tomb of Pope Julius III., and a very valuable chapter library; the Church of San Zeno (constructed like the cathedral in the Lombard style, *i.e.*, with alternate bands of white stone and red brick), a fine edifice rebuilt in the 12th century; St. Anastasia, of the later 13th century, adorned with sculptured tombs and paintings by Pisano and others; San Fermo Maggiore, of the 14th century; and many other churches. V. has preserved the aspect of a mediæval town, not only in her old houses, but also in her streets, her bridges, and her gates. The ancient castle (14th century), in which the Scaligers lived, is now converted into an arsenal, and is connected by a picturesque bridge with the modern arsenal on the other side of the river. The old castle of St. Peter, founded by Theodoric the Goth, and rebuilt in the 14th century, was dismantled by the French in 1801. Not least amongst the architectural glories of V. are the magnificently sculptured tombs of the Scaligers, standing in the open air. (See Ruskin, *Stones of Venice*, vol. iii.) Many Renaissance palaces and other structures attest the skill of two celebrated architects, Sammicheli and Fra Giocondo, both of the 15th and 16th centuries. The finest palaces in V. are that of the Scaligers (14th century), with a lofty tower, of the Bevilacqua and Pompei families, the last a picture-gallery and museum, and that of the town-council, richly sculptured. The Roman remains embrace a well-preserved amphitheatre, traces of baths, city walls, a theatre, a triumphal arch, and fine mosaic pavements. The town has manufactures of cottons and silks, candles, tanneries, and railway workshops. It was the birthplace of Cornelius Nepos, Catullus, and perhaps of both the Elder and Younger Pliny, Paul Veronese, the poet Scipione, and the architects Vitruvius and Sammicheli. V. became a Roman city in the 1st century A.D., and speedily rose to be a place of importance. It was besieged by the Emperor Constantine in 312, and here in 489 Odoacer was defeated by Theodoric the Goth (Dietrich of Bern in the Charlemagne cycle), who frequently resided within its walls. The Lombard kings, successors of Charlemagne, made it one of their caps. From 1260 to 1375 it was in the hands of the Scaligers (Della Scala family), one of whom, Can Grande, gave an asylum to Dante. In 1405 the city was conquered by Venice, which kept possession down to 1797. In 1815 it became a possession of Austria, who in 1848 strongly fortified it and made it one of the pivots of the celebrated **Quadrilateral** (*q.v.*). It was under its walls, at Custozza, that Victor Emmanuel was defeated by the Archduke Albert in 1866. In that same year V. was incorporated in the kingdom of Italy. Alt. 180-205 ft. Prov. P. (1871) 367,674; dist. P. 121,294; comm. P. 67,080; city P. 60,049; P. (1881) 60,800; comm. P. (1892) 69,500.

Versailles, comm. and city, France, cap. dep. Seine-et-Oise, cap. arr. V., 10 m. WSW. Paris, with which it communicates by two lines of rail, on a plateau, 5 m. from l. bk. of the Seine. It is divided into four quarters, starting in the shape of a fan from the castle, which is separated from the town by the Place d'Armes. It has many remarkable edifices, fine squares, public fountains, and beautiful boulevards, the church of St. Louis, the prefecture, and the chancery. The palace of Versailles, one of the most beautiful in existence, is composed of three main wings, two stretching right and left of a central square, and the third backing the square and projecting into the gardens behind. It was restored during the reign of the late Louis Philippe, and is now used as an historical museum. The most interesting apartments have been preserved or restored as they were under Louis XIV.; they embrace the Gallery of Mirrors, the Bull's Eye Chamber, the bedroom of Louis XIV., and the chapel. The immense galleries contain a series of paintings and statues arranged in chronological order, the pictures being by David, Horace, Vernet, Ary Scheffer, Delacroix, &c. Connected with the palace are a decorated chapel and theatre, an orangery, flower gardens, and a park, in which are statues and fountains supplied with water by the machine of Marly, and at the extremity of the park the two palaces called the Great and Little *Trianon*, associated with Marie Antoinette. The gardens of the Little Trianon are well known to botanists and horticultural amateurs. Great Trianon, built 1670. The castle and gardens were begun in 1661, by order of Louis XIV. The architecture was entrusted to Levau and Mansart, and finished in 1684; sculpture to Coysevox, Coustou, Girardon, Le Moyne, Tuby, Tarsy, &c. Lebrun was the painter by appointment. The gardens were designed by Le Nôtre. V. is a bishop's see and Protestant consistory, created in 1802, and has a national college, a normal school, shooting-school, hippodrome, school of horticulture, and library of 75,000 volumes. Its industries are unimportant; the greater part of the inhabitants live by market-gardening, small trade, and visitors and Parisians. The two largest parish churches were built, one by Mansart, the other, serving as cathedral, under Louis XV. In the city, statues have been erected to Hoche, the Abbé de l'Epée, and Houdon; an equestrian statue of Louis XIV. graces the great court of the castle, where it is surrounded by statues of various national celebrities; and here, on June 20, 1789, the representatives of the communes of France constituted the National Assembly, and took the famous oath termed the '*Jeu de Paume!*' From 1790 to 1837 V. was nearly deserted; but after the opening of the museum in the latter year, it regained some of its former importance. During the siege of Paris, V. formed the headquarters of the German army, and here the King of Prussia was proclaimed German Emperor, Jan. 18, 1871. At the outbreak of the revolt of the Commune, March 18, 1871, the

government went to V., together with the National Assembly, the latter remaining there, as well as the succeeding legislature, the Senate and Chamber of Deputies, elected 1876. It is the birthplace of Philip V. of Spain; Louis XV., XVI., and XVIII., and Charles X.; Count de Maurepas, minister of Louis XV. and XVI.; Prince Polignac, minister of Charles X.; General Lazare Hoche, died 1797; Marshal Berthier, Prince of Wagram, died 1815; the Abbé de l'Epée, instructor of deaf mutes, died 1789; Ferdinand de Lesseps, born 1805; and the sculptor Houdon, died 1828. Before Louis XIII., V. was a simple manor; it was bought by the king in 1627, who built an ordinary castle: this castle forms the nucleus of the present palace. The new palace became after 1683 the official and generally the actual residence of the French king. Here, in 1783, was signed the treaty of peace by which the United States of America became independent. Alt. 421 ft. Mean temp., yr. 50.7° F., Jan. 37.2°, July 65.7°. City P. (1872) 61,670; (1891) 51,700.

Vesunna, tn., France. See **Périgueux.**

Vesuvius, Mount (Italian **Monte Vesuvio**), the most celebrated active volcano in Europe, Italy, on the E. side of the bay, and 8 m. ESE. Naples. Lat. of crater 40° 49′ N., long. 14° 26′ E. It rises, an isolated cone, out of the fertile plain of Campania, the diameter of its base being about 10 m. The actual eruptive cone (4260 ft.) is surrounded by an outer ring or

crest on N. and E., called Monte di Somma (3730 ft.), the two being separated by a valley known as Atrio di Cavallo, 550 yds. across. The height of the eruptive (inner) cone varies from period to period, according to the accumulation of volcanic matters which it ejects; the range of alt. being from 3330 ft. (1749) to 4270 ft. (1894). The mountain is almost wholly composed of lava, scoriæ, and tufa; and the ejecta embrace nearly half a hundred different kinds of minerals (leucite, augite, magnetic iron, &c.). The vegetable products on its flanks comprise euphorbias, and many other plants not found elsewhere in Italy. The famous wine *lachryma christi* (red and white) is grown on its sides. The first recorded eruption occurred in A.D. 79, when the Elder Pliny perished, and the cities Herculaneum, Pompeii, and Stabiæ were overwhelmed. From that time onwards many eruptions are recorded, of which the most celebrated occurred in 472, 512, 685, 982, 1036, 1139, 1631, 1638, 1660, 1680, 1794, 1804, 1810, 1822, 1828, 1831, 1834, 1839, 1850, 1855, 1858, 1868, 1872, 1878, 1879, 1891. On the W. side of the mountain, on a projecting crag (2218 ft.) at the foot of the cone of ashes, an observatory was built in 1844; and in 1880 a wire-rope railway was constructed to within 150 yards of the summit, from a point about 2600 ft. from the base.

Veszprém, tn. with magistracy, Hungary, cap. prov. V., 24 m. W. by S. Stuhlweissenburg; has trade in grain and wine. The upper town is perched on a rock, and contains the old fortified castle and the episcopal palace. The Gothic cathedral of the 16th century has been the nucleus of an episcopal see since the year 1000. The town has changed hands many times, remaining in the hands of the Turks from 1605 to 1683. Alt. 855 ft. P. 12,700.

Vic-en-Bigorre, tn., France, dep. Hautes-Pyrénées, arr. Tarbes, on the Echez, 22 m. E. by N. Pau. P. <4000.

Vicente, or **Vicenti,** vil., Portuguese E. Africa, prov. Mozambique, 3 m. W. Mopea, on l. bk. of the Zambezi. The African Lakes Company has a port here.

Vicenza, tn., Italy, Venetia, cap. prov. V., on the Bacchiglione, 20 m. NW. by W. Padua; has silk spinning and weaving, spinning of flax, hemp, wool, and cotton; the Bertoliana Library, with more than 80,000 vols., and a museum (in the Chieregati Palace), with paintings of the Venetian school. V. was formerly fortified. One of the most remarkable buildings is the Basilica or Palace of Justice, burnt down in 1389, and rebuilt in the 16th century, after the design of Palladio. Other works by the same architect are Villa Palladiana (½ m. SE. of city), the Barbaran Palace, and the Olympic Theatre. The cathedral is an ancient Gothic structure, and there are other Gothic churches, that of San Lorenzo dating from 1280. V. was sacked in 401 by Alaric the Goth, and almost destroyed by Attila the Hun in 452. It was a member of the Lombard League, but was taken by Frederick II. in 1236. It surrendered voluntarily to Venice in 1404, and was governed by its podestas till 1797. The Austrians took it in 1848. Birthplace of the architect Palladio, died 1580, and the painter Montagna, died 1523. Mean temp., yr. 54.8° F., Jan. 35.1°, July 75.4°; rfall. (1858–91), yr. 46.1 in., Oct.–Nov. 10.2 in. P. (1881) 37,000.

Vic-Fezensac, tn., France, dep. Gers, arr. Auch, on the Losse, 34 m. SW. by S. Agen. P. <3000.

Vich, tn., Spain, prov. Barcelona, cap. dist. V., 28 m. W. by S. Gerona; an irregular town, with narrow winding streets going up or down. Has a cathedral, built 1803, on the site of a basilica built about 1040; at the side is a fine cloister of the 14th century. P. (comm.) 11,600.

Vichada, riv., Colombia, flows E. through the great N. plain of S. America, and joins the Orinoco in 5° N. Length, 350 m.

Vichumbi, vil., central Africa, on the S. side of Lake Albert Edward, in 0° 44′ S. P. <2000.

Vichuquen, lake, Chile, prov. Curicó, near the coast, in about 34° 45′ S., communicating directly with the roadstead of Llico by a channel 4 m. in length and 330 ft. average breadth. It has been proposed to convert this lake into a fine commercial and military port. Length, 5 m.

Vichuquen, vil., Chile, prov. and 45 m. WNW Curicó. P. <3000.

Vichy, vil., France, dep. Allier, on the riv. Allier, arr. and 11 m. E. by N. Gannat, 28 m. NE. Clermont; one of the most important thermal stations in France, visited annually by more than 50,000 people; in V. alone about thirty of the mineral springs are used for baths and for drinking. The Romans knew these waters, and called the place *Aquæ Calidæ*. Amongst the old houses of the 16th and 17th centuries, one bears the name of Madame de Sévigné, who lived here in 1676 and 1677. Rfall. 18.11 in. P. 10,400.

Vicksburg, vil., U.S., Michigan, Kalamazoo co., 126 m. W. by S. Detroit. P. <1500.

Vicksburg, city, U.S., Mississippi, Warren co., on the l. bk. of the Mississippi, 42 m. W. Jackson, the outlet for the Mississippi delta and valleys of the Yazoo; has foundries, machine-shops, and a stone quarry, and exports cotton (which is the staple article of commerce) and cotton-seed oil. Has regular steam communication with New Orleans, 400 m. distant. In the national cemetery, in the vicinity, are buried nearly 17,000 Union soldiers. V. capitulated to the Federal army under General Grant, July 4, 1863. Alt. (signal stn.) 244 ft. (U.S. Signal Office). Mean temp., yr. 66.1° F., Jan. 48.3°, July 82.2°; rfall. (13 yrs.), 61.4 in. P. (1880) 11,800; (1890) 13,400.

Victor Harbour, S. Australia. See **Port Victor.**

Victoria, colony, Australia, in SE., bounded N. by the Murray R., which separates it from New South Wales, and W. by S. Australia; area nearly equal to that of Great Britain; comprises several dists.: Western, in SW.; Wimmera, NW. (occupying nearly one-fourth of the colony); Loddon, N.; Murray, NE.; Gippsland, SE. The principal openings in the coast (length about 600 m.) are Corner Inlet, Waratah Bay, Western Port, Port Phillip, and Portland Bay; **Islands.**—Snake, French, and Phillip, with several smaller ones. A large part of the **surface** is mountainous. The Australian Alps with their spurs fill the greater part of the eastern half of the colony, and contain the culminating point, Mount Bogong (6508 ft.). W. of these mountains the Dividing Range sinks in elevation, so that easy routes could be found for the railways laid N. of Melbourne to the plains on the other side. Still farther W., a range called the Pyrenees rises above the plains in the N. of Ripon co., and turning to NW. leaves only a narrow notch (now traversed by the railway between Melbourne and Adelaide), at the height of about 1000 ft. above the sea, between itself and the Grampians, which stretch N. and S., and contain Mount William (3827 ft.), the highest summit in the western half of V. S. of the Dividing Range the plains are comparatively small in extent, but on the N. they widen westward from the Ovens R., especially after the point at which the Murray turns NW. The principal **rivers** S. of the Dividing Range are Snowy R., Tambo, Mitchell, and Latrobe, in the E. (the last three terminating in the Gippsland Lakes), Yarra, and Glenelg. Many other rivers in the W. empty themselves into salt lakes. The principal rivers N. of the Dividing Range (all tribs. of the Murray) are Mitta-Mitta, Ovens, Goulburn, Campaspe, and Loddon; these have smaller supplies of water than those in the S.; towards the W. they decrease in volume, while streams W. of the Loddon dry up before reaching the Murray, as the Avoca, Avon, and Wimmera. The region watered by the upper courses of these rivers was named 'Australia Felix' by the Surveyor-General of New South Wales, who, in 1836, traversed it from the Murray to the Glenelg. There are numerous **lakes,** both salt and fresh: Corangamite, on the banks of which large quantities of salt crystals are collected; Colac, SE. of the preceding; Burrum-

beet, in Ripon co.; Hindmarsh, Albacutya, Tyrrell, and Bolac, all in the Wimmera dist.; the Gippsland lakes—King, Victoria, and Wellington, interconnected, and separated from the sea only by a narrow belt of sand, usually traversed by a navigable channel. Some of the lakes in the W. dry up altogether in summer, leaving nothing but salt. As regards **geological structure,** the older Palæozoic formations are the most widely distributed, associated with extensive outcrops of granite and igneous rocks, the plains being in many cases formed of basalt; near the coast the older rocks are overlaid by Mesozoic and Tertiary deposits. Extensive tracts (originally about one-fourth of the area of the colony), especially in the Wimmera dist., are covered with mallee scrub (*Eucalyptus dumosa*—a bush of remarkable vitality, 12–20 ft. high, growing in dense thickets, infested with rabbits), intersected with forests of she-oak, box, stringy-bark, &c. Much of the mallee scrub-land has, however, recently been taken up for pastoral purposes, under specially advantageous conditions offered by the government, and is rapidly being reclaimed. The bush is felled with a heavy roller, then burnt, and the ground is then ready for ploughing with a peculiar plough of S. Australian invention, the share of which is so poised as to jump over the stumps (or any other fixed obstruction) left in the ground. Forests of gum, iron-bark, and other valuable trees occur in Gippsland, the mountainous parts of Murray dist., and elsewhere. The **climate** is, on the whole, temperate and healthy; in July and Aug. slight frosts occur, while in Jan. and Feb. hot winds from the interior sometimes raise the temp. to 105° or even 110° F.; but these extremes are of short duration, and the mean for the colony approximates to 57° F., higher to the N. of the Dividing Range than to the S., where the influence of the sea-breezes is most felt [**Sandhurst, Echuca, Ballarat, Melbourne**]. N. of the Dividing Range the rainfall is generally scanty, but in the mallee scrub region is generally sufficient for the cultivation of wheat, the crop to which the cleared land is generally devoted. At Hopetoun, one of the principal centres in this region, in 35° 43′ S., 142° 24′ E., the mean rainfall in 14 years was upwards of 15 in., of which 10½ in. fell in the season of growing crops. **Irrigation** is, however, in many parts of North V. absolutely essential to successful farming; and probably no part of Australia offers greater facilities for irrigation. It has been estimated that the water brought down by the northern streams would be sufficient to irrigate an area nearly three times as large as Bourke co., so that this region might become one of the most populous parts of Australia. Special attention is given to the matter by the government, which acquired extended powers for dealing with it by the Water Act of 1890. Several important irrigation works are now in operation, as those of the Goulburn and Loddon dists., W. Wimmera, and the famous Mildura Irrigation Colony; while under rural water-trusts over 4,000,000 acres were supplied in 1893. **Agricultural products** include cereals, of which the most important is wheat, grown extensively in the Loddon and Murray dists., tobacco, hemp and flax, and fruits of all kinds. The cultivation of the vine, chiefly in the Murray dist., is rapidly extending, yielding wines of good quality, the produce per acre being about 250 to 300 gallons. Under the 'Settlements on Lands Act, 1893,' many small holdings are being allotted, by which it is hoped to promote the cultivation of minor products, such as medicinal, dye, and perfume plants, for which manual labour is best adapted. The **principal mineral** is gold, said to occur over one-third of the colony, and of which the total production from 1851 to 1893 exceeded £235,000,000; chief mining centres, Ballarat, Beechworth, Sandhurst, Maryborough, Castlemaine, Ararat, and the Gippsland dist. Other minerals include coal (found near Cape Paterson and Western Port, and elsewhere), lignite (valuable deposits, covering at least 100 sq. m., have been discovered in Gippsland), silver (St. Arnaud and Bethanga), tin (Beechworth and Omeo), iron (Lal-Lal), &c. Manufactures are being developed, but as yet the products are used chiefly in the colony, though some are exported. The **railway system** of V. is extensive, and in the W. central part forms a complete network. The principal **exports** are wool, wheat and flour, butter and cheese, skins, tallow, gold, &c.; principal **imports,** woollen and cotton goods, sugar and molasses, iron and steel and manufactures thereof, apparel, &c. Elementary **education** is free, and compulsory between the ages of six and thirteen; technical schools are established in various parts of the colony, and there is one university (Melbourne). The military forces include a small permanent staff, the militia, and the volunteers. As to government, see **British Empire, The.** For purposes of **local government,** nearly the whole of V. is divided into urban or rural municipalities, incorporated under the Local Government Act, 1890; the former are cities, towns, or boroughs, the latter shires; any dist. containing ratable property to the value of £10,000 can be constituted a shire, and any group of 300 houses, a borough. The first permanent settlement on the terr. was made at Portland in 1834; in 1835 another band of settlers established themselves on the shores of Port Phillip Bay, on the site now occupied by Melbourne. This settlement continued to be subject to the governor of New South Wales till 1851, when it was erected into the independent colony of V. Area, 87,884 sq. m. P. (1891) 1,140,400. See **Australia, Australasian Colonies,** table, and **British Empire, The.** [**E. J. H.**]

Victoria, tn. and seapt., Argentine Republic, Entre Rios, 34 m. ENE. Rosario; an important centre of commerce. P. 6000.

Victoria, seapt., on the E. ct. of Brazil, Espirito Santo, in 20° 18′ S., 275 m. NE. by E. Rio de Janeiro. The roadstead, at the entrance of the bay, is rendered dangerous by several islets and reefs. Exports coffee, rice, sugar, and manioc. The old Jesuit college (1551) now serves as a government palace. V. is one of the oldest Portuguese establishments in Brazil. In 1535, on the S. shore of the bay, Coutinho founded the town of Espirito Santo, which was soon after transferred to the neighbouring island. P. 20,000.

Victoria, tn., Natal, Victoria dist., 22 m. NNE. Durban.

Victoria, co., S. Australia, S. of 33° S., bounded on the W. by Spencer's Gulf.

Victoria, or **Huonville,** tn., Tasmania, Buckingham co., 15 m. SW. by W. Hobart; fruit-growing dist.; coal is found in neighbourhood. P. <1500.

Victoria, mining vil., U.S., Tennessee, Marion co., 19 m. NW. by W. Chattanooga. P. <1500.

Victoria, city, U.S., Texas, cap. V. co., on the Guadalupe R., 113 m. SSE. Austin; centre of active agricultural trade. P. <4000.

Victoria, tn., Venezuela, Miranda, 40 m. SW. by W. Carácas.

Victoria, co., W. Australia, between 30° and 32° S., and 116° and 181° E.

Victoria, dist., W. Australia, bounded on the W. by Geelvink Channel, and on the N. by Murchison R.

Victoria, Mount, New Guinea, highest peak in the Owen Stanley Range, at SE. end of range. Alt. 13,121 ft.

Victoria, Mount, peak, Tasmania, in about 41° 20′ S., 147° 43′ E., 25 m. from E. ct. Alt. 3964 ft.

Victoria Bay. See **Peter the Great Gulf.**

Victoria Bridge, stn., Ire., NW. co. Tyrone, bar. Lower Strabane, 4 m. S. Strabane, on riv. Foyle, on the G. N. (Ire.) and Donegal Rlys., P.O.

Victoria Corner, post-vil., Canada, New Brunswick, co. Carleton, 10 m. from Woodstock. P. <1500.

Victoria Desert, or **Great Victoria Desert,** the S. part of the desert in E. half of W. Australia, comprising all the land between the sea on the S., and 26° S. on the N., and from 120° E. on the W. to the border of S. Australia, where it continues as No Man's Land.

Victoria Docks, docks, London, Eng., Kent, on the l. bk. of the Thames, 5–7 m. E. St. Paul's, with two stns. (**Tidal Basin** and **Custom House**) on the G. E. R., and 4 stns. (**Connaught Road, Central, Manor Way,** and **Gullions**) on the Royal Albert Dock Rly.

Victoria Docks, part of West Ham par., Eng., Essex, comprising two eccles. pars. Total P. 37,100.

Victoria Falls, or **Mosi-oa-tun-ya,** great falls upon the riv. Zambezi, in 25° 51′ E.

Victoria Fort, Isle of Wight, at Sconce Point, 1 m. W. Yarmouth, on the coast, one of the defences of the Solent.

Victoria Harbour, post vil., Canada, Ontario, co. Simcoe, on Matchedash Bay, 120 m. from Toronto. P. <1500.

Victoria Lake, Canada, Ontario. See **Opeongo.**

Victoria Lake, Newfoundland, in 48° 20′ N., 57° 10′–30′ W., drained NE. by the **Victoria R.** into Red Indian Lake.

Victoria Lake, or **Zor-kul,** sometimes **Gaz-kul,** on the Great Pamir, central Asia, crossed by 37° 25′ N., 73° 50′ E., the lake collecting the head-streams of the Pamir R., one of the rivers uniting to form the Ab-i-Panj, one of the two great head-waters of the Amu or Oxus. Alt. about 14,000 ft.

Victoria Lake, brackish lake, Victoria, crossed by 38° S., connected by a navigable channel with Lakes Wellington and King and the ocean; navigable for small vessels. Length, 22 m.; breadth, 2–3 m.

Victoria Mines. See **Low Point Shore.**

Victoria Land. Brit. N. America, in Arctic Regions, crossed by 70° N. and 105° W.

Victoria Land. See **Antarctic Regions.**

Victoria Nyanza, the largest of the lakes in central Africa, in about 0° 25′ N. to 3° S., 31° 45′ to 34° 45′ E. In the SE. is the large Speke Gulf, and in the S. the narrow inlet of Smith Sound. Apart from these the coasts are pretty regular. The N. part, N. of 1° S., belongs to the sphere of British influence, the S. part, S. of this parallel, to the sphere of German influence. The lake is bordered almost all along its coasts by a belt of islands, especially near its W. and SW. coasts, the largest being Sesse in NW., Ukerewe and Ukara in SE., and Ugingo towards NE. On the W., in Ger. terr., the rocks of the high plateau descend sheer into the lake, only leaving a narrow strip of sandy land between them and the shore. In Uganda, more to the N., the coast is flatter and covered with forests. The E. ct. of the lake is sandy and barren. The principal tribs. are, in the SE., the Simiu and the Rubana; in the W., the Kagera and Katonga. On the N. is the outlet of the lake to the Nile by Ripon Falls. From February to May, and from September to November, there are severe storms and large waterspouts on the lake. In the neighbourhood, often in the evening a sea breeze is felt, and in the morning a land breeze. There are fish in the lake, and it abounds in molluscs. On the SW. are vast swamps covered with papyrus. The dists. around the lake are amongst the most populous in Africa. The V. N. was discovered by Speke at its S. end in 1858, and its outlet to the N. by the same explorer in 1861; in 1875 Stanley sailed all round it. Greatest length, N. to S., is about 180 m.; greatest width, E. to W., 208 m. (118 m. in the S.). Area, 32,167 sq. m. Alt. between 3300 ft. (Mackay) and 4240 ft. (Wilson and Felkin), more than 650 ft. above Lake Albert Edward Nyanza, and 1600 ft. above Lake Albert. Depth, 1–2 m. from S. shore in Speke Gulf, 6 ft.; along the W. shore, 50–80 ft.; E. of Bumbire I., 360 ft.; S. of Ukerewe I., 130 ft.; N. of that island, 295 ft., and 620 ft. near the E. shore.

Victoria Park, eccles. par. and stn., Eng., Middlesex, Tower Hamlets div., on the N. L. R., 4 m. NE. by E. St. Paul's, London. P. 13,000.

Victoria Peak, summit in Brit. Honduras, Central America, in Cockscomb Mts., 53 m. SSW. Belize. Alt. 3700 ft.

Victoria Peak, mt., Palawan I., Philippine Is., in 9° 25′ N., 118° 17′ E. Alt. 5675 ft.

Victoria Plains, post-tn., W. Australia, Glenelg co., 75 m. NNE. Perth. In the neighbourhood is the Roman Catholic missionary establishment of New Norcia. P. <1500.

Victoria Ranges, Victoria, in co. Dundas, about 142° 20′ E., run 30 m. from N. to S., and comprise quarries of hard stone (grindstones and mill-stones). They are thickly covered with fine timber, chiefly stringy bark.

Victoria River, S. Australia, N. Terr., rises in 18° 20′ S. and 131° E., flows N., W., and NW., and joins the Indian Ocean by the wide estuary of Queen's Channel, in 14° 46′ S., 129° 25′ E.; navigable for 46 m. by sea-going ships, and 100 m. by small craft.

Victoria River, or **Barcoo,** riv., Queensland, discovered in 1846 by Sir T. Mitchell; it flows W., and in 1858 was traced by Gregory into Cooper's Creek, lat. 25° 10′ S.

Victoria Road, post-vil., Canada, Ontario, co. Victoria, 79 m. N. of Toronto. P. <1500.

Victoria West, vil., Cape Colony, cap. of dist. V. W., 70 m. NNE. Beaufort West. Alt. 4100 ft. Mean rfall. 12.4 in. P. <1500.

Victorica, settlement, Argentine Republic, Pampa terr., 304 m. SE. Mendoza, 206 m. S. by E. San Luis.

Victory, islet, E. Indies, at almost equal distance between Malay Penin. and Borneo, in about 20° N.

Victory, maritime vil., W. Africa, French Ivory Coast, 168 m. WSW. Great Bassam, in Kruland.

Victory Mills, vil., U.S., New York, Saratoga co., 25 m. N. by E. Troy, 8 m. E. Saratoga, on the Champlain Canal; has cotton manufactures. P. <1500.

Vicuna, Bay and **Island,** N. ct. of Vanua Levu, Fiji Is., in 16° 13′ S., 179° 50′ E.

Vid, riv., Bulgaria, rises in the Balkan Mts., and flows NW. and NNE. to the Danube, which it joins on the r. bk. about 9 m. above Nikopoli.

Vidago, vil., Portugal, Traz-os-Montes, 25 m. NNE. Villa Real; has mineral waters much used.

Vidal, cape, S. Africa, Zulu-land, E. of the S. end of St. Lucia, in about 28° 13′ S.

Vidal, isl. of the ct. of Chile, crossed by 52° S., in NW. of Queen Adelaide Archipelago.

Vidalia, vil., U.S., Louisiana, Concordia co., on the r. bk. of the Mississippi, 64 m. SW. by S. Vicksburg (Miss.); important cotton mart. P. <1500.

Vidauban, tn., France, dep. Var, arr. Draguignan, 16 m. W. Fréjus; has lead-mines and manufactures of corks. P. <3000.

Viddin, or **Vidin,** the ancient *Bononia*, fortified tn. and riv. port, in the NW. of Bulgaria, cap. prov. V., on the r. bk. of the Danube, in the midst of a marshy plain, in 44° N.; has industry in gold and silver filigree work, jewellery, lace, &c. V. is divided into three dists.; the modern suburb, by the Danube, the city surrounded by walls, and the citadel. V. was conquered by the Turks in 1396, who kept it, except between 1689 and 1737, until 1878. P. (1881) 13,700; (1888) 14,800; Bulgarians, 8000; Moham. 3500.

Viderö, one of the Faroe Is., 19 m. E. Strömö.

Vidigueira, tn., Portugal, dist. Beja. P. <4000.

Vidin, Bulgaria. See **Viddin.**

Vidlin, P.O., Scot., Shetland Is., Mainland, Nesting par., on V. Voe, 19 m. S. by E. of the N. end of the Mainland.

Vidourle, riv., France, rises near the S. end of the Cevennes, dep. Gard, flows S. by E., and enters the lagoon of Repausset 13 m. E. Montpellier. Length, 60 m.; area of basin, 500 sq. m.

Vidrare, vil., Bulgaria, prov. Loveč, 42 m. SW. Plevna. P. <3000.

Vidzy, Polish **Widzy,** tn., Russia, govt. Kovno, 42 m. S. Dvinsk (Dünaburg). P. 5700.

Vie, riv., France, dep. Vendée, rises 5 m. N. La Roche-sur-Yonne, and flows W. into the Atlantic, which it reaches at St. Gilles. Length, 37 m.

Viechtwang, tn., Upper Austria, 23 m. WSW. Steyr. P. <2000.

Viedma, lake, Argentine Republic, Patagonia, govt. Santa Cruz, in the Andes, in 49° 30′ S.; it communicates with Lake San Martin on the NW., and with Lake Argentino on the SE. by the Rio Leona. Length, 53 m.; breadth, 12 m.

Viedma, tn., Argentine Republic, Patagonia, cap. govt. Rio Negro, on r. bk., and about 19 m. above the mouth of the Rio Negro, opposite Carmen Patagones. P. <2000.

Viège, vil., Switzd. See **Visp.**

Vieille Montagne, mining vil. See **Moresnet.**

Vieira, tn., Portugal, dist. Leiria. P. <4000.

Viejas, small isl., in Independencia Bay, Peru, in 14° 20′ S.

Viejo, cape, Morocco. See **Ras ed Deir.**

Vielau, vil., Ger., kgd. Saxony, circle, dist., and 3 m. SE. Zwickau. P. <4000.

Vielsalm, comm., Belgium, prov. Luxembourg, arr. Bastogne, 16 m. S. Spa; large slate quarries near. P. <4000.

Vienenburg, vil., Prussia, prov. Hanover, circle Goslar, 15 m. S. Wolfenbüttel. P. <3000.

Vienna, Ger. **Wien** (originally *Vindobona*, *Vindobna*, *Vidobomina*, name probably of Celtic origin, meaning 'white castle;' *vindos*, 'white;' *obna*, 'castle'), cap. of the Austro-Hungarian monarchy, situated on the r. bk. of the Danube, at its confluence

with the little riv. Wien at the W. end of the level plain known as the Marchfeld stretching along the left or N. bank of the Danube to the riv. March and the base of the Little Carpathians. V. New Observatory, 48° 13′ 55″ N., 16° 20′ 23″ E. The importance of the geographical position of V. consists in the fact that it lies on the spot where the last NE. offshoots of the Alps (Wiener Wald) reach the Danube Plain. The chief divs. of V. are: the Inner Town, Leopoldstadt, Landstrasse, Wieden, Margarethen, Mariahilf, Neubau, Josephstadt, Alsergrund, Favoriten. The principal suburbs are: Flöridsdorf, Simmering, Gaudenzdorf, Obermeidling, Untermeidling, Sechshaus, Fünfhaus, Rudolfsheim. A little more distant are Schwechat, Inzersdorf, Währing, Hietzing, Nussdorf. In the suburb of Hietzing is the royal palace of Schönbrunn, with beautiful grounds open to the public. V. is the seat of the civil and military government of Austria, and the see of an archbishop. The V. University, founded in 1365, is one of the oldest, and, next to Paris, the largest (350 teachers, 6000 students) of the world. Its medical school is of great renown, and medical studies are facilitated by a vast and well-equipped hospital. The V. Academy of Science is also famous. The museums contain valuable collections. The centre of the Inner Town is occupied by the celebrated cathedral of St. Stephen, founded in 1144, one of the finest specimens of mediæval architecture. The Gothic 'Votiv Kirche' (built in 1853) forms one of the principal ornaments of modern V. Among other buildings must be mentioned the Imperial Castle ('Hofburg'), an assemblage of buildings, erected at different times; the Town Hall; the new Parliament buildings; and the Exchange. The old fortifications have been converted into a street, called the Ringstrasse, surrounding the whole of the Inner Town and forming the principal street of V., with a length of more than three miles. Outside of it are a number of parks, including the well-known 'Prater.' V. is the industrial and commercial centre of Austria. The chief manufactures are machinery, musical instruments, iron-ware, jewellery, surgical and physical instruments, beer, chemicals, and leather goods. Many railway lines converge at V., and the Danube navigation (see **Danube**) is likewise of very great commercial importance. The traffic is increasing from year to year, cereals, coal, and textiles forming the principal commercial commodities. V. was founded by Celtic tribes. Here the emperor Marcus Aurelius died in 180 A.D. But V. was long inferior in importance to the more easterly *Carnuntum*, situated also on the r. bk. of the Danube, but opposite a point near the E. end of the Marchfeld (extensive ruins near the village of Petronell). This town having been destroyed in the 4th century by the Germani, the Romans then fortified V. and made it their headquarters in this region. In the following century, however, it was destroyed by the Rugii, and it was not before the middle of the 12th century that V. again came into prominence, when it was refounded by Henry Jasomirgott, the first duke of Austria. The emperor Frederic II. made it a free imperial city in 1237, and in 1276 it became the residence of the Habsburgs. V. was besieged in 1529 and 1683 by the Turks. In 1805 and 1809 it was occupied by French troops. In 1815 the famous V. Congress took place. Alt. 560–655 ft. Mean temp., yr. 48.8° F., Jan. 29.6°, July 68.5°; rfall. (34 yrs.), 23.42 in. P. (1754) 175,400; (1820) 260,000; (1840) 357,000; (1880) 726,000; (1890) 1,364,500.

Vienna, vil., Canada. See **Rosedene.**

Vienna, vil., U.S., Illinois, cap. Johnson co., 67 m. SW. Carmi by rail. P. <1500.

Vienne, dep., W. France, traversed S. to N. by the Vienne R., formed in 1790 out of Poitou (about four-fifths), Tourraine, and Berry; divided into four arrs.: Poitiers (cap.), Châtellerault, Civray, Loudon, and Montmorillon. The surface consists chiefly of low plateaux and hills, intersected by winding valleys, and presenting considerable diversity; highest in S., Coteau de Prun (765 ft.), lowest (115 ft.) at confluence of the Creuse with the V. The dep. belongs mainly to the basin of the Loire by the V. and Dive Mirebalaise; small areas in the W. and SW. being drained respectively to the Sèvre Niortaise and the Charente. The principal affluents of the V. (which traverses the dep. for 60 m. and drains more than four-fifths) are l. bk. Clain and r. bk. Creuse, with its l. bk. affluent, Gartempe; the NW. is drained by the Dive Mirebalaise. As regards geological formation, granitic rocks form a narrow zone in the SE., succeeded northward by lias, Jurassic limestone, and chalk, together occupying about six-sevenths of the dep., overlaid, however, over extensive areas by Tertiary deposits. The soil varies much in character, in some parts very poor, in others fertile; the 'warren lands' ('terres de varenne') of the valleys are especially suited to cereals, root-crops, nuts, &c. Principal forests, Moulière, Vouillé-St.-Hilaire, Châtellerault, &c. Climate variable [**Poitiers**]; rainfall greatest in autumn. Principal cereal, wheat (which here covers the largest area of any dep.), next oats; the vine occupies nearly 4 per cent. of the surface (Poitiers, Montmorillon, Châtellerault, Loudon), but the production per hectare is less than half the average for France; root-crops for forage, a little hemp (Lencloître); principal fruit trees, chestnut, walnut, and almond. Manufactures very limited; blast-furnaces (Montmorillon, &c.), cutlery (Châtellerault). Area, 2712 sq. m. P. (1891) 344,400. See **France,** table.

Vienne, riv., France, rises in the plateau of Millevache, dep. Corrèze, flows W. past Limoges, then N. and WNW., and enters the Loire 8 m. above Saumur. Its principal tribs. are the Creuse (r.) and the Clain (l.). Length, 217 m.; area of basin, 8287 sq. m.; ordinary discharge, 2120 cubic ft. to 2470 cubic ft. Navigable for 52 m. to 6 m. above Châtellerault.

Vienne, suburb of Blois, France, dep. Loir-et-Cher, on l. bk. of the Loire. P. <3000.

Vienne, tn., France, dep. Isère, cap. arr. V., on the l. bk. of the Rhone, 17 m. S. Lyons; has lead and copper mines, foundries, mechanical factories and brass works; manufactures of haircloth, cloth, flannel, rope, twine, &c. Two interesting memorials of Roman civilisation survive in a temple to Augustus and Livia, and a circus pyramid. V. has three churches of the 11th and 13th centuries, including the Romanesque-Gothic cathedral. Has remains of Roman walls and feudal buildings, surmounted by a colossal statue of the Virgin (1860). V. is the ancient *Vienna*, the cap. of the Allobroges. From 257 to 267 it was the cap. of the empire of Posthumus, but it was between the reigns of Constantine and Theodosius that it became the seat of a bishopric, and for some time the cap. of all the Gaulish dominion, including Spain and Great Britain. The Emperor Valentinian II. died here in 392. At a later date V. was elevated to the rank of an archbishopric, which, however, was suppressed at the Revolution. In 1311 and 1312 an Œcumenical Council was held here to suppress the Templars. Alt. 590 ft. P. (1872) 21,400; (1891) 24,800.

Vienne, Haute, dep. W. France, traversed E. to W. by Vienne R., formed in 1790 out of Limousin (chiefly), La Marche, Poitou, and Berry; divided into four arrs.: Limoges (cap.), Bellac, Rochechouart, and St. Yrieix. Surface diversified, a succession of mountains of moderate elevation, called the mountains of Limousin, intersected by verdant valleys, in parts well wooded, and with numerous small lakes (étangs); highest point, Colline de Souffrangeas (2550 ft.), in SE. on frontier of Corrèze, with several neighbouring summits of nearly the same alt.; further N. the mountains of Ambazac rise to 2300 ft., and in the W. the mountains of Blond to 1690 ft. The dep. belongs to the basins of the Loire, Gironde, and Charente; chiefly to the first by the Vienne, of which the principal tribs. in the dep. are r. bk. Maude, l. bk. Briance, and Gartempe (the latter joining beyond the frontier); the Gironde drains a small dist. about St. Yrieix, and the Charente has its source in the SW. The geological formations belong almost entirely to the Primary rocks, with only small patches of Tertiary (Eocene). Forests few (Châteauneuf, &c.). Climate similar to that of the central plateau [**Limoges**], coldest in SE.; rainfall below the average. Agriculture is carried on chiefly in the valleys; principal cereal rye, then wheat and buckwheat; a little hemp and colza are grown. The chestnut is the characteristic fruit of the dep., and forms a principal article of food for the peasantry. Non-metalliferous minerals are important, including fine-grained granite and mica, serpentine, beautiful quartz crystals and precious stones (garnets and emeralds), and valuable deposits of kaolin (St. Yrieix, Coussac-Bonneval), which supply the porcelain manufactures of Sèvres and Limoges. Manufactures limited; forges (Champagnac, Marval, &c.); special industries are porcelain (Limoges), gloves, sabots. Area, 2120 sq. m. P. (1891) 372,900. See **France,** table.

Vincennes, tn., France, dep. Seine, 5½ m. E. Notre Dame, Paris, 2½ m. from the city wall, with a fort; has manufactures of chemical products, cartridges, metal plates, pianos, and organs. It has a castle, built by Philip of Valois, John, and Charles V., on the site of a feudal fortress founded 1164 by Louis VII., and enlarged by St. Louis, in the midst of a forest, which was used as a royal residence till the time of Louis XV. Henry V. of England died here in 1422, also Charles IX. of France, 1574, and Mazarin, 1661. Louis XI. made a state prison of the keep, where many persons were confined, amongst them Henry of Navarre, the great Condé, Duke de Longueville, Cardinal de Retz, Fouquet, Diderot, Mirabeau, and several of Charles X.'s ministers, and outside of which the Duke d'Enghien was shot by order of Napoleon I., March 21, 1804.

It contains military schools, a fine armoury, depôt of artillery, and the tomb of the Duke d'Enghien. Birthplace of Charles V., died 1380; Elizabeth of France, Duchess of Milan, died 1372; and Madame de Longueville, died 1679. The town owes its prosperity to the forest called Bois de V., which covers about 17 ac. between the fortifications of Paris, and r. bk. of the Marne. P. (1872) 17,064; (1891) 20,400.

Vincennes, isl., Pacific. See **Kawahi.**

Vincennes, city, U.S., Indiana, Knox co., on l. bk. of Wabash R., 49 m. S. by W. Terre Haute, on a fine prairie; has Roman Catholic cathedral and the V. University, chartered 1807. The dist. supplies timber and coal. V. has flouring-mills, starch factory, iron-foundries, and extensive railway machine shops. On high ground near are three ancient artificial earth-mounds. V. is the oldest town of the state, and stands on the site of the military station founded by Vincennes in 1702. P. (1880) 7700; (1890) 8900.

Vincentown, vil., U.S., New Jersey, Burlington co., 24 m. E. Philadelphia. P. <1500.

Vinces, vil., Ecuador, prov. Los Rios, 50 m. NNE. Guayaquil, on l. bk. of Rio de V., or Palenque.

Vinces, Rio de, riv., Ecuador, rises in the Andes, and flows SSW. into the Rio de Bodegas, before entering which, however, it breaks up into several arms, none of which is navigable in the dry season, though steamers can ascend to Palenque (52 m. NNE. Guayaquil) in the rains.

Vinchiaturo, tn., Italy, Abruzzi e Molise, prov. and 7 m. SW. Campobasso, 48 m. W. Foggia; has manufactures of Maccaroni. P. <5000.

Vinchina, vil., Argentine Republic, prov. and 102 m. NW. Rioja, on r. bk. of the Rio V.; the starting-point for Mount Copiapo.

Vincocaya, vil., Peru, dep. Arequipa, 110 m. NE. by N. Mollendo, on the railway to Puno. Alt. 14,635 ft.

Vindhya, series of mt. ranges, India, forming the great N. wall of a triangle whose E. and W. sides are the Ghâts. The V. Hills run E. from Gujarát across Málwá to the valley of the Ganges at Rájmahal. They have given their name to a recognised geological formation. Diamonds are found in these hills. Alt. 1500–4500 ft., nowhere exceeding 5000 ft.

Vindobona. See **Vienna.**

Vindocinum, tn., France. See **Vendôme.**

Vinegar Hill, mt., Ire., in the E. of co. Wexford, 5 m. ENE. Enniscorthy. Irish rebels defeated here by General Lake in 1798.

Vineland, bor., U.S., New Jersey, Cumberland co., 30 m. S. by E. Philadelphia (Penn.); a very attractive town, with private residences generally surrounded by gardens and vineyards. A home for feeble-minded women and children was founded in 1888. Immense quantities of fruit are exported. Principal manufacture is that of shoes. P. <4000. **Vineland, South,** adjoining vil., P. <1500.

Vinemont, vil., U.S., Pennsylvania, Berks co., 10 m. W. Reading. P. <1500.

Vineyard, The, par., Eng., Herefordshire, in bor. of Hereford. P. 8.

Vineyard Haven, vil., U.S., Massachusetts, Dukes co., 27 m. SE. New Bedford; has an excellent harbour, and is engaged in fisheries. P. <1500.

Vineyard Sound, channel, U.S., Massachusetts, on the NW. of Marthas Vineyard I.

Viney Hill, eccles. par., Eng., Gloucestershire, E. and W. Dean and Awre pars. P. <2000.

Vinga, or **Theresiopolis,** tn. with magistracy, Hungary, co. Temes, cap. dist. V., 17 m. N. Temesvár. P. <5000.

Vingearme, riv., France, rises about 3 m. from the source of the Aube in Langres plateau, dep. Haute-Marne, flows SSE., and joins the Saône 10 m. SSW. Gray; not navigable for timber or ships, but its valley is followed almost throughout by the canal from the Marne to the Saône. Length, 54 m.; area of basin, 273 sq. m.

Vingst, vil., Prussia, Rhine Prov., govt. and circle Cologne, 3 m. E. Deutz. P. <3000.

Vinhaes, vil., Brazil, state Maranhão, in São Luiz de Maranhão I.; formerly a Jesuit mission station.

Vinh-long, tn., Lower Cochin-China, on the r. bk. of the Konghan mouth (*kwa*) of the Mekong, 60 m. WSW. Mekong.

Vinita, vil., U.S., Indian Terr., 74 m. W. by S. Pierce City; business centre of the Cherokees. P. <1500.

Vinje, vil., Norway, prov. S. Trondhjem, on the W. ct., 41 m. E. Christiansund. P. <2000.

Vinkeveen, vil., Holland, prov. Utrecht, 11 m. S. Amsterdam. P. (comm.) <4000.

Vinkovce, tn., Hungary, Croatia-Slavonia, 20 m. S. by E. Eszek. P. 5900.

Vinnitsa, dist. tn., Russia, govt. Podolia, 90 m. NE. Kamenets Podolsk, on both banks of the Bug, 29 m. from Zhmerinka junction of Volochisk–Odessa Rly., on its branch to Kiev. Surrounded by populous suburbs. P. 25,000.

Vinovo, tn., Italy, Piedmont, prov. and 9 m. S. Turin; terminus of a steam-tram from Turin. P. <3000.

Vinton, city, U.S., Iowa, Benton co., on Wapsipinicon R., 23 m. NW. by W. Cedar Rapids; has the state college for the blind. P. <3000.

Vinton, co., U.S., Ohio, in the SE., to the N. of 39° N. E. of 83° W.

Vinton, tn., U.S., Virginia, Roanoke co. P. <1500.

Vintschgau, Italian **Val Venosta,** valley, S. Tirol, circle Botzen, stretching NW. to E. from Reschen Pass (alt. 4900 ft.), which forms the step between the basins of the Danube and the Adige, and which separates the Engadine from the upper valley of the Inn to Töll Pass (alt. 1635 ft.); it is about 40 m. long and divides into two. The inhabitants speak German, but are of Rhæto-Roman descent. P. <2000.

Vinukonda, tn., Brit. India, Madras, dist. Kistna, 15 m. NNW. Masulipatam. P. 6900; Hindus, 5200.

Vinya Nyara, group of vils., Congo Free State, on the l. bk. of the upper Congo, in 2° 15′ S.

Vlöl, vil., Prussia, prov. Schleswig-Holstein, circle Husum, 16 m. W. by N. Schleswig. P. <2000.

Violaines, tn., France, dep. Pas-de-Calais, arr. and 6 m. E. by N. Béthune; has coal-mines and phosphate beds. P. <2000.

Viravásaram, tn., Brit. India, Madras, Godávari dist., 40 m. NE. by E. Masulipatam. P. 5700; Hindus, 5600.

Virden, stn., Canada, prov. Manitoba, on the C. P. R., 180 m. by rail W. Winnipeg.

Virden, city, U.S., Illinois, Macoupin co., 22 m. S. by W. Springfield; coal mined; centre of active trade; important grain mart. P. <2000.

Vire, tn., France, dep. Calvados, cap. arr. V., 9 m. NW. by W. Tinchebrai; has quarries of granite suitable for works of art; manufactures of hosiery, cloth, and woollens; exports butter. Its church dates from the 13th, 14th, and 16th centuries; gateway fortified in the 13th century. V. owes its importance to its castle, built by Henry I. of England at the beginning of the 12th century. P. 6400.

Vire, riv., France, rises in SW. corner Calvados, and, after a N. course, enters the (Bay de Veys) English Channel, 15 m. N. St. Lô. Length, 73 m.; area of basin, 1200 sq. m. Navigable up to Pontfarey, 44 m.

Virestad, vil., Sweden, prov. Kronoberg, 23 m. SW. Vexiö. P. (comm.) 5400.

Virgen, La, port, Nicaragua, on the W. shore of Lake Nicaragua, 65 m. SE. by S. Managua, 5 m. from Rivas; safe anchorage.

Virgenes, Cabo de las, cape, in the extreme SE. of the mainland of Argentine Republic, in 52° 20′ S.

Virgilio, the ancient *Pietole,* vil., Italy, Lombardy, prov. and 3 m. S. Mantua. Birthplace of the Latin poet Virgil. P. (comm.) <4000.

Virgin Gorda, small British isl., W. Indies, one of the Virgin Is., in 18° 28′ N., 64° 17′–25′ W.

Virginia, vil., W. Africa, Liberia, 12 m. N. Monrovia, on r. bk. of St. Paul R.

Virginia, tn., Ire., SE. co. Cavan, bar. Castlerahan, 16 m. SE. Cavan, 3 m. from Virginia Road stn. P. <750.

Virginia, post-tn., S. Australia, co. and 18 m. N. by W. Adelaide. P. <1500.

Virginia, one of the thirteen original states of the American Union, the severest sufferer during the Civil War, of which it was largely the seat. The resulting separation of W. Virginia to the NW. in 1863 gave V. its roughly triangular shape, and present area one-sixth less than England. Bounded S. by N. Carolina, E. by the Atlantic, separated from Maryland to NE. by Potomac R. The surface divides easily into six regions, with varying climate and products. Low-lying **Tidewater V.** to the E. produces much vegetables and fruit, particularly peanuts. The 1500 m. of tidal shore on the Atlantic, Chesapeake Bay, and the entering rivers have important fisheries, especially of oysters, in gathering which only Maryland, with the N. portion of the bay, surpasses V. The chief ports are on Hampton Roads, formed by the estuary of the James R.,

perhaps the finest American Atlantic harbourage. On this river are Richmond (P. 81,000), the largest city and capital, and five of the other eight cities exceeding 8000. Inland is the great triangular plain of **Middle V.,** much divided by its many rivers, and with valuable soil somewhat injured by continuous tobacco planting. Corn, growing well throughout the state, is the chief crop; then come hay, wheat (enabling flour to be the second Virginian product), and tobacco (five states threaten V.'s rank of second to Kentucky; V.'s chief manufacture). Finally stretching from NE. to SW. are the more elevated **Piedmont strip** and the **Blue** and **Mountain Ridges,** with the **Valley region** between, watered by six rivers. The E. is mild in winter, but malarial in summer. In the Valley are Roanoke and other health resorts; its elevation makes it cool in summer, and the mountains keep off winter winds [**Cape Henry, Lynchburgh, Norfolk, Wythville**]. The remaining oak and pine forests and their rapid growth make lumber still fourth product. Carboniferous rocks in the SW. yield yearly 700,000 tons of bituminous coal, while the Devonian and Silurian strata of the mountain region are rich in minerals. V. ranks fifth both in the quantity of pig iron produced and of iron ore, chiefly brown hematite, mined. Area, 42,450 sq. m. P. 1,656,000. See **United States,** table. [**W. S.**]

Virginia, vil., U.S., California, Placer co., 10 m. N. Auburn. P. <1500.

Virginia, city, U.S., Illinois, Cass co., 32 m. W. by N. Springfield. P. <2000.

Virginia, city, U.S., Montana, Madison co., 56 m. SE. by S. Butte City, with rich placer and quartz mines in vicinity. Settled in 1863, on the discovery of gold. Alt. 5480 ft. Mean temp. (9 yrs., 1872–80), yr. 40.2° F., Jan. 18.5°, July 64.4°. P. <1500.

Virginia, city, U.S., Nevada, Storey co., 12 m. NE. Carson City, built at the foot of Mount Davidson, which rises 1622 ft. above the main street, and 7827 ft. above the sea, and directly over the famous Comstock Lode. Several other mines near, most of them, however, now nearly exhausted. The greatest depth yet reached is about 2250 ft. Alt. 6205 ft. (R.R.). P. (1870) 7000; (1880) 10,900; (1890) 8500.

Virginia, West, one of the United States, separated from Virginia after the passage of the Secession ordinance in 1861, admitted June 19, 1863, irregular in shape, half the area of England, bounded W. by Kentucky, S. and E. by Virginia, and N. by Pennsylvania. The Potomac separates it NE. from Maryland, and the Ohio R. divides it from Ohio to NW.; between Ohio and Pennsylvania it sends N. the narrow projection known as the Panhandle. The Alleghany Mts. (2500 ft. high) form most of the eastern frontier, and are followed by a parallel ridge, 20–40 m. distant, bearing various names. Thence the country, though a mass of great hills, has a general slope down to the Ohio, which forms a thoroughly navigable NW. boundary for about 300 m. The climate is agreeable and healthy, without great extremes [**Morganstown**]. Many Ohio tribs., more or less navigable, water the state and furnish power for flour-milling, the second industry in importance. The chief product, iron and steel, exceeds £2,000,000 yearly, though the ore is brought from other states, the local yield being insignificant. Forests cover two-thirds of the state, and the lumber product is third in importance. Most of the population are still engaged in agriculture. The soils of the valleys and hillsides are fertile; corn, hay, wheat, oats, and potatoes are chief products. Few cities of any size. Wheeling (P. 34,500), with manufactures of iron, steel, and glass, in the Panhandle, perhaps the most fertile area in the Union, Huntington and Parkersburg with petroleum refineries, all three on the Ohio, are all that exceed 8000. Martinsburg, in the extreme E., is also larger than Charleston, the capital. This latter city is situated on the chief Ohio trib., the Great Kanawha, whose valley is noted for its salt. Carboniferous rocks cover most of the state, and yield coal extensively over large areas (most largely in the dist. round Charleston), and (chiefly in the W.) petroleum, in the production of which West V. is third. The coal product increased eightfold, and West V. now ranks fourth, with every prospect of surpassing Ohio (third) before 1898. Area, 24,780 sq. m. P. 762,800. See **United States,** table. [**W. S.**]

Viso del Alcor, tn., Spain, prov. and 14 m. E. Seville, dist. Carmona; has mineral spring, called Fuente Lanuda. P. <5000.

Viso del Marqués, tn., Spain, prov. Ciudad Real, dist. Valdepenas, 30 m. N. by E. Linares; has beds of lead, copper, antimony, and white marble quarry. Palace of the Marquis of Santa Cruz, with paintings, &c. P. <4000.

Visoko, tn., Bosnia, on riv. Bosna, prov. and 15½ m. NW. by W. Sarajevo; manufactures carpets. In the neighbourhood are beds of coal and iron. P. <5000.

Visp, or **Viège,** vil., Switzd., cant. Valais, 6 m. WSW. Brieg, on the Vispe-bach, 2 m. S. of the Rhone. P. <2000.

Visselfjerda, comm., Sweden, prov. Kronoberg, 33 m. WSW. Kalmar. P. 6600.

Vissenbjerg, vil., Denmark, Fyen I., 10 m. W. Odense. P. (comm.) <4000.

Visso, vil., Italy, The Marches, prov. Macerata, 38 m. SE. by E. Perugia. P. <2000.

Vista, maritime vil., W. Africa, Congo Free State, in Kakongo, 9 m. NW. Banana, on the Atlantic; has plantations of mango trees.

Vistre, small riv., France, dep. Gard, rises about 7 m. NNE. Nîmes, passing that town 2 m. from its r. bk., and flowing into Radelle Canal, which carries its waters to the l. bk. of the Vidourle, 1 m. NW. Aigues-Mortes. Length, 40 m.; area of basin, 139 sq. m.

Vistritsa, Slavonic; Turkish **Inje-kara-su,** the ancient *Erigon*, riv., Turkey, Macedonia, rises to the SE. of Lake Prespa, flows SE. then NE. and enters the Gulf of Salonica a few miles W. of the Vardar. There are no important towns on its banks, but on the hills adjoining it are Kesrie, Siatista, Serfije, and Karaferia.

Vistrorio, vil., Italy, Piedmont, prov. and 27 m. N. by E. Turin. P. <2000.

Vistula, Ger. **Weichsel,** Polish **Wisla,** the *Vandalus, Visula,* and *Ishtula* of antiquity, one of the largest rivs. of Europe, rises on the N. side of the Beskid Mts. at an alt. of 3675 ft., on the frontier between Austrian Silesia and Galicia, in about 49° 35′ N., 18° 40′ E., flows N. with a W. inclination as far as the frontier of Prussian Silesia, then turns E. and NE., and separates Prussian Silesia from the two Austrian provs. already mentioned. Immediately N. of Ausschwitz (Oswiecym) the river bends E. again, and so continues until it has passed Cracow some 15 m. or so. It then wheels NNE., and forms the boundary between Poland and Austrian Galicia, as far as 21° 50′ E., some 10 m. NNE. of Sandomierz. During its course through Austrian terr. it receives from the left the Przemsza and Nida, and from the right the Raba, Dunajec, Wisłoka, and San. Immediately E. of Sandomierz the V. turns N., and shortly afterwards enters Poland, its bed lying in a deep narrow valley as far as the confluence of the Pilica (left) in 21° 20′ E. At Ivangorod, about half-way between Sandomierz and Warsaw, the river is joined by the Wieprz from the right, and higher up by the Kamienka from the left. At Ivangorod the river changes its direction to NNE. and flows past Warsaw. Some 20 m. beyond that city it is joined by the Narew (or Bug) from the right, and curves W. and WNW. until it has crossed the Prussian frontier (in about 18° 30′ E.). On the way it receives the Bzura from the left, and passes Novogeorgievsk (Modlin), Wyszgorod, and Płock. The first important town it touches in Prussia is Thorn, 20 m. beyond which the river makes a sharp, almost rectangular, bend to the right, then flows NNE. as far as Graudenz, and thence assumes a more N. direction to its mouth, in the Bay of Dantzig, an indentation of the Baltic Sea. The principal tribs. in Prussia are, on the right, the Drewenz, Ossa, and Liebe, and on the left the Netze, Schwarzwasser, Ferse, and Radaune. In about 53° 55′ N. the delta begins, the right-hand boundary stream being the Nogat (35 m.), which enters the Frisches Haff 8 m. N. Elbing, and the left-hand the V. itself. The delta, called the Werder, is about 35 m. across at the seaward front. Five miles from the sea, the river suddenly turns to the NW., and carries the greater portion of its water out at a new mouth, which it made in 1840. Its former chief exit lies still further NW., beyond Danzig itself. The Vistula-Haff Canal (7½ m.), the Elbing Vistula, and other channels connect the Danzig Vistula with the Frisches Haff to the E. Although the river suddenly shifts its bed with great frequency, and in spite of its being in part choked with movable sandbanks, the V. is an important highway for the transmission of merchandise; indeed it is the principal waterway of Poland. The Austrian government have within recent years strengthened and regulated the banks between Cracow and the Polish frontier (60–70 m.). In Prussia, too, a great deal has been done since 1832 to deepen and regulate the channel and intersect the delta with canals. The surface of the stream is subject to considerable irregularities of level, and floods are usual two or three times a year in the middle of Poland, especially about the confluence of the Narew. At Warsaw the river is on an average frozen for 70–80 days in the year. Navigable for small boats up to the junction of the Przemsza (622 m.), and for larger boats to the confluence of the San (505 m.). Total length 652 m., of which 156 m. in Prussia; area of basin, 73,900 sq. m.; average mean discharge, 47,000 cubic ft., but the discharge is subject to great variation, ranging between the extremes of 19,400 cubic ft. and 291,400 cubic ft.

Viszoka-Makó, comm., Hungary, co. Trencsén, dist. Bittse. P. <4000.

Vita, tn., Sicily, prov. Trapani, 11 m. SW. Alcamo. P. 5200.

Vitakri, tn., Brit. Baluchistan, 134 m. WSW. Múltán.

Vitalba, Monte, mt., Italy, Tuscany, in the W., 15 m. SE. Leghorn. Alt. 2210 ft.

Vite, Capo della, cape, Italy, in the NE. of the isl. of Elba.

Vitebsk, govt., W. Russia, has Livonia and Pskov on N., Smolensk on E., Moghilev, Minsk, and Vilna on S., Courland on W. Surface flat; low hills, cut by ravines, in SE. and N. borders. Watered by Düna, which is connected by Berezina Canal with the Dnieper and its tribs., Mezha and Kasplya. Climate relatively mild; average temp. being at Vitebsk, yr. 40° F., Jan. 16°, July 64°. Population chiefly White Russian (61 per cent.), Lettish (21 per cent.), Jewish (10 per cent.), and Polish (3 per cent.), some 10,000 Germans. Agriculture insufficient for population; flax grown. Manufactures in infancy. Peasant population very poor. · Exports, flax, linseed, and timber. Active navigation on Düna. Divided into twelve dists.: Vitebsk, Drissa, Dünaburg (now Dvinsk), Gorodok, Lepel, Lutsin, Nevel, Polotsk, Ryezhitsa, Sebezh, Surazh, and Velizh. Area, 17,440 sq. m. P. (1884) 1,204,950; (1890) 1,341,100.

Vitebsk, cap. of above govt., on both banks of Düna, 345 m. by rail W. Moscow; old town, with a poor population, half Jewish; trade with Riga in corn, flax, hemp, tobacco, sugar, and timber. Annexed to Russia in 1772. P. 58,180.

Viterbo, city, Italy, at the foot of Monte Cimino, in the Campagna, and 40 m. NNW. Rome. It is enclosed by walls, and in general well built of lava. The cathedral contains the tombs of several popes, and was the scene (in 1271) of the murder of Prince Henry of England, son of Richard of Cornwall, by Guy of Montfort. The bishop's palace and city hall are fine buildings; the latter contains various Etruscan antiquities. V. is celebrated for its fountains. Alum, vitriol, and sulphur abound in its vicinity. This city was one of the principal in the Etruscan League; in the Middle Ages it was the cap. of the patrimony of St. Peter, bestowed in the 12th century upon the Papal see. In the vicinity are the sulphur springs (with spa) of Bulicame, the pilgrimage church of Madonna della Quercia (designed by Bramante, and ornamented by Luca della Robbia), and several Etruscan cemeteries. P. (1881) 16,300; comm. P. 19,700.

Viti Levu, isl. See **Fiji Is.**

Viti Levu Bay, on NE. ct. of Viti Levu I., in 178° 18′ E.

Vitim, large riv., Russia, E. Siberia, prov. Transbaikalia, r. bk. trib. of Lena; rises in a longitudinal valley of Barguzin Mts., flows first NE., then suddenly turns SW., and describing a large curve to the S. turns N. and NW., enters the Lena under 59° 30′ N., 112° 45′ E.; receives many large tribs.—Zaza, Karenga, Kalar, and Lake Oron, r. bk.; Tsipa, Muya, and Mama, l. bk. Rich gold diggings in its basin. Navigable up to Delyun-uran rapids, in 57° 40′ N. Length, 1100 m. **Vitim Plateau** is the name given to the part of the higher terrace of the High Plateau of E. Asia which is watered by the V.

Vitimskoye, vil., E. Siberia, govt. Yakutsk, on l. bk. Lena, at its junction with Vitim; river-port. P. <1000.

Vitismann, settlement, Argentine Republic, Catamarca, 125 m. S. by W. Tucuman, 25 m. SE. by E. Catamarca.

Vitkov, tn., Austria. See **Wigstadtl.**

Vitor, riv., Peru, rises in the Andes, flows W. and enters the Pacific Ocean in about 16° 40′ S.

Vitoria, tn., Spain, cap. prov. Alava and of V. dist., 31 m. SSE. Bilbao; has manufactures of linen drapery, pottery, and cutlery. V. is composed of three towns: the upper town, enclosed by half-decayed walls; the old town, surrounded by walls and communicating by three gateways with the modern town. It is one of the most prosperous cities in Spain; has an institute of science, drawing academy, Jesuit schools, Basque society, provincial hall of assembly, and historical houses, notably that where Francis I. of France resided. In the neighbourhood is a mineral spring. Here the English, Spanish, and Portuguese troops, commanded by Wellington, totally defeated the French, 1813. P. (comm.) 27,700.

Vitoša (vitosha), improperly **Vitosh,** mt., SW. Bulgaria, 9 m. SSW. Sofia, almost circular. Alt. 7645 ft.

Vitré, tn., France, dep. Ille-et-Vilaine, cap. arr. V., 21 m. W. by N. Laval; has quarries of black-stone, iron-foundries, mechanical factories, &c. V. has retained its Breton characteristics and its aspect of the Middle Ages; still in great part surrounded by ramparts of the 16th century. The old feudal castle, rebuilt in the 14th century, is one of the most remarkable in Brittany. Birthplace of Pierre Landais, minister of Duke Francis II. P. 10,600.

Vitrey, vil., France, dep. Haute-Saône, arr. Vesoul, 42 m. NNW. Besançon. P. <2000.

Vitrezais, dist., France, formerly in Bordelais, now in dep. Gironde, on the border of dep. Charente-Inférieure.

Vitrinitsa, tn., Greece, prov. Phthiotis and Phocis, on the N. shore of the Gulf of Lepanto, 22 m. E. by S. Lepanto P. <4000.

Vitry-en-Artois, tn., France, dep. Pas-de-Calais, arr. Arras, 5 m. SW. Douai; has refineries of salt, potash, and sugar. P. <3000.

Vitry-le-François, tn., France, dep. Marne, cap. arr. V.-le-F., on the Marne, 19 m. SE. by S. Châlons-sur-Marne; has

manufactures of cement, foundries, great trade in wine, grain, iron, and wood. V. was built in 1545 by Francis I. Birthplace of the mathematician Demoivre, died 1754. P. 7300.

Vitry-sur-Seine, tn., France, dep. Seine, arr. Sceaux, 4⅝ m. SSE. Notre Dame, Paris, 2 m. from the city wall; has nurseries of ornamental and fruit trees. P. 6800.

Vitsa, tn., Turkey in Europe, prov. Kirk-Kilise, 65 m. S. by E. Burgas.

Vitse, vil., Asia Minor, on the SE. shore of the Black Sea, 33 m. SW. by W. Batum.

Vitteaux, tn., France, dep. Côte d'Or, arr. Semur, on the Brenne, 24 m. W. by N. Dijon. P. <2000.

Vittel, tn., France, dep. Vosges, 31 m. SSW. Nancy, arr. and 11 m. SW. by W. Mirecourt; has important thermal establishment where four springs are used similar to those at Contréxéville, known to the Romans; a fifth spring is used in a small establishment. Has breweries, manufactures of lace and fine embroideries. Alt. 1100 ft. P. <2000.

Vittoria, vil., Canada, Ontario, co. Norfolk, on Young's Creek, 7 m. S. Simcoe. P. <1500.

Vittoria, tn., Sicily, prov. and 42 m. W. by S. Syracuse; trade in ashes, soda, and wine. P. (1871) 17,900; (1881) 23,900.

Vittorio, tn., Italy, Venetia, prov. and 21 m. N. by E. Treviso; seat of the bishopric of Ceneda; has silk-mills, lime-kilns, manufacture of cement. V. was formed in 1866 by the union of two neighbouring towns, Ceneda and Serravalle, for a long time rivals. P. 10,600.

Vitu, dist., E. Africa. See **Witu.**

Vitulano, tn., Italy, Campania, prov. and 8 m. WNW. Benevento. P. <2000.

Viù, vil., Italy, Piedmont, prov. and 19 m. NW. by W. Turin. P. <2000.

Viva, Rio, estuary, Colombia, Isthmus of Panama, prov. Chiriquí, on the Pacific; navigable for small vessels to Port Guavala, 12 m.

Vivarais, old prov., France. See **Ardèche.**

Vivér, tn., Spain, prov. Castellon de la Plana, cap. dist. V., 34 m. NNW. Valencia. P. (comm.) <3000.

Vivero, or **Bucas,** isl., Philippine Is., NE. ct. of Mindanao; mountainous. Area, including the adjoining islets, 88 sq. m.

Vivero, maritime tn. and port, Spain, Galicia, prov. and 44 m. N. Lugo, cap. dist. V.; has flax-weaving trade. No docks or quays. P. (comm.) 13,400.

Viverols, vil., France, dep. Puy-de-Dôme, arr. Ambert, 25 m. W. St. Étienne. P. <2000.

Vivi, stn., Africa, Gabun, 37 m. E. Boma, 112 m. from the Atlantic. Founded by Stanley in 1879, V. was cap. of the state till 1882, when it was superseded by Boma. American Evangelical Alliance. Alt. 374 ft. Mean temp. (1½ yrs., 1882–83), yr. 76.4° F., Feb. 79.5°, Aug. 70.5°.

Vivian, vil., Canada, Ontario, York co., 29 m. N. by E. Toronto, on a railway. P. <1500.

Vivier-au-Court, tn., France, dep. Ardennes, arr. and 6 m. ESE. Mézières; has foundries and iron-works. P. <3000.

Viviers, tn., France, dep. Ardèche, arr. Privas, beautifully situated on the slope and summit of a hill at the confluence of the Rhone and the Escoutay, 25 m. N. by W. Orange, 6 m. S. by W. Montélimar; seat of a bishopric; has manufactures of hydraulic lime, silk-mills, and mechanical factories. Its imposing cathedral, 12th and 14th centuries, contains valuable Gobelin tapestry. Episcopal palace of 17th century. P. <2000.

Viviez, vil., France, dep. Aveyron, arr. and 15 m. NNE. Villefranche; has beds of zinc; manufactures zinc covers. P. <2000.

Vivis, tn., Switzd. See **Vevey.**

Vivonne, tn., France, dep. Vienne, on the Clain, arr. and 12 m. SSW. Poitiers. P. <2000.

Viwa, isl., NW. of Viti Levu, Fiji Is., in 17° 10′ S., 176° 55′ E.

Viza, tn., Turkey in Europe, vilayet and 62 m. E. by S. Adrianople; seat of a metropolitan Greek church. P. 5000.

Vizagapatam, municip. and seapt., Brit. India, Madras, cap. dist. V., on the E. ct., 178 m. NE. by E. Masulipatam, in a small bay bounded S. by the Dolphin's Nose, and N. by the suburb of Waltair, the residence of all the European officers. The town, or fort, is separated from the Dolphin's Nose by a small river, which forms a bar passable during spring-tides for vessels of 300 tons. The municipality has effected great improvements. There is a second-class college and a hospital endowed by the Maháráját of Vizianagram. It has a gradually increasing trade. Chief exports, grain and sugar; special industries, the manufacture of native cloth and ornamental articles of horn, ivory, and porcupine quills. About the middle of the 17th century the East India Company established a factory here. Only an open roadstead, but the construction of a harbour has been sanctioned. Vessels load and discharge by means of lighters. P. 34,500; Hindus, 31,000.

Vizakna, Hungarian; Ger. **Salzburg,** tn. with magistracy, Hungary, 6 m. NW. by W. Hermannstadt; has much frequented salt-baths. P. <4000.

Vizcaya, or **Biscaya,** the north-western of the three Basque Provs. (*q.v.*), N. ct. Spain, on the Bay of Biscay, cap. Bilbao, rich in valuable iron ore. See **Spain,** table, &c.

Vizela, or **Vizella,** vil., Portugal, prov. Entre Douro e Minho, on the Vizela R., 21 m. NE. Oporto, with sulphur baths and remains of ancient Roman baths.

Vizeu, tn., Brazil, state Para, 149 m. ENE. Belem or Para, on l. bk. of the Gurupy, not far from its mouth in the Atlantic.

Vizéu, tn., Portugal, cap. prov. V., 50 m. ESE. Oporto. In the neighbourhood is the Campo de Viriato, Roman camp, connected with Viriatheus, Lusitanian chief, who was a formidable enemy to Rome. Near V. the first orange-trees in Europe were planted. Not far from the town are tin-beds and sulphureous springs. It is a quiet city, owing all its importance to its administrative and episcopal rank, and its fair, held in September, the most important in Portugal. P. 7000.

Vizladrúg, tn. and port, on W. ct. of Brit. India, Bombay, dist. Ratnágiri, 78 m. NNW. Goa; manufactures ornaments from bison-horn. On S. side of the harbour stands one of the strongest Mohammedan fortresses in the Konkan. P. <5000.

Vizianagram (Vizianagaram, census), municip. and fort, Brit. India, Madras, dist. and 30 m. N. by E. Vizagapatam. A well-built town, with a fine market-place (commemorating the visit of the Prince of Wales); is a military cantonment and the residence of the Maháráját, who maintains a first-class college in the town. P. 30,900; Hindus, 28,700.

Vizianáráyanam, tn., Brit. India, Madras, dist. and 22 m. SSE. Tinnevelli. P. <5000.

Vizille, tn., France, dep. Isère, on the Romanche, arr. and 9 m. S. by E. Grenoble; has iron, copper, and lead mines, quarries of slate, chalk, and gypsum, and silk manufactures. Its castle, built in 17th century, is of imposing appearance, and has some very remarkable sculptures. This castle is regarded as the real cradle of the French Revolution; here, July 21, 1788, was held an assembly of the deputies of all the communities of Dauphiné to protest against the new taxes and the loss of the privileges accorded by Louis XVI. A splendid commemorative monument was erected in the castle place, 1888. P. <4000.

Vizzini, tn., Sicily, prov. Catania, 31 m. W. by N. Syracuse; its cathedral has some fine paintings. Alt. 2025 ft. P. 14,200.

Vjetovo, tn., Bulgaria, prov. and 18 m. SE. by E. Rustchuk. P. <3000.

Vjetren, tn., Bulgaria, Eastern Roumelia, prov. Tatar-Pazardžik, 37 m. W. by N. Philippopolis. P. <4000.

Vlaardingen, Celebes. See **Macassar.**

Vlaardingen, tn. and port, Holland, prov. S. Holland, on the r. bk. of the Nieuwe Maas, 7 m. W. Rotterdam; has important herring-fisheries. P. (comm.) 12,600.

Vladikavkaz, tn., Russia, N. Caucasia, cap. prov. Terek, picturesquely and tidily built on an elevated plain (2340 ft.) at the N. foot of main Caucasus range, where the Terek emerges from the mountains, *i.e.*, at the head of the Darial gorge leading to Tiflis, the only highroad to Transcaucasia across the main range, 432 m. by rail SE. Rostov-on-Don, connected by railway with Port Petrovsk, on Caspian Sea (166 m.). Was but a small fort in 1784, but has grown rapidly of late. Alt. 2244 ft. Mean temp., yr. 47.6° F., Jan. 24.4°, July 68.3°; mean rfall. (11 yrs.), yr. 34.2 in., April–Sept. 25.8 in. P. (1891) 53,720.

Vladimir, govt. of central Russia, has Moscow and Tver on W., Yaroslavl and Kostroma on N., Nizhniy Novgorod on E., Ryazañ and Tambov on S. Surface a deeply trenched plateau, 800–900 ft. high, with river-valleys sunk 300–450 ft. below the general level. Depressions of middle Volga and Oka in E. Rocks, Upper Carboniferous and Permian, covered by much denuded Jurassic clays and patches of Cretaceous in S. All covered with boulder-clay and lacustrine period deposits. Soil mostly unfertile. Iron ore, china-clay. Climate similar to that of Moscow; average temp. at V. being, yr. 38°, Jan. 16°, July 67°. Watered by Oka and its trib. Klyazma (navigable to Kovrov, and occasionally to V.). Lake Pereyaslavl and many small ones. Population thoroughly Great Russian. Agriculture insufficient for the population, who chiefly resort to industrial pursuits, or go in *artels* to seek for work as carpenters, masons, iron-roof makers, or as pedlars (*ofeni*) all over Russia. All sorts of domestic industries in villages; painting of sacred ikons, fabrication of sickles and all sorts of hardware, wooden vessels, boxes, bast-shoes, hosiery, gloves, toys, felt goods, earthenware, and so on. The yearly products of these petty trades are valued at over £7,000,000. V. is also a great centre of manufacture, for which it occupies the third rank (after the two caps.) in European Russia (yearly products £10,500,000, exclusive of the minor manufactures). Over 150,000 persons find employment in the cotton and linen factories, glass, chemical, and iron works, flour-mills, tanneries, and distilleries. Divided into thirteen dists.: Vladimir, Alexandrov, Ivanovo-Voznesensk, Kovrov, Melenki, Murom, Pereyaslavl-Zalyesskiy, Pokrov, Shuya, Sudogda, Suzdal, Vyazniki, and Yuriev-Polskiy. Ivanovo, Gusevsk, Kholui, and many others are important industrial towns. Area, 18,864 sq. m. P. (1883) 1,359,330; (1890) 1,456,600.

Vladimir, cap. of above govt., is known in history as Vladi-

mir-on-Klyazma, to distinguish it from Vladimir in Volhynia; situated on Klyazma and Lybed Rivs., 114 m. by rail E. of Moscow. Has a *kreml* on a hill containing the very old cathedrals Uspenskiy (1150) and Dmitrievskiy. Several churches from the 12th century, including the 'golden gate' surmounted by a church, built by Andrei Bogolubskiy in 1158. P. (1859) 13,865; (1891) 21,640.

Vladimir, bay, Russian Manchuria, Sea of Japan, 43° 55′ N., 135° 8′ E.; freezes for two months.

Vladimirovka, tn., Russia, govt. Astrakhañ, on Akhtuba branch of Volga, 80 m. SE. Tsaritsyn; railway to Baskunchak salt lakes. P. 6000.

Vladimir Volhynskiy, dist. tn., Russia, govt. Volhynia, 17 m. NE. of the spot where the frontiers of Poland, Russia, and Galicia meet together. Very old, 9th century town; chief town of Vladimir Principality in Volhynia. Rich monastery. Trade in corn and cattle. P. 8300.

Vladivostok, chief naval station, Russia, on the Pacific, dist. tn. of Maritime Prov., 43° 7′ N., 131° 55′ E., on the Gulf of Peter the Great, of the Sea of Japan. Founded in 1861, on the NW. ct. of Muravieff Penin., on the 'Golden Horn' Bay, 5–13 fathoms deep, of the 'Eastern Bosporus' (13–20 fathoms). The gulf is covered in winter by an ice-crust, which could only be broken by ice-breaking steamers. A railway to the Usuri has lately been completed, and is pushed down the r. bk. shore of this river to Khabarovsk. V. has naval workshops and a pro-gymnasium. Visited every year by foreign ships, the yearly imports attaining about £300,000. Some 3000 Koreans gather in the gulf the edible seaweed *Laminaria saccharina*, of which about 70,000 cwts. (£45,000) are sent to China every year. Gold diggings, of little value, on Askold I. Mean temp. (10 yrs., 1875–85), yr. 40.2° F., Jan. 7.4°, Aug. 70.0°; mean rfall. (9 yrs.), yr. 13.2 in., April–Oct. 12.0 in. P. (1886) 12,500; (1891) 14,450, chiefly military.

Volga, chief riv. of European Russia, and by far the largest riv. of Europe, rises on the Valdai plateau of Tver, and after a course of 2325 m. enters the Caspian at Astrakhañ. Its drainage basin covers 563,300 sq. m., thus exceeding the aggregate areas of Germany, France, and the United Kingdom, and has a population of over 45,000,000. It receives over 100 tribs., which are navigable for an aggregate length of 14,600 m., and most of the populous cities of Russia are in its basin. Owing to three systems of rivers and canals (Mariinsk, Vyshnevolotsk, and Tikhvinsk), which connect its upper tribs. with affluents of Lakes Ladoga and Onega, the commercial mouth of the V. has been transferred, so to say, to St. Petersburg. Other less important canals connect it with the Düna (Riga) and the White Sea (Archangel); while advantage has been taken of the V. closely approaching the Don at Tsaritsyn to connect its lower course by a railway (40 m.) with the Don and the Sea of Azov. Three main trunks of railways bring its lower parts in connection with the Baltic. Nearly 1000 steamers, 20,000 barges and large boats, and 50,000 rafts are used for the traffic on the V. and its tribs. to carry every year upwards of 4,000,000 tons of various goods, valued at more than £50,000,000. About 50,000 rafts of timber must be added to the above, the total weight of goods carried and floated in the basin of the V. exceeding the transport on all Russian railways. The bulk of the traffic of the V. and its connections is directed upwards, the tonnage of goods reaching St. Petersburg by this route being about 15 times as great as that reaching Astrakhañ. The V. rises in marshes, in 57° 10′ N., 665 ft. above the sea. Owing to special reservoirs, it is navigated from its sixty-fifth mile onwards. It descends rapidly from the Valdai plateau to Tver (420 ft.), where it is 300 yards wide, and has a volume of 4000 cubic ft. per second. At Tver regular steam navigation begins. It flows NE. to join the Mologa (head of the Tikhvinsk system) and the Sheksna (Mariinsk system), then SE. past Yaroslavl and Kostroma, receiving the Unzha from N., and (at Nizhniy Novgorod) the Oka from the S., after it has traversed the chief provs. of middle Russia. Both in its length (920 m.) and in its drainage area (89,500 sq. m.) the Oka is superior to the upper V. The V. then enters a broad lacustrine depression (alt. 190 ft.), and attains a width of 350–1750 yards. It is joined next (r. bk.) by the Sura and (l. bk.) the Vetluga, which comes from the forest tracts of Yaroslavl. The river then turns SE. and enters another lacustrine depression (110 ft.), where it is joined by the Kama. For the next 738 m. of its course to Tsaritsyn, the V. (580–2600 yards wide) flows SSW., making a great bend at Samara, and is accompanied on the right by cliffs, reaching 1000 ft. above the V., whose alt. is only 54 ft. near Saratov. Its volume there is 384,000 cubic ft. per second (1,427,000 in floods). At Tsaritsyn its level sinks 58 ft. below the ocean. The V. bends sharply SE., sending off a large branch, Akhtuba, which flows parallel to the main river, rejoining it by many branches. The delta proper begins 40 m. above Astrakhañ, the Volga entering the sea by 200 separate mouths. Below Astrakhañ navigation becomes difficult. Immense fisheries give occupation to nearly 15,000 men on the lower Volga, and to 50,000 men in N. Caspian. The ice-covering on the Volga and its tribs. lasts from 90 to 160 days. The average dates of the break-up are: April 11 at Tver, April 25 at Kostroma, April 6 at Kazañ, April 7 at Tsaritsyn, and March 17 at Astrakhañ. The respective dates of freezing-up for the same places are: Nov. 23, Nov. 20, Dec. 7, Dec. 20, and Dec. 17.

Volga, vil., U.S., S. Dakota, Brookings co., 102 m. N. by E. Yankton. P. <1500.

Volgaro, tn., Turkey in Europe, on the NW. ct. of Thasos I., 11 m. SW. of the mouth of the Kara-su.

Volhynia, govt. of SW. Russia, having the Polish govts. Lublin and Siedlce in W., Grodno and Minsk on N., Kiev on E., and Podolia and Austrian Galicia on S. Spurs of the Carpathians (Avratynsk plateau, 1200 ft. in its highest parts) in S.; hills 700–900 ft. high in W.; flat elsewhere, sloping to the Polyesiye marshes of Pinsk. Watered by Pripet, Styr, Goryñ, Sluch, and other minor rivers. Western Bug flows along its boundary with Poland. One-third of area under forests. Population chiefly Little Russian (80 per cent.) and partly White Russian (about 30,000), Jewish (12 per cent.), and Polish (7 per cent.), Germans (about 30,000). Surplus of cereals grown and exported, as also wool. Large culture of beet for sugar-works, and tobacco. Manufactures of sugar, woollen cloth, spirits, paper, china, and metal wares. Active trade. Divided into twelve dists.: Zhitomir (cap. of the govt.), Dubno, Kovel, Kremenets, Lutsk, Novograd-Volhynskiy, Ostrog, Ovruch, Radzivilov, Rovno, Staro-Konstantinov, and Zaslavl. Area, 27,743 sq. m. P. (1884) 2,096,500; (1890) 2,407,800.

Völkermarkt, tn., Austria, Carinthia, 16 m. E. by N. Klagenfurt. P. <2000.

Volkhov, riv., NW. Russia, issues from Lake Ilmeñ, 3 m. above Novgorod, flows NNE. 133 m., enters Lake Ladoga at Novaya Ladoga; has many rapids. Its upper part is connected by means of Vishera and Siewers canals and upper Msta with the Volga basin.

Vologda, govt., NE. Russia, has Arkhangelsk and Yaroslavl on N., Tobolsk on E., Perm, Vyatka, and Kostroma on S., Novgorod and Olonets on W. It occupies a wide area, stretching for 800 m. from Novgorod to the Urals, and covers the broad depression through which the Sukhona flows from SW., and the Vychegda from the NE., to make the N. Dvina; while a flat, marshy, and wooded swelling separates the above from the drainage area of the Volga. In NE. covers the Urals (Hostepiär, 4955 ft.; Tell-pös, 5540 ft.) up to the main water-parting, including wide marshy plateaux (*parmas*). The Timanskiy Mts. rise in N. Watered by Vychegda, Sukhona, N. Dvina, and their numerous large tribs. The Pechora flows in the E., and the Pinega, Mezeñ, and Vaga rise in V. Climate severe, average temps. being: at Vologda, yr. 36°, Jan. 11°, July 63.5°; at Ust-Sysolsk, yr. 32°, Jan. 5°, July 62°. Large forests. Population consists of Great Russians (88 per cent.) and Zyryans (12 per cent.). Cereals are cultivated everywhere. Felling of timber, preparation of tar, pitch, and potash; manufactures of all sort of wooden ware carried on, also spinning and weaving as domestic industries. A few iron-works. Salt raised. Export of flax, linen, linseed, tar, pitch, timber, butter, and furs. Divided into ten dists.: Vologda, Gryazovets, Kadnikov, Nikolsk, Solvychegodsk, Totma, Ustyug Velikiy, Ust-Sysolsk, Velsk, and Yarensk, all small towns. Verkhovazhsk is a centre for trade. Area, 155,498 sq. m. P. (1861) 960,850; (1890) 1,272,100.

Vologda, cap. of above govt., in its SW. corner, 302 m. by rail NE. Moscow *viâ* Yaroslavl, at the head of Sukhona; old colony of Novgorod, founded in the 12th century; well provided with educational institutions. Centre for trade in flax, linseed, oats, hemp, butter, and eggs. Alt. 374 ft. Mean temp., yr. 38.0° F., Jan. 10.7°, July 66.6°. P. (1891) 17,800.

Volokolamsk, dist. tn., Russia, govt. and 72 m. WNW. Moscow; many cotton-mills in its district. P. <2000.

Volta, Aswada, or **Adirri,** riv., Africa, Guinea, rises in the Kong Mts., flows SE. and S., separates Ashantee from Dahomey, and enters the ocean at Adda, in 5° 45′ N., 0° 40′ E. Estimated length, 360 m.

Voltaggio, tn., Italy, Piedmont, prov. Alessandria, 10 m. SSE. Novi Ligure; has medicinal spring. P. <3000.

Volta Mantovana, vil., Italy, Lombardy, prov. Mantua, 8 m. S. by W. Peschiera. P. <2000.

Volterra (*Volaterræ*), tn., Italy, Tuscany, prov. Pisa, 24 m. WNW. Siena, cap. circle. It stands on a lofty rock 1630–1785 ft. above the sea, is enclosed by ancient Etruscan walls, and has two ancient gates. Principal buildings, a citadel, divided

into two portions, one used as a prison, a cathedral, a Piarist college, Camaldolese monastery, classical seminary, public library, hospital, and orphan asylum. V. was one of the chief cities of the Etruscans, and has valuable memorials of that people in its public museum. The alabaster manufactures employ many of the population. From its strong position it was a place of importance in the Middle Ages. Five miles S. Volterra are the salt-works of **Leopoldo,** and brine springs, which furnish the greater part of the salt used in Tuscany. Birthplace of the Roman satirist Persius (34–62 A.D.). P. 5400.

Voltri, maritime tn., Italy, Liguria, prov. and 8 m. W. by N. Genoa. P. 6000.

Vorsma, vil., Russia, govt. and 45 m. SW. Nizhniy Novgorod; centre of manufacture of small steel goods. P. <5000.

Vorst, Teutonic, 'a wood.' See **Forst.**

Vorst, market-tn., Prussia, Rhine Prov., circle Kempen, 6½ m. WSW. Krefeld. P. <5000.

Vortigern's Valley (Nant Gwrtheyrn), deep, gloomy valley, Wales, Carnarvonshire, between 'The Rivals' and the sea.

Vösendorf, tn., Lower Austria, dist. Mödling. P. <3000.

Vosges, dep., E. France, on frontier of Alsace-Lorraine, from which it is separated by the V. Mts.; formed in 1790, chiefly out of the old prov. of Lorraine, with smaller parts of Franche-Comté and Champagne; divided into five arrs.: Épinal (cap.), Mirecourt, Neufchâteau, Remiremont, and St. Dié. The dep. comprises two distinct regions, the Mountain in the E. and the Plain in the W.; the former includes the western slopes of the V. Mts. (*q.v.*), highest point in dep. Hohneck (1200 ft.) in SE., N. of which is the pass of Schlucht (3775 ft.), traversed by the road from Epinal to Kolmar; other passes are Bonhomme (3115 ft.), on the route from St. Dié to Kolmar, and Saales (1830 ft.), on that to Strassburg. Of many secondary chains, one of the principal is the Faucilles, which from the SE. trend NW. to the pass of Girancourt (traversed by the Canal de l'Est), and then SW., the former section being known as the Great and the latter as the Little Faucilles, highest points respectively 2640 ft. and 1645 ft. The Plain includes, besides level tracts, a number of low hills, including the Little Faucilles. Lowest point at exit of Saône, 765 ft. The dep. is drained to the North Sea by the Moselle and the Meuse, to the Mediterranean by the Saône, and to the English Channel; the Moselle traverses the dep. S. to N., draining nearly two-thirds; principal tribs., r. bk., Moselotte, Vologne, and (outside) Meurthe, with its affluent Mortagne, and l. bk., Madon; in the upper valley of the Moselle is the reservoir of Bouzey; the Meuse drains the W., and the Saône, with its trib., Coney, the SW. As regards geological structure, the older rocks predominate in the V. Mts.; in the centre is Trias, and in the W. Jurassic limestone. Forests cover more than one-third of the surface. Climate subject to great extremes. Rainfall abundant; greatest in the mountains. The principal cereal is oats, then wheat; the vine covers less than 1 per cent. of the surface (Charmes, Gircourt, &c.), but the production per acre is considerably above the average; plums are extensively grown; the wild cherry is abundant, and used for the distillation of kirschwasser (Bains, Clerjus); cheese made in considerable quantity (Gérardmer). Lignite (Gemmelaincourt, St. Menge, &c.) and peat are the principal minerals; mineral springs are numerous (Plombières, Vittel, Bains, &c.). Textile manufactures are the most important—cotton (Remiremont, Fraize, Senones), bleaching and dyeing (Thaon). A special and very important manufacture is that of embroidery (Plombières, Épinal, Bains, &c.), lace (Mirecourt), linen (La Bresse, &c.). Saw-mills are numerous, and wooden articles are largely produced. Metallurgical industries include forges and bell-founding (Robicourt, Urville, &c.). Area, 2305 sq. m. P. (1891) 410,200. See **France,** table.

Vosges, German **Vogesen, Wasgau,** or **Wasgen,** range of mts. to the W. of the valley of the middle Rhine, stretching (with its continuation the **Haardt,** the portion N. of the Queich valley, and the line of valleys followed by the railway from Landau to Zweibrücken; highest summit, Kalmit, 2240 ft.) 145 m. from SSW. to NNE., the valley of the Pfrimm, which separates it from the Donnersberg, marking its northern ter-

mination; the S. and higher part on the Franco-German frontier, the northern part wholly in Germany; geologically composed in its higher portion largely of plutonic rocks, further N. of Permian rocks, flanked on the W. by Triassic, on the E. by Jurassic deposits. The eastern slopes are the steeper, in some places abrupt. The summits have in many cases a rounded form, to which the term *ballon* is applied in French, *belchen* in German (Sulzer Belchen, 4670 ft., to the W. of Gebweiler; Elsasser Belchen, or Ballon d'Alsace, 4085 ft., at the SW. angle of the Franco-German frontier). Pass roads, even across the higher part of the chain, are numerous (Col du Bonhomme, 3565 ft., connecting the valleys of the Weissbach and Meurthe on the road from St. Dié to Kolmar, &c.); but there is no railway across the mountains for a length of 75 m. from the line of valleys in the N. followed by the railway from Strassburg by way of Zabern (Saverne) and the Marne and Rhine Canal to the line of valleys in the extreme S., followed by the railway from Mülhausen to Belfort and Vesoul. There are, however, several railways ascending the valleys both on the French and German side, one up the Breusch valley from Strassburg almost reaching the frontier. There are several small lakes in these mountains at high elevations, three between 3300 and 3500 ft. above sea-level; the largest, the Weisser See (white lake), about 44 acres. Minerals of economic value are rare, but there is a small detached coalfield at St. Pilt, in Alsace. Forests, mainly of conifers, cover the greater part of the mountains, but in the N. of Alsace are confined to the W. slopes.

Voznesenskaya, Cossack vil., Russian Governor-Generalship of the Steppes, prov. Akmolinsk, 166 m. SW. Omsk, 27 m. SW. Petropavlovsk. P. <5000.

Voznesenskoye, vil., Russia, govt. Olonets, at the issue of the Svir from Lake Onega; important river-port.

Vraca, tn., Bulgaria, prov. V., 37 m. NNE. Sofia. P. 11,300.

Vracene, comm., Belgium, prov. E. Flanders, arr. St. Nicolas. P. <5000.

Vračeš, tn., Bulgaria, circle Vraca, 25 m. NE. Sofia. P. <3000.

Vrakhori, tn., Greece. See **Agrinion.**

Vrakhori, Lake, Greece. See **Trikhonis, Lake.**

Vranja, tn., in the S. of Servia, cap. prov. V., on the l. bk. of the Morava, 37 m. E. by S. Prishtina. Alt. 1503 ft. P. 9500.

Vražogrnac, tn., Servia, circle Črna-Rjeka, 27 m. W. Vidin (Bulgaria). P. <3000.

Vrbas, riv., Bosnia, rising in a deep valley between Mounts Radus and Zec, flows N., with a slight curve W., past Banjaluka, and joins the Save at Svingar, in about 17⅓° E. Its bed is obstructed with rocks, and its course is impetuous; not navigable. Length, 106 m.; area of basin, 2187 sq. m.

Vrbica, tn., Bulgaria, prov. and 23 m. SW. by S. Shumla (Šumen). P. <3000.

Vrchlabi, tn., Austria. See **Hohenelbe.**

Vrčin, tn., NE. Servia, circle Danube or Podunavlje. P. <3000.

Vrede, tn., Orange Free State, cap. div. V., on N. frontier, crossed by 29° E., 220 m. by road N. Bloemfontein. P. <2000.

Vredefort, tn., in NW. of Orange Free State, dist. Kroonstad, 20 m. from Heibron Road stn. P. <2000.

Vredenburg, vil., Cape Colony, dist. Malmesbury. P. <1500.

Vredenburg ('peace town'), vil., on the coast of Dutch Guiana, in 54° 30′ W., 45 m. E. by N. Paramaribo.

Vreeswijk, vil., Holland, prov. Utrecht, on r. bk. of the Lek, 5 m. S. by W. Utrecht, at S. end of Merwede Canal. P. <2000.

Vrf Pietrosa. See **Pietrosa.**

Vrh, Servian, 'mountain-peak.'

Vriddhachalam, tn., India. See **Viruddhachalam.**

Vries Island. See **O'shima.**

Vriezenveen, vil., Holland, prov. Overijssel, 18 m. NW. Enschede. P. <2000.

Vrigne-aux-Bois, tn., France, dep. Ardennes, arr. and 5 m. NW. Sedan; has manufactures of ironmongery. P. <3000.

Vrijheid, tn., South African Republic. Same as **Vryheid.**

Vron, PM.O., Wales, Denbighshire, 2 m. from Rhosymedre.

Vroomanton, post-vil., Canada, Ontario, co. Ontario, 3 m. from Sunderland. P. <1500.

Vrška Čuka (vrshka chuka), coal-mining vil., Servia, prov. Črna-Rjeka, between the Timok and E. frontier, 28 m. WSW. Vidin (Bulgaria), connected by narrow-gauge railway, 53 m. long, with the Danubian port of Radujevac; coal of good quality, anthracitic, containing very little sulphur; ash, 2.5 per cent.; not far below the surface, one seam 50 ft. thick.

Vrtolom, vil., Turkey in Europe, prov. and 23 m. SSE. Monastir.

Vruin, Loch a, or **Loch a Bhraoin,** lake, Scot., Ross-shire, 9 m. NE. of head of Loch Maree, drained N. into Loch Broom.

Vryburg (vri'burg, 'free town'), tn., Africa, Brit. Bechuanaland, cap. dist. V., 124 N. Kimberley. Founded in 1882 by Boers from the Transvaal. Wesleyan Missionary Society station. Four forts, on neighbouring hills, protect its approaches. Since 1891, V. has been connected by rail with Kimberley.

Vryheid (vrai'haid, Dutch 'freedom'), tn., South African Republic, cap. of V. dist. (in the SE. angle of the republic), about 130 m. NNE. Pietermaritzburg (Natal). P. <2000.

Vsek, Ossetian, 'pass.'

Vuardens, meteorological station, Switzd., Freiburg, near Gruyère, in 46° 37′ N., 70° 1′ E. Alt. 2707 ft. Rfall. (17 yrs.), 51.10 in.

Vuchitrn, tn., Turkey in Europe, prov. (sanjak) and 16 m. NW. Prishtina. Alt. 1765 ft.

Vuchnik, vil., Turkey in Europe, prov. (sanjak) and 10 m. WNW. Novibazar.

Vuelta de Arriba ('upper dist.'), **Vuelta de Abajo** ('lower dist.'), two dists. in W. of Cuba (*q.v.*).

Vught, vil., Holland, prov. N. Brabant, on the Dommel, 2 m. S. by W. Bois-le-Duc. P. (comm.) 6000.

Vuiteboeuf, vil., Switzd., cant. Vaud, 4 m. W. Grandson. P. <2000.

Vukovár, tn., Hungary, Croatia-Slavonia, on the Danube, 20 m. SE. Eszek. P. 9500.

Vulcaniæ Insulæ. See **Lipari Islands.**

Vulcano, one of the Lipari Is., Italy, separated from Lipari I. on the N. by the narrow strait called **Bocche di Vulcano.** The last eruption took place in August 1888. Alt. 1635 ft.

Vulkan Pass, pass across the Transylvanian Alps, on the borders of Hungary and Roumania, in 23° 15′ E. Alt. 5325 ft.

Vulture, Monte, extinct volcano, in the N. of the Basilicata, S. Italy, whose dark cone, rising above the towns of Melfi and Rionero, is conspicuous for a great distance round. Alt. 4630 ft.

Vulu, vil., E. Africa, in about 9° 48′ N., 39° 3′ E.

Vung-shwa, Vung-kwia, or **Bung-kwia,** cape, N. of Annam, in 17° 55′ N.

Vuon, or *Vuodna,* Lapp word meaning 'fjord.'

Vurkaria, marshy lake, Greece, Acarnania, about 5 m. S. of the mouth of the Gulf of Arta; flows W. by a channel into Leucas Strait.

Vurla, tn., Asia Minor, vilayet, sanjak, and 21 m. WSW. Smyrna, 3 m. S. of its roadstead on the Gulf of Smyrna, on the edge of a hilly plateau, now a vineyard. P. 4500; Moham. 3200; Orthodox Greeks, 1000.

Vyatka, govt., NE. Russia, has Vologda in N., Perm in E., Ufa and Kazañ in S., Nizhniy Novgorod and Kostroma in W. Surface an undulating plateau, with low hills, the highest of which attain 1400 ft., in dist. Nolinsk. Watered by **Vyatka R.,** r. bk. trib. of Kama, and its tribs., Cheptsa, Maloma, Kilmes, and several others, navigable; the upper Kama in NE., and lower Kama on SE. border. A considerable traffic is carried on on both. Soil very fertile in parts. Iron ore found. Forests cover three-fourths of area. Population Great Russians, Votyaks (about 220,000), Cheremisses (about 120,000), Tatars (about 100,000), and some Bashkirs and Permians. Cereals, chiefly rye and oats, exported; culture of flax. Good breeds of ponies; extensive cattle-breeding; ponies exported; bee culture. Population largely occupied in felling timber and fabricating all sorts of wooden goods for exportation. Weaving of linen widely spread as home industries. Mining (Votkinsk, Izhevsk ironworks) and industries on increase; flour-mills, cotton and paper mills, chemical works. Education well attended to. Considerable trade in rye, flax, linseed, hides, tallow, honey, linen, exported. Divided into eleven dists.: Vyatka, Elabuga, Glazov, Kotelnich, Malmyzh, Nolinsk, Orlov, Sarapul, Slobodsk, Urzhum, and Yaransk. Area, 59,117 sq. m. P. (1860) 2,170,220; (1890) 3,020,700.

Vyatka, cap. of above govt., 653 m. NE. of Moscow, on high l. bk. of Vyatka R.; old colony of Novgorod (Khlynov), founded in 12th century; tanneries, distilleries, candle-works; considerable trade in corn, linen, and animal produce, exported to Archangel and Moscow. Alt. 580 ft. Mean temp., yr. 34.4° F., Jan. 5.3°, July 65.0°. P. 26,000.

Vyazma, dist. tn., Russia, govt. and 89 m. by rail ENE. Smolensk, 152 m. from Moscow, on Vyazma R., junction of railways to Moscow, Ostashkov (on Moscow and St. Petersburg Rly.), and Tula; entrepôt for grain, linseed, hempseed, hides, &c., sent to Riga and St. Petersburg. P. 16,700.

Vyazniki, dist. tn., Russia, govt. and 77 m. by rail ENE. Vladimir, on Klyazma R.; linen mills, dyeing works; gardening; trade in linen, linseed, hempseed, and corn. P. <5000.

Vychegda, riv., N. Russia, govt. Vologda, r. bk. trib. of N. Dvina, rises on boundary of Perm, flows NW. and SW. 640 m., joins Dvina 60 m. below the junction of Sukhona and Yug.

Vyernyi (formerly **Almaty,** and when vil. **Vernoye**), tn., Russian Turkistan, cap. of prov. Semiryechensk, 46 m. S. of Ili R., at the N. foot of Trans-Ili Alatau, at the issue of Almaty R. from the mountains, 43° 16′ N., 78° 59′ E., 673 m. SW. Semipalatinsk; founded in 1855 amidst a very fertile region; often suffers from earthquakes. Alt. 2440 ft. Mean temp., yr. 46.6° F., Jan. 13.4°, July 75.6°. P. (1890) 22,300.

Vyetka, tn., Russia, govt. and 100 m. SSE. Moghilev, on l. bk. Sozh; seat of Nonconformists in 17th century; all sent to Siberia in 1764, but still a Nonconformist centre. P. 6000.

Vyg, lake, N. Russia, govt. Olonets, 410 sq. m., receives the **Upper Vyg R.,** has its outflow to White Sea by **Lower Vyg.**

Vyksunskiy, Upper, Middle, and **Lower,** three iron-works, Russia, govt. and 95 m. SW. Nizhniy Novgorod. Aggregate P. 6000.

Vylia, vil., Greece, prov. Bœotia and Attica, 25 m. NW. by W. Athens. P. <2000.

Vyoshenskaya, vil., Russia. See **Veshenskaya.**

Vypin, isl., India, Madras, Cochin state, in 9° 59′ N., 76° 18′ E., formed by deposits of silt; in the N. is the fort of Ayakotta. The S. extremity belongs to the British.

Vyrnwy, riv., Wales, rises in the NW. of Montgomeryshire, flows SE. then NE. through that county, and joins the Severn on the W. border of Shropshire. The artificial **Lake Vyrnwy,** the chief reservoir of the new Liverpool water-works, is near its source, 8 m. W. Llanfyllin. See **Liverpool, Hirnant,** and **Llanwddyn.**

Vyrnwy Lake, or **Llanwddyn,** P.O., Wales, 12 m. from Llanfyllin, Montgomeryshire.

Vyshgorod, vil., Russia, govt. and 9 m. N. Kiev, on high r. bk. of Dnieper; very old town, which seems to have existed in 5th century.

Vyshnevolotskaya Sistema, one of the three systems of rivers and canals connecting Volga with Neva; begins with Tvertsa R., which joins Volga near Tver, and is connected by Vyshnevolotskiy Canal with Tsna, trib. of Msta; this last is connected by Visherskiy and Siewers canals with Volkhov to avoid Lake Ilmeñ, and the Volkhov is connected by canals with Neva to avoid Lake Ladoga. Total length of the system, 534 m. Immense traffic along it, considerable amounts of grain, flour, linseed, hemp, spirits, and metallic goods being added to the goods sent from the Volga to St. Petersburg.

Vyshniy Volochok, dist. tn., Russia, govt. and 81 m. NW. Tver, near to Vyshniy Volochok railway station of Moscow-St. Petersburg Rly., on Vyshniy canal; cotton and flour mills, ironworks; considerable trade. P. 16,050.

Vyskov, tn., Austria. See **Wischau.**

Vysoke, tn., Bohemia. See **Hochstadt.**

Vytegra, dist. tn., Russia, govt. Olonets, 257 m. SE. Petrozavodsk, on **Vytegra R.,** a trib. of Lake Onega, which enters into the Mariinsk system of canals and rivers; trade in corn, timber, and fuel-wood. Mean temp., yr. 36.5° F., Jan. 12.0°, July 62.8°. P. <5000.

W

Wa-, Bantu prefix, 'people.' In many central African names of dists. beginning with U the U is replaced by Wa- in the names of the people of the dist., as in Wanyoro, Waganda, Wasoga.

Wa, or **Wa-shan,** remarkable mt., China, Süchwan, N. of the Tatu-ho or Tung-ho, about 50 m. W. by S. Kiating-fu, in 29° 22′ N., 103° 14′ E.; in horizontal section it is almost a square, and all four sides are very slightly out of the perpendicular for a height of about 2500 ft., and it is surmounted by a series of twelve or fourteen quadrangular precipitous blocks set one on the top of the other, each about 200 ft. high. See the description in *R. G. S. Supp. Papers,* vol. i., part 1, p. 38.

Wa, vil., W. Africa, to the E. of the Black or West Volta, in about 9° 38′ N., 2° 6′ W.

Waadt, German name for Swiss cant. **Vaud** (*q.v.*).

Waag, in Hungarian spelling **Vág,** riv., in NW. of Hungary, rises by two headwaters near the sources of the Poprád, and flows first W. through the broad valley between the Tátra and the Nižna Tatra ranges, then W. through defiles across the parallel Fátra ranges, finally SW. and S. between the Carpathians proper and the Beskids and Little Carpathians, joining the Danube at Komorn.

Waag-Neustadtl, comm., Hungary. See **Vág-Ujhely.**

Waal, riv., Netherlands. See **Rhine.**

Waalwijk, vil., Netherlands, prov. N. Brabant, 10 m. W. Bois-le-Duc. P. (comm.) <5000.

Waarde, comm., Holland, S. Beveland, on the W. Scheldt, prov. Zeeland, 18 m. NW. Antwerp. P. <2000.

Wabash, co., U.S., Illinois, on E. frontier, between 38° and 39° N.

Wabash, city, U.S., Indiana, cap. Wabash co., on r. bk. of Wabash R., 72 m. N. by E. Indianapolis; building-stone found near. P. 5100.

Wabash, riv., U.S., Ohio, principal trib. from the N. of the Ohio R., navigable for steamers to Lafayette, near which the canal commences connecting it with Lake Erie. Length about 600 m.

Wabasha, city, U.S., Minnesota, cap. Wabash co., on the r. bk. of the Mississippi, 60 m. SE. St. Paul. P. <3000.

Wabaunsee, co., U.S., Kansas, partly bounded on the N. by the Kansas R., and on the E. by 96° W.

Waberthwaite, par., Eng., Cumberland, Egremont div., on the left shore of the estuary of the Esk, 17 m. SE. by S. Whitehaven, 1 m. NE. Eskmeals stn., P.O. P. <250.

Wabigoon, stn., Canada, prov. Ontario, on the C. P. R., 1196 m. by rail W. Montreal.

Waboni, tribe, E. Africa, scattered about in the dist. traversed by the lower course of the Tana, now living amongst the Massai, Wakwafi, Somali, and Galla tribes.

Waccamaw, riv., U.S., N. and S. Carolina, joins the estuary of the Great Pedee, opposite Georgetown, 10 m. from the Atlantic after a S. course of 100 m.

Waccassassee Bay, U.S., Florida, on Gulf of Mexico, just N. of 29° N.

Waesmunster, comm., Belgium, prov. E. Flanders, arr. and 6 m. N. Dendermonde. P. 5600.

Wagadugu, tn., W. Sudan, cap. of Mossi or Mushi, in about 11° 10′ N., 2° 40′ W.

Wagawaga, native name of Discovery Bay, Brit. New Guinea.

Wa-gay-ma, vil., Brit. India, Lower Burma, dist. Thon-gwa, on Wa-gay-ma R. P. <5000.

Wagenfeld, vil., Prussia, prov. Hanover, circle Diepholz, 23 m. NW. by N. Minden. P. <4000.

Wageningen, tn., Holland, prov. Gelderland, on the lower Rhine, 11 m. W. Arnhem. P. (comm.) 7700.

Wagga Wagga, tn., New South Wales, Wynyard co., on the l. bk. of the Murrumbidgee, 70 m. NNE. Albany; important centre; has an agricultural show-ground and a racecourse. The railway crosses the low-lying lands near the Murrumbidgee by embankments and viaducts; the main stream is spanned by a bridge of 636 ft. P. <5000.

Waghadugu, vil., W. Africa, in the Mossi country, in about 12° 15′ N., 1° 7′ W. Alt. 760 ft. (Binger).

Wagner, co., U.S., S. Dakota, on the N. frontier, bounded on the E. by 102° W.

Wagonga, post-tn., New South Wales, Dampier co., 105 m. S. by E. Goulburn, on a bay at mouth of Wagonga R., in gold-mining and dairying dist. P. <1500.

Wagon Wheel Gap, vil., U.S., Colorado, Rio Grande co.; has hot and cold sulphur springs. P. <1500.

Wágra, vil., Brit. India, Bombay, dist. and 15 m. NW. Broach. P. <5000.

Wagram, comm., Lower Austria, dist. Kornneuburg, 10 m.

NE. Vienna; famous victory of Napoleon over the Austrians, 5th and 6th July 1809.

Waha'bis, or **Wahabites,** powerful Mohammedan sect, still ruling part of central Arabia (Nejd). Their doctrine is a return to primitive traditions and the re-establishment of theocratic authority; in Africa there is a formidable extension under the form of Senussism. In Persia a similar movement was the cause of the religious revolution of Bab in the middle of the 19th century.

Wahgunyah, tp., Victoria, Bogong co., on Murray R., 30 m. W. by N. Albury; terminus of the line from Springs. P. <1500.

Wahidis, tribe, in the S. of Arabia, extending from the coast to about 15° N., between about 47° and 48° E. (*Jour. R. G. S.*, 1871, p. 229).

Wahkiakum, co., U.S., Washington, between 123° and 124° W., bounded on the S. by Columbia R.

Wahlen, vil., Ger., kgd. Saxony, circle and 11½ m. NNE. Zwickau, on the Zwickauer Mulde. P. <4000.

Wahlen, vil., Prussia, Rhine Prov., govt. Aix-la-Chapelle, circle and 4 m. SSE. Schleiden. P. (comm.) <3000.

Wahlershausen, vil., Prussia, prov. Hesse-Nassau, govt., circle, and 3 m. W. Kassel. P. <3000.

Wahlscheid, vil., Prussia, Rhine Prov., circle Sieg, 13 m. E. by S. Cologne. P. (comm.) <3000.

Wahlstatt, vil., Prussia, circle and dist. Liegnitz; has a military school in the former Benedictine monastery founded by Duchess Hedwig in honour of her husband Henry the Pious (II.), who was killed here in a battle with the Mongols, April 9, 1241. P. <2000.

Wahn, vil., Prussia, Rhine Prov., circle Mülheim, 7 m. SE. Cologne. P. (comm.) <5000.

Wahnapitae, stn., Canada, prov. Ontario, on the C. P. R., 431 m. by rail W. Montreal.

Wahóko, small tribe, central Africa, to the W. of the Semliki, and S. of Lake Albert Nyanza.

Wahoo, vil., U.S., Nebraska, cap. Saunders co., 39 m. NE. Lincoln by rail. P. <3000.

Wahpeton, city, U.S., N. Dakota, Richland co., 43 m. S. by E. Fargo. P. <2000.

Währing, a suburb of Vienna (*q.v.*).

Wahring, post-tn., Victoria, Moira co., in 36° 2′ S., 146° 26′ E. P. <1500.

Wahsatch, U.S. See **Wasatch.**

Wahu'ma, central African tribe, with physical characteristics similar to those of the Somalis and Gallas: high foreheads, sharp-cut features, often large and aquiline noses, light-coloured skins, soft wavy hair, and very sinewy frames. They are said to have immigrated from the N. into Unyoro and Uganda, in both of which the reigning families are largely of Wahuma stock, while considerable numbers of the tribe are scattered through the country.

Wái, tn., Brit. India, Bombay, dist. Sátára, 39 m. S. Poona; a commercial centre and one of the most sacred places on the Kistna R. P. 12,400; Hindus, 11,400.

Wai, or **Vai,** isl., off N. extremity of Sumatra, separated by Malacca Passage.

Waia Island, isl., S. of Yasawa group, Fiji Is., in 17° 18′ S., 177° 8′ E.

Waianiwa, post-tn., New Zealand, South I., Southland co., 12 m. from Invercargill by road and rail. P. <1500.

Waiapu, co., New Zealand, E. ct. of North I., crossed by 38° S.

Wai-Apu, New Zealand. See **East Cape.**

Waiau, riv., New Zealand, South I., prov. Otago, flowing from the S. of Lake Te Anau into Lake Manipuri, receives the Mararoa, flows SSW. into Tewaewae Bay to the W. of Foveaux Strait. Length, 134 m.

Waiaú, postal-tp., New Zealand, South I., Amuri co., 60 m. NNE. Christchurch. P. <1500.

Waiben, native name of Thursday I., Queensland.

Waiblingen, tn., Ger., kgd. Würtemberg, Neckar circle, 7 m. NE. by E. Stuttgart; has manufactures of silk goods, embroidery, and pottery; and brick-kilns. The adherents of the Hohenstaufen emperors received from this town the name Waiblinger (Ghibbelines). P. <5000.

Waiheki, isl., New Zealand, crossed by 175° 10′ E., in Hauraki Gulf.

Waihemo, co., New Zealand, South I., E. ct., crossed by 45° 20′ S.

Waihi, post-tn., New Zealand, South I., Geraldine co., 28 m. N. by W. Timaru. P. <1500.

Waihi, post-tn., New Zealand, North I., Piako co., 32 m. from Thames; with very productive gold-mine. P. <1500.

Waiho, riv., New Zealand. See **Thames River.**

Waihola, post-tn., New Zealand, South I., Bruce co., 20 m. SW. by W. Dunedin. P. <1500.

Waihu, isl. See **Easter Island.**

Waikaia, New Zealand. See **Switzers.**

Waikari, post-tn., New Zealand, South I., Ashley co., 40 m. N. Christchurch. P. <1500.

Waikato, principal riv., New Zealand, North I., rises S. of and drains Lake Taupo, flows N. by W. and W. to the Pacific ocean at Waikato Harbour on the W. ct., in about 37° 45′ S. Length, 140 m.

Waikato, co., New Zealand, North I., crossed by 37° 30′ S., 175° 20′ E.

Waikato, post-tn., New Zealand. See **Port Waikato.**

Waiking-fu, tn., China. See **Hwaiking-fu.**

Waikolkoi, post-tn., New Zealand, South I., Clutha co., 96 m. from Dunedin by road and rail. P. <1500.

Waikouaiti, seapt., New Zealand, South I., Waikouaiti co., on the E. ct., 15 m. NNE. Dunedin, on S. of Waikouaiti Harbour, which is available only for small craft; anchorage in bay for larger vessels. Lighthouse. It forms a borough, the official name of which is Hawkesbury. P. <1500.

Wailangilala, isl. and reef, Fiji Is., in 16° 42′–48′ S., 179° 8′ W.

Wailu, stn., New Caledonia. See **Huailu.**

Waimakariri, riv., New Zealand, South I., formed of two branches—the right, the longest (the Courtenay), the other (the Esk)—turns S. then SE. and enters the Pacific about 12 m. N. Lyttelton, after a course of more than 110 m. Navigable for small vessels only to Kaiapoi, a short distance above its mouth.

Waimangaroa, post-tn., New Zealand, South I., Buller co., 11 m. from Westport by road and rail. P. <1500.

Waimanolo, western headland of the bight of Honolulu, Oahu, Sandwich Is.

Waimate, post-tn., New Zealand, South I., Waimate co., 20 m. N. by E. Oamaru. P. <1500.

Waimea, co., New Zealand, South I., bounded on the N. by Tasman Bay, and crossed by 173° E.

Wainád, or **Wynaad,** a tableland of the Western Ghâts, Brit. India, Madras Presidency, Malabar and Nílgiris dists., about 60 m. by 30 m., crossed by 11¾° N., 76° E.; noted for its gold-mines and coffee plantations.

Wainfleet, stn., Canada, Ontario, Welland co., 29 m. W. by N. Buffalo.

Wainfleet, probably the ancient *Vainona*, market-tn., Eng., Lincolnshire, S. Lindsey div., 15 m. NE. by E. Boston, on the riv. Steeping (Tennyson's 'Brook'), about 4 m. from its entrance into the Wash, and on the G. N. R. Once a seaport of some importance; has a grammar-school, founded in 1484 by 'William of Waynflete.' PMT.O. Market-day, S. Pars., **Wainfleet All Saints,** P. <1500; **Wainfleet St. Mary,** 6179 ac., P. <750; eccles. par. (**Wainfleet St. Thomas,** or **Northolme**) P. <250.

Waingangá, riv., Brit. India, Central Provs., rises in Seoní dist., flows NW. then E. and S. past Bhandárá, when it is joined by the Kanhán, its main trib.; 30 m. SE. Chánda it unites with the Wardhá to form the Pranhítá, which falls into the Godávari. Navigable during the rains for about 100 m. above the Kanhán. Elevation of source, 3600 ft.; length, 405 m.

Wainhouse Corner, P.O., Eng. See **St. Gennis.**

Waini, or **Guaima,** riv., NW. of Brit. Guiana, flows first NE. then NW. nearly parallel to the coast, and enters the Atlantic in about 59° 40′ W.; navigable about 80 m. up for vessels of 15 ft. or 16 ft. draught. See **Baramanni** and **Morawhanna.** *Proc. R. G. S.*, 1892, p. 668.

Wainisk, riv., Canada. See **Weenisk.**

Wainlode Cliff, on the banks of the Severn, Eng., between Tewkesbury and Gloucester, with an exposure of Rhætic and Liassic rocks. At **Wainlode Shoal** the Severn (*q.v.*) passes over a rocky barrier where the depth was formerly only 3–4 ft.

Wainstalls, P.O., Eng., Yorkshire, W. Riding, 2 m. from Luddenden.

Waiorongomai, post-tn., New Zealand, Piako co., 38 m. from Thames by road and rail; has gold-mines. P. <1500.

Waipa, co., New Zealand, North I., crossed by 38° S., and bounded on the NE. by Waikato R.

Waipahi, post-tn., New Zealand, South I., Clutha co., 65 m. W. by S. Dunedin. P. <1500.

Waipara, post-tn., New Zealand, South I., Ashley co., 32 m. N. Christchurch. P. <1500.

Waipawa, post-tn., New Zealand, North I., Waipawa co., 30 m. SSW. Napier. P. <1500.

Waipiro, post-tn., New Zealand, North I., Waiapu co., 70 m. from Gisborne by road and rail. P. <1500.

Waipu, post-tn., New Zealand, North I., Whangarei co., 60 m. N. by W. Auckland. In the neighbourhood are some remarkable limestone caves. P. <1500.

Waipukurau, post-tn., New Zealand, North I., Waipawa co., 36 m. SW. by S. Napier. P.<1500.

Wairakei, tp., New Zealand, North I., E. Taupo co., on N. shore of Lake Taupo, 80 m. NW. Napier; health resort. It contains many natural curiosities, including geysers and the beautiful Huka Falls and medicinal springs. P.<1500.

Wairarapa, North and **South,** adjoining cos., New Zealand, in the extreme SE. of North I.; the former crossed by 176° E.

Wairau, riv., New Zealand, South I., enters Cloudy Bay, and is navigable to some distance above its mouth.

Wairoa, small Maori vil., New Zealand, North I., Rotorua co., 95 m. NNW. Napier, at foot of Lake Tarawera; it was almost destroyed by the eruption of Mount Tarawera in 1886. P.<1500.

Wairoa, or **Clyde,** post-tn., New Zealand, North I., Wairoa co., 45 m. NE. Napier, and at mouth of Wairoa R., which cannot be entered by vessels drawing more than 7 ft. P.<1500.

Wairoa, North, riv., New Zealand, North I., flowing SW. and SE. into the ocean on W. ct. at Kaipara Harbour.

Wairoa, South, post-tn., New Zealand, North I., Manukau co., 19 m. SE. by E. Auckland. The waterfall of the Wairoa R. in the locality is 90 ft. high. P.<1500.

Wais, tn., Persia, prov. Khuzistan, on the Karun, 30 m. S. by E. Shuster.

Waitahuna, or **Havelock,** gold-mining and agricultural tp., New Zealand, South I., Tuapeka co., 38 m. W. by S. Dunedin. P.<1500.

Waitaki, co., New Zealand, South I., crossed by 44° and 45° S., and bounded on the E. by Waitaki R.

Waitaki, or **Waitangi,** riv., New Zealand, South I., formed by the union of the Ahuriri and Ohau in about 45° S., dividing the provs. of Otago and Canterbury, and falling into the ocean on the E. ct. Lakes Ohau, Pakaki, and Tekapo belong to its basin.

Waitaki, post-tn., New Zealand, South I., Waimate co., at the mouth of the Waitaki R., 68 m. NNE. Dunedin. P.<1500.

Waitara, post-tn., New Zealand, North I., Taranaki co., 10 m. NE. by E. New Plymouth, on the coast. The port has a depth at quay-side of 10 ft. high water ordinary springs, and a bar at entrance with 12 ft. of water at high water ordinary springs, and 9 ft. at neap tides. There is also an open roadstead. P.<1500.

Waitati, New Zealand, native name of **Blueskin** (*q.v.*).

Waltby, par., Eng., Westmorland, div. and 8½ m. SSE. Appleby, 1½ m. NW. Kirkby Stephen stn. P.<250.

Waitekauri, post-tn., New Zealand, North I., 31 m. from Thames by road and rail. P.<1500.

Waitemata, co., New Zealand, North I., crossed by 36° 30′ S., 174° 30′ E.

Waithe, par., Eng., Lincolnshire, E. Lindsey div., 6 m. S. Grimsby, 1 m. SW. Holton-le-Clay stn. P.<250.

Waitotara, co., New Zealand, North I., crossed by 175° E. and 39½° S.

Waitotara, post-tn., New Zealand, North I., Patea co., 62 m. SE. by E. New Plymouth, 20 m. WNW. Wanganui. P.<1500.

Waitsburg, vil., U.S., Washington, co. and 17 m. NE. by N. Wallawalla; summer resort. P.<1500.

Waitzen (German, in Hungarian **Vácz**), tn. with magistracy, Hungary, on the l. bk. of the Danube, where it turns to the S., 20 m. N. by E. Budapest. Seat of a bishopric, to which belongs a cathedral built 1761–77; in the episcopal palace are numerous antiquities of the Roman and Middle Ages. Here is a state prison. Alt. 365 ft. P. 14,500.

Waiuku, post-tn., New Zealand, North I., Manukau co., 25 m. S. Auckland. P.<1500.

Waiwera, coast tp., New Zealand, North I., Rodney co., 23 m. N. by W. Auckland. Much resorted to for its hot springs; efficacious in rheumatic, spinal, and cutaneous diseases. The water is similar to that at Vichy and Fachingen. P.<1500.

Wajanga, Sahara. See **Wanyanga.**

Wakamatsu, tn., Japan, Honshiu, 58 m. SE. by E. Niigata. Its castle was obstinately defended against the Mikado during the Satsuma rebellion of 1868. In the neighbourhood are china factories and a salt spring. P. 20,500.

Wakasa, kuni or old prov., Japan, now included in Fukui ken.

Wakasa, bay, on the N. ct. of Honshiu, Japan, in 135° 20′–136° E.

Wakatipu, lake, New Zealand, South I., crossed by 45° S.; the scenery at upper part is extremely grand. Length, 52 m.; breadth, 1–3 m.; depth, 1400 ft.; area, 113 sq. m.; alt. 1050 ft.

Wakatsu, tn., Japan, Kiushiu, 42 m. NE. by N. Nagasaki. P.<4000.

Wakaya, isl., Fiji Is., E. of Viti Levu and Ovalau Is., crossed by 17° 35′ S., 179° E. Rfall. (4 yrs.), 117.95 in.

Wakayama, maritime tn., Japan, Honshiu I., prov. Kii, 35 m. SW. Osaka; an important centre of the cotton trade. Mean temp. (6 yrs., 1881–86), yr. 58.8° F., Feb. 39.4°, Aug. 80.1°; rfall. (4 yrs.), 55.8 in. P. 56,000.

Wake, co., U.S., N. Carolina, E. of 79° W., crossed in the N. by 36° N.

Wa Keeney, vil., U.S., Kansas, Trego co., 225 m. W. Topeka. P.<1500.

Wakefield, episcopal city, parl. bor., and (since Charles I.) mun. bor., and market-tn., Eng., Yorkshire, W. Riding, 9 m. S. Leeds, in the diocese of Wakefield, on the Calder, with stns. on G. N. R. and L. & Y. R. Objects of interest are: the cathedral, an enlargement of the Perpendicular parish church, the grammar-school (dating from 1591), the town hall, fine-art institute, and an interesting chapel on the eight-arch bridge, &c. Waldau, vil., Prussia, prov. Silesia, circle Bunzlau, 14 m. ENE. Görlitz. P.<3000.

Waldbröl, vil., Prussia, Rhine Prov., cap. circle Waldbröl, 29 m. E. by S. Cologne. P. (comm.) 5200.

Waldeck, stn., Canada, dist. Assiniboia, on the C. P. R., 497 m. by rail W. Winnipeg.

Waldeck, princip., Ger., and a state of the empire, formed of two dists., viz. (1) Waldeck, lying between 51° and 51° 30′ N., 8° 30′ and 9° 15′ E., enclosed by the Prussian provs. of Westphalia and Hesse-Nassau, and (2) Pyrmont, 30 m. northward, surrounded by Hanover, Lippe-Detmold, and Brunswick. It is divided into four circles, viz., Twiste, Eisenberg, Eder, and Pyrmont. Surface hilly, often very rugged, reaching a height of 2750 ft. in the SW. Both portions of terr. are situated in the basin of the Weser, and are watered by its tribs., the Eder, Diemel, and Emmer. Chief products, rye, oats, potatoes, forage crops, beet-root for sugar, and fruit. Cattle-rearing is of some importance. More than one-third of the surface is forest. Mineral products comprise iron, gypsum, and slates. The waters of Pyrmont, one of the chief spas of Germany, and of Wildungen, are exported in large quantities. There is but little manufacturing industry. Government a limited monarchy, with a diet of twelve representatives for Waldeck and three for Pyrmont. Chief towns, Arolsen, the cap., in Waldeck, and Pyrmont. Total area, 439 sq. m. Total P. 57,300, all Lutherans, except about 2400 Roman Catholics and Jews.

Waldegrave, co., Queensland, crossed by 27° S. and 147° E.

Waldegrave Island, small isl., S. Australia, W. ct. of Flinders Penin., in Southern Ocean, 134° 46′ E.

Walden, par., Eng., Hertfordshire. See **King's Walden** and **St. Paul's Walden.**

Walden, vil., Eng., Yorkshire. See **Burton with Walden.**

Walden, vil., U.S., New York, Orange co., on Wallkill R., 20 m. SW. Poughkeepsie. P.<3000.

Walden Beck, riv., Eng., Yorkshire, N. Riding, rising in Buckden Out Moor, on the S. border of the Richmond div., and flowing NE. to the Ure, which it joins on the r. bk., 1½ m. below Aysgarth.

Waldenburg, tn., Ger., kgd. Saxony, circle Zwickau, dist. and 5 m. NE. Glauchau; has princely castle with fine gardens, ruins of an imperial residence; manufactures of hosiery, gloves, &c. Alt. 845 ft. P.<3000.

Waldenburg, tn., Ger., kgd. Würtemberg, Jagst circle, 43 m. SSW. Würzburg. P.<2000.

Waldenburg, tn., Prussia, prov. Silesia, cap. circle Waldenburg, 42 m. SW. by W. Breslau, in the Waldenburg coal-fields; has manufactures of porcelain, stoves, cement, and carriages. Alt. 1425 ft. P. (1816)<2000; (1890) 13,600.

Waldenrath, vil., Prussia, Rhine Prov., circle Heinsberg, 16 m. N. Aix-la-Chapelle. P. (comm.)<3000.

Waldenses, in French **Vaudois,** a religious sect, aiming to practise the precepts of primitive Christianity, who arose in the 12th century in Lyons. Subjected to much persecution because of their unwearied proselytism, they took refuge in the valleys of the Cottian Alps (Piedmont, Provence, and Dauphiné), where they have maintained themselves down to the present time.

Walden's Ridge, range of mts., U.S., in the SE. of Tennessee, trending NNE. and SSW. to the W. of the Tennessee River.

Walden Stubbs, par., Eng., Yorkshire, W. Riding, Osgoldcross div., on the Went, 8½ m. N. Doncaster, 1 m. N. Norton stn. P.<250.

Waldershare, par., Eng., Kent, St. Augustine div., 4½ m. N. Dover, 2 m. E. Shepherd's Well stn. P.<250; eccles. par. (**Waldershare with Whitfield and West Langdon**) P.<750.

Waldershof, vil., Ger., kgd. Bavaria, govt. Upper Palatinate, circle Tirschenreuth, 21 m. E. by N. Bayreuth. P.<2000.

Walderton, vil., Eng., Sussex, 7 m. NW. Chichester, PMT.O.

Waldfeucht, vil., Prussia, on the W. frontier of the Rhine Prov., circle Heinsberg, 20 m. N. by W. Aix-la-Chapelle. P. (comm.)<3000.

Waldheim, tn., Ger., kgd. Saxony, circle Leipzig, on riv. Zschopau, 17½ m. NW. Freiberg, beautifully situated; manufactures cigars, furniture, and cloth; has magnificently built line of railway along the Zschopau. P. (1834)<4000; (1890) 9200.

Waldhof, vil., Ger., gd.-duchy Baden, circle, dist., and 3 m. N. Mannheim. P.<3000.

Waldingfield, Great and **Little,** two adjoining pars., Eng., Suffolk. Great Waldingfield, Sudbury div., 13½ m. S. by E. Bury St. Edmunds, P.O., P.<750; Little Waldingfield, P.O., P.<500.

Surface.—With the exception of the island of Anglesey, where it is level or undulating, the surface is generally mountainous, especially in the N., which has in Snowdon 3590 ft., the culminating point of Britain S. of the Tweed. The mountains, for the most part, do not form well-defined ranges, but present a confused mass of short ranges (in many instances trending N. and S. or NE. and SW.) and small groups, separated by narrow valleys. Besides Snowdon, several other summits in Carnarvonshire rise to over 3000 ft. (Carnedd Llewellyn, 3482 ft.; Carnedd Davydd, 3430 ft., &c.); in Denbighshire are the Mynydd Hiraethog (E. and W.), and in Flintshire the Halkin Mts. (NW. and SE.); in Merioneth, Aran Mawddwy rises to 2970 ft., and the better-known Cader Idris to 2929 ft., with several other summits of over 2000 ft., and the Berwyn range (2716 ft. NE. and SW.), on the E. border; in Montgomeryshire, the Mynydd Drum stretch NE. and SW. through the centre, the Long Mt. borders on Salop, and Kerry Hill on Radnor; in the latter county is the Radnor Forest group, 2163 ft. Plinlimmon rises in the NE. of Cardigan to 2463 ft., and trending parallel to the coast in the same county is the Mynydd Bach range, and in Pembrokeshire the Mynydd Perceley, 1754 ft. The Black Mts., or Forest Fawr, in SE. Carmarthenshire and SW. Brecon, rise to 2596 ft. in Talsarn, Brecon Van to 2631 ft., and Pen-y-fan, the highest of the Brecon Beacons, to 2910 ft.; the Black Forest group, in E. of Brecknockshire, contains Pencaderfawr, 2630 ft., and other summits in the county rise to over 2000 ft.; but southward the elevation declines, and the S. part of Glamorgan is comparatively low. As regards **geological structure,** the characteristic formations are the Silurians, a group of strata named, on account of its great development in Wales, from the Silures, a British tribe formerly inhabiting the region. The Lower Silurian beds occupy nearly the whole of the W. portion of the country; the Upper Silurians, of less extent, mainly the cos. of Denbigh, Montgomery, and Radnor, with a SW. extension through Brecon. Small areas of Cambrian formation occur in Merioneth, N. of Barmouth, and in Carnarvonshire along the Menai Strait. Carboniferous beds appear in the NE., in Flintshire and Denbighshire; in the S. they cover a wide area (the true coal-measures largely predominating), including the greater part of Glamorgan, with parts of Brecon, Carmarthen, and Pembroke. Devonian strata form a wide wedge-shaped mass between the Upper Silurian in the N. and the Carboniferous formations in the S., the apex stretching westward to Milford Haven. Trappean rocks break through the Silurian over considerable areas in Anglesey and in the Braich-y-Pwll Penin.; in other parts they crop out in ridges, generally NE.–SW. The principal rivers are, N., the Dee, Clwyd, and Conway; W., the Mawddach, Dovey, Rheidol, Aeron, and Teifi; S., the Cleddan, Taf, Towy, Neath, and Taff, and the Usk, of which the lower course is in Monmouth. The rivers are, however, short, and where navigable, only so by small boats or barges. In Wales are many tarns; the largest lake, Bala, in Merioneth, is less than 4 m. in length. As regards **climate,** see under **United Kingdom.** An examination of the tables of agricultural statistics in the **Appendix** (pp. 7–9) shows that the total area under corn crops decreased between 1869 and 1893 by one-fourth, the decrease being greatest in wheat and least in oats; the actual decrease in wheat (from 81 to 20 ac. per 1000) was greatest in Flint, Denbigh, Montgomery, and Glamorgan, though the first still takes the lead; proportionate decrease was greatest in Anglesey and Carnarvon, in each of which the area under wheat was only about one-sixth of that in 1869, but at both periods these counties were amongst the smallest wheat-producers. The area under barley declined in every county, the decline being greatest in Pembroke, least in Merioneth, while yet these are respectively the greatest and least producers of this crop. The area under oats has, on the whole, declined but little, and three counties (Flint, Montgomery, and Radnor) show a slight increase. The total area under green crops (about 29 per cent. of the corn crops) was slightly lower in 1893, the decrease being greatest in potatoes, while mangold had increased. On the other hand, the total area under artificial grasses increased by about one-fifth, and that under permanent pasture by nearly one-third, the actual increase being respectively 11 and 99 per 1000 ac.; actual increase in the former was greatest in Pembroke (37 per 1000), and in the latter in Carmarthen (145 per 1000). The last-named county had at both periods the greatest proportionate area under permanent pasture, and Merioneth the least, though there was an actual increase in Merioneth of 96 per 1000. The total area under artificial grasses (for hay and not for hay) was rather more than one-half that of the combined corn and green crops, while the area under permanent pasture was 2½ times that of all the others, whereas in 1869 it was only 1⅝. The area under orchards (chiefly in Brecon and Radnor), small-fruit, and market gardens is everywhere small. The number of horses increased during the period under consideration by 3 per 1000 ac., cattle by 32 (ranging from 82 per 1000 in Anglesey to 5 in Merioneth); sheep by 80 (increase ranging from 198 per 1000 in Denbigh to 10 in Glamorgan, while Radnor showed a decrease of 48 per 1000 ac.); pigs by 6 (greatest, 29 in Flint, three counties showing a decrease, of which the greatest, 9 per 1000 ac., was in Radnor). The counties having respectively the greatest and least proportion to area of the animals above named were, horses, Anglesey and Merioneth; cattle, Anglesey and Brecon; sheep, Brecon and Pembroke; pigs, Flint and Radnor. Of the **mineral productions** of Wales coal is by far the most important, amounting to about 85 per cent. in value of all the minerals of Wales and about one-fifth of the total coal-supply of the United Kingdom. There are two coalfields, the N. and the S. The importance of the N. Wales coalfield (cos. Denbigh and Flint) as early as the 16th century is attested by a reference to it in Camden's *Britannia* (Gough's edition, 1789, p. 592), where it is said, 'The collieries of Mostyn and Bychton have been worked for a very considerable space, and in the last century supplied Dublin and the eastern coast of Ireland.' The S. Wales coalfield extends from Abersychan on the E. to St. Bride's Bay on the W., a distance of 89 m.; greatest breadth (in Glamorgan) 21 m., total area about 1000 sq. m. The total thickness of the coal-measures is roughly estimated at about 7000 ft. Portions of the coalfield lie beneath the sea in Carmarthen Bay, Burry Inlet, and Swansea Bay. Of the five counties into which the coalfield extends, Glamorgan has about 52 per cent., Carmarthen nearly 30 per cent., Monmouth 10 per cent., and Pembroke and Brecon each about 7½ per cent. When this coalfield was first worked is not certainly known, but its real development dates from about the middle of the 18th century, when coal came to be substituted for charcoal in the smelting of iron. Some idea of the growth of the coal industry may be gathered from the following figures taken from a paper by Mr. T. Forster Brown (see below):—In 1745, 1857 tons of coal were sent to London; in 1765, 4000 tons; total shipments of coal from S. Wales coalfield, 1816–18, amounted to 890,000 tons, while the annual average for the ten years 1831–40 was 881,000 tons; in 1852 it had risen to 2,110,000 tons, and in 1893 to 3,454,000 tons. In 1860 the total production of coal was 10.2 (million tons); in 1872, 15.0; in 1893, 22.8 (exclusive of Monmouth, 7.3). Of the last total (22.8) nearly 1⅓ths was obtained in Glamorganshire. The production in the N. coalfield during the same year amounted to 2.2 (million tons), of which Denbighshire supplied rather more than three-fifths. Both bituminous and anthracite coals are obtained in the S. coalfield, the latter mainly in the much folded and compressed seams W. of Carmarthen Bay and the Vale of Neath. The steam-coal, for which S. Wales (above all the port of Cardiff) is famous all the world over, is derived mainly from the Merthyr, Taff, Aberdare, and Rhondda valleys, while the N. outcrop of this portion of the S. Wales coalfield, from Hirwain on the W. to Blaenavon on the E., furnishes the bulk of the coal used in the iron industry. Next in value to coal are slate (Carnarvon and Merioneth), about two-thirds being obtained from quarries, and the rest from mines; stone (Brecon and Glamorgan), and clays (Glamorgan. Denbigh,

and Flint, in the two last chiefly from open works. Five-eighths of the zinc and nearly one-fifth of the lead produced in the United Kingdom are obtained in Wales, both in Flint, Denbigh, Cardigan, and Anglesey, and lead also in Carmarthen; other minerals are obtained in small quantity, gold (Merioneth), iron (Glamorgan), copper (Anglesey), ochre and umber (Anglesey), manganese, &c. The abundance of argillaceous ironstone found associated with the steam-coal beds of S. Wales was once largely worked, and its occurrence here along with the coal may be said to have given rise to the S. Wales iron industry, but the refractory nature of the ore has latterly caused it to be almost entirely displaced by the more valuable ores of Spain. The **manufacturing** industries of Wales are mainly metallurgical, and connected with the S. Wales coalfield. Iron-making was carried on by means of charcoal as early as the 15th century, and the extensive use of wood for this purpose is said to have resulted in the almost complete deforesting of the country by the middle of the 18th century. In 1755 a Mr. Bacon obtained a lease of mineral property in the neighbourhood of Merthyr-Tydfil, and here grew up later the great iron-works for which the dist. is famous. According to the report of the Royal Commission, quoted by Mr. Forster Brown, there were in 1788 seven charcoal furnaces, producing 4300 tons of pig iron, and six coke furnaces, producing 6600 tons. In 1827 there were ninety furnaces in S. Wales and Monmouthshire, producing 272,000 tons of iron; in 1867 the number of furnaces had risen to 115, and the output to 886,000 tons; and in 1872, with the same number of furnaces, to over 1,000,000 tons. This activity has not, however, been uniformly maintained; and in 1893 the number of furnaces in blast was only about 25, with an output of nearly 711,000 tons, less than one-eighth of the total for the United Kingdom. To supply its smelting-furnaces S. Wales imports large quantities of ore, including nearly one-fourth of the total iron ore imported into the United Kingdom, chiefly by Cardiff, Newport, and Swansea, and, to a less extent, Llanelly. Copper-smelting has its chief seat in the neighbourhood of Swansea, which imports from all parts of the world more than half the copper brought into the United Kingdom. The manufacture of tin-plate from tin chiefly supplied by Cornwall, as well as the working of other metals, is carried on in connection with the S. Wales coalfield. The tin-plate industry, which is now pursued more extensively in S. Wales than anywhere else in the world, was introduced here in the 17th century from Saxony. Textile industries are very limited—chiefly flannels (Welshpool, Newtown, Montgomery). **Communication** between the ports and mining and industrial centres inland is maintained by an extensive system of railways and canals, which have their greatest development in the S., where valleys, running generally N. and S., afford natural openings into the interior. As to **local government, elementary education,** &c., see under **England.** Higher education is provided for by the University of Wales (established 1893), comprising the three university colleges of Bangor, Aberystwith, and Cardiff. **Historical notes.**—Wales was in early times peopled by various tribes, some Celtic, some, as is supposed, non-Aryan. Under Roman rule Wales formed chiefly the div. *Britannia Secunda.* Later, when the Saxons established themselves in Britain, they drove the ancient inhabitants westward, designating them the *wealas,* or 'foreigners,' and hence that part of the country in which they were most numerous was called 'Wealas,' or Wales. The Celtic language gradually acquired predominance, and by the beginning of the 7th century it had replaced the other dialects and was spoken throughout nearly the whole of Wales. The census of 1891 includes a record of the Welsh and English speaking inhabitants of the registration counties of Wales, as well as Monmouthshire (*q.v.*). The census thus applies not merely to the principality within its present limits, but includes also portions of adjoining English counties, while, on the other hand, it excludes parts of Flintshire. The result, as given in the table below, shows that nearly one-third of the population of registration Wales still speak Welsh only:—

	Total above 2 Years of Age.	Welsh only.	Bilingual	English only.
Anglesey	32,460	23,200	7,201	2,059
Brecknockshire	50,013	5,228	13,699	31,086
Cardiganshire	82,714	61,624	17,111	3,979
Carmarthenshire	112,033	63,315	36,937	11,751
Carnarvonshire	119,714	78,780	28,330	12,604
Denbighshire	110,535	37,195	35,030	38,310
Flintshire	40,225	10,484	16,879	12,862
Glamorganshire	646,553	142,346	177,726	326,481
Merionethshire	61,500	45,856	12,023	3,621
Montgomeryshire	64,030	16,414	15,846	31,770
Pembrokeshire	76,436	13,673	10,804	51,959
Radnorshire	16,269	75	924	15,270
Total	1,412,482	498,220	372,510	541,752

The history of the country till its final conquest by England is mainly a record of internecine feuds, and of the brave, though unsuccessful, struggle for independence. The legislative union with England was not accomplished till 1536. See **British Isles, England, United Kingdom.** (See a paper on the South Wales Coalfield, by T. Forster Brown, in *Trans. of South Wales Inst. of Engineers,* vol. ix., 1874.) **[E. J. H.]**

Waraszdin, Ger. spelling of **Varasd** (Croatia).

Warasque, former dist., France. See **Varais.**

Waratah', post-tn., New South Wales, Gloucester co., in 32° 56′ S., 151° 45′ E.; has coal and copper mines, copper and tin smelting works, stone quarries, pottery, and brick-making. Large quantities of fruit are exported. P. <1500.

Waratah', post-tn., Tasmania. See **Mount Bischoff.**

Waratah, South, tp., New South Wales. See **Charlestown.**

Waraultee Island, isl., S. Australia, in Spencer Gulf, in about 34° 30′ S.

Warberg, tn. and sea-bathing place, Sweden, prov. Halland, on W. ct., 42 m. S. by E. Gothenburg. P. <5000.

Warbleton, par., Eng., Sussex, div. and 12 m. N. Eastbourne, PMT.O., and P.O. (**Rushlake Green**); 6226 ac. P. <1500; eccles. par. (**Warbleton St. Mary**) P. <1500.

Warblington, par., Eng., Hampshire, Fareham div., on the coast, 7 m. ENE. Portsmouth, 1 m. SE. Havant stn.; includes **Emsworth** (*q.v.*), 1 m. E., with stn. on L. B. & S. C. R. Warblington Castle, now a ruin, was built before Henry III., but rebuilt in the reign of Henry VII. P. <3000.

Warborough, par., Eng., Oxfordshire, Henley div., 9½ m. SE. by S. Oxford, 1 m. N. of the Thames, 3 m. N. Wallingford, PMT.O. P. <750.

Warboys, par., Eng., Huntingdonshire, Ramsey div., 6½ m. NE. Huntingdon, on the G. E. R., PMT.O; 8435 ac. P. <2000.

Warbreck, vil., Eng., Lancashire, div. and 1½ m. N. Blackpool. See **Layton.**

Warbstow, par., Eng., Cornwall, div. and 8½ m. WNW. Launceston; 4151 ac. P. <500. See **Treneglos.**

Warburg, tn., Prussia, prov. Westphalia, cap. circle Warburg, 20 m. NW. Kassel; here the Duke of Brunswick gained a victory, July 31, 1760. P. <5000.

Warburton, par., Eng., Cheshire, Altrincham div., 6 m. E. by N. Warrington, on the Mersey, with a stn. (**Heatley and Warburton**) on the L. & NW. R., P.O. P. <500.

Warburton, riv., S. Australia, flows SW. into the N. end of Lake Eyre. See **Diamantina.**

Warburton, postal-dist., Victoria, Evelyn co., in 37° 48′ S., 145° 41′ E.; a summer resort, surrounded by beautiful scenery. P. <1500.

Wárcha, vil., India, Punjab, Sháhpur dist., 105 m. SW. by S. Ráwal Pindi, at the base of the Salt Range, with salt-mines.

Warcop, par., Eng., Westmorland, on the Eden, div. and 5 m. SE. Appleby, on the NE. R., PMT.O.; 11,494 ac. P. <750.

Ward, par., Ire., co. and 7 m. NW. Dublin, bar. Castleknock, P.O. (**The Ward**). P. <250.

Ward, co., Queensland, on the E. ct., in the extreme SE., crossed by 28° S.

Ward, mining vil., U.S., Nevada, White Pine co., 75 m. SE. Eureka, at foot of Harnet Peak. P. <1500.

Ward, co., U.S., N. Dakota, N. of 48° N., crossed in the E. by 101° W.

Ward District, gold and silver mining vil., U.S., Colorado, co. and 20 W. Boulder. P. <1500.

Wardell, tp., New South Wales, Rous co, 55 m. NNE. Grafton, on Richmond R. P. <1500.

Warden, par., Eng., Kent, on the E. ct. of the Isle of Sheppey, 6½ m. E. by S. Sheerness. P. <250.

Warden, par., Eng., Northumberland, div. and 2 m. W. by N. Hexham, at the confluence of the N. and S. Tyne, 1 m. S. by W. Wall stn. P. <1000; eccles. par. (**Warden with Newbrough**) P. <2000.

Warden, Old, par., Eng., Bedfordshire, Biggleswade div., 6½ m. SE. by E. Bedford, 1 m. NE. by N. Southill stn., PM.O. P. <500.

Ward End, eccles. par., Eng., Warwickshire, Aston par., P.O. P. <1500.

Warden Law, par., Eng., Durham, union and 2½ m. E. Houghton-le-Spring. P. <250.

Wardhá, riv., Brit. India, Central Provs., rises in the Sátpura Hills and flows from the NW. in the same general direction as the lower Godávari. In the monsoon it becomes a furious torrent; in the hot months it is nearly everywhere fordable. The valley of the Wardhá is famous for its cotton. Length, 254 m.

Wardhá, tn., Central India, Wardhá dist., 46 m. SW. Nágpur; an active centre of the cotton trade, founded on the site of an old village only in 1866, but very prosperous through being the place of junction of the railway down the Wardhá valley with the main line from Bombay to Nágpur. P. (1891) 8300; Hindus, 6600.

Wardhouse, stn., Scot., W. Aberdeenshire, 7 m. SSE. Huntly, on the G. N. of S. R.

Ward Hunt Strait, Brit. New Guinea, separating Cape

Vogel Penin. from the W. end of the D'Entrecasteaux group, crossed by 9½° S., 150° E.

Wardle, vil., Scot., Midlothian, included in Granton (*q.v.*) village.

Wardin, comm., Belgium, prov. Luxembourg, arr. Bastogne, 29 m. NW. by N. Luxembourg. P. <2000.

Wardington, par., Eng., on the NE. border of Oxfordshire, div. and 4½ m. NE. Banbury, 2½ m. E. Cropredy stn., PMT.O. P. <750.

Ward Law, mt., Scot., Selkirkshire, par. and 1 m. N. Ettrick church. Alt. 1951 ft.

Wardle, par., Eng., Cheshire, Eddisbury div., 3½ m. NW. by N. Nantwich, on the Ellesmere Canal, 2 m. SE. Calveley stn. P. <250.

Wardle, vil., Eng., Lancashire; has coal-mines. PM.O. See **Wuerdle and Wardle.**

Wardleworth, par., Eng., Lancashire, included in co. bor. of Rochdale, on L. & Y. R. P. 19,200.

Wardley, stn., Eng., Lancashire. See **Moorside and Wardley.**

Wardley, par., Eng., Rutland, 6 m. SSW. Oakham, 3 m. E. by S. East Norton stn. P. <250; eccles. par. (**Wardley with Belton**) P. <500.

Wardley Colliery, P.O., Eng., Durham, 4 m. SE. Gateshead.

Wardlow, par., Eng., Derbyshire, W. div., 8 m. E. by N. Buxton, 1½ m. N. Monsal Dale stn. P. <250.

Wardlow Hay Cop, a hill to the S. Alt. 1227 ft.

Ward of Cruden, vil., Scot., Aberdeenshire. See **Port Errol.**

Wardour, par., Eng., Wiltshire, union and 2 m. SW. Tisbury. P. <1000.

Ward's Island, U.S. See **New York,** city.

Ward's Springs, vil., U.S., Virginia, Pittsylvania co., 2 m. N. Elba; has sulphur spring. P. <1500.

Wardsville, vil., Canada, Ontario, Middlesex co., 35 m. SW. London, on the riv. Thames. P. <1500.

Wardwán, long narrow valley, N. India, E. of Kashmír valley, bounded by mountains covered with perpetual snow; a noted haunt of the ibex. Length, 40 m.; average breadth, ½ m.

Ware, par. and market-tn., Eng., Hertfordshire, div. and 2½ m. NE. by E. Hertford, on the Lea, on a branch of the G. E. R. The town, on l. bk. of the Lea, has a church, and an active trade in malt, grain, and coal. The 'great bed of Ware,' 12 ft. square, and of uncertain origin and use, mentioned by Shakespeare, is now at Rye House, about 4 m. from the town. The town was founded by Edward the Elder, at the place of a wear or dock, previously formed by the invading Danes, and here are some remains of an ancient priory, and the head springs of the New R., by which water is conveyed for the supply of the N. part of London. Market-day, Tu. 4705 ac. Mean rfall. (Much Hadham, alt. 222 ft., 1866–80), yr. 26.7 in. Par. P. 5700; tn. P. 5300.

Ware, co., U.S., Georgia, on S. frontier, W. of 82° W.

Ware, tn., U.S., Massachusetts, Hampshire co., on Ware R., 18 m. E. by N. Holyoke; has cotton and woollen manufactures. P. 7300.

Waregga, central African Bantu tribe of the Congo Free State, inhabiting the primeval forests E. of the Upper Congo, and NE. of Nyangwe. They are intelligent, and some of their native industries, *e.g.*, forging, are highly developed. Iron ores of good quality are found in their country. According to Stanley and Huxley the Wareggas are addicted to cannibalism. See Stanley, *Through the Dark Continent*, 1878, ii., ch. v. [**H. G. S.**]

Wareham, mun. bor. (since 1703), Eng., Dorsetshire, E. div., 15 m. E. Dorchester, in the diocese of Salisbury, between the Trent and Frome, with stn. on the L. & SW. R. The chief trade now is from clay-works, but anciently it was an important market-town and seaport. The Romans had a station here, and traces of their *vallum* (rampart) still remain. As the sea receded Wareham declined as a port, while the neighbouring town of Poole rose in importance. Market-day, Tu. Mun. bor. P. (1891) <2500; eccles. par. (**Wareham with Arne**) P. <3500.

Wareham, tn., U.S., Massachusetts, Plymouth co., on Wareham R., 14 m. NE. New Bedford. P. <4000.

Warehorne, par., Eng., Kent, div. and 6 m. S. by W. Ashford, 1 m. SW. Ham Street stn., P.O. P. <500.

Warehouse Point, vil., U.S., Connecticut, co. and 11 m. N. by E. Hartford, on the l. bk. of the Connecticut. P. <1500.

Waremme, comm., Belgium, prov. and 13 m. WNW. Liège, arr. Waremme. P. <4000.

Waren, tn., Ger., Mecklenburg-Schwerin, circle Waren, between the N. shore of Müritz-see and the Tiefwaren-see, 20 m. NW. by W. Neustrelitz. P. 6800.

Warendorf, tn., Prussia, prov. Westphalia, cap. circle Warendorf, 23 m. S. Osnabrück. P. 5600.

Warenford, par., Eng., Northumberland, Berwick-upon-Tweed div., 10½ m. NNW. Alnwick, 1½ m. SW. Lucker stn., P.O. P. <250.

Warenton, par., Eng., Northumberland, 2 m. SE. Belford. P. <250.

Waresboro, vil., U.S., Georgia, Ware co., 104 m. E. Albany by rail, in the midst of pine forests. P. <1500.

Wareside, eccles. par., Eng., Hertfordshire, Ware and Thundridge pars., P.O. P. <750.

Waresley, par., Eng., Huntingdonshire, div. and 11 m. S. Huntingdon, 2 m. N. by E. Gamlingay stn., P.O. P. <250.

Warfield, par., Eng., Berkshire, Wokingham div., 6 m. SW. by W. Windsor, 2 m. NNE. Bracknell stn., P.O. (**Warfield Street**). P. <2500.

Warford, Great, par., Eng., Cheshire, 5 m. E. Knutsford. P. <500.

Wargla, or **Wargala** (French spelling, **Ouargla**), oasis, Algeria, 315 m. S. by W. Constantine; has numerous date-palms. Continuation of railway from Biskra (present terminus of Philippeville, Constantine, and S. line) by Tuggurt to Wargla projected. Malarial fever very prevalent, especially in spring and autumn.

Wargrave, par., Eng., Berkshire, Wokingham div., on the r. bk. of the Thames, at the confluence of the Loddon, 5½ m. NE. by E. Reading, close to Shiplake stn., PMT.O.; 4462 ac. P. <2500.

Wargrave, PMT.O., Eng., Lancashire, Newton div., 4½ m. E. by S. St. Helens, ½ m. SE. Earlestown Junction.

Warham, All Saints and **St. Mary,** two adjoining pars., Eng., Norfolk, N. div. Warham All Saints, 17½ m. W. Cromer, 1½ m. SE. Wells stn., P.O., P. <500; Warham St. Mary, P. <250.

War Hill, mt., Ire., in the NE. of co. Wicklow, 8 m. SW. by W. Bray. Alt. 2250 ft.

Wárí, also known as **Sáwantwárí,** and **Sundarwárí** ('beautiful garden'), tn. and ruined fort, India, cap. native state Sáwantwári, 30 m. N. by W. Goa; on the rocky border of a lake, surrounded by palm-groves. P. (1881) 8600.

Warialda, tp., New South Wales, Burnett co., 110 m. N. by W. Tamworth. P. <1500.

Wari Creek, arm of the Niger delta, flowing W., in about 5° 40′ N., 5° 20′–50′ E.

Warin, tn., Ger., Mecklenburg-Schwerin, circle Güstrow, 13 m. SE. by E. Wismar. P. <2000.

Waringsford, P.O., Ire., NW. co. Down, bar. Lower Iveagh, Lower Half, 9½ m. S. by W. Lisburn, 4 m. from Dromore stn.

Warrington, parl. and (since 1847) mun. bor., and market-tn., Eng., Lancashire, Newton div., equidistant (16 m.) from Liverpool and Manchester, in the diocese of Liverpool, on the Mersey (at the head of navigation), and the Manchester Ship Canal (here crossed by five bridges), a little below the Latchford locks, with stns. on the L. & NW. R. and Cheshire Lines Rly. Its growth is due to the manufactures, but anciently it was of note. It is mentioned as *Walintune* in Domesday, and is spoken of by Leland (1549) as a better market than Manchester; has important iron manufactures of various kinds (including wire and tools), pins (an industry at least 100 years old), glass, leather (especially heavy leather goods), chemicals, soap, beer, &c. Among its public buildings are a gymnasium, museum, school of art, and infirmary. Market-days, W. and S. Mun. bor. P. (1801) 10,600; (1851) 22,900; (1871) 32,144; (1891) 52,700; parl. bor. P. (1891) 55,300.

Warrington, tn., U.S., Florida, Escambia co., on the coast, 5 m. SW. Pensacola. P.<1500.

Warrior Reefs, large coral reef in Torres Strait, between Australia and New Guinea, in about 9° 15′–143° 50′ S., 143°–15′ E.; divided into two by Moon Pass.

Warrnambool, seapt. municip., Victoria, Villiers co., 50 m. E. Portland, on Lady Bay. Warrnambool does considerable trade, and has several factories. Its public buildings include an art gallery and museum, and well-appointed salt-water baths, erected by the Corporation. There are botanical gardens, and the Albert Park (area, 144 ac.). The port has a breakwater pier 900 ft. in length, and on the N. shore of the bay is a lighthouse, visible 14 m. P. 6600.

Warsash, vil., Eng., Hampshire, PMT.O. See **Hook.**

Warsaw, govt. of Russian Poland, occupies a narrow strip of land on the l. bk. of the Vistula and the lower Bug to the Prussian frontier; has Płock and Łomża on N., Siedlce on E., Radom, Piotrków, and Kalisz on S. Surface low and flat (plains of central Poland and Mazovia). Terrible inundations at the junction of Vistula with Narew and Bug. Soil not very fertile but well cultivated. Pop., Poles and Mazurs (76 per cent.), Jews (15 per cent.), and Germans (9 per cent.), who have rapidly colonised the country by peasants, aided by the German government. Manufactures rapidly developing, especially in and round the capital, the government of Warsaw, with its yearly production valued at £5,000,000, ranking fourth in the Russian Empire after Moscow, St. Petersburg, Vladimir, and Piotrków. Sugar-works, plated silver, carpets, woollen cloth, machinery, boots and shoes, and ready-made clothing being the chief items. Divided into thirteen dists.: Warsaw, Błonie, Góra, Kalwarya, Gostynin, Grójec, Kutno, Łowicz, Nowo-Minsk, Radziejewo, Radzymin, Skiernewice, Sochaczew, and Włocławek. Area, 5623 sq. m. P. (1885) 971,730; (1890) 1,465,130, of whom 490,420 in the capital.

Warsaw, Polish **Warszawa,** cap. of Poland, and chief town of the above government, by its population the third city of the Russian Empire, only second to the two Russian capitals; beautifully situated on l. bk. of Vistula, 700 m. by rail SW. of St. Petersburg, and 395 m. E. of Berlin. Stands on a terrace 100 ft. high, having the suburb of Praga on the r. bk. of the Vistula, 450–880 yards wide, and spanned by two bridges. Owing to its most advantageous position amidst a fertile plain, on a great navigable river, near to its junction with the Pilica, the Wieprz and the Narew, as well as on the terr. of Mazovia, it became cap. of the united kingdom of Poland and Lithuania. It has suffered much from wars in the 17th and 18th centuries, and especially in 1794, during the Napoleonic wars, and after the risings of 1831 and 1863. But it is still one of the chief cities of Europe, rapidly increasing in population, well built and a centre of science, art, industry, and commerce. It is the seat of the governor-general and lieutenant of Poland, and the see of the Roman Catholic and Greek archbishops. It has a university which has lost much lately since teaching is being made in Russian by Russian professors, and the library of the university, having been confiscated in 1794, was taken to St. Petersburg to form the nucleus of the imperial public library. The medical school of Warsaw enjoys universal renown, so also the school of art (fine museum), the academy of agriculture and forestry, the conservatory of music, and several scientific societies. The theatre for Polish drama and ballet is a fine building. The Łazienki public gardens and theatre, the Saxon gardens, and the Krasinski gardens are favourite places of resort. An old-type citadel, erected in 1832–35, stands in the N. and protects the railway bridge, which has, moreover, a *tête de pont* on the r. bk. of the Vistula. The suburb of Praga has a historical renown for the bloody assaults of Suvoroff in 1794, and Paskevich in 1831. The industries of Warsaw occupy over 20,000 persons, and represent a yearly return of over £4,000,000. Plated silver, machinery and engines, chemicals, musical instruments, especially pianos, carpets, boots and shoes, carriages, leather goods, and sugar are among the most important items, as well as spirits and beer. The distinctive feature of Warsaw's workingmen population is the number of skilled artisans. The trade is very considerable. The suburbs of Warsaw are surrounded by villas and palaces. The battlefields of Grochowo (1831), Raszyn (1809), and Maciejowice (50 m. up the Vistula), where Kosciuszko was wounded and taken by the Russians in 1794, are round it. The fortress of Modlin is 20 m. down the river. Alt. 392 ft. Mean temp., yr. 45.3° F., Jan. 26.0°, July 66.7°; mean rfall. (73 yrs.), yr. 22.4 in., April–Dec. 17.3 in. P. (1860) 161,000; (1872) 276,000; (1890) 490,417 (523,133 including military).

Warwick, parl. and (since Henry III.) mun. bor. and market-tn., Eng., Warwickshire, 20 m. SE. Birmingham, in the diocese of Worcester, on the Avon, with stn. on the G. W. R. During William I. it was a borough with 261 houses, and a jurisdiction of its own. It suffered much from the wars of the barons, but still retains some mediæval dignity from its remaining gates with chapels over the arches, its cruciform church, the beautiful Beauchamp Chapel (1464), and especially its noble castle on a rocky height overhanging the river. Erected on the site of a Saxon fortress, with the huge 'Cæsar's Tower,' 147 ft. high, and Guy's Tower, built 1394, it is the grandest feudal mansion now remaining, and contains relics of Warwick, the King-Maker, noted paintings, and the Warwick Vase from Hadrian's Villa, Tivoli. Market-day, S. Mun. bor. P. (1801) 5800; (1851) 11,000; (1871) 11,000; (1891) 11,900; parl. bor. (including Leamington) P. (1891) 39,100.

Warwick, mun. tn., Queensland, Merivale co., 80 m. SW. Brisbane; well-built in the heart of the best agricultural dist. of Queensland; noted for its fine wheat and excellent grapes for wine. Building-stone, marble, and fireclay are abundant in the neighbourhood; coal is found in many parts of the dist., and there are gold-bearing reefs. Alt. 1520 ft. Mean temp., yr. 62.2° F., Jan. 72.7°, July 48.0°; rfall. (12 yrs.), 32.13 in. P.<4000.

Warwick, tn., U.S., Massachusetts, Franklin co., 35 m. NNE. Holyoke. P.<1500.

Warwick, vil., U.S., New York, Orange co., 43 m. NNW. New York. P.<2000.

Warwick, tn., U.S., Rhode Island, Kent co., 8½ m. SSW. Providence. P. (1880) 12,200; (1890) 17,800.

Warwick, co., U.S., Virginia, in the SE., crossed in the S. by 37° N., and E. of 77° W., bounded on the SW. by the estuary of the James R.

Warwick Neck, P.O., U.S., Rhode I., for **Rocky Point** (*q.v.*).

Warwickshire, inland co., Eng., in the very heart of the midlands, with drainage W., E., N., and S., to the four great basins of the Severn, Wash, Trent (or Humber), and the Thames. It contains four parl. divs., as in the following table:—

Parliamentary Divs. and Bors.	Acres.	P. 1891.
N. or Tamworth	105,599	54,137
NE. or Nuneaton	95,589	52,644
SW. or Stratford-on-Avon . .	176,920	46,463
SE. or Rugby	171,320	49,737
Bors.	28,034	602,091
Ancient co.	577,462	805,072

The administrative co. includes part of the co. bor. of Birmingham, and excludes parts of the urban sanitary dists. of Hinckley, in the administrative co. of Leicester, Redditch, in the administrative co. of Worcester, and Tamworth, in the administrative co. of Stafford. Area, 578,595 ac. P. 838,030.

The county is mostly a plateau, without mountains, the only heights reaching to 800 ft. being the Edge Hills on S. border, traversed from NE. to SW. by the riv. Avon, with its many tribs. Camden describes the two parts separated by the river as '*Feldon* and *Woodland*, *i.e.*, a plain champaign, and a woody country'—the latter being the 'Forest of Arden' of Shakespeare, in N. The geological floor is mainly (N.) Red Sandstone, with the Lias formation in S. near Edge Hill. The Upper Lias crosses by Henley-in-Arden, Stratford, and Rugby. There is a small but productive coalfield from Tamworth to near Wyken, of about 30 sq. m. area. Coal centres are Atherstone, Bedworth, Tamworth, Nuneaton, Coventry, Polesworth, Wyken; stone, hydraulic limestone at New Bilton and Newbold-on-Avon; fireclay at Glascote. Limestone is quarried at Bearley, Stretton, Southam, &c.; freestone, Warwick, Leamington, and Coventry; ironstone at Redworth, Oldbury, &c. The soil is generally good; rich in pasture-land, with fine orchards, and some admirable woodland scenery. For the proportion of permanent pasture and agricultural statistics, see **Appendix,** pp. 7–9. Oxfordshire is connected by canals with the Trent, Mersey, Thames, and Severn; and is traversed in various directions by the L. & NW. R., G.W. R., and M. R., with branches. Manufactures, extremely important (see **Birmingham** and **Coventry**). This county was part of the *Flavia Cæsariensis* of the Romans, who have left many traces of their rule: the three great routes (Watling Street, Fosse and Icknield Way) crossed here, and many camps are shown. Becoming part of the Saxon kingdom of Mercia, the dist. saw much warfare from the 6th to the 10th century. There were no Danish settlements here. During the Cromwellian struggle occurred the battle of Edgehill, sack of Birmingham by Prince Rupert, siege of Coventry, &c. Antiquities—several fine Norman churches, the famous Warwick Castle, and ruins of Kenilworth; other castles and abbeys, &c. This county returns four members to Parliament; it contains four parl. bors., returning ten members, viz., Birmingham, seven; Aston Manor, Coventry, and Warwick with Leamington, each one member. There are six mun. bors. (two of which, Coventry and Birmingham, are cities), and ten market-tns. See **England,** table.

Wasa, Finland. See **Vasa.**

Wasatch, co., U.S., Utah, crossed by 40° N., and bounded on the E. by 110° W.

Wasatch Mountains, U.S., Utah, form the E. wall of the Great Basin, and rise to about 12,000 ft.; one of the chief summits is Mount Nebo, 11,680 ft.

Wasco, co., U.S., Oregon, on the Columbia, crossed by 121° W.

Wascrow Beck, riv., Eng., Durham, flowing E. and S. through the NW. and Barnard Castle divs., trib. of the Wear, which it joins on the l. bk. at Wolsingham.

Wasdale, part of par., Eng., Cumberland, composed of the vale of Wastwater. See **Eskdale and Wasdale.**

Wasdale, Nether, par., Eng., Cumberland, Whitehaven union, 6 m. NE. Ravenglass, P.O. (**Wastdale**); 8574 ac. P. <250.

Washington, par., Eng., Sussex, Chichester div., 7½ m. ENE. Arundel, 4 m. WNW. Steyning stn., P.O. P.<1000.

Washington, isl., Pacific. See **Uahuga.**

Washington, or **New York,** isl., Pacific, in about 4½° N., 128° W.

Washington, a Pacific State of the American Union, admitted 1889, more than twice the size of Ireland, bounded E. by Idaho, separated N. by the 49th parallel from British Columbia, while the Columbia R., after running S. through eastern Washington, turns W. to the Pacific, and forms the chief separation from Oregon to the S. The Cascade Mts. cross the state N. to S. almost centrally, with hardly extinct volcanic peaks and some eight glaciers traversing the dense forests of their plateaux and slopes. E. lie the valleys of the Snake and upper Columbia Rivs. and the Great Plain, furnishing abundant pasture, and now extensively cultivated. Puget Sound converts much of western Washington into a penin., with wooded mountains reaching 8000 ft. S. of the Sound is a well-watered, low-lying region admirably fitted for agriculture. Puget Sound abounds in islands, some of great size, and partly cultivated. It affords many fine harbours. Here are Seattle (P. 43,000), with a large export trade in lumber, wheat, coal, &c., Tacoma, hardly smaller, and little Olympia, the capital. Thick forests of splendid timber encircle the Sound, making the lumbering industry of first importance. The value of the mill products increased from about £350,000 in 1880 to about £2,800,000 in 1890, a sum exceeded by only six states. The 180 m. of Pacific coast offer few harbours, but the enormous coast-line of Puget Sound and its islands is largely available, while the various obstacles to free navigation on the 663 m. of the Columbia R. and 150 m. of the Snake are being gradually removed. The Pacific gives western Washington an equable and moist climate, with a heavy winter rainfall [**Tatoosh, Olympia**]. The E. rainfall is light, with hot, dry summers, necessitating irrigation in places, and short cold winters, giving a high death-rate from respiratory diseases. The proportion of deaths due to diarrhœal diseases is the lowest in any state. Most of the surface rocks are of recent volcanic origin, but aqueous rocks of Miocene age are found around Puget Sound, and yield an important lignitic coal supply near Seattle and at Bellingham Bay, and some bituminous coal elsewhere. The state contains two large Indian reservations, one called the Colville Reservation in the NE., between the Columbia and Okanagan Rivs. and the Canadian frontier, the other, the Yakima Reservation, in the S., between Mount Adams and the Yakima R. Area, 69,180 sq. m. P. (1880) 75,100; (1890) 349,500. See **United States,** table. [**W. S.**]

Washington, cap. city of the United States of America, in the Federal dist. of Columbia, on the Potomac, at the influx of the Anacostia, each here crossed by a bridge, 34 m. SW. Baltimore, 226 m. SW. New York. The site was suggested by General Washington. The city is planned on a grand scale, occupying over 8 sq. m., and is noted for its 'magnificent distances. The avenues and principal streets are 130–160 ft. wide. Public edifices are amongst the most splendid in the Union. The Capitol, on Capitol Hill, 90 ft. above the Potomac, has portico with Corinthian columns; its frontage is now 751 ft. It contains the Senate Chamber and Hall of Representatives, the latter a magnificent chamber 139 ft. in length, the Congress Library, of nearly 700,000 volumes, and Supreme Court of the United States, with law library of 30,000 volumes. The buildings, covering more than 3½ ac., are surrounded by grounds of 50 ac. The Smithsonian Institute, with nine towers 75–150 ft. high, contains a laboratory, library, five museums of natural history and ethnology, and picture gallery. It was founded from funds bequeathed in 1826 by an Englishman, James Smithson, and has been invested with the control of several government establishments, including the National Museum, Zoological Park, and Bureau of Ethnology. Here are the 'White House,' the official residence of the President of the United States, and near it the buildings of the navy and war offices, state, and treasury departments; the General Post-office, of white marble; the National Observatory, on the Potomac (38° 53′ 8″ N., 77° 3′ 1.8″ W. Greenwich), founded 1842; the Patent Office, of marble, its model-room occupying four large halls, total length more than ¼ m.; the bureau of engraving and printing for U.S. paper money and bonds, and the government printing works, from which have issued 1,500,000 volumes in one year; the navy yard (27 ac.), arsenal (45 ac.); port Orchard, government wooden dock, 605 ft. long, now being constructed, not likely to be finished before 1896; the Columbian University, Gonzaga Roman Catholic College, and Howard (coloured) University; the Signal Office, headquarters of the Weather Bureau; Army Medical Museum; Corcoran Gallery of Art; and many charitable institutions. The magnificent monument to General Washington, with a temple at the base, and a shaft 555 ft. high, stands in the centre of a park of 45 ac. The water supply comes from the falls of the Potomac through an aqueduct 12 m. long. The distributing reservoir has a capacity of 300,000,000 gallons. Washington became the seat of the Federal government in 1800. Cemeteries are Oak-hill, National, and Congressional. Mean temp., yr. 55.3° F., Jan. 33.8°, July 78.9°; rfall. (37 yrs.), 38.05 in. P. (1800) 3200; (1820) 13,200; (1840) 23,400; (1870) 109,200; (1890) 230,400. See **Georgetown** and **Columbia.**

Waterfoot, eccles. par., Eng., Lancashire, Rossendale div., with a stn. **Waterfoot** (for Newchurch) on the L. & Y. R., 2 m. WSW. Bacup; cotton, woollen, and slipper manufactures; flags and slate quarried. PMT.O. P. <3000.

Waterfoot, harb., Scot., Dumfriesshire, at mouth of Annan R., 2 m. S. Annan.

Waterford, post-vil., Canada, New Brunswick, co. Kings. P. <1500.

Waterford, maritime co., in the S. of Ire., prov. Munster, between the Atlantic and the riv. Suir, with coast indented by Waterford Harbour, Tramore Bay, with caves and picturesque cliffs, Dungarvan Harbour, a place of refuge, and Youghal Harbour. It is divided into nine baronies, as shown in the following table:—

Baronies.	Acres.	Pop. 1891.
Coshmore and Coshbride .	88,253	13,945
Decies within Drum . .	57,326	9,612
Decies without Drum . .	131,193	21,493
Gaultiere	29,450	8,913
Glenahiry	38,850	5,019
Kilculliheen . . .	2,138	915
Middlethird	44,610	9,919
Upperthird	63,846	7,583
Waterford City . . .	533	20,852
Total . . .	456,198[1]	98,251

[1] Exclusive of 5354 ac. under the larger rivers and tideways.

The surface is generally mountainous, rising in the Old Red Sandstone ranges of W. and NW. to over 2000 ft. Knockmeal-Down, on the N. border, is 2609 ft. high; the mountain ranges between Clonmel and Dungarvan reach 2478 ft. in Knockanarian. In SE. the county is more level, with clay slate strata interrupted by limestone and basalt, and sometimes shows a rocky coast of lofty cliffs. Iron, lead, and copper all occur, but are not worked; slate has been quarried in several places; there are also sandstone and marbles. Waterford Harbour is the joint estuary of the Barrow and Suir, but the Blackwater and Suir are the only rivers properly belonging to this county, the former in the W., the latter along its N. border. The Blackwater is navigable to Cappoquin for vessels of 100 tons, and the Suir for 2000 tons to Waterford, and for boats of 50 tons to Clonmel. Four lines of railway pass from Waterford to Kilkenny, to Limerick by Carrick-on-Suir and Clonmel, to Tramore, and to Lismore by Dungarvan. With much excellent soil in SE., this county is otherwise better suited for pasturage than tillage. There were more than 10 pigs to every 100 ac. For agricultural statistics, see **Appendix,** pp. 10–12. There are important salmon fisheries. There are two members of Parliament for the county (one for E. and one for W. Waterford), and one for the county town. Chief towns—Waterford, Dungarvan, Tramore, Portlaw, and Lismore. The Danes settled here from 9th century, and previously the dist. seems to have been held by a colony of Belgæ; there are many prehistoric remains; round tower at Ardmore, 97 ft., with large rath and ruins of cathedral. John Talbot (1447) was the first Earl of Waterford. The castle of Lismore (founded 1185) is famous, and the ruins of Ardmore cathedral. See abolished in the 12th century. Parl. divs., E. Waterford, P. 33,300; W. Waterford, P. 37,200. See **Ireland,** table.

Waterford, parl. bor. (1 member), city, and seapt., Ire., NE. co. Waterford, bar. Middlethird, 12 m. SW. by S. New Ross, on riv. Suir, on the G. S. & W., Waterford and Limerick, and Waterford, Dungarvan, and Lismore Rlys. A wooden bridge of 39 arches, 832 ft. long, connects the city with its suburb, Ferrybank, on opposite side of river. Has Protestant and Roman Catholic cathedrals, and various public buildings. The Protestant see is united to Cashel, Emly, and Lismore, the Roman Catholic to Lismore. Ring, or Reginald's, Tower, rebuilt in 1819, was first erected in 1008, when it formed part of the city fortifications, and is of extreme archæological interest. Vessels of 2000 tons can discharge at the quays. There are 7000 ft. of quayage, and a depth at pontoons, low water ordinary springs, of 14–22 ft. It is the entrepôt for a large extent of country; has considerable exports, chiefly of live stock and agricultural produce, and it has regular steam communication with various ports in the United Kingdom. Waterford was founded by the Danes about the middle of the 9th century. Here Strongbow landed in 1170, and Henry II. in 1171. It was taken by Ireton in 1650, and by William III. in 1690. Market-days, M., W., Th., and S. Tn. P. (1841) 23,200; (1851) 25,300; (1871) 23,300; (1891) 20,900; parl. bor. P. (1891) 27,700.

Way Stone Edge, upland tract, Eng., on the borders of the Colne Valley and Sowerby divs. of the W. Riding of Yorkshire, about 8 m. SW. Halifax.

Waythe, eccles. par., Eng., Lincolnshire. See **Waithe.**

Wazan, or **Wezzan,** sacred tn., Morocco, 60 m. NW. by N. Fez, on N. slope of Sebu valley, residence of the Grand Sherif, who has the right of investing the sultans of Morocco with their dignity, and is at the head of the powerful and numerous fraternity of Mulai-Taieb. Alt. 1320 ft. P. 10,000.

Waziers, tn., France, dep. Nord, arr. and 2 m. NE. Douai; coal worked. P. <2000.

Wazirábád, tn., Brit. India, Punjab, dist. Gujránwála, 60 m. N. by W. Lahore; houses chiefly of brick; manufacture of small articles of steel and iron. The Chenáb R., 1 m. distant, is spanned opposite Wazirábád by the Alexandra railway bridge, one of the finest in India, opened in 1876 by the Prince of Wales. P. 15,800; Hindus, 4100; Moham. 11,000.

Waziristan, region of E. Afghanistan, comprising the portion of the Suláiman Mts. and the country immediately to the W. from the Kuram valley S. to the Zhob valley.

Weakley, co., U.S., Tennessee, on the N. frontier, E. of 89° W.

Weald. The Weald of Kent, Sussex, and Surrey comprises the area formerly occupied by the Saxon Andreadswald, long a dense forest, between the N. and S. Downs, from near Farnham and Petersfield (Hants) eastward to the sea at Hythe, Rye, and Eastbourne. It is still in part wooded. A highly fertile agricultural region, with only a few small towns.

Weald, PMT.O., Eng., Kent, near Sevenoaks.

Weald, South, par., Eng., Essex, 1½ m. W. Brentwood, PMT.O. (**Southweald**); 4629 ac. P. 5000.

Weald Bassett, North, par., Eng., Essex, 3 m. NE. Epping, with a stn. (**N. Weald**) on the G. E. & N. London Rly. P. <1500.

Weald Gullet, P.O., Eng., 3 m. from Epping, Essex.

Wealdstone, eccles. par., Eng., Middlesex, Harrow on the Hill and Pinner pars., PMT.O. P. <3000.

Wear, riv., Eng., rises in the W. of co. Durham, the centre of which it traverses, flows ESE. to Bishop Auckland, and thence NE. past Durham and Chester-le-Street to the North Sea at Wearmouth; receives on the left the Wascrow and Browney, on the right the Bollihope, Bed, and Gaunless. Lead extensively mined in the upper part of the valley (Weardale). Length, 67 m.; area of basin, 458 sq. m.

Weardale, eccles. par., Eng., Durham, Stanhope ancient par. P. <1500.

Weardley, par., Eng., Yorkshire, W. Riding, 7 m. E. Otley. P. <250.

Weare, par., Eng., Somerset, Wells div., on the Axe, 8½ m. SE. Weston-super-Mare, 2 m. SW. Axbridge stn., P.O. P. <500.

Weare, tn., U.S., New Hampshire, Hillsboro co., 12 m. SW. Concord. P. <2000.

Wear Gifford, par., Eng., Devonshire, S. Molton div., 3 m. SSE. Bideford, 1½ m. N. Torrington stn., P.O. P. <500.

Wearhead, P.O., Eng., Durham, Barnard Castle div., on the Wear, 16 m. SSW. Hexham, 9 m. W. by N. Stanhope stn.

Wear Valley Junction, stn., Eng., Durham, SE. div., on the NE. R., 3 m. WNW. Bishop Auckland.

Weasenham St. Peter and **Weasenham All Saints,** two adjoining pars., Eng., Norfolk, Mid div., the former 16 m. E. King's Lynn, 3 m. SSE. East Rudham stn., P.O. P. (of each) <500.

Weaste (wist), eccles. par., Eng., Lancashire, in the W. div. of Salford, on the L. & NW. R. P. 6100.

Weatherbury, hill, Eng., Dorsetshire, 8½ m. ENE. Dorchester.

Weathercote Cave, cave, Eng., Yorkshire, W. Riding, in Ingleborough Mt., 4 m. NE. Ingleton; has a fine cascade, 70 ft. Length, 60 yards; width, 30 yards.

Weatherford, agricultural city, U.S., Texas, Parker co., 60 m. W. Dallas. Alt. 864 ft. (R.R.). P. <4000.

Weather Hill, mt., Eng., Westmorland, Appleby div., between Hawes Water and Ullswater, 9½ m. SSW. Penrith. Height, 2174 ft.

Weatherly, bor., U.S., Pennsylvania, Carbon co., 32 m. S. by W. Scranton, and 22 m. S. by E. Wilkesbarre. P. <3000.

Weathersfield, tn., U.S., Vermont, Windsor co. P.<1500.

Weaver, riv., Eng., rises in the SW. of Cheshire, flows SE. to near the S. frontier of the county, then N. through the middle of the county past Nantwich, Winsford, and Northwich, and finally NW. into the Mersey. It passes through the most important salt district of England, and has been made navigable to Winsford.

Weaverham, par., Eng., Cheshire, div. and 3 m. W. Northwich, 1½ m. E. Acton Bridge stn.; has brick and tile making. PMT.O. P.<2000.

Weaver Hills, Eng., Staffordshire, in the NE., 9 m. SE. Leek. Alt. 1205 ft.

Weaver's Point, cape, Scot., Inverness-shire, on the E. ct. of N. Uist, in 57° 36½′ N.

Weaverthorpe, par., Eng., Yorkshire, E. Riding, Buckrose div., 11½ m. SSW. Scarborough, 4½ m. S. by E. of its stn. on the NE. R., PM.O. P.<750.

Weaverville, vil., U.S., California, Trinity co., 60 m. E. Eureka; centre of mining and agricultural dist. P.<1500.

Webb, or **Webbville,** city, U.S., Missouri, Jasper co., 46 m. N. by E. of the SW. corner of the state; lead smelted. P. 5000.

Webb, co., U.S., Texas, in the SE., on the Rio Grande (SW. frontier), crossed in the N. by 28° N.

Webber, East and **West,** two small streams, Eng., Devonshire, which flow S. from Dartmoor, and after uniting fall into the Dart.

Webberville, vil., U.S., Michigan, Ingham co., 19 m. SE. Lansing by rail. P.<1500.

Webbe Shebelli ('Leopard River'), riv., E. Africa, flows with a more or less S. course through the Somali country. After rains it becomes a deep and rapid river, with a width in places of about 50 yards, but it dries up a few miles from the coast, within half a degree of the equator.

Webbwood, stn., Canada, prov. Ontario, on the Sault St. Mary line of the C. P. R., 491 m. by rail W. Montreal.

Weber, co., U.S., Utah, between 41° and 42° S.; bounded on the W. by Great Salt Lake.

Weber, riv., U.S., Utah, flows W. into Great Salt Lake through cañons remarkable for scenery; important as affording a route for the Union Pacific Railroad.

Weber Hafen, or **Lutn Bay,** harb., in the N. of the Gazelle Penin., Neu-Pommern, Bismarck Archipelago, crossed by 152° E., 4° 15′ S.

Weberschau, vil., Austria, Bohemia, 38 m. NW. Prague, 9 m. ENE. Saaz. P.<2000.

Webheath, par., Eng., Worcestershire, Droitwich div., 5 m. SE. by E. Bromsgrove, 1½ m. W. Redditch. P.<1500. See **Tardebigg.**

Webi Ganana, stream, Africa. See **Jub.**

Webster, co., U.S., Georgia, crossed in S. by 32° N., and midway between 84° and 85° W.

Webster, co., U.S., Iowa, N. of 42° N., crossed in the E. by 94° W., traversed by the Des Moines R.

Webster, city, U.S., Iowa, Hamilton co., 62 m. N. by W. Des Moines; coal, limestone, and brick clay are found in the vicinity. P.<3000.

Webster, co., U.S., Kentucky, in the SW., crossed by 37½° N. and 87½° W.

Webster, par. (co.), U.S., Louisiana, on the N. frontier, E. of 93½° W.

Webster, tn., U.S., Massachusetts, co. and 16 m. S. by W. Worcester, on French R.; has iron and brass foundries; terminus of the Norwich line of steamers to New York. P. 7000.

Webster, co., U.S., Missouri, N. of 37° N., and crossed in the W. by 93° W.

Webster, co., U.S., Nebraska, on the S. frontier, W. of 98° W.

Webster, vil., U.S., New York, Monroe co., 9 m. ENE. Rochester. P.<1500.

Webster, coal-mining vil., U.S., Pennsylvania, Westmoreland co., 18 m. SW. Greensbury. P.<1500.

Webster, vil., U.S., S. Dakota, Day co., 150 m. ENE. Pierre. P.<1500.

Webster, co., U.S., W. Virginia, N. of 38° N., and W. of 80° W.

Weidenau, vil., Prussia, prov. Westphalia, circle Siegen, 42 m. E. Cologne. P. 6000.

Weiersheim, or **Weyersheim,** vil., Ger., Alsace-Lorraine, circle and 10 m. N. by E. Strassburg. P. <3000.

Weigelsdorf, vil., Prussia, prov. Silesia, circle Reichenbach, 38 m. SSW. Breslau. P. (comm.) <3000.

Weighton, Little, vil., Eng., Yorkshire, E. Riding, Howdenshire div., 7½ m. WNW. Hull, on the Hull and Barnsley Rly.

Weihai, another name for Kiao-chou Harbour, China.

Weihaiwei, Chinese naval station, N. ct. Shantung, about 40 m. E. Chifu, and 30 m. W. the NE. point of the penin., on a bay sheltered on the E. by a small island; taken by the Japanese after the destruction of the Chinese fleet in the harbour, Feb. 2, 1895.

Wei-ho, or **Hwei-ho,** riv., China, rises in SE. of prov. Shansi, flows E. through the N. of Honan, then NE. through Pechili (crossing the NW. of Shantung), and finally joins the Pei-ho at Tientsin; canalised from Linthsing, in 116° E., from which point it forms a portion of the Grand or Imperial Canal.

Wei-ho, riv., China, flows E. through a rich valley in S. of prov. Shensi, bounded on the S. by the Tsinling-shan Range, and joins the Hwang-ho just above Tungkwan, at the point where the latter river makes an abrupt change in its course from S. to E. Chief trib. the King-ho, which joins it from the NW. near Singan-fu. See **China,** Surface (near top of p. 327, column 1).

Wei-hsien, tn., China, prov. Shantung, 47 m. WSW. Laichou-fu; the most important city in Shantung, in the midst of a plain separating the two mountain systems of the prov., on both banks of the Peilang-ho.

Weihwei, tn., China, prov. and 115 m. ENE. Honan, 305 m. SW. by S. Tientsin, on the Hwei-ho.

Weikendorf, vil., Lower Austria, 20 m. NE. by E. Vienna. P. <2000.

Weikersdorf, comm., Lower Austria, 5 m. W. by N. Wiener Neustadt. P. <5000.

Weikersdorf, Gross-, vil., Lower Austria, 25 m. NW. Vienna. P. <2000.

Weikersheim, tn., Ger., in the N. of Würtemberg, 21 m. S. Würzburg; grows superior wine. P. <2000.

Weil, Weilerstadt, or **Weilderstadt,** tn., Ger., kgd. Würtemberg, dist. Leonberg, circle Neckar; is still surrounded with wall and moat; has a monument to Kepler the astronomer (1571–1630), who was born at Magstadt, in the neighbourhood, and is buried here.

Weilburg, vil., Prussia, prov. Hesse-Nassau, on the Lahn, circle Oberlahn, 21 m. WSW. Giessen. P. (1825) 2000; (1890) <4000.

Weiler, vil., Ger., Alsace-Lorraine, on the Thur R., circle Thann, 14 m. NW. by W. Mülhausen. P. <3000.

Weiler bei Bine, vil., Prussia, Rhine Prov., circle and 9 m. N. Kreuznach. P. (comm.) <3000.

Weilheim, tn., Ger., kgd. Bavaria, govt. Upper Bavaria, circle Weilheim, 29 m. SW. Munich. Alt. 1850 ft. P. <4000.

Weilheim, tn., Ger., kgd. Würtemberg, circle of the Danube, dist. Kirchheim, 20 m. SE. by E. Stuttgart. P. <4000.

Weimar, tn., Ger., cap. of the gd.-duchy of Saxe-Weimar, occupies a very agreeable situation on the Ilm, 50 m. WSW. Leipzig, and 13 m. E. Erfurt. It owes its fame to the enlightenment of Duke Karl August, who in the end of the 18th century gathered round him here the greatest literary geniuses of Germany, and further made Goethe his minister and friend. The most notable edifice is the ducal palace, built, after a fire in 1774, under the supervision of Goethe, between the years 1750 and 1803. Other buildings are Goethe's Garden House, the Red Palace (1574), Yellow Palace, Green Palace (containing the library of 180,000 vols.), the Princes House, theatre (restored 1825, and again 1868), &c.; the dwelling-houses of Goethe (since 1886 the Goethe-Schiller Museum), Schiller, Wieland, Herder, and Lucas Cranach (painter); monuments to Duke Karl August (1825 and 1875), Goethe and Schiller (1857), Wieland, and Herder; the parish church, containing the tombs of Duke Bernhard of Saxe-Weimar, the Elector John the Magnanimous, and an altar-piece by Cranach; tombs of Cranach the Elder, Musaeus, the dukes of Saxe-Weimar, Goethe and and Schiller. Between the years 1848 and 1866 the celebrated musician, Abbé Liszt, frequently resided at Weimar, and in some sort revived something of the departed glories of the cultured little capital. Weimar is the seat of various industries in iron, straw, and wood; of a geographical institute, large orphanages, and some technical schools; and has an active trade in live stock, wool, and onions. The town dates from the 9th century, and belonged down to the 15th to different noble houses; in the end of that century it fell to the Ernestine line of the ducal house of Saxony. Alt. 696 ft. P. (1782) 7000; (1834) 10,600; (1890) 24,500.

Weimar, tn., U.S., Texas, Colorado co., 102 m. W. Houston by rail. P. <1500.

Weina, small riv., Prussia, provs. Posen and Silesia, winds on the whole westwards through several lakes, and enters the Warthe 24 m. below Posen; not navigable.

Weinberg, mt., Austria, Bohemia, in the W., 15 m. NW. by W. Pilsen.

Weinberge, tn., Austria. See **Prague.**

Weinfelden, tn., Switzd., Thurgau, 7 m. SSW. Constance (Baden). P. (comm.) <4000.

Weingarten, comm., Ger., gd.-duchy of Baden, circle Karlsruhe, 5 m. NNE. Durlach. P. <4000.

Weingarten, tn., Ger., kgd. Würtemberg, 43 m. SSW. Ulm, circle of the Danube, dist. and 2 m. NE. Ravensburg. The abbey church (built 1724) contains a great organ, and is the scene of an annual ceremony connected with religious relics. Alt. 1590 ft. P. 5600.

Weinheim, urban comm., Ger., gd.-duchy of Baden, circle and 10½ m. ENE. Mannheim; has tanneries, and manufacture of patent leather, gun-stocks, chairs, &c.; was taken by the Spaniards in 1621, and destroyed by the French in 1688. P. 8200.

Weining-chou, tn., China, in the W. of Kweichou, 125 m. W. by N. Kweiyang-fu.

Weinitz, vil., Austria, Carniola, 40 m. E. by N. Fiume. P. <2000.

Weinsberg, tn., Ger., kgd. Würtemberg, circle Neckar, dist. Weinsberg, 26 m. N. by E. Stuttgart, 3 m. ENE. Heilbronn. Above the town are the ruins of the Castle Weibertreu (women's

fidelity), famous in tradition, and taken by the peasants in 1525. Birthplace of the reformer Oecolampadius (1482). Has a magnetic medical establishment. P.<3000.

Hampden, in five successive parliaments, represented the bor., which was disfranchised by the Reform Act of 1832. PMT.O. 5788 ac. P. <2500.

Wendron, par., Eng., Cornwall, Truro div., on the riv. Hel, 8 m. W. by S. Falmouth, 2½ m. NNE. Helston; it has tinmines. 13,259 ac. P. <4500.

Wends, Slav race, formerly spread over most of the terr. lying between the Elbe and the Oder, from Bohemia northwards

to Mecklenburg. They are now greatly dwindled in numbers (167,000), and chiefly confined to Lusatia, a dist. between Brandenburg, Saxony, and Silesia, or rather these people are (Slavic) Sorbs and Liutizes, who have adopted the Wendish language, and to some extent Wendish customs and costumes. In the stricter sense the Wends are identified with the Veneti of the Latin writers; in the wider, the name comprehends all the N. Slav tribes. See also **Kassases.**

Wenduyne, comm., Belgium, prov. W. Flanders, on the coast, arr. and 9 m. NW. Bruges. P. <2000.

Wendy, par., Eng., Cambridgeshire, Chesterton div., 10½ m. SW. by W. Cambridge, 3½ m. WNW. Meldreth and Melbourn stn., P.O. P. <250; eccles. par. (**W. with Shingay**) P. <250.

Wener, Swedish **Venern,** lake, Sweden, in 59° N., 13° E., enclosed by the provs. Elfsborg, Skaraborg, and Wermland. Length, 90 m.; breadth, 15 to 48 m. near its centre, where two penins. extend into it from N. and S., and, with a group of islands, nearly separate it into Wener Lake, NE., and Dalbo Lake, SW. Area, 2144 sq. m.; alt. 143 ft.; depth, 292 ft. Shores greatly indented; it receives numerous rivers, the principal of which is the Klar from the N., and it discharges its surplus waters by the Göta (SW.) into the Kattegat. It is in some parts too shallow for navigation, and is connected by a canal with Lake Wetter on the E., by which, and the Göta Canal, Lake Roxen, &c., a continuous line of inland communication extends between the Kattegat and the Baltic Sea.

Wenersborg, tn., Sweden. See **Venersborg.**

Wengern, vil., Prussia, prov. Westphalia, circle and 10 m. WNW. Hagen. P. (comm.) <3000.

Wengernalp, alp or mountain pasture, Switzd., Bern, in Lauterbrunnen comm., between the valleys of Lauterbrunnen and Grindelwald, which have been connected since 1892 by a mountain rack railway. Alt. 6185 ft.

Wenham, vil., U.S., Massachusetts, Essex co., 5 m. N. Salem. Wenham Lake is celebrated for the great purity of its ice, which is largely shipped; it is about 1 m. sq., and 200 ft. deep. P. <1500.

Wenham, Great and **Little,** two adjoining pars., Eng., Suffolk, Woodbridge div., the former 7 m. SW. by W. Ipswich, 2 m. W. by S. Capel stn., P.O. (**Great Wenham**). P. (of each) <250. See **Capel.**

Wenhaston, par., Eng., Suffolk, div. and 2½ m. SE. Halesworth, on the Southwold Rly., P.O. P. <1000; eccles. par. (**Wenhaston with Mells**) P. <1000.

Wenhiang, tn., China, prov. Honan, on the r. bk. of the Hwang-ho, 280 m. N. by W. Ichang, 103 m. W. Honan.

Wen-ho, or **Yunting,** another name of Hun-ho R., N. China.

Wenigenjena-Camsdorf, vil., Ger., gd.-duchy Saxe-Weimar, circle and 9½ m. ESE. Weimar. P. <3000.

Wenju, tn., Korea. See **Wönju.**

Wen-kiang, riv., China. See **Wang-kiang.**

Wenlock, mun. bor. (since Edward IV.), Eng., Shropshire, Mid and S. divs. (comprising three market-tns., Much Wenlock, 12 m. SE. Shrewsbury, Madeley, and Ironbridge, also Broseley, Coalport, and Coalbrookdale), in the diocese of Hereford, with stns. on the G. W. and L. & NW. Rlys. Important agricultural dist.; extensive limestone quarries; bricks and tiles made at Broseley; large iron-works at Madeley (*q.v.*) and Coalbrookdale. Till 1885 Wenlock returned two members to Parliament. Market-day, M. P. (1891) 15,700; par. **Much Wenlock,** 8761 ac., P. <2500.

Werl, tn., Prussia, prov. Westphalia, circle Soest, 31 m. SSE. Münster, and 20 m. E. by N. Dortmund. P. <5000.

Wermelskirchen, tn., Prussia, Rhine Prov., circle Lennep, 8½ m. SSE. Elberfeld; manufactures of cotton, silk ribbons, and many other articles. P. (comm.) 11,800.

Wern, riv., Ger., in the N. of Bavaria, flows S. then W. into the Main, which it enters 18 m. NW. by N. Würzburg; not navigable.

Werne, par. and tn., Prussia, prov. Westphalia, on riv. Lippe, circle Lüdinghausen, 20 m. S. Münster. P. <3000.

Werne, vil., Prussia, prov. Westphalia, circle Bochum. P. (comm.) 7000.

Wernerheide, colony, Prussia, prov. Westphalia, circle Bochum, near Werne. P. <3000.

Werneth, par., Eng., Cheshire, union and 4 m. NE. Stockport, on the L. & Y. R.; manufactures of cotton and hat-making. P. <3000.

Werneth, eccles. par., Eng., Lancashire, on the L. & Y. R. P. 11,500. See **Oldham.**

Wernеuchen, tn., Prussia, prov. Brandenburg, circle Ober-Barnim, 5 m. ENE. Berlin. P. <2000.

Wernigerode, tn., Prussia, prov. Saxony, 12½ m. WSW. Halberstadt, cap. circle Wernigerode; manufactures agricultural machinery, and has iron-founding. P. (1816) <4000; (1890) 10,000.

Wernstadt, tn., Austria, Bohemia, 21 m. E. Teplitz; manufactures cottons and laces. P. <3000.

Werra, riv., Ger., one of the headwaters of the Weser, rises in the SW. of the Thuringian Forest, and flows on the whole NW., passing Meiningen to Münden, where it unites with the Fulda; navigable from Wanfried, 42 m.

Werracknabeal, Victoria. See **Warracknabeal.**

Werragebirge, a mt. complex on the borders of the Prussian provs. of Hesse-Nassau, Hanover, and Saxony, on both sides of the riv. Werra. Highest points, Meissner (2460 ft.), Bilstein (2100 ft.), Koburg (1757 ft.), and Boyneburg (1680 ft.).

Werre, riv., Ger., a l. bk. trib. of the Weser, rises in the Teutoburger Wald, and falls into the Weser near Rehme. Length, 61 m.

Werribee, or **Wyndham,** vil., Victoria, Grant co., 23 m. NE. Geelong. P. <1500.

Werrington, par., Eng., Devonshire, Tavistock div., 2 m. N. Launceston; 5305 ac. P. <750.

Werrington, par., Eng., N. div. of Northamptonshire, 3 m. NNW. and in the Soke of Peterborough, 1 m. N. Walton stn., P.O. P. <750.

Werrington, P.O., Eng., Staffordshire, 3 m. from Bucknall.

Werrington River, small riv., Eng., Cornwall, flows ESE. to the Tamar, for the greater part of its course on the border of Cornwall and Devon.

Werris Creek, vil., New South Wales, Buckland co., 84 m. SW. Armidale. P. <1500.

Werro, dist. tn., Russia, govt. Livonia, 122 m. NE. Riga, 39 m. S. by E. of Dorpat, on Woo R.; ruins of old castle Kirumpäh close by. P. <5000.

Werschetz, German spelling of **Versecz,** Hungary, having the same pronunciation.

Wertach, riv., Ger., in SW. of Bavaria, flows NNE. into the Lech just below Augsburg; not navigable, but used for floating timber from Pforzen, 40 m.

Werth, in German place-names. See *Worth.*

Wertheim, urban comm., Ger., Baden, on the l. bk. of the Main, 17 m. W. by S. Würzburg. P. <4000.

Werunda, co., New South Wales, bounded on the NW. by the Darling R., and crossed in the S. by 32° S.

Wervin, par., Eng., Cheshire, Eddisbury div., 3 m. NNE. Chester, on the Ellesmere Canal. P. <250.

Werwick, or **Vervicq,** comm., Belgium, prov. W. Flanders, on the l. bk. of the Lys, arr. and 9 m. SE. by E. Ypres; has various manufactures. P. 7400.

Wesel, fortified tn., Prussia, Rhine Prov., circle Rees, on the r. bk. of the Rhine, at the confluence of the Lippe, 22 m. NW. Essen; manufactures pianos, cards, art fabrics, soap, money-chests, sheet-lead, and leaden piping, &c. The fortifications of the town were demolished in 1890, but there still remain a citadel and four forts, one of which, Fort Blucher, is on the l. bk. of the Rhine. Wesel existed in the time of Charles Martel, and belonged to the duchy of Kleve; it was often besieged during the 16th and 17th centuries. P. (1816) 11,000; (1890) 17,900; comm. P. 20,700.

Wesell, vil., Austria, Bohemia, on riv. Luznitz, 18 m. NE. by N. Budweis. P. <2000.

Wesen, tn., Switzd., cant. St. Gall, at the foot of Lake Walenstadt, 7 m. N. by E. Glarus. P. <2000.

Wesenberg, ancient *Rakobor,* dist. tn., Russia, govt. Esthonia, 68 m. SE. Reval; founded by Danes in 1224; ruined by wars. Mean rfall. (10 yrs.), yr. 20.3 in., May–Oct. 14.2 in. P. <5000.

Weser, riv., Prussia, is formed by the confluence of the Werra (*q.v.*) and the Fulda (*q.v.*) at Münden, 10 m. NE. Kassel, at an alt. of 395 ft. Its general course is N., inclining to W. It separates Hesse-Nassau and Westphalia from Hanover and Brunswick, crosses outlying portions of these several provs., traverses Hanover and Bremen, and finally separates Hanover from Oldenburg. Above Minden (NE. corner Westphalia) after flowing W. by N. in a valley to the S. of the Weser-gebirge, it turns N. and quits the hilly country by the Westphalian Gate (*q.v.*) and enters the great plain of N. Germany. A few miles below Bremen (160 ft.) the river widens greatly, and eventually reaches the sea by two mouths at Bremerhaven, a noble stream 7 m. wide. The portion from Bremen to Bremerhaven (70 m.) is of the greatest importance from the commercial point of view. Since 1886 the town of Bremen has deepened the channel to 16½ ft., and otherwise improved it. The river is navigable up to Rotenburg (just S. of 51° N.) on the Fulda, and to Wannfried (51° 11′ N.) on the Werra; but from Bremen up to Hameln (where there is a lock) the minimum depth is only 3½ ft., and in summer boats (200 tons) can scarcely get beyond Hameln. Length 280 m., or including the course of the Werra 450 m.; area of basin, 1850 sq. m. Principal tribs., the Aller (right) and the navigable Hunte (left). Canals connect the Weser with the Elbe and the Ems.

Weser, riv., Prussia. See **Vesdre.**

Weser-gebirge, hill-ridge, Ger. See **Westphalian Gate.**

Wesham, vil., Eng., Lancashire, div. and 7½ m. E. by S. Blackpool, ½ m. N. Kirkham stn., PMT.O. See **Medlar. Wesham Row,** 1 m. W.

Westerloo, comm., Belgium, prov. Antwerp, arr. Turnhout; iron-mining and tanning. P.<4000.

Westerly, seapt. tn., U.S., Rhode Island, Washington co., on Pawcatuck R., 27 m. WSW. Newport; has granite quarries. P. 6800.

Western, Great, postal-vil., Victoria, Borung co., 10 m. N. by W. Ararat. P.<1500.

Western Australia, colony, Australia, occupying all the country W. of 129° E., divided into six dists.: South-West, Gascoyne, North-West, Kimberley, Eucla, and Eastern, with a total area about twelve times that of Great Britain. Coast-line about 3500 m., with several large bays but few good harbours, the principal being King George's Sound, Shark's Bay, King Sound, and Cambridge Gulf. Off the coast are numerous small islands (chief, Dirk Hartog and Rottnest) and extensive coral reefs. A marked difference is observed in the rise and fall of the tides on different parts of the coast; S. of Shark's Bay it is unimportant, while in the NW. it rises to over 30 ft., and in King Sound to 46 ft. The **surface,** so far as known, consists mainly of a vast plateau (1000–2000 ft.), from which rise, near the W. ct., mountain or hill ranges with a generally N. and S. (or SE.) trend. In the interior the country is nearly level or traversed by low ridges and with vast sandy deserts. The principal ranges are the Darling (elevation about 1500 ft.), in SW., running N. and S. for about 300 m.; Stirling, near S. ct., with Mount Kyenrup (3500 ft.), the highest point in the settled part of the colony; Roe, with Mount William (3000 ft.); Blackwood (2000 ft.), &c.; in the NW. is the Hammersley and in the N. the King Leopold Range. It is believed that higher summits than the above exist in the northern interior. **Principal rivers,** N., Ord; NW., Fitzroy, De Grey, Fortescue, and Ashburton; W., Gascoyne, Murchison, Swan, Murray, and Blackwood. The Fitzroy is the most important river in the country, navigable for 200 m. during part of the year; the other rivers are mainly storm-water channels, unnavigable except (in some cases) for a few miles at the mouth. W. of the Darling Range are several shallow lakes, and on the plateau are many large depressions, or salt-clay flats, in which the rain is collected, but much of this is evaporated. As regards **geological structure,** sandstone covers the greater part, broken through by belts of granite and schistose rocks, on which lie the principal gold-fields; in the SW. Mesozoic rocks crop out, and in the S. they form the cliffs of the Great Australian Bight. Tertiary deposits occur around Shark's Bay, and Car-

boniferous formations in the Collie and Irwin Rivs., N. of the latter to the Fortescue R., and in Kimberley dist. **Forests** cover immense areas. According to Von Mueller, the extra tropical forests alone are equal in area to Great Britain. Eucalypts predominate, as in other parts of Australia, and many of the trees are of great size. Amongst the more important are the karri and jarrah, the latter specially valuable on account of its power of resisting the teredo and the white ant; others are the tuart or white gum, sandal-wood, &c. Large areas suitable for pasture have been discovered, as the rich grass plains along the Fitzroy, tracts of grass and salt-bush E. of the head of the Gascoyne, and others in the S. and SW. The presence of poisonous plants in many pastoral dists. has in several instances proved very injurious to cattle, but these plants are now being destroyed. **Climate** tropical in N. and NW. [**Derby, Cossack**]. More moderate in the SW., where the mean annual temp. decreases very gradually from 65.5° F. near 28° S. to 58.6° F. in about 35° S. [**Geraldton, Perth, Fremantle, Bunbury, Albany**]. In the N. and NW., which lies within the monsoon region, heavy rains occur in summer, and in the NW. occasionally severe hurricanes; in the SW. the rain is brought by the NW. winds in winter (May–Oct.), and the rest of the year is dry. Along the coast S. of Fremantle the rainfall is about 40 in., but it decreases rapidly inland, being barely 20 in. on the plateau 50 m. from the coast, while in the interior it is quite uncertain. **Wool** is the most important product. The area under the plough is very limited; the principal cereal is wheat. Fruits of various kinds grow luxuriantly, and the cultivation of the vine is extending. The **pearl-fisheries** of Shark's Bay and the NW. ct. are important; considerable deposits of guano occur on Houtman's and the Lacapede Is., and tortoise-shell is obtained from a species of turtle on the islands. Until within the last eight or ten years, Western Australia was supposed to be very poor as to **minerals,** but the gold and other discoveries since made point to the existence of considerable mineral wealth. The principal goldfields are Coolgardie, Yilgarn, Murchison, Pilbarra, Kimberley, and Dundas; iron, both magnetite and hematite, is so abundant, that it is said seriously to affect the use of the compass; tin (stream) is found in the Blackwood R. and in Roebourne dist.; copper and galena also occur in the latter dist. and in other parts; coal is found in the Irwin and Collie valleys and near Wyndham, &c., but little has been done in working it. Want of water has proved a serious hindrance to the development of the goldfields, but the matter has been taken up by government, and measures for the supply of Coolgardie dist. are projected. **Railways** are at present limited to the SW. settled part of the colony; a line from York to the S. Australian frontier at Eucla is proposed. The principal **exports** are gold and wool; others are pearl and pearl-shell, timber and sandal-wood, &c. There is a small military volunteer force. **Education** is provided for in elementary and assisted schools, under the supervision of a Central Board, the elementary schools being immediately controlled by local Boards. As to government, see **British Empire, The.** The first occupation of terr. belonging to the colony took place in 1826, when Major Lockyer with a party of convicts formed a settlement at Albany, on King George's Sound; further settlements were made soon after, but for a long time little progress was made, and the need for labour was so much felt that the colonists applied for convicts, several thousands of whom were sent out between 1850 and 1868. The mineral and other discoveries of recent years have given a great impetus to the growth of the colony, which was granted responsible government in 1890. Area, 1,060,000 sq. m. P. (1891) 49,800. See **Australia, Australian Colonies,** and **British Empire, The.** [**E. J. H.**]

Western Islands. See **Hebrides.**

Western Port, vil., U.S., Maryland, Allegany co., 27 m. SE. by E. of the NW. corner of the state; rich coal-mines in the vicinity. P. <2000.

Western Port Bay, Victoria, crossed by 145° 11′ E., contains Phillip, French, and other islands; discovered by Bass in 1798.

Western Springs, vil., U.S., Illinois, Cook co., 1 m. by rail E. Hinsdale, and 16 m. W. of Chicago; a settlement of the Society of Friends; has a mineral spring. P. <1500.

Westerton, par., Eng., Durham, div. and 2 m. ENE. Bishop Auckland, ½ m. NE. Coundon stn. P. <500.

Westervik, tn., Sweden, prov. and 75 m. N. Kalmar. P. 6900.

Westerville, vil., U.S., Ohio, Franklin co., 12 m. N. by E. Columbus. Westerville is the seat of the Otterbein University. P. <1500.

Westervoort, vil., Holland, prov. Gelderland, on the IJssel, 3 m. SE. by E. Arnhem. P. <2000.

Westerwald, section of the **Schiefergebirge** (*q.v.*) of Prussia, almost entirely in the prov. Hesse-Nassau, and surrounded by the Rhine (SW.) and its tribs., the Sieg and the Lahn. General alt. 2000 ft.; highest peaks, Saalberg, Fuchskanten, and Stegskopf (2145–2155 ft.). The dist. slopes gradually S., where it terminates in the **Siebengebirge** (*q.v.*), but has steep descents in the N. and E. Iron, anthracite, and manganese underneath, and forests and pasturage above ground, with fruit and wine in the valleys, constitute the principal products of the region.

Westfalen, prov., Prussia. See **Westphalia.**

West Indies (*Antillia*, or *Antilles*), archipelago of islands which extend from the Gulf of Florida to the Gulf of Paria, between 10° and 27° N., 60° and 85° W., bounded on N. and E. by the Atlantic, and on the S. by the Caribbean Sea, which separates them from the N. ct. of S. America. The group of larger islands on the W., comprising Cuba, Jamaica, Haiti, and Porto Rico, is called the Greater Antilles, those on the N., stretching towards Florida, the Bahamas, and all the islands to the E. and S. of Porto Rico, comprising the Leeward and Windward Is. (officially so called, see **Leeward Islands**) with their sub-groups, together with Trinidad and other islands off the coast of Venezuela, are comprehended under the name of the Lesser Antilles. The Bermudas are not properly West India islands, although they were officially considered as such till 1834. The following table shows by whom the islands were first occupied, the date of occupation, and the countries to which they now belong:—

Belong to	Islands.	First occupied by	Year.
Great Britain	Jamaica	Spaniards in	1509
	Caymans	...	...
	Bahamas	English in	1629
	Virgin Islands	Dutch in	1648
	Trinidad	Spaniards in	1532
	Tobago	Dutch in	1632
	Grenada	French in	1650
	Grenadines	...	...
	St. Vincent	English in	1722
	Barbados	English in	1624
	St. Lucia	France	1653
	Dominica	French in	1610
	Antigua	English in	1632
	Montserrat	,,	1632
	Barbuda	,,	1632
	Nevis and Redonda	,,	1628
	St. Christopher	,,	1625
	Anguilla	,,	1640
Spain	Cuba and Isle of Pines	Spaniards in	1511
	Porto Rico	,,	1510
France	Martinique	French in	1635
	Guadeloupe	,,	1635
	Desirade	,,	1635
	Marie Galante	,,	1635
	Les Saintes	,,	...
Denmark	St. Thomas	Dutch in	1657
	St. John	,,	1717
	Santa Cruz	Dutch in	1643
Netherlands	St. Martin	Spaniards in	1643
	St. Eustatius	,,	1643
	Saba	,,	1643
	Curaçao	,,	1643
	Oruba	,,	...
	Buen Ayre	,,	...
Sweden	St. Bartholomew	French in	1648
Venezuela	Margarita, Tortuga, Los Siete Hermanos	,,	1635
Independent	Haiti	Spaniards in	1493

Many of the islands are of volcanic origin. Climate of the whole tropical, but modified by the surrounding ocean and the elevated surface of many of the islands. The more important industries are the production of sugar, molasses, and rum, the cultivation of coffee, cacao, the lime, bananas, pine-apples, oranges, yams, sweet potatoes, arrow-root, cassava, ground-nuts, tobacco, spices (nutmegs, ginger, black pepper, mace, cloves, cinnamon, vanilla, &c.); while efforts are being made to extend the cultivation of henequen. Subsidiary industries are fishing, and the rearing of ponies, cattle, small stock, and poultry. Columbus landed on Watling I., Bahama group, in October 1492; and the archipelago, under the erroneous impression at the time of discovery that it formed part of Asia, was called the West Indies. The history of the West India islands 'from the period of their discovery in 1492 till 1816, presents little more than a melancholy series of calamities and crimes. The islands have been laid waste by hurricanes, and visited by pestilence; but the sufferings which have arisen from natural causes are few and trifling in comparison with those which moral and political circumstances have produced.' Among these may be classed the annihilation of the Indians, the introduction of slavery, the atrocities of the buccaneers, and international wars. [Particular descriptions are given under the heads of the various islands.] Slavery was abolished in the Dutch West Indies, July 1, 1863. Total area of the archipelago, 94,822 sq. m. P. 4,194,700.

West Lake, vil., Canada, Ontario, Prince Edward co., 9½ m. from Pictou. P. <1500.

Westland, co., New Zealand, South I., on the NW. ct., crossed by 43° and 44° S.

Westland, prov., New Zealand, in the W. of South I.

Westmeath, inland co., Ire., prov. Leinster, mainly in the Shannon basin, except towards the E. border, which is drained by streams flowing to the riv. Boyne and the Irish Sea, divided into twelve bars., as shown in the following table:—

Baronies.	Acres.	Pop. 1891.
Brawny	10,099	4927
Clonlonan	32,099	5571
Corkaree	23,870	3114
Delvin	39,062	4381
Farbill	35,447	4926
Fartullagh	37,552	4003
Fore	49,082	6757
Kilkenny, West	31,173	4602
Moyashel and Magheradernon	40,604	10,114
Moycashel	47,067	6573
Moygoish	39,599	4816
Rathconrath	48,363	5325
Total, Westmeath	434,017[1]	65,109

[1] Exclusive of 19,436 ac. under the larger rivers and lakes.

Geologically the county is part of the central limestone plain, with some sandstone heights cropping up near Ballymahon and at Moat-a-Genogue. It is nowhere mountainous, but is so varied with heights and valleys as to offer much agreeable scenery. Nearly one-seventh of the area is bog. There are some good limestone quarries, and small quantities of marble, copper, and lead have been found. The large lakes, Derravaragh, Owel, Ennel, Lene, &c., with parts of Lough Sheelin in the NE. and Lough Ree in the SW., occupy altogether 17,000 ac. Lough Lene is notable from supplying the riv. Inny with an affluent, which therefore flows towards Lough Ree in the W., while supplying another river, the Dale, which flows to the Boyne and the Irish Sea. The Royal Canal traverses this county. It is also served by the M. & G. W. R. system. The staple occupations are tillage and pasturage. For agricultural statistics, see **Appendix,** pp. 10–12. Manufactures flour and meal; some frieze, flannel, and linen. As part of the kingdom of Meath, this dist. suffered much from the Danes, 10th and 11th centuries. On the English taking possession of Leinster, Hugh de Lacy obtained 800,000 ac. The name of the county dates from Henry VIII. The county contains several important raths and ruins of an abbey (1236), with tower 93 ft. high. Chief towns, Athlone (one half being in county Roscommon) and Mullingar, an important railway junction, with Roman Catholic cathedral. The county returns two members to the House of Commons. See **Ireland,** table.

Westmoreland, co., U.S., Virginia, on the Potomac, E. of 77° W.

Westmorland, co., Canada, in the extreme SE. of New Brunswick.

Westmorland, co., in the NW. of Eng., entirely inland except at the mouth of the Kent, in Morecambe Bay. It lies nearly all to W. of the Pennine Range, the chief part, in N., being drained by the Eden and its tribs., flowing to the Solway Firth; and a smaller part, in S., by the Kent, flowing to Morecambe Bay, and by the Lune and the Leven. Part of the upper Tees valley belongs to NE. The county is named from the *moors* on *west* of Durham and Yorkshire, a wild dist. where rise Dufton Fell (2591 ft.), Dun Fell (2780 ft.), Mickle Fell (2591 ft.), and others all over 2000 ft. Another area belongs to the 'Lake District,' with its many 'fells,' Helvellyn (3118 ft.), Bow Fell (2959 ft.), &c. Most of the Vale of Eden is above the 500 ft. level, while the Kendal area of undulating lowlands is mainly below that limit. This, the most mountainous county of Eng., consists largely of Carboniferous strata on the Yorkshire border, Silurian as far as Ambleside, and towards Cumberland of mica and chlorite rocks, with some whinstone and granite. There are many 'faults' traversing the dist. Coal occurs in the Carboniferous rocks, and is mined to a small extent at Brough, but is of inferior quality. There are excellent fireclays at Argill, but not yet worked. Barytes is mined at Appleby and Barras, iron ore at Brough, lead ore at Appleby and Patterdale, and green slate is quarried at Elterwater, Troutbeck, and Ambleside. Gypsum is worked at Kirkby and Sowerby. Much of this county was formerly held by 'statesmen,' small farmers owning the land they occupied. For agricultural statistics, see **Appendix,** pp. 7–9. Manufactures of woollen goods, gunpowder, paper, and boots in and about Kendal. The county is traversed from S. to N. by the main lines of the L. & NW. R. (ascending the valley of the Kent and crossing Shap Fell) and the M. R. (descending the valley of the Eden), and is entered from the E. by a branch of the NE. R., which forks at Kirkby Stephen and joins the L. & NW. R. at Tebay and Clifton. Antiquities: circular earthworks, barrows, stone circles; also Roman remains; some of the churches and castles show Norman architecture. The county contains 109 pars., and is in the diocese of Carlisle; chief towns, Kendal, Appleby, Ambleside, Windermere, Kirkby Lonsdale, Bowness. N. or Appleby div. 352,008 ac., P. (1891) 31,176; S. or Kendal div. 148,898 ac., P. (1891) 34,922; total (ancient and administrative county) 500,906 ac., P. 66,098. See **England,** table.

Westphalia (German **Westfalen**), prov., Prussia, lying between Hanover and Lippe (N.), Brunswick, Waldeck, and the prov. Hesse-Nassau (E.), Rhenish Prussia and the Netherlands (W.), with an area of 7799 sq. m., nearly the same surface area as Yorkshire and Lancashire together. The S. half of the prov. is mountainous, being diversified by the Schiefergebirge and the hills of Sauerland (Kahler Astenberg in the Rothhaargebirge, 2720 ft.). Farther N. the prov. includes part of the Ruhrkohlengebirge (mountains of the Ruhr coalfield), and in the NE. the Eggegebirge (1520 ft.), Teutoburger Wald, and Weser- and Wiehen-gebirge. On each side of the Teutoburger Wald (1500–1750 ft.) lie portions of the great plain of N. Germany; on the SW. the wide 'bay' of Münster, which penetrates SE. to the sources of the Ems and Lippe; on the NE. the valleys of the Weser and the Werre. Considerable portions of the Münster 'bay' consist of dry sand and marshland of no fertility. In addition to the rivers named, Westphalia contains the upper courses of the Diemel (to Weser) and Werse (to Ems); of the Lippe, Ruhr (with the Lenne), Lahn, and Sieg (all four to the Rhine); of the Vechte, with the Dinkel (to the Zuider Zee), and of the Berkel (to the IJssel). Climate temperate, but severe in the S. uplands; yearly mean, in the lowlands (Münster), 48.8° F.; in Sauerland, 41°; rfall., 25 in. in the lowlands, 39 in. in the mountainous dists. of the S. About 42⅔ per cent. of the prov. is under cultivation, 25 per cent. covered with meadows and grass, and 28 per cent. with forests (notably in the Schiefergebirge). Peasant proprietors own, in farms between 15 and 150 ac., some 57 per cent. of the land in private possession. Flax and hemp are grown in addition to the usual cereals. But the principal wealth of the prov. consists in her minerals, especially coal and iron; the former in the Ruhr coalfield and around Ibbenbüren in the N., the latter in the Schiefergebirge and the Ruhr coalfield. Besides these, zinc, copper, lead, quicksilver, sulphuric acid, salt, &c., are all extracted. There are mineral springs at Schwelm, Lippspringe, Oeynhausen, and Driburg. Various metal industries (iron and steel, brass and bronze, tin and britannia metal, needles and wire) are carried on on a very extensive scale in the W.; *e.g.*, in Dortmund, Hagen, Bochum, Iserlohn, Altena, and Lüdenscheid. Towards the NE., around Bielefeld, Herford, Wasendorf, &c., is one of the principal linen manufacturing dists. of Germany; and in the same region extensive bleaching-grounds. Cotton and pottery are manufactured in the W., coarse papers in Sauerland, glass in the E. and in the Ruhr coalfield dists., and leather in the S. around Siegen. Bielefeld, Dortmund, and Iserlohn are the chief trading centres. The Weser, Ems, Ruhr, and Lippe are all navigable, and the prov. is well equipped with good roads and railways. The people are of Saxon (*i.e.*, Low German) race, and speak Low German (*Platt Deutsch*). There is an academy at Münster with two faculties. Westphalia is divided into three administrative divs.: Münster, Minden, and Arnsberg; has Münster for its cap.; and sends seventeen members to the Reichstag, and thirty-one to the Prussian House of Representatives. This prov. was formed in 1815 out of the ancient duchy of Westphalia (itself separated out from the still more ancient dukedom of Saxony in the end of the 12th century), the bishoprics of Münster, Paderborn, and Minden, the abbacies of Herford and Corvey (near Höxter), the principality of Siegen, and various countships. P. (1871) 1,775,000; (1890) 2,205,000, of whom 1,036,000 are Protestants, 1,146,000 Roman Catholics, and 19,000 Jews.

Westphalian Gate (Westfälische Pforte), the gap or notch 3 m. S. Minden, Prussia, by which the Weser breaks through the well-marked ridge forming the N. limit of the hilly country which separates the plains of Westphalia and Hanover, and is limited S. by the Teutoburg Forest ridge. W. of the gap the ridge is known as the Wiehen-gebirge, at the E. end of which the Wittekindsberg (930 ft.), on which the prov. of Westphalia is now erecting a monument to the Emperor William I., overlooks the l. bk. of the river. E. of the gap the ridge is known as the Weser-gebirge, at the W. end of which is the Jakobsberg (595 ft.).

West Point, cape, Canada, the most westerly point of Prince Edward Island.

West Point, gold-mining vil., U.S., California, Calaveras co., 18 m. N. by E. San Andreas. P.<1500.

West Point, city, U.S., Georgia, Troup co., on the l. bk. of the Chattahoochee R., 76 m. SW. by S. Atlanta. P.<1500.

West Point, vil., U.S., Iowa, Lee co., 20 m. WSW. Burlington. P.<1500.

Wetter, riv., Ger., gd.-duchy Hesse, prov. Upper Hesse, a r. bk. trib. of the Nidda; gives its name to the fertile valley near Friedberg called the **Wetterau.**

Wetter, or **Wetter an der Ruhr,** vil., Prussia, prov. Westphalia, on riv. Ruhr, circle Hagen, 9 m. SSW. Dortmund. P. (comm.) 5400.

Wetter, Lake, Swedish **Vettern,** lake, Sweden, in 58° 30′ N., 14° 30′ E., 23 m. SE. Lake Wener, and enclosed by the provs. Skaraborg, Jönköping, Östergötland, and Örebro. It is often agitated by storms and sudden variations in its level, but it is of great importance for internal traffic, being connected by a canal with Lake Wener, by which and the Motala R.—serving as an outlet for its surplus waters on the E.—it completes the inland navigation between the Baltic Sea and the Kattegat. Length, 80 m.; breadth, 10 m.; area, 716 sq. m.; alt. 295 ft.

Wetteren, tn., Belgium, prov. E. Flanders, arr. Termonde (Dendermonde), on the Scheldt, 8 m. ESE. Ghent; manufactures Siam cottons, tulle, and lace, and has bleach-works, &c. P. (comm.) 12,000.

Wetterhorn, or **Hasle,** mt., in the Bernese Oberland, Switzd., E. of the Grindelwald, about 12 m. ESE. Interlaken. Alt. 12,150 ft.

Wettersteingebirge, the most important chain of the Bavarian Alps, lie between Bavaria and Tirol, W. from the upper Isar, 15 m. NW. Innsbruck. Highest points—Wetterstein (8145 ft.), Dreithorspitze (8640 ft.), and Zugspitze (9725 ft.), this last being the highest peak in all the German Empire.

Wettin, tn., Prussia, prov. Saxony, circle and on riv. Saale, 9 m. NW. Halle. P. <3000.

Wettingen, vil., Switzd., cant. Aargau, 1 m. SE. Baden. P. <2000.

Wetton, par., Eng., Staffordshire, div. and 8 m. E. Leek. PM.O. P. <500.

Wettringen, vil., Prussia, prov. Westphalia, circle Steinfurt, 21 m. NW. Münster. P. (comm.) <3000.

Wetumpka, vil., U.S., Alabama, cap. Elmore co., on both banks of the Coosa R., navigable to this point, and here crossed by an iron bridge, 13 m. N. by E. of Montgomery. Wetumpka is the shipping point for a cotton region, and contains the state prison. P. <1500.

Wetwang, par., Eng., Yorkshire, E. Riding, Buckrose div., 19½ m. SSW. Scarborough, on the NE. R., P.O. P. <750; eccles. par. (**Wetwang with Fimber**) P. <750.

Wetwood, P.O., Eng., Staffordshire, 4 m. NW. Eccleshall.

Wetzel, co., U.S., W. Virginia, bounded by the Ohio, S. of 40° N.

Wetzikon, vil., Switzd., cant. and 12½ m. E. by S. Zürich; has cotton and silk mills. On the borders of the lake numerous remains of lake-dwellings have been found, especially tombs of the Romans and Alemanni. P. (comm.) 5400.

Wetzlar, tn., Prussia, in a detached part of the Rhine Prov., circle Wetzlar, on riv. Lahn, 8 m. WSW. Giessen. In the neighbourhood are large mines of iron and manganese ores and phosphorus. Was formerly an imperial free city, and from 1691 to 1806 the seat of the Imperial Chamber. Residence of Goethe during the summer of 1772, when the incidents occurred that gave rise to the production of the *Sorrows of Werther.* P. 7800.

Wevelghem, comm., Belgium, prov. W. Flanders, arr. Courtrai. P. 5900.

Wevelinghaven, tn., Prussia, Rhine Prov., on riv. Erft, circle Grevenbroich, 10 m. SSW. Düsseldorf. P.<3000.

We-wo-ka, vil., U.S., Indian Terr., Seminole nation, cap. of the Seminole country, about 65 m. NW. Perryville. P. <1500.

Wexford, vil., Canada, Ontario, York co., 9 m. from Toronto. P.<1500.

Wexford, maritime co., in the SE. corner of Ire., prov. Leinster, on the St. George's Channel, containing ten bars., as in the following table:—

Baronies.	Acres.	Pop. 1891.
Ballaghkeen, North . .	45,413	6,710
Ballaghkeen, South . .	40,987	8,910
Bantry	101,599	19,065
Bargy	40,002	7,713
Forth	38,849	19,203
Gorey	81,932	11,479
Scarawalsh	106,651	18,071
Shelburne	51,103	10,009
Shelmaliere, East . .	16,364	3,053
Shelmaliere, West . .	50,300	7,565
Total . .	573,200[1]	111,778

[1] Exclusive of 3388 ac. under the larger rivers and tideways.

The coast is noted for dangerous sandbanks. Chief inlet, Wexford Harbour, inaccessible at low tide to large vessels. The geological basis is clay-slate, with patches of quartz, a protrusion of greenstone trap near Gorey, and in NW., on the Wicklow and co. Carlow borders, a granitic range, with Blackstairs Mt. reaching a height of 2409 ft. The general interior is chiefly a succession of green heights. S. of Wexford Harbour is found Carboniferous limestone. The chief rivers are the Slaney, from NW. to Wexford Harbour on SE., receiving the Bann; and the Barrow, forming the W. boundary of the county, and navigable for large vessels to New Ross. The Slaney is navigable for barges to Enniscorthy. The railway service is by the Dublin, Wicklow, and W. R., with a branch from G. S. & W. R. Much land towards the coast is a fertile alluvial soil, but in W. are large tracts of peat-moss. For agricultural statistics, see **Appendix,** pp. 10–12. Factories for agricultural implements and soda water, and distillery. There are valuable fisheries at the county town, &c. The N. part of the county belonged to the MacMurroughs, overlords of Leinster. One of that race, Dermod, being deposed, asked for the help of Henry II., and caused the Norman invasion of 1169, and sovereignty of England. This district had an active share in the rising of 1641, and in 1649 the town was carried by storm during Cromwell's campaign. In 1798 several serious conflicts occurred here with the insurgent peasantry. There are many monastic ruins in this county, and several fine old castles, &c. The county returns two members to Parliament, one for the N. and one for the S. div. Chief towns are Wexford, New Ross, Enniscorthy, and Gorey. Parl. divs., **North Wexford,** P. 55,400; **South Wexford,** P. 56,400.

Wexford, seapt. tn., Ire., cap. co. Wexford, on the Dublin, Wicklow, and Wexford and the Fishguard and Rosslare Rlys., on r. bk. of riv. Slaney, where it expands into Wexford Harbour, 64 m. S. Dublin. The tidal harbour is 13 ft. deep at extrance at ordinary spring tides at high water, 9 ft. deep at low water. The harbour entrance is impeded by a shifting bar about 4 m. from the quay, admitting vessels of not more than 10 ft. draught; larger vessels anchor at Rosslare Harbour, nearly 9 m. distant, but connected with Wexford by a branch line. There is a shipbuilding yard, manufacture of implements and cement; and the town has fisheries, and trade in cattle and agricultural produce. Wexford was founded by the Danes in the 9th century, and remained in their possession until 1169, when it was taken by Fitzstephen MacMurrough, king of Leinster. There are some remains of ancient walls, and ruins of Selskar Priory (12th century). Market-days, W. and S. Tn. P. (1841) 11,300; (1851) 12,500; (1871) 12,100; (1891) 11,500.

Wexford, co., U.S., Michigan, in the W., N. of 44° N., E. of 86° W.

Wexford, South, stn., Ire., on the Fishguard and Rosslare Rly.

Weybridge, par., Eng., Surrey, Chertsey div., 7½ m. W. by S. Kingston, 1 m. NNW. of its stn. on the L. & SW. R.; the residence of many London merchants. Has some remains of a palace built by Henry VIII. PMT.O. Mean rfall. (Weybridge Heath, alt. 150 ft., 1866–80), yr. 26.6 in. P.<4000.

Weydale, P.O., Scot., Caithness, 4 m. SE. Thurso.

Weyer, vil., Upper Austria, on the r. bk. of the Enns, 17 m. SE. Steyr. P.<2000.

Weyersheim, Alsace-Lorraine. See **Weiersheim.**

Weyhill, vil., Eng., Hampshire, div. and 3 m. W. by N. Andover, 14½ m. NW. Winchester, on the M. & SW. Joint Rly.; a great agricultural fair is held here annually in October. PMT.O.

Weymouth, settlement, Canada, Nova Scotia, Digby co., on St. Mary's Bay, 123 m. W. Halifax.

Weymouth, par. See **Weymouth and Milcombe Regis.**

Weymouth, tn., U.S., Massachusetts, Norfolk co., 11 m. SSE. Boston. Weymouth is the second oldest settlement in the state, founded 1626. P. (1880) 10,600; (1890) 10,900.

Weymouth and Melcombe-Regis, mun. bor., seapt., and market-tn., Eng., Dorset, S. div., 8 m. S. Dorchester, in the diocese of Salisbury, on the bay of the same name at the mouth of a small stream, the Wey, on the L. & SW. R. and the G. W. R. The tidal 'Backwater,' formed by the Wey, separates Weymouth proper on the S. from the modern Melcombe-Regis on the N.; they are connected by a bridge over the harbour. Both were parl. bors. till 1832, returning two members each, then two as one bor. till 1885, representation being now merged in the county. There are two slips, 134 and 180 ft. long; the tidal harbour has a quayage of 2200 ft., with depths of 12 to 19 ft., and (1893) has been deepened. Melcombe has beautiful sands, an esplanade over a mile long, and a pier 1050 ft. long, and first became a seaside resort under George III. Remains of a castle noted in the Cromwellian war. Market-days, Tu. and F. Mun. bor. P. (1801)<1500; (1851) 9500; (1871) 13,300; (1891) 13,900; par. (**Weymouth**) P.<4000.

Weymouth Bay, bay, Queensland, on Pacific coast of Cape York Penin., in about 12° 30′ S.

Wezzan, tn., Morocco. See **Wazan.**

Whaddon, par., Eng., Gloucestershire, Tewkesbury div., 3 m. S. by E. Gloucester. P.<250. See **Brookthorpe.**

Whaddon, par., Eng., Wiltshire, Westbury div., 3 m. NE. by N. Trowbridge, 1 m. SE. Holt stn. P.<250. See **Hilporton.**

Whaingarra, bay, New Zealand, off the W. ct. of North I., between 37° and 38° S., is about 5 m. long, and extends 7 m. farther in the NE.; width across mouth ½ m. and 3½ m., including one of the five small gulfs which it has at both sides.

Whakamarama, mt. chain, New Zealand, South I., prov. Nelson, stretches 47 m. along the W. ct. from Cape Farewell in the NE. to the r. bk. of the riv. Heaphy, which separates it from the Tasman plateaux; gold, silver, copper, tin, zinc, iron, galena, plumbago, molybdena, iridium, platinum, and coal are found on its slopes. Greatest alt. 3985 ft.

Whakari, isl., New Zealand. See **White Island.**

Whakatane, co., New Zealand, North I., on the NE. ct., crossed by 177° E.

Whakatane, tn., New Zealand, North I., Whakatane co., 137 m. SE. by E. Auckland, on the coast; there is a university reserve of 10,000 ac. P.<1500.

Whale, hamlet, Eng., Westmorland, Appleby div., on the Lowther, 5½ m. S. Penrith, 2½ m. SW. by S. Clifton and Lowther stn.

Whale Chine, small, deep, and narrow valley, Eng., in the Isle of Wight, 2½ m. NW. St. Catherine's Point.

Whale Firth, inlet, Scot., Shetland Is., in the W. of Yell I., stretching 4 m. SSE. from the mouth, in 60° 39′ N.

Whale River, Great and **Little,** two rivs., Canada, flowing W. into Hudson Bay, the former entering in 55° 18′, the latter in 55° 55′ N.; Hudson Bay Company's stn. at the mouth of each.

Whale's Back, small isl., U.S., New Hampshire, at E. of entrance to Portsmouth Harbour, in 43° 3′ N., 70° 41′ W.

Whaley, tn., Eng., Cheshire, Knutsford div., 7 m. NE. Macclesfield, with a stn. (**Whaley Bridge**) on the L. & NW. R.; has coal-mines in the neighbourhood. Alt. 602 ft. Mean rfall. (1866–80), yr. 44.8 in. PMT.O. (**Whaleybridge**). See **Yeardsley.**

Whalley (hwaw'li), par., Eng., Lancashire, div. and 3½ m. S. by W. Clitheroe, on the L. & Y. R.; has ruins of a splendid Cistercian abbey, founded 1296. The church, rebuilt 1100, was originally founded 628. The parish is one of the largest in England, and is about 13 m. in length and breadth. PMT.O. P.<1500.

Whalley Range, St. Edmund and **St. Margaret,** two eccles. pars., Eng., Lancashire, Manchester par. Whalley St. Edmund, P. 5900; Whalley St. Margaret, P. 6600.

Whalsay ('whale island'), isl., Scot., Shetland Is., about 2 m. off the E. ct. of the Mainland, in 60° 19½'–23' N. Length, 5¾ m.; breadth, 2½ m. PMT.O. P. 927; eccles. par. (**Whalsay and Skerries**) P.<1500.

Whalton, par., Eng., Northumberland, Wansbeck div., 5 m. WSW. Morpeth, 1 m. SSE. Meldon stn., PM.O. P.<500.

Whampoa, or **Hwampoa,** tn. and seapt., China, prov. Kwangtung, 27 m. S. by E. Canton, on an island forming part of the delta of the Si-kiang; an outport of Canton; has two government dry docks not open to merchant vessels.

Whangapoua, post-tn., New Zealand, North I., Coromandel co., 50 m. from Auckland by road and rail. P.<1500.

Whangarei, co., New Zealand, North I., on the NE. ct., to the E. of 174° E., and crossed in the S. by 36° S.

Whangarei, or **Wangarei,** post-tn., New Zealand, North I., Whangarei co., 80 m. NNW. Auckland; coal and iron are worked, and there are medicinal springs. Limestone caves are among the natural curiosities of the neighbourhood. P.<1500.

Whangarei Heads, post-tn., New Zealand, North I., Whangarei co., 70 m. N. by W. Auckland; has an excellent harbour. The fantastic peaks near the entrance are, according to Maori tradition, the chief Manaia, his wife, and two children. P.<1500.

Whangaroa, post-tn. and harbour, New Zealand, North I., Whangaroa co., 136 m. NNW. Auckland. Whangaroa has a magnificent harbour, 5 m. in length, and amidst beautiful scenery. Scene of the massacre of Boyd's crew and sixty-four passengers, 1809. P.<1500.

Whaplode, par., Eng., Lincolnshire, Holland div., 5 m. E. by N. Spalding, on the M. & G. N. Joint Rly., P.O.; 10,688 ac. P.<2500.

Whaplode Drove, eccles. par., Eng., Lincolnshire, Holland div., 8 m. SE. by S. Spalding, 2 m. ENE. Postland stn., PM.O. P.<1000.

Wharf Bank, North, shoal, Eng., at the mouth of the Wyre R., N. Lancashire, near Fleetwood.

Wharfe, riv., Eng., rises 4 m. N. of Pen-y-gent, in the NW. of the W. Riding of Yorkshire, flows SE. to Ilkley, then E. to Wetherby, and finally ESE. past Tadcaster, and enters the Ouse from the right 8 m. below York.

Wharles, vil., Eng., Lancashire, Blackpool div., 6½ m. NW. by W. Preston, 4½ m. W. by N. Barton and Broughton stn. See **Treales.**

Wharncliffe, PM.O., Eng., Yorkshire, W. Riding, 6 m. NW. Sheffield. In the vicinity are **Wharncliffe Crags,** on the E. bank of the Don, whence magnificent views are obtained. Wharncliffe Lodge (built in 1510) was for some time the residence of Lady Mary Wortley Montagu.

Wharnley, vil., Eng., Northumberland, div. and 4 m. NW. by W. Hexham, on the r. bk. of the S. Tyne, 1 m. SW. Fourstones stn.

Whitby, tn. and port of entry, Canada, Ontario, prov. and cap. co. Ontario, on Lake Ontario, 27 m. NE. by E. Toronto; has a fine harbour. Manufactures include mill machinery, iron-castings, agricultural implements, &c. P. <3000.

Whitby, par., Eng., Cheshire, Wirral div., 6 m. N. Chester, close to Ellesmere Port stn., P.O. P. 5100.

Whitby, par. and tn., Eng., Yorkshire, N. Riding, in W. div., on the coast, on both sides of the Esk, 50 m. NE. York, and 16½ m. NW. by N. Scarborough, on the NE. R. The river is crossed by a swing iron bridge; there is ample accommodation for vessels, and slips for shipbuilding. The tidal harbour is 58 ac. in area; depth available at high water ordinary spring tides 15 ft., ordinary neap tides 12 ft. Owing to the beauty of the town and its surroundings, and its bracing moors, Whitby has become a watering-place of resort, and a new town has been built on the West Cliff. The noble ruins of St. Hilda's Abbey, founded in 566, but rebuilt in the 11th century, mark the place where lived and died (about 880) the poet Cædmon. The jet found in the dist. is famed over the world, and the manufacture of ornaments from it is a special industry. Whitby has shipbuilding, and manufactures of sailcloth and cordage. On Ling Hill, about 2 m. SE., is a lighthouse, with light 240 ft. above high water, visible 22 m. Market-day, S. Alt. 184 ft. Mean rfall. (1866-80), yr. 26.9 in. Tn. P. 13,100; par. P. 7500; parl. div. P. 54,800.

Whitesboro, tn., U.S., Texas, Grayson co., 15 m. W. Sherman. P. <1500.

Whitesburg, vil., U.S., Tennessee, Hamblen co., 8 m. NE. Morristown; in vicinity are valuable marble quarries. P. <1500.

White's Cross, P.O., Ire., co. and 3 m. from Cork.

White Sea, Russian **Byeloye More,** wide gulf of the Arctic Ocean, in N. Russia, the entrance of which is formed by Cape Svyatoi Nos, in 68° 10′ N., 39° 47′ E., and Kanin Nos, in 68° 39′ N., 43° 32′ E. It extends 380 m. S. and SW., reaching 63° 47′ N. in S., and covers 36,600 sq. m. Consists of two parts, outer and inner, connected by a relatively narrow passage (**Gorlo**), 115 m. in its narrowest part. It forms four large bays: (1) Kandalakskiy, or Kandalaksha, to the NW., between the mainland and the Kola Penin., of which the S. ct. is known as **Terskiy Bereg.** It receives the Niwa, outflow of Lake Imandra, is surrounded by high craggy mountains, and attains 100 fathoms at entrance. (2) The Mezeñ Bay, on E. ct., in S. of Kanin Penin., receives Mezeñ R., and attains 50 fathoms at entrance. (3) Dvina or Archangel Bay, also on E. ct., receiving the N. Dvina (port of Archangel), depth 45 fathoms at entrance, but large sandbanks at the mouth of the Dvina; the S. ct. of this bay is named **Lyetniy Bereg.** (4) Onega Bay, in SE., receiving Onega R. (town Onega), also 45 fathoms at entrance. The entrance to White Sea is occupied by shallows separated by water 20–25 fathoms deep, increasing to 50 fathoms in the narrow strait. The **Solovetskiye Is.** lay in the midst of Onega Bay at its entrance. Large portions of the White Sea are frozen from October to May. Considerable fishing, yielding every year about 200,000 cwt. of fish (150,000,000 herrings). Opened to foreign trade by Chancellor in 1553. Chief port, Archangel.

Whiteshill, eccles. par., Eng., Gloucestershire, Stroud par., P.O. P. <2000.

Whiteside, co., U.S., Illinois, on W. frontier, S. of 42° N.

Whiteside's Corner, P.O., Ire., 5 m. from Randalstown, co. Antrim.

White Springs, mineral spring, U.S., Florida, Hamilton co., 15 m. E. Live Oak.

Whitestakes, P.O., Eng., 3 m. from Lostock Hall, near Preston, Lancashire.

White Staunton, par., Eng., Somerset, Bridgwater div., 10 m. SSE. Taunton, 3½ m. W. by N. Chard stn. P. <250.

Whitestone, PM.O., Eng., Cornwall. See **Whitstone.**

Whitestone, par., Eng., Devonshire, Tiverton div., 3½ m. W. by N. Exeter, P.O.; 4935 ac. P. <500.

Whitestone, vil., U.S., New York, Queens co., Long I., on the East R., 11 m. NE. Brooklyn; manufactures tinwares, and has an excellent harbour. In the vicinity are the fortifications commanding the E. entrance to New York Harbour. P. <3000.

Wick, royal and parl. burgh, par., and market and seapt. tn., Scot., E. ct. of Caithness, on Wick Bay, 18½ m. SE. by E. Thurso, on the H. R. Wick parl. burgh includes **Wick with Louisburgh** on the N. and **Pulteneytown** on the S. The last is chiefly occupied by the fisher population. There are two harbours and an extensive breakwater in the bay, erected at a cost of about £120,000; it was almost destroyed in 1872. In recent years great harbour improvements have been effected. It has barrel, boat, sail, and rope making, and other industries. For upwards of half a century Wick has been the headquarters of the herring-fishery in Scotland. The burgh unites with Dingwall, Tain, Cromarty, Kirkwall, and Dornoch, forming the Wick dist. of burghs, in sending one member to Parliament. Market-day, F. Mean temp. (19 yrs.), yr. 45.4° F., Jan. 37.9°, July 55.3°; rfall. (25 yrs.), yr. 27.7 in. Par. 47,264 ac., P. 13,100; tn. and parl. burgh (including **Louisburgh** and **Pulteneytown**) P. 8500; royal burgh P.<3000; parl. dist. P. 18,100.

Wicklow, maritime co., Ire, prov. Leinster, on St. George's Channel, divided into eight bars., as in the following table:—

Baronies.	Acres.	Pop. 1891.
Arklow	67,266	13,432
Ballinacor, North	74,114	4,775
Ballinacor, South	78,277	6,117
Newcastle	52,042	7,550
Rathdown	32,866	9,893
Shillelagh	44,392	6,076
Talbotstown, Lower	88,355	7,108
Talbotstown, Upper	62,511	7,185
Total	499,822[1]	62,136

[1] Exclusive of 259 ac. under the larger lakes and tideways.

The coast consists of precipitous rocks, with dangerous sand-banks, and the only harbours are that of Wicklow (lately improved) and the small one of Arklow. Along the shore, from Wicklow to near Greystones, is a tract of boggy marsh protected by the **Murrough,** a shingly bank, along which now runs the Dublin, Wicklow, and Wexford Rly. A range of granite mountains occupies the middle of the county, passing from NE. to SW., with a succession of moors, above which rise Lugnaquilla (3039 ft.), Kippure (2473 ft.), Duff Hill (2369 ft.), and Donce Hill (2384 ft.). This range contains many Silurian strata. The valleys show ancient river-terraces along the sides (*e.g.*, Glendalough), and the famous scenery of the district is due to the deep glens and rugged rocks combining with the luxuriant foliage of the beautiful woods along the sides, and enhanced by the small but romantic loughs. Chief rivers, the Liffey, in NW.; Vartry; the Avonmore and Avonbeg, which meet to form the Avoca, famed in song; the Slaney, in W., passing into Carlow. The Dublin, Wicklow, and Wexford Rly. passes along the coast, bending W. to Rathdrum, with a branch to Shillelagh. Lead and copper occur in the mountains, but the amount of ore extracted is quite insignificant. In the lower grounds the soil is fertile, and much good pasturage for sheep is found in the higher districts. For agricultural statistics, see **Appendix,** pp. 10–12. Cordite manufacture at Arklow, where there are also oyster-beds. Under James I., Wicklow was made a separate county, having been previously (from the time of King John) included in co. Dublin. The most remarkable antiquities are those of the Vale of Glendalough (*q.v.*). It returns two members to Parliament, one for the E. and one for the W. div. Chief towns, Wicklow, Bray, Arklow, and Baltinglass. See **Ireland,** table.

Wicklow, seapt., civic and market tn., Ire., cap. co. Wicklow, bars. Arklow and Newcastle, 28 m. S. Dublin, on the Dublin, Wicklow, and Wexford Rly., at mouth of the Vartry, here crossed by a bridge of eight arches. The harbour admits vessels drawing 13 ft. water at high tide. The town is resorted to for sea-bathing. Lead ores, ochre, manure, timber, corn, potatoes, turnips, and cordite, gun-cotton and nitro-glycerine (works at Arklow) are exported. Some remains of Black Castle, a 14th century edifice, stand on a neighbouring headland. Market-day, W. P.<3500; parl. divs., **East Wicklow,** P. 31,400; **West Wicklow,** P. 30,800.

Wield, par., Eng., Hampshire, Petersfield div., 7½ m. S. Basingstoke, 3½ m. NW. Medstead stn. P.<250.

Wieliczka, tn., Austria, crownland Galicia, 7½ m. SE. Cracow; has the most important rock-salt mines of Austria. These mines form a large subterranean town, about 2½ m. from

E. to W. and 3940 ft. from N. to S., 920 ft. below the surface of the ground. Here are several subterranean ponds, which can be traversed by canoes; some of the halls are of vast size, reaching 100 ft. in height. There are also two chapels with various ornamentations. Alt. 835 ft. P. 6000.

Wielka, Wielki, and other derivatives from the root *wiel*, Polish, 'large.'

Wielun, dist. tn., Russian Poland, govt. and 45 m. SSE. Kalisz; trade in grain and wool. P. 5700.

Wiemelhausen, vil., Prussia, prov. Westphalia, govt. Arnsberg, circle Bochum. P. (comm.) 6600.

Wien, German name of **Vienna.**

Wiener Neustadt, tn., Lower Austria, 30 m. S. by W. Vienna; manufactures machinery, iron goods, pottery, flour, and brass wares. Among the buildings of the town are the old castle, built in the 12th century and restored in the 15th and 18th centuries, now containing the military academy, founded by Maria Theresia, with the Gothic chapel (with fine stained-glass windows) and the tomb of Maximilian I. (born here in 1459, died 1519); the Neukloster, founded in 1444, having a church with a monument to Eleanora of Portugal (died 1467), wife of Frederick III. The Turks unsuccessfully besieged the town in 1529, an earthquake partly destroyed it in 1768, and it was almost entirely burnt down in 1834. P. 25,000.

Wiener-Wald. See **Austria, Archduchy of,** and **Hermanuskogel.**

Wiesa, vil., Ger., kgd. Saxony, circle Zwickau, dist. Annaberg, 16 m. S. by E. Chemnitz. P. <3000.

Wiesbaden, tn., Prussia, cap. administrative div. W. of prov. Hesse-Nassau, at the foot (S.) of the Taunus Range, 2½ m. N. of the r. bk. of the Rhine; the most frequented watering-place in the German Empire, a distinction it owes partly to its hot saline springs, partly to its genial climate. In great part a comparatively modern town, Wiesbaden possesses numerous handsome buildings, amongst them museums of pictures, antiquities, and natural history; the library of 100,000 volumes; the Pauline Palace (1842), an imitation of the Alhambra; the magnificent bath-house (*Kurhaus*), 400 ft. long. The hot springs of Wiesbaden were known to the Romans under the names of *Fontes Mattiaci* and *Aquæ Mattiacæ*. Wiesbaden has been steadily growing in repute since the 16th century, especially since it came into favour as a winter resort. There are about two dozen springs in all, with temp. 104°–156½° F., wonderfully copious in supply, and deemed efficacious in cases of severe dyspepsia, gout, rheumatism, skin and nervous diseases. The most celebrated are the Koch-brunnen (Boiling Spring), the Adler (in the 'Eagle' Hotel garden), and the Schützenhof (Riflemen's Court). The number of visitors annually falls little, if anything, short of 100,000. From 1815 to 1866 Wiesbaden was the winter residence of the Duke of Nassau. Alt. 384 ft. P. (1816) 5000; (1871) 35,450; (1890) 64,700.

Wigan, parl. and (by prescription) mun. bor., co. bor. (since 1888), par., and market-tn., Eng., Lancashire, SW. div., 15½ m. S. Preston, in the diocese of Liverpool, on the Douglas and on the Leeds and Liverpool Canal, with stns. on the L. & NW. R., L. & Y. R., M. S. & L. R., &c. Wigan is mentioned in Camden's *Britannia* as *Wiggin*, 'which some say,' he adds, 'was anciently *Wibiggin*,' and in Gough's edition of Camden (1789) its manufactures of brass, pewter, and checks are mentioned, and so also is the 'candle or canal coal' of Wigan and the neighbouring village of Haigh (*q.v.*), but only as being made into ornaments and used by the poor as candles, though Leland (1549) speaks of the coal of Hawe (Haigh), 'much like sea-coal,' as very profitable to burn. Large local trade, due to its very extensive coal-mines, its important ironworks, and its cotton industry; manufactures calicoes, ginghams, fustians, &c. There are also manufactures of machinery. There are a public park of 27 ac. and free library, both opened in 1878; also a mining and technical school. Wigan, as parl. bor., had two members of Parliament till 1885, now only one. Mean rfall. (Wigan water-works, alt. 225 ft., 1866–80), yr. 39.8 in. Market-days, F. and S. Parl. and mun. bor. P. (1801) 11,000; (1851) 31,900; (1871) 39,100; (1891) 55,000.

Wight, Isle of, the ancient *Vectis*, isl., in the English Channel, off the S. ct. of England, separated by the Solent and Spithead from the mainland of Hampshire, in which county it is included. Length, E. to W., 22½ m.; greatest breadth, at its centre, 13½ m. It presents almost every variety of landscape in miniature. Surface on the N. ct. undulating, and in many parts well wooded; it rises towards the centre, where a range of chalk-hills traverses it from E. to W., 669 ft. at the highest part, and in the S. St. Catherine Hill rises to 775 ft., and Boniface Down 784 ft., the highest point in the island; along the S. ct. is the Undercliff (*q.v.*), including Culver Cliff, Dunnose Point, Shanklin, Luccombe, and Blackgang Chines, &c. Off its W. extremity are the Needle Rocks. The Medina R., flowing S. to N., separates it into two nearly equal portions, the E. of which is the more fertile. In the W. are some wide sheep downs. Principal towns, Newport (the cap.), Yarmouth, Cowes, Ryde, and Ventnor; the three last are greatly frequented in summer as bathing-places, and near Cowes is Osborne House, a favourite residence of Queen Victoria. The island has constant communication by steamboats with Portsmouth and Southampton, and is a great resort of invalids and a favourite place of residence. The principal antiquities are Carisbrooke Castle and the remains of Quarr Abbey. Mean rfall. (1866–80), Osborne, alt. 172 ft., yr. 29.9 in.; St. Lawrence, alt. 75 ft., 31.2 in. Parl. div. P. (1891) 78,700.

Wigton with Woodside, par. and market-tn., Eng., Cumberland, Penrith div., 2 m. S. of the Wampool, 10½ m. WSW. Carlisle, on the Maryport and Carlisle Rly.; manufacture of fine cottons, and tanning. Large deposits of barytes in the vicinity, but not worked. Market-day, Tu. 4974 ac. Par. P. <4500; tn. P.<4000; eccles. par. (**Wigton with Woodside, Waverton, and Oulton**) P. 5100.

Wigtown, co. tn., royal burgh, par., and market-vil., Scot., Wigtownshire, on the W. shore of Wigtown Bay, 6½ m. SSE. Newton Stewart, on the Portpatrick & Wigtownshire Joint Rly. The harbour belongs to the port of Ayr; vessels of 300 tons can berth at its quays. Formerly a constituent of parl. burghs, Wigtown was merged in the county in 1885. PMT.O. Market-day, F. Par. 7508 ac., P.<2000; royal burgh, P.<2000; parl. dist. of county, P. 36,000.

Wigtown Bay, inlet of the Irish Sea, Scot., between Wigtownshire and the Stewartry of Kirkcudbright; is 15 m. long, and 12 m. wide at entrance.

Wigtown (or **Wigton**) **shire,** maritime co., Scot., washed by the Irish Sea and North Channel, with a coast-line of 120 m. It is deeply indented on the S. by Luce Bay, and Loch Ryan on N., thus forming a double-headed penin., the 'Rinns;' and between Luce Bay and Wigtown Bay on E. is formed the promontory called the 'Machers.' Loch Ryan is an excellent harbour; but generally the coast of Wigtown is precipitous, and its inlets rocky and dangerous. There are two lines of railway, one from Newton Stewart by Wigtown to Whithorn, and the other from Newton Stewart by Glenluce and Stranraer to Portpatrick, with a branch to pass N. by New Luce. Geologically the county is mainly composed of Silurian rocks (Lower in the NW., Upper in the SE.). W. of Loch Ryan is a strip of Permian sandstone. The Mull of Galloway, the most S. point in Scotland, rises 228 ft. above the sea. Galena, copper pyrites, and barytes occur in small quantities, but are not mined. There are slate and flag shales at Cairn Ryan, and sandstone quarries. Rivers unimportant; the Cree, on the E. boundary, passing Newton Stewart to expand into Wigtown Bay; the Bladnoch, in a parallel valley, also falls into that bay, with the county town at its mouth; the Luce, forming another parallel valley, flows to the head of Luce Bay. There are many lochs, but mostly small. This county consists chiefly of stony moors, rising in the N. into rocky hills reaching an alt. of about 1000 ft., but has good arable land in the Rinns and the Machers. For agricultural statistics, see **Appendix,** pp. 10–12. Manufactures and fisheries unimportant. There is a woollen-factory at Kirkcowan, and engineering works at Stranraer. At Newton Stewart an important weekly auction market. Antiquities: Whithorn (*Candida Casa*) was an important Roman station, and having been afterwards the scene of the mission work of St. Ninian (close of the 4th century), was made a bishop's see in 727; the 'Devil's Dyke' is a survival of the Roman occupation; many traces of the prehistoric natives, 'crannogs' and cairns, &c.; ruins of several ancient strongholds; picturesque remains of the Whithorn cathedral; and the standing stones of Torhouse. Wigtownshire returns one member to Parliament. The chief towns are Stranraer, Wigtown, Newton Stewart, Whithorn, Glenluce. Area, 327,906 ac. P. (1891) 36,000. See **Scotland,** table.

Wilmington, vil., U.S., California, Los Angeles co., 21 m. S. Los Angeles. P. <2000.

Wilmington, formerly **Willington,** city and port of entry, U.S., Delaware, Newcastle co., on the Christiana Creek, about 2 m. above its confluence with the Delaware, in 39° 44′ N., at a point accessible to vessels drawing 14 ft. of water. The falls of the Brandywine afford valuable water-power, which is applied to flour, paper, saw, and other mills. Steam-power is also employed in numerous industries, among the most important of which are the making of passenger carriages, the manufacture of cottons, leather, &c. The iron and steel industry is likewise largely developed in all its branches, including bridge-building and the making of steam-engines and boilers. Iron shipbuilding, still a leading industry, was first carried on here in the U.S. The gunpowder works (Du Pont mills) are among the largest in the U.S. Wilmington was the first permanent settlement in the Delaware valley. P. (1870) 30,800; (1880) 42,500; (1890) 61,400.

Wilmington, isl., U.S., Georgia, at mouth of the Savannah R. Length 5 m., by 3½ m. wide.

Wilmington, city, U.S., Illinois, Will co., 46 m. SW. by S. Chicago. P. <2000.

Wilmington, tn., U.S., Massachusetts, Middlesex co., 15 m. NNW. Boston. P. <1500.

Wilmington, city and port of entry, U.S., N. Carolina, New Hanover co., on the Cape Fear R., 115 m. SSE. Raleigh. Wilmington is the largest city in the state; has several turpentine distilleries, a large rice-mill, and other industries, and an extensive trade, both coasting and foreign. Formerly a leading market for naval stores; its staples are now cotton and lumber. Good anchorage. Depth of water on bar, available for vessels entering port, at spring tides 20½ ft., at neap tides 19½ ft.; at quayside (principal wharves), high water 20 ft., low water 18 ft. Improvements are now in progress. On two islands opposite the city are fine rice-fields. The climate is healthy. Mean temp. (15 yrs.), yr. 63.3° F., Jan. 47.7°, July 80.3°; mean annual rfall. (14 yrs.), 57.79 in. P. (1870) 13,400; (1880) 17,400; (1890) 20,000.

Wilmington, city, U.S., Ohio, Clinton co., 45 m. NE. Cincinnati; has a Friends' college. P. <4000.

Wilton, mun. bor., par., and market-tn., Eng., Wiltshire, Wilton div., 3½ m. WNW., and in diocese of Salisbury, on the rivs. Wily (Wylye) and Nadder, with stns. on the L. & SW. R. and G. W. R. It gave name to the county in which it lies, and was anciently the seat of a bishopric. It is mentioned as a borough in Domesday, but its first known charter was granted by Henry I., and its present charter dates only from 1885. It is said to have been the place where carpets were first manufactured in England, and this industry is still carried on, both Wilton and Axminster carpets being made. Wilton House, the seat of the Earl of Pembroke, a building erected after the designs of Holbein and Inigo Jones, is noted in literary history as the place where Sir Philip Sidney wrote his *Arcadia*. P. <2500; parl. div. P. 42,900.

Wilts and Berks Canal, Eng., extends from Senningham, Wiltshire, to the Thames at Abingdon. Length, 52 m. It has 41 locks.

Wilts Canal, North, canal, Eng., in the NE. of Wiltshire, extends from near Swindon, 8 m. NW. to the Thames, near Cricklade.

Wiltshire, or **Wilts,** inland co., in the S. of Eng., traversed in the extreme N. by the upper part of the Thames; divided into the parl. divs. named in the following table:—

	Acres.	P. 1891.
N., or Cricklade	102,822	59,414
NW., or Chippenham	154,620	44,358
W., or Westbury	128,387	52,670
E., or Devizes	236,287	48,297
S., or Wilton	257,224	42,896
Parl. bor. of Salisbury, S. div.	908	17,362
Total	880,248[1]	264,997

[1] The administrative county is coextensive with the ancient county.

It consists mainly of a high plateau or chalk upland, with three main slopes draining S., W., and NE., the corresponding rivers being the Salisbury Avon, flowing to the English Channel, the Bristol Avon flowing to the Severn estuary, and the Kennet flowing E. into Berks to join the Thames at Reading. The geological basis is chalk except to NW. (including part of the White Horse Vale), which shows oolite limestones and clays, with greensand beneath. The chalk region includes Salisbury Plain, the wooded tract of Cranbourne Chase, and the hilly Marlborough Downs, much of the upland being over 600 ft. high, the summits reaching over 900 ft., especially Inkpen Beacon, 1011 ft., at the junction of Wilts, Hants, and Berks. On the Somerset side is Alfred's Tower, 800 ft. In some parts the chalk rises steeply, in others forms deep valleys, the scenery in NW. showing much beautiful variety. Many of the woods and forests are as they were ages ago. Dairy-farming is the chief occupation in NW. dist. of Wilts. The chalk dists. are mainly devoted to sheep pasturage. In 1893 over 47 per cent. of the total area was permanent pasture. For agricultural statistics, see **Appendix,** pp. 7–9. Among the peculiar industries of the county may be mentioned truffle-hunting, dogs being still trained for the purpose. Iron ore is worked at Westbury and freestone at Box, Corsham, Monkton, Farleigh, Bradford-on-Avon, Limpley Stoke, Kingsdown. The important broadcloth manufacture is centred at Bradford and Trowbridge; carpets are manufactured at Wilton. Culne is the centre of the Wilts bacon trade. Near Downton is a noted agricultural college, and another has been opened at W. Lavington. The railways are G. W. R. and L. & SW. R. (the former having extensive works at Swindon). The county is also traversed by the Kennet and Avon Canal. There are many traces of the Roman occupation—roads, works, and camps: 'the Wans Dyke,' which crossed the county W. of Marlborough, is British, and the megalithic circles of Stonehenge and Amesbury are two of the most famous existing 'rude stone monuments' of an unknown period. Wilton and Ethandum are noted in the history of Egbert and Alfred (823–880). Canute died at Old Sarum (see **Salisbury**). There are many interesting churches and castles. Till 1832, Wilts returned 34 members to Parliament, and many of the boroughs being disfranchised or reduced, it returned 18 till 1867; now since 1885 there are six, one being for

the borough of Salisbury. There are seven mun. bors., viz., Culne, Chippenham, Devizes, Malmesbury, Marlborough, Salisbury, and Wilton. See **England,** table.

Wily, or **Wylye,** small riv., Eng., Wiltshire, flows N. to Warminster, then SE. and S. till it joins the Nadder at Wilton. The united waters of the two streams then flow E. to the Avon.

Wilz, tn., gd.-duchy Luxemburg, 26 m. N. by W. Luxemburg; manufactures cloths. P.<4000.

Wimbish, par., Eng., Essex, div. and 3½ m. ESE. Saffron Walden, PM.O.; 4920 ac. P.<750; eccles. par. (**Wimbish with Thunderley**) P.<750.

Wimblebury, P.O., Eng., 2 m. from Hednesford, near Stafford.

Wimbledon, par. and tn., Eng., Surrey, Wimbledon div., 4½ m. SE. by E. Richmond, on the L. & SW. R., the L. B. & S. C. R., and the Metropolitan Dist. Rly., at NE. extremity of Wimbledon Common; is a favourite residential suburb of London. Alt. 170 ft. Mean rfall. (1866–80), yr. 25.1 in. P. 25,800; eccles. par. (**South Wimbledon**) P. 15,400; parl. div. P. 69,200.

Wimbledon Park, eccles. par., Eng., co. of London, Wandsworth par., on the L. & SW. and Metropolitan District Rlys., near Wimbledon Common. P.<2000.

Wimblington, par., Eng., Cambridge, Isle of Ely, 3 m. S. by W. March, on the G. E. R. (stn. for **Doddington**), PM.O.; 7762 ac. P.<1500.

Wimeswould, par., Eng., Leicestershire. See **Wymeswold.**

Wimille, tn., France, dep. Pas-de-Calais, arr. and 3 m. NE. by N. Boulogne. P.<2000.

Wimmelburg, vil., Prussia, prov. Saxony, circle Mansfeld-lake. P.<3000.

Wimmera, riv., Australia, rises in the Pyrenees and Grampians, and flows into Lake Hindmarsh, from which in wet seasons it overflows into Lake Albacutya.

Wimmera, dist. in the NW. of the colony of Victoria (*q.v.*).

Wimmerby, tn., Sweden, prov. and 72 m. NNW. Kalmar. P.<3000.

Wimmis, vil., Switzd., cant. Bern, 6 m. S. Thun. P.<2000.

Wimpfen, tn., Ger., gd.-duchy Hesse, dist. Starkenburg, circle Heppenheim; has saline baths (Ludwigshall) and sulphur baths. Made a free city, 1803; site of Tilly's victory, 6th May 1622. P.<3000.

Wimpole, par., Eng., Cambridgeshire, Chesterton div., 8½ m. SW. by W. Cambridge, 2½ m. SE. by S. Old North Road stn. P.<500.

Wina, bay, W. Africa. See **Meano.**

Winamac, tn., U.S., Indiana, cap. Pulaski co., on Tippecanoe R., 73 m. SE. Chicago (Ill.). P.<1500.

Winandermere, lake, Eng. See **Windermere.**

Win-badaw, vil., Lower Burma, dist. Shwegyin, 36 m. ESE. Pegu; does considerable trade in grain. See **Sittaung.**

Winburg, tn., Orange Free State, cap. of W. dist., on the railway route to Pretoria, 65 m. NE. Bloemfontein. P.<5000.

Wincanton (Saxon *Wyndcaleton*), par., Eng., Somerset, E. div., 12 m. NE. by E. Yeovil, on the M. & L. & SW. R. Wincanton is a market for cheese and agricultural produce. PMT.O. Market-day, W. P.<2500.

Winceby, par., Eng., Lincolnshire, S. Lindsey div., 12 m. S. Louth, 4 m. E. by S. Horncastle. P.<250.

Winch, East and **West,** two adjoining pars., Eng., Norfolk, NW. div., the latter 2 m. S. by E. King's Lynn, the former ½ m SW. of its stn. on the G. E. R., PMT.O. (**East Winch**), and PM.O. (**West Winch**). P. (of each)<500.

Wincham, par., Eng., Cheshire, 2 m. NE. Northwich, on the Trent and Mersey Canal. P.<1500.

Winch Bridge, suspension bridge, Eng., Yorkshire, N. Riding, across the Tees, 4 m. NW. Middleton in Teesdale.

Winchburgh, vil., Scot., Linlithgowshire, 5½ m. E. by S. Linlithgow, on the N. B. R. and C. R.; coal is mined here. PM.O. P.<500.

Winchcomb, par., Eng., Gloucestershire, Tewkesbury div., 6 m. NE. by E. Cheltenham; it has silk and paper mills, and tanning. PMT.O. (**Winchcombe**). 6720 ac. P.<3000; eccles. par. (**Winchcomb with Gretton**) P.<3000.

Winchelsea (*Gwent-ceoseley*, 'the sand-bank on the fair plain'), par., Eng., Sussex, div. and 2½ m. SW. by S. Rye, 1 m. from the coast, 1 m. S. of its stn. on the SE. R. **Old Winchelsea** in the Roman and Saxon times stood at the mouth of the Rother, 2 m. distant, but was destroyed by inundations of the sea in 1250 and 1287, after which the present town was founded by Edward I. It has been ruined by the sea having gradually receded 1½ m. since the 16th century, leaving around it a salt marsh, now well drained and converted into good pasturage. PMT.O. P.<250.

Winchelsea, another name of Buka I., Ger. Solomon Is.

Winchelsea, post-tn., Victoria, Polwarth co., 23 m. W. by S. Geelong; has bluestone quarries in the neighbourhood. P.<1500.

Winchendon, tn., U.S., Massachusetts, Worcester co., 43 m. NE. Holyoke. P.<5000.

Winchendon, Nether and **Upper,** two adjoining pars., Eng., Buckinghamshire. Nether Winchendon, on the Thame, div. and 5½ m. W. by S. Aylesbury, P.<500; Upper Winchendon, P.<250.

Winchester, episcopal city, parl. and mun. (since 1184) bor., Eng., Hampshire, on the riv. Itchen, r. bk., in the diocese of Winchester, 66 m. (by rail) SW. London. The British *Caer Gwent* (*i.e.*, 'White City,' from the chalk of the neighbourhood) was named *Venta Belgarum* by the Romans, and *Win-ceaster* by the early English when they made it cap. of the kingdom of Wessex. After Egbert united the kingdoms the witan was still held at this cap., there being six mints here for three in London. Many of the Norman coronations and parliaments were at Winchester, and Henry II. increased the palace, his hall being still visible. Charles II. began a new palace on the site of the dismantled Winchester castle, 'a stately fabric,' according to Evelyn. St. Swithun was bishop here (852–862), enlarging the Saxon cathedral, but the present structure (558 ft. long) dates from 1070, the Norman transepts and central tower being as at first; the nave, which is much admired, was rebuilt by William of Wykeham. A splendid feature of the building is the reredos, with tiers of canopied niches, adorned with statues. Winchester College, the second prominent building, was built by William of Wykeham (1387–93), the chapel, hall, cloisters, &c., being still well preserved. To these two institutions and the presence of the barracks (holding about 2000 men) the prosperity of the town is due. The last, on the site of Wren's unfinished palace, and retaining part of its walls, was burned down in 1894. Formerly Winchester was an important seat of the woollen trade; it had suffered by the removal of the court to London, and also by the dissolution of the monasteries. The diocese embraces Hampshire, with most of Surrey, and the Channel Islands. Revenue, £6500. Winchester, as parl. bor., returned two members to Parliament from Edward I. till 1885, and now has one member. Free library established 1877. Market-day, S. Alt. 155 ft. P. (1801) 5800; (1851) 13,700; (1871) 16,400; (1891) 19,100.

Winterbourne Stoke, par., Eng., Wiltshire, Wilton div., 8 m. NW. by N. Salisbury, 4 m. N. by E. Wishford stn., P.O. P.<250.

Winterburn, vil., Eng., Yorkshire, W. Riding, Skipton div., 17½ m. NNE. Burnley, 4 m. ENE. Bell Busk stn. See **Flasby.**

Winter Harbour, fishing hamlet, U.S., Maine, Hancock co., 45 m. SE. Bangor. P.<1500.

Winterhoek, Groote, mt., Cape Colony, the highest point of the coast range W. of the Olifant, 68 m. NNE. Cape Town. Alt. 6840 ft.

Winterhoek, Groote and **Kleene,** two small chains of the S. ct. range, Cape Colony. Groote Winterhoek is near the Bay of Algoa; Kleene Winterhoek is a little further N.

Winterhude, N. suburb of Hamburg, Ger. P. 7400.

Winteringham, par., Eng., Lincolnshire, N. Lindsey div., on the S. bank of the riv. Humber, 12 m. E. Goole, 6½ m. W. Barton-upon-Humber, 2½ m. S. by W. Brough stn., PM.O. P.<750.

Winterlingen, vil., Ger., kgd. Würtemberg, Black Forest circle, 24 m. S. by E. Tübingen. P.<3000.

Winterport, tn., U.S., Maine, Waldo co., on Penobscot R., 18 m. NE. Belfast. P.<2000.

Winters, vil., U.S., California, Yolo co., 57 m. NNE. San Francisco. P.<1500.

Winterset, city, U.S., Iowa, cap. Madison co., 29 m. SW. by W. Des Moines. P.<3000.

Wintersett, par., Eng., Yorkshire, W. Riding, Barnsley div., 4½ m. SE. Wakefield, 1 m. WSW. Nostell stn. P.<250.

Winterslow, par., Eng., Wiltshire, Devizes div., 6 m. ENE. Salisbury, 3½ m. SE. Porton stn., PM.O.; 5236 ac. P.<1000.

Winterswijk, vil., Holland, prov. Gelderland, 18 m. SSW. Enschede. P.<3000.

Winterthur, tn., Switzd., cant. Zürich, 9 m. WSW. Frauenfeld (Thurgau); manufactures cottons, machinery. A good wine is produced in the neighbourhood. P. (comm.) 16,000.

Winterthur, Ober, vil., 1 m. to the NE., on the site of the Roman station *Vitodurum;* has silk-mills and machine shops. P. (comm.)<3000.

Winterton, PMT.O., Eng., near Ferry Hill, Durham.

Winterton, par. and tn., Eng., Lincolnshire, N. Lindsey div., 12 m. E. by S. Goole, 4 m. NNW. Appleby stn.; manufactures machinery and agricultural implements. Winterton is supposed to occupy the site of a Roman settlement. PMT.O. P.<1500.

Winterton, coast par., Eng., Norfolk, 8 m. N. Yarmouth, PM.O. P.<750; eccles. par. (**Winterton with East Somerton**) P.<1000.

Winterton Ness, cape, Eng., Norfolk, 10 m. N. by W. Yarmouth.

Winthorpe, par., Eng., Lincolnshire, S. Lindsey div., ½ m. from the E. ct., 20 m. SE. Louth, 2 m. N. Skegness stn. P.<500. See **Burgh-le-Marsh.**

Winthorpe, par., Eng., Nottinghamshire, div. and 2 m. NE. by N. Newark, P.O. P.<500.

Winthrop, tn., U.S., Maine, Kennebec co., 7 m. WSW. Augusta. P.<3000.

Winthrop, tn., U.S., Massachusetts, Suffolk co., on the coast, 5 m. ENE. Boston. P.<3000.

Winthrop, vil., U.S., Missouri, Buchanan co., on Missouri R., 20 m. SW. St. Joseph. P.<1500.

Winton, locality, Eng., Hampshire, included in the parl. bor. of Christchurch, 1 m. N. Bournemouth (West) stn., PMT.O., and PM.O. (**New Winton**).

Winton, par., Eng., Westmorland, in the E. of the div. and 8½ m. SE. Appleby, 2½ m. SSE. Musgrave stn., P.O.; 4518 ac. P.<500.

Winton, par., Eng., Yorkshire, N. Riding, Richmond div., 13½ m. SE. by S. Darlington, 2 m. E. Brompton stn. P.<250.

Winton, post-tn., New Zealand, South I., Southland co., 20 m. N. Invercargill. P.<1500.

Winton, post-tn., Queensland, Ayrshire co., 320 m. SW. Townsville. P.<1500.

Winton, stn., Scot., Haddingtonshire, on a branch of the N. B. R., 5½ m. W. by S. Haddington.

Winton, coal-mining bor., U.S., Pennsylvania, co. and on Lackawanna R., 8 m. NE. Scranton. P.<2000.

Winton, post-tn., Victoria, Delatite co., 35 m. WSW. Beechworth. P.<1500.

Wintringham, par., Eng., Yorkshire, E. Riding, Buckrose div., 13½ m. SW. Scarborough, 2 m. S. Knapton stn.; 5342 ac. P.<500.

Winwick, par., Eng., Huntingdonshire and Northamptonshire, div. and 10 m. NW. by W. Huntingdon, 4½ m. SE. Barnwell stn. P.<500.

Winwick, par., Eng., Lancashire, Newton div., 3 m. N. Warrington, 1½ m. SSE. Newton-le-Willows stn., PT.O. P.<500.

Winwick, par., Eng., Mid div. of Northamptonshire, 8 m. E. Rugby, 3½ m. ENE. Kilsby and Crick stn. P.<250.

Winyau Bay, U.S., S. Carolina, Georgetown co.

Winzenheim, vil., Ger., Alsace-Lorraine, circle and 3 m. W. Kolmar, at entrance to the Münsterthal; cotton spinning and weaving are carried on at Logelbach. P.<3000.

Winzig, tn., Prussia, prov. Silesia, circle Wohlau, 26 m. SE. by E. Glogau. P.<3000.

Wipkingen, vil., Switzd., cant. and 2 m. NW. Zürich, on the Limmat. P. (comm.)<3000.

Wipp, riv., Ger., in the E. of Pomerania, flows NW. then W. into the Baltic at the Rügenwalder-Münde, 34 m. ENE. Kolberg; used for floating timber from Techlip, 56 m.

Wippach, tn., Austria, Carniola, 18 m. ESE. Görz. P.<2000.

Wipperfürth, circle, Prussia, Rhine Prov. The administration belongs to Alsbach.

Wipperfürth, tn., Prussia, Rhine Prov., 23 m. NE. by E. Cologne, cap. circle Wipperfürth; manufactures nets and cloth. P.<3000.

Wippthal, valley, Tirol, opening into the Inn valley at Innsbruck, ascended by the railway leading to the Brenner tunnel.

Wirdum, vil., Holland, prov. Friesland, 3 m. S. Leeuwarden. P.<2000.

Wire, isl., Scot., Orkney Is. See **Viera.**

Wirksworth, par. and market-tn., Eng., Derbyshire, W. div., 4 m. S. by W. Matlock, on a branch of the M. R.; manufactures cotton goods, hosiery, &c. Limestone quarries and tape mills in the vicinity. There is a fine ancient church. PMT.O. Market-day, Tu. P.<4000.

Wirrabarra, post-tn., S. Australia, Frome co., 47 m. SE. Port Augusta; in a timber dist. Supplies railway sleepers. P.<1500.

Wirral, penin., Eng., Cheshire, between the rivs. Mersey and Dee; is a low-lying stretch of land, protected by an embankment. Length 12 m., by 7 m. broad.

Wirral, parl. div., Eng., in the NW. of Cheshire. P. 73,100.

Wirsitz, tn., Prussia, prov. E. Prussia, Posen, cap. circle Wirsitz. P.<2000.

Wirswall, par., Eng., on the S. border of Cheshire, Eddisbury div., 8½ m. SW. by W. Nantwich, 2 m. N. Whitchurch stn. P.<250.

Wirt, co., U.S., W. Virginia, crossed by 39° N., W. of 81° W., traversed by the Little Kanawha R.

Wirz-järvi, lake, Russia, govt. Livonia; its outlet, the Embach, flows into Lake Peipus, past Dorpat. Alt. 115 ft.; area, 106 sq. m.

Wisbech, mun. bor. (since 1374), par., and river-port, Eng., Cambridgeshire, Wisbech div., 22 m. NE. Peterborough, in the diocese and Isle of Ely, on the Nene, with stns. on G. E. R., and G. N. & M. Joint Rly. Length of the quay on each side of the river 1 m., with depth alongside of 15 to 25 ft. high water, and 8 to 13 low water; each quay accessible by vessels drawing 13 to 17 ft. Steamers 200 ft. long now frequent the port (see **Appendix,** p. 13). Name was probably **Ouse-beck,** the Ouse Stream. The town has a fine memorial to Thomas Clarkson the philanthropist (born at Wisbech in 1760), a museum rich in local antiquities, and a public park of 18 ac. Market-days, Th. and S. Mean rfall. (Wisbech Observatory, alt. 10 ft., 1866–80), yr. 26.7 in. Mun. bor. P. (1801) 5500; (1851) 10,600; (1891) 9400; parl. div. P. (1891) 49,600.

Wisborough Green, par., Eng., Sussex, div. and 8½ m. W. by S. Horsham, 3 m. W. by N. Billingshurst stn., PMT.O.; 8862 ac. P.<2000.

Wisby, or **Visby,** seapt. tn., Sweden, Gotland I., on the W. ct. The anchorage in the roads is in about 140 ft. of water, and is only sheltered from E. winds. During the 11th and 12th centuries the principal centre of commerce in the Baltic, and

later a prominent member of the Hanseatic League; was captured and plundered by Waldemar III. of Denmark in 1361. Mean temp., yr. 43.2° F., Feb. 29.3°, July 61.5°. P. 7100.

Wiscasset, tn. and port of entry, U.S., Maine, cap. Lincoln co., on W. bank of Sheepscot R., 22 m. SSE. Augusta. Its harbour admits vessels of the largest class. Favourite watering-place. P. <2000.

Wisch, vil., Netherlands, prov. Gelderland, 17 m. SSE. Zutphen, near the Prussian frontier. P. (comm.) 6400.

Wischau, Slavonic **Vyskov,** tn., Austria, Moravia, on riv. Hanna, 18 m. ENE. Brünn; manufactures cloth, woollen and cotton goods and pottery; trade in flax, linen, and cattle. Castle of the prince-archbishop of Olmütz. P. <5600.

Wiscon'sin, one of the United States, admitted 1848, rather smaller than England and Wales, bounded N. for 120 m. by Lake Superior, NE. by upper penin. of Michigan, E. for 200 m. by Lake Michigan, S. by Illinois, separated W. by Mississippi and St. Croix Rivs. from Iowa and Minnesota. Surface, an elevated rolling plain, forest to N., prairie to S. Highest ground runs E. and W. in the N., reaching 1800 ft., a steep slope thence N. to Lake Superior, and a gentle slope southwards. The central N. to S. watershed is so little marked that some affluents of the Mississippi and Lake Michigan almost intermingle. The other affluents are less valuable for navigation than as power for flour-milling, the chief industry. The winters are long and severe, especially N., with short, hot, dry summers [**Lacrosse, Milwaukee**]. Although the death-rate from respiratory diseases is high along the Mississippi R., no state has a lower proportion of such deaths. Wisconsin is remarkable for its numerous lakes, and is chief source of U.S. mineral waters. In 1880 one-third of the population was foreign-born. No state has a larger proportion of Germans; these live chiefly in Milwaukee (*q.v.*), the largest city. Racine and Sheboygan, also Lake Michigan ports, Lacrosse (Mississippi port), Oshkosh and Eau Claire in interior, are all larger than Madison, the capital; ten others exceed 8000. Forests still cover nearly half the state, and their pines, aided by demand of sparsely wooded states SW., make sawed lumber second product, surpassed by two states only. Excluding forests and northern high ground, most of the soil is fairly fertile. Hay, oats, corn, and barley are the chief products. The state ranks third in oats and rye, second in hops, and first in barley. The last two furnish material for malt liquor, the fifth manufacture, brewed chiefly in Milwaukee. The chief live stock are horses, milch cows (only five states have more; yielding dairy products, third state for cheese), and oxen (material for Milwaukee meat-packing, fourth industry). Important lead ores, accompanied by zinc, are mined in SW., and the N. elevation is a continuation of the rich mineral ranges of Michigan. In iron ore production, red hematite chiefly, Wisconsin was fifth in 1890, seventh in 1893. It is seventh also in iron and steel, third manufacture. Area, 56,040 sq. m. P. 1,686,900. See **United States,** table. [**W. S.**].

Wisconsin, riv., U.S., Wisconsin. It issues from Vieux Desert Lake on the Michigan frontier, and flows on the whole S. past Merrill Wausaw, Stevens Point, and Portage, and then WSW. to the Mississippi, which it joins about 3 m. S. of Prairie du Chien, just to the S. of 43° N. Navigable by small steamers to Portage, 200 m. By a canal in connection with the Fox R., it allows of steamboat navigation to Lake Michigan. There are several cataracts, including the famous Dalles, about 20 m. above its change of direction, where it flows for about 6 m. between sheer walls of curiously cut sandstone.

Wise, co. U.S., Texas, in the N., N. of 33° N., to the E. of 98° W.

Wise, co., U.S., Virginia, in the SW., on the W. frontier, crossed by 37° N.

Wiseman's Ferry, postal-stn., New South Wales, Cumberland co., on Hawkesbury R., in 33° 17′ S., 151° 2′ E. P. <1500.

Wiseton, par., Eng., Nottinghamshire, Bassetlaw div., 6 m. W. Gainsborough. P. <250.

Wishart, settlement, Canada, dist. Assiniboia, 75 m. NNE. Regina, at the foot of the Big Touchwood Hills.

Wishart, Bismarck Archipelago. See **Fischer Island.**

Wishaw, par., Eng., Warwickshire, div. and 6 m. SSW. Tamworth, 3½ m. E. Sutton Coldfield, P.O. P. <250.

Wishaw, market-tn., Scot., Mid Lanarkshire, 3 m. ESE. Motherwell, with two stns. (**South** and **Central**) on the C. R.; has large collieries, blast-furnaces; large iron and steel works. Market-day, Th. P. (including **Cambusnethan** and **Craigneuk**) 15,300.

Wishford, Great, par., Eng., Wiltshire, Wilton div., on the Wily, 5½ m. NW. by W. Salisbury, with a stn. (**Wishford**) on the G. W. R., PM.O. (**Wishford**). P. 500.

Wiske, riv., Eng., Yorkshire, N. Riding, rising in the SW. of the Cleveland div., and flowing W. and S. through the divs. of Richmond and Thirsk and Malton, to the Swale, which it joins on the l. bk. 1 m. above Holme.

Wisla, Polish name of the riv. **Vistula.**

Wisley, par., Eng., Surrey, Chertsey div., 6½ m. NE. by N. Guildford, 3 m. SSW. Weybridge stn. P. <250; eccles. par, (**Wisley with Pyrford**) P. <750.

Wislock, riv., Austria, Galicia, rises on the N. slope of the Eastern Beskides, flows NW. and NE., passing Rzeszou, and enters the San (trib. of the Vistula) 15 m. NW. Jaroslaw. Length, 93 m.; area of basin, 2854 sq. m.

Wisloka, riv., Austria, Galicia, rises on the N. slope of the Eastern Beskides, flows N., and joins the Vistula in about 21° 25′ E. Length, 84 m.

Wismar, tn., Ger., Mecklenburg-Schwerin, circle Wismar, on the coast, 18 m. N. Schwerin. Depth at entrance to harbour, and at quayside, 16½ ft. Manufactures copper and brass wares, fire-engines, &c., and has iron and bell-foundries. The town has beautiful grounds on the site of former fortifications. The church of St. Mary, dating from 1339, has a tower 280 ft. high. Wismar was made a town in 1229, and later became an important Hanse town. From 1648 to 1803 it belonged to Sweden. P. (1890) 6000; (1870) 16,800.

Wisnicz-Nowy, tn., Austria, crownland Galicia, dist. Wisnicz. P. <4000.

Wisowitz, tn., Austria, Moravia, 38 m. SE. Olmütz; manufactures paper and cloths. P. <3000.

Wisper, small riv., Prussia, prov. Hesse-Nassau, flows SW. into the Rhine below Rüdesheim; not navigable.

Wisp Hill, mt., Scot., Dumfriesshire, on E. border, 8 m. N. Langholm. Alt. 1950 ft.

Wispington, par., Eng., Lincolnshire, E. Lindsey div., 13 m. SW. by S. Louth, 4 m. WNW. Horncastle. P. <250.

Wissant, tn., France, dep. Pas-de-Calais, arr. and 11 m. N. by E. Boulogne, on the North Sea; a small fishing port and sea-bathing resort. In the Middle Ages Wissant was a very active port; here the English armies frequently landed during the Hundred Years' War. P. <2000.

Wissek, tn., Prussia, prov. Posen, 37 m. W. Bromberg. P. <2000.

Woolwich, par. and garrison tn., and formerly a naval port, Eng., Kent, on the Thames, comprised within the limits of the co. of London, 8 m. ESE. St. Paul's, with two stns. (**Woolwich Arsenal** and **Woolwich Dockyard**) on the SE. R. and G. N. & SE. R. The town, about 1 m. in length, is on an elevated site, separated from the Thames by the dockyard and arsenal. The dockyard, now closed, is the most ancient in the kingdom, and is upwards of 1 m. in length. Ships were first built here in Henry VII.'s reign. Woolwich has the largest arsenal in Britain, transferred from Moorfields, 1716, covering more than 350 ac., and containing carriage, gun and torpedo factory, laboratory, saddlery, and ordnance departments, besides an immense supply of war-like stores. It is the headquarters of the royal horse and foot artillery, for whom there are extensive barracks; the royal engineers and other corps are also located here. It is the seat of a royal military academy, and has a military museum, the Rotunda. Woolwich returns one member to Parliament. Woolwich Common serves as a review ground. The free ferry established by the London County Council communicates with N. Woolwich, situated in Essex. Par. P. 40,800; parl. bor., embracing Woolwich, Plumstead, Eltham, &c., P. 99,000.

Woolwich, tn., U.S., Maine, Sagadahoc co., on Kennebec R., 49 m. by rail SW. Rockland; ice extensively shipped here. P.<1500.

Woolwich Green, vil., Eng., Kent, St. Augustine div., 7 m. NW. Dover, 1½ m. NW. by W. Shepherd's Well stn.

Woolwich, North, eccles. par., Eng., Essex and London, part of East Ham par., on the G. E. R. and L. & l. D. R.; has extensive manufactures of telegraph cables. P. 7100.

Woomargama, postal-tp., New South Wales, Goulburn co., 25 m. NE. Albury. P.<1500.

Woonasquatucket River, U.S., Rhode Island, flows on the whole SE. into Providence Harbour.

Woongarra, vil., Queensland, Cook co., 6 m. from Bundaberg by road and rail; in a sugar-growing dist.; coffee is also cultivated. The Sloping Hummock Mt. is in the neighbourhood. P.<1500.

Worbis, tn., Prussia, prov. Saxony, 20 m. W. by S. Nordhausen, cap. circle Worbis. P.<2000.

Worcester, tn., Cape Colony, cap. dist. Worcester, 60 m. ENE. Cape Town, on the railway to Kimberley. Near it are the remarkable thermal springs of Brandvlei ('fire lake'), where the water wells out from the ground over an acre measuring 300 by 10 yards at a temperature of 145° F. Alt. 780 ft. Mean temp. (15 yrs.), yr. 62.7° F., Jan. 72.0°, July 52.8°; mean annual rfall. (17 yrs.), 13.62 in. P. 5400.

Worcester, episcopal city, parl. and mun. bor. (since 1189), co. bor., and market-tn., Eng., Worcestershire, on the Severn, l. bk., 112 m. NW. London (120 m. by rail), on the M. R. and G. W. R. The principal object and ornament of the city is the cathedral (see established in A.D. 780), finished 1216, cruciform,

with tower 162 ft. high. Other buildings are the grammar-school (founded 1541); the Guildhall, a handsome Italian structure; the Shire Hall, Ionic with pillared portico. The Severn is crossed by a bridge of five arches. There was a British town here, and remains of the Saxon and Norman periods still exist. The name is mostly Saxon, a corruption of *Hwicwara-ceaster*, 'the castle of the men of Hwic,' so called from the Huiccii, the early Celtic inhabitants. At Worcester, alternately with Hereford and Gloucester, occurs every three years the musical festival of the 'Three Choirs.' There are several distinguished schools. The Natural History Museum is important from size and completeness. The see of Worcester includes the cos. Worcester and Warwick, with portions of others; revenue, £5000. The leading industries of the town are the manufacture of porcelain (the Royal Works occupying 5 ac.), gloves (Worcester being the chief seat of that manufacture), railway signals, 'Worcester sauce,' vinegar, and chemicals. P. (1801) 11,400; (1851) 27,500; (1871) 33,300; (1891) 42,900.

Worcester, city, U.S., Massachusetts, Worcester co., situated in the valley of the Blackstone R., and on the enclosing hills, 36 m. SW. Lowell, and 44 m. W. Boston. The town is noted for its schools and manufactures. Chief industries, manufacture of machines and machinery, metals and metallic goods, boots and shoes, food preparations, woollen and worsted goods (including carpets), and musical instruments. There are eleven parks, in one of which stands the soldiers' monument. Seat of Clerk University. Among the public buildings are those of the American Antiquarian Society and the Free Public Library (each with 100,000 vols.). Worcester was permanently settled 1713. P. (1800)<3000; (1860) 25,000; (1870) 41,100; (1880) 58,300; (1890) 84,655.

Worcester, co., U.S., Maryland, in the extreme SE., on the coast.

Worcester, co., U.S., Massachusetts, crossed by 72° W.

Worcester, vil., U.S., New York, Otsego co., 52 m. W. Albany. P.<1500.

Worcester Park, residential suburb of London, Eng., Surrey, Epsom div., 11 m. SW. by S. St. Paul's, London, adjoining Wimbledon, on the L. & SW. R., PMT.O. See **Malden.**

Worcestershire, inland co., Eng., in the basin of the Severn, which traverses it from N. to S., with 5 parl. divs., as in the following table:—

	Acres.	P. 1891.
Western, or Bewdley . . .	154,155	52,012
Southern, or Evesham . . .	165,074	49,538
Mid, or Droitwich . . .	80,517	48,745
Northern	20,725	58,439
Eastern	50,568	59,356
Parl. bors.[1]	9,521	145,670
Total[2] . . .	480,560	413,760

[1] Which include Kidderminster and Worcester, and parts of Birmingham and Dudley.

[2] The administrative county, which excludes the part of Birmingham within the limits of the ancient county, and includes part of the urban sanitary dist. of Redditch, has an area (including co. bors.) of 480,342 acres, and a population of 385,309.

Besides the Severn, the county is traversed by the Stour, Teme, and Warwickshire Avon; and local divs. of the county are the Vale of Worcester, along the Severn, and the Vale of Evesham, along the Avon. In NE. a small strip belongs to the Trent basin. Chief heights are the Malvern Hills, in SW. (highest point, Worcestershire Beacon, 1440 ft.); the Clent Hills, in E.; and in the S. the Bredon Hills, part of the Cotswold range. The geological strata are mostly Triassic, with black shales over sandstone, and Silurian to W. of the Malverns. The Cambrian system appears in the W., and the Carboniferous system with the coal-measures in the NW., near Forest of Wyse. Red marls and Triassic sandstones distinguish some three-fourths of the area of the county. This county is noted for its fruit, vegetables, and hops; the orchards occupied 4 per cent. of total area in 1893, a much larger proportion than in any other county; and market-gardens form a pleasing feature. For agricultural statistics, see **Appendix,** pp. 7–9. There is great mineral wealth in coal, iron, and salt; large quarries of limestone and freestone; hardware works at Halesowen; needles at Redditch, &c.; aluminium works at Oldbury, Birmingham. The county town is noted for porcelain, Kidderminster for carpets. Droitwich has produced salt from the Roman period till now. Salt is also extracted at Bromsgrove. Dudley is a town of coal-mines and iron-works in a detached part of the county amidst the Black Country of S. Staffordshire, a region which extends into Worcestershire proper, coal being mined also at Stourport, Oldbury, Netherton, Bewdley, Lye, Cradley, Stourbridge, Halesowen. This country was but forest and jungle in the Roman period, but in 7th century the English added it to Mercia, and soon the see of Worcester was created and the first bishop appointed to bear rule in civil as well as ecclesiastical matters. In 1265 Earl Simon de Montfort was defeated at Evesham. In 1471 the Lancastrians were defeated at Tewkesbury. During the Civil War this county suffered greatly owing to its royalist bias, and here in 1651 the troops of Charles II. received their complete and final defeat from Cromwell. Instead of twelve this county since 1885 returns eight members to Parliament, including one from each of the boroughs of Worcester, Dudley, and Kidderminster; other mun. bors. are Bewdley, Droitwich, and Evesham. The county is in the diocese of Worcester and Hereford. See **England,** table.

Worcestershire Beacon, hill, Eng., Worcestershire, overlooking Great Malvern on the W. Alt. 1395 ft.

Wordesley, vil., Eng., Staffordshire, Kingswinford div., 4 m. SW. by W. Dudley, 1 m. W. Brettle Lane stn.

Wordieboluc, tn., Victoria. See **Wensleydale.**

Workington, mun. bor. (since 1888), par., seapt., and market-tn., Eng., Cumberland, Cockermouth div., at the mouth of the Derwent, in the diocese of Carlisle, 7 m. N. Whitehaven, with stns. on the L. & NW. R. and the Cleator and Workington Rlys. As a seaport it has long been of importance. In the 16th century it was the chief port on this coast. Its harbour, sheltered by a breakwater, is partly tidal, with depth of 12 to 18 ft. at high water ordinary spring tides, and 2800 ft. of quayage. Lonsdale Dock, 4½ ac. in extent, has a depth on sill of 10 ft. at high water lowest neap, and 19½ ft. highest spring tides. The town has extensive coal-mines, important iron and steel works, and other industries. Mun. bor. P. (1801) 5700; (1871) 9980; (1891) 23,500.

Worksop, par. and market-tn., Eng., Nottinghamshire, Bassetlaw div., 12 m. N. by E. Mansfield, on the Chesterfield Canal and the M. R. and M. S. & L. R.; manufactures agricultural implements, railway sleepers, &c. Alt. 127 ft. Market-day, W. Mean rfall. (1866–80), yr. 25.6 in. 17,935 ac. P. 12,700.

Wormley, par., Eng., Hertfordshire, div. and 5½ m. SSE. Hertford, on the Lee, PMT.O. P. <1000.

Wormley, P.O., Eng., 1 m. from Witley, Surrey.

Worms, tn., Ger., Hesse, cap. circle Worms, prov. Rhenish Hesse, on l. bk. of Rhine, 20 m. SW. Darmstadt. Its most notable building is the (restored) Romanesque cathedral, dating from the 12th century. Other structures of moment are the Romanesque church of St. Paul (12th century), with an antiquarian museum; the church of Our Lady (Liebfrau), finished in 1467, outside the walls (which in part still stand)—around it is grown the Rhenish wine known as *Liebfrauenmilch*; the Luther monument (1868), designed by Rietschel; the hospital; and the town-hall. The old episcopal palace, in which the German diets met, and in which Luther defended himself in 1521, is now the lower storey of a private house. The Jewish burial-place possesses some remarkable ancient inscriptions. The manufactures embrace patent leather goods, artificial wool, machinery; and the town is a busy river-port. It is one of the oldest cities in the empire. In the time of Ariovistus it was a German chief's residence; and was fortified by the Roman general Drusus in 14 B.C. In the 5th century it was wrested from the Romans by the Burgundians and made their cap. The Frank sovereigns also (*e.g.*, Charlemagne) made it one of their residential cities. Early in the 11th century it fell under the rule of the bishop; but in 1074 was privileged to account itself a free imperial city, and as such it remained down to 1801. Here in 1122 was signed the agreement (*concordat*) between Pope Calixtus II. and the Emperor Henry V. which put an end to the investiture dispute; and here, at a diet held in 1495, the 'Perpetual Peace' was proclaimed by Maximilian I., with the intent to put a stop to the incessant feuds of the feudal nobility; and here, at another diet held in 1521, Luther made his celebrated defence before the assembled magnates of the empire. Worms was taken during the Thirty Years' War by the Swedes, the Imperialists, and the French, and was burned to the ground by the last named in 1689. Between 1801 and 1814 the city was in the hands of the French, who had once more seized it in 1792. Worms is the scene of stirring events related in the great epic, *Das Nibelungenlied*, and figures also as the scene of more than one of the mediæval legends of chivalry (*e.g.*, Eginhard and Emma, daughter of Charlemagne). P. (1815) 6250; (1871) 14,500; (1890) 25,500.

Worms Head, cape, Wales, in the W. of Glamorganshire, at the end of a small island 18 m. W. by S. Swansea.

Wormshill, par., Eng., Kent, Medway div., 7 m. E. Maidstone, 3 m. NE. by E. Hollingbourne stn., P.O. P. <250.

Wunsiedel, tn., Ger., kgd. Bavaria, govt. Upper Franconia, circle Wunsiedel, 20 m. ENE. Bayreuth, in the Fichtelgebirge; manufactures hosiery, agricultural and electrical dynamo machinery, mineral dyes, &c. In the vicinity are quarries of granite, sienite, limestone, marble, and soap-stone. Wunsiedel is the birthplace of Richter (Jean Paul), 1763. Alt. 1742 ft. P.<4000.

Wunstorf, tn., Ger., prov. and 13 m. W. by N. Hanover, circle Neustadt. P.<4000.

Wuntho, Shan chiefship in Upper Burma, NE. of Mandalay, brought under British administration in 1891; rich auriferous quartz reported.

Wunyamyanga, country on the N. frontier of Brit. S. Africa, between Lakes Tanganyika and Nyassa, between about 32½° and 33° E.

Wupper, riv., Prussia, Rhine Prov., winds NW. then SW. past Barmen and Elberfeld, and enters the Rhine a few miles below Cologne; not navigable.

Wupperthal, settlement, Cape Colony, dist. and 22 m. ESE. Clanwilliam, 64 m. SW. by S. Calvinia.

Würbenthal, tn., Austria, Silesia, on riv. Oppa, 23 m. WNW. Troppau; manufactures linens and iron wire; has an acidulated mineral spring. In the vicinity are iron-mines and an astronomical observatory. P.<3000.

Würm, Lake, Ger., kgd. Bavaria, govt. Upper Bavaria, 13 m. SW. Munich; 13 m. long, by 1–2½ m. broad.

Wurnu, tn., central Sudan, kgd. and 15½ m. NE. Sokoto, of which it is the present cap.; occupies a fine position on an isolated rock 130 ft. high. To the N. is the riv. Gulbi-n-Rima or Gulbi-n-Sokoto. P.<2000.

Würselen, vil., Prussia, Rhine Prov., circle and 4 m. NNE. Aix-la-Chapelle. P. (comm.) 8400.

Wursten, dist., Prussia, prov. Hanover, stretching about 15 m. N. from the mouth of the Weser.

Würtemberg, kgd., Ger., lying between Bavaria (E.) and Baden (S., W., and NW.), and touching the Lake of Constance in the S.; divided into the four circles Neckar, Schwarzwald (Black Forest), Jagst, and Donau (Danube). The separate principality of Hohenzollern, an oblong strip of terr., penetrates towards the middle of Würtemberg from the S.

In extent, Würtemberg is the third largest of the states comprised within the German Empire, though somewhat less than the combined area of Yorkshire and Lancashire. Fifty miles of the W. frontier fall within the limits of the Black Forest (loftiest alt., part of Hornisgrinde, 3820 ft.). From the SW. corner of the country stretches in a NE. direction the chain of the Rauhe Alb or Swabian Jura (highest point, 3327 ft.). S. of this last range and parallel to it flows the Danube, and between the Danube and the Lake of Constance is a plateau region (1900 ft. to 2450 ft.), bounded E. by the Iller, which runs up to the Adelegg (3668 ft.), an outlier of the Alps, in the extreme SE., and falls away northwards to the Danube (1522 ft. at Ulm). On the N. side of the Alb, Würtemberg is a region of fertile plateaux (1000 ft. to 2400 ft.) and valleys, watered by the Neckar and its tribs. (the Filz, Rems, Murr, Kocher, Jagst, Eschach, Nagold, Enz, Zaber), and by the Tauber (NE.), an affluent of the Main, and sinking as a whole in altitude towards the NW. (500 ft.). Würtemberg enjoys a temperate climate, the yearly mean in the valley of the Neckar being 45°–50°, and in the mountainous parts about 40° F. Nearly one-half of the surface is devoted to agriculture (vine, fruit, rye, maize, pease, lentils, spelt, oats, wheat, barley, potatoes, beetroot, chickory, flax, hops, tobacco, turnips, vetch, cabbage, &c.); about one-fifth consists of meadows and grass; and nearly one-third is covered with forests (principally *Coniferæ* and beech). The wine, fruits, and spelt of Würtemberg are especially celebrated. The keeping of cattle, sheep, horses, and swine constitutes an important branch of industry. Salt and iron are the only minerals of importance, the former extracted at Heilbronn, Hall, Friedrichshall, Wilhelmshall, and Sulz. Turf is pretty widely distributed. The manufactures embrace gold and silver work, cast-iron goods, cutlery, arms, ironmongery, machinery (Esslingen), bell-casting, mathematical instruments, musical instruments (including organs, pianos, and musical boxes), roofing-tiles, cement, glass, chemicals, wood-carving and allied trades, toys, paper, printing (Stuttgart), cottons, silks, woollens, linens, embroidery, beer, flour, confectionery, &c. Stuttgart is the principal centre of publishing in S. Germany. Nearly one-half of the population are engaged in these and other industrial pursuits all over the country, though the principal seats are Stuttgart, Esslingen, Heilbronn, Gmünd, Reutlingen, Kanstatt, Ulm, Tuttlingen, Ludwigsburg, Blaubeuren, Schramberg, Heidenheim, Göppingen, and Ebingen. An active trade is carried on, even with distant parts of the world; the most important trading-centres are Heilbronn, Friedrichshafen (on Lake of Constance), and Ulm on the borders, and Stuttgart in the centre. In addition to the navigable Neckar and Lake of Constance, the country is served by 1000 to 1500 m. of railways and by excellent roads, most of the railways being state property. The government rests in the hands of a hereditary constitutional monarch, assisted by a ministry of six members and a privy council, and by two legislative chambers —that of the Magnates, partly hereditary, partly nominated by the sovereign, and that of the People's Representatives (70), with certain *ex-officio* and class delegates. Würtemberg sends seventeen members to the German *Reichstag* (diet), and has four votes in the Federal Council. The people are mostly descendants of the ancient Alemanni and Suevi (Swabians). The educational status of Würtemberg stands praiseworthily high, attendance at school being compulsory upon all children between seven and fourteen years of age. There is a university at Tübingen, an excellent polytechnic at Stuttgart, an agricultural college at Hohenheim, a conservatory of music at Stuttgart, and numerous good technical and special colleges. Stuttgart, the cap., has a population approaching 150,000; and there are ten other towns with populations between 10,000 and 50,000. The second town of the kingdom in point of size is Ulm (36,000). The earliest historical inhabitants of Würtemberg were the Suevi, who were subdued by the Romans in the 1st century. In the 3rd century the country was conquered by the Alemanni, in the end of the 5th by the Franks, and in the 9th it was incorporated in the duchy of Swabia, one of the great divisions of the empire. The county house of Würtemberg was founded in the 12th century, and in the end of the 15th advanced to the ducal dignity. Duke Ulrich, the most striking personality amongst the dukes, provoked the hostility of his peasantry as well as of the neighbouring princes, but lived to introduce the Reformation into his state. Würtemberg suffered severely during the Thirty Years' War. In 1802 the duke threw in his lot with the French, and was rewarded by a large accession of territory, and the title of Elector, exchanged in 1806 for the higher title of King. In 1866 Würtemberg sided with Austria against Prussia, but five years later joined the German Empire. See **German Empire,** table. [**J. T. B.**]

Würzburg, tn., Bavaria, cap. of administrative division of Lower Franconia, on the riv. Main, 60 m. E. by S. Frankfort-on-Main. Its memorable buildings include the cathedral, founded 842, rebuilt 1042; the handsome Mary chapel (14th to 15th centuries), in the Gothic style; the Romanesque church of St. Burkard (11th century); the Haug church, in the Italian Renaissance style (1670–91); the New Minster church, which contains the grave and a monument to the mediæval poet Walter von der Vogelweide (died 1230); the royal castle (1720–1744), formerly residence of the prince-bishops of Würzburg, an imitation of the Versailles Palace; and the university, founded originally in 1403, but refounded in 1582, with a celebrated medical school, the excellently equipped Julius Hospital (1576), an observatory, and library of 200,000 vols. The town is overlooked by the fortress of Marienburg, built on the site of a Roman fort and fortified in 1203; it was the residence of the bishops down to 1720. In the vicinity of the town is a pilgrimage church on the summit (1162 ft.) of the Nickolausberg. Würzburg is a busy manufacturing centre; the principal objects of industry are tobacco and cigars, mathematical and musical instruments, wine, printing-presses, machinery, playing-cards, gold braid, railway carriages, and various others. There is an active trade in wine, fruit, coal, and timber; considerable quantities of both wine and fruit being grown in the neighbourhood. Würzburg dates from the 7th century. The bishopric was founded in 741 by St. Boniface. In the 10th century the town was surrounded by walls; it was further fortified in 1650, and remained a fortress until 1866. Several imperial diets were held here during the Middle Ages. In 1525 Würzburg fell into the hands of the revolted peasants, and in 1631 was occupied by Gustavus Adolphus of Sweden. Marshal Jourdan, in command of the French Republicans, suffered a defeat under its walls in 1796 at the hands of the Archduke Charles of Austria. Würzburg passed to Bavaria in 1803, and was bombarded and occupied by the Prussians in 1866. Alt. 594 ft. P. (1871) 40,000; (1890) 61,000, of whom 47,500 are Roman Catholics.

Wurzen, or **Wurzen in Sachsen,** tn., Ger., kgd. Saxony, circle and 15½ m. E. by N. Leipzig, dist. Grimma. P. (1834) <4000; (1890) 14,600.

Wushan-hsien (or **hien**), tn., China, in the E. of Süchwan, on the l. bk. of and at the most northerly part of the curve of the Yangtse-kiang between Ichang and Chungking, in 110° 13′ E.; gives name to the Wushan gorge, 20 m. long, the longest on the navigable part of the river.

Wushek, tn., central Sudan, in the N. of Munio, a vassal state of Bornu, in about 14° N., 10° E.

Wuso-ling, or **Usha-ling,** pass, China, Kansu, over a spur of the Nan-shan range, to the S. of Liangchou. Alt. 9900 ft. (10,080 ft., Michaelis). See *Proc. R. G. S.*, 1890, p. 71.

Wusterhausen, or **Wusterhausen an der Dosse,** tn., Prussia, prov. and 34 m. N. Brandenburg, circle Ruppin. P. <4000.

Wycombe (wik'am), par., Eng., Buckinghamshire, Wycombe div., 11½ m. NW. by N. Windsor. P. <5000.

Wycombe, Chipping (or **High**), civic par., mun. bor., and eccles. par., Eng., Bucks, adjoining the parish of Wycombe (the whole of which is included in the mun. bor.), with stns. (**High Wycombe** and **West Wycombe**) on the G. W. R., 29 m. by rail from London, near the base of the Chiltern Hills. It is an old town. In 1774 a tesselated pavement was found near, along with a large number of Roman coins, some of Antoninus Pius and Marcus Aurelius. It was governed by a mayor as early as the time of Henry III., though it did not receive its charter of incorporation till the reign of Henry VI. Till 1867 it sent two members, and till 1885 one member, to Parliament. It has a free grammar-school and almshouses, originally founded out of funds belonging to the Hospital of St. John, in the town, but confiscated by the crown at the dissolution of the monasteries, now under the management of the corporate charity trustees. It has barracks, and in the 18th century had a branch of the Royal Military College, afterwards removed to Sandhurst. Formerly it carried on lace-making and straw-plaiting, but now the making of chairs is the staple industry. Alt. 225 ft. Mean rfall. (1866-80), yr. 26.7 in. Market-day, F. Par. 6266 ac., P. 11,400; mun. bor. 687 ac., P. (1801) 2350; (1851) 4200; (1891) 13,400; eccles. par. (**High Wycombe**) P. (1891) 14,400; parl. div. (**Wycombe** or **South Division**) P. (1891) 66,900.

Wycombe, West, par., 2½ m. WNW. Chipping Wycombe, PT.O.; 6533 ac. P. <3000.

Wycombe Marsh, P.O., 2 m. from High Wycombe, Buckinghamshire, Eng.

Wyddial, par., Eng., Hertfordshire, Hitchin div., 12½ m. N. by E. Hertford, 1½ m. N. Buntingford stn. P. <500.

Wye, riv., Eng., in the NW. of Derbyshire, flows SE. past Bakewell to the riv. Derwent, which it joins on the l. bk. at Great Rowsley.

Wye, par., Eng., Kent, div. and 4 m. NE. by E. Ashford, on the Stour, on the SE. R., with a bridge over the Stour. The church was rebuilt by Archbishop Kempe, and dates from the time of Henry VI. The college, founded in 1431, but suppressed in 1534, was in 1893 appropriated for the South-Eastern Agricultural College, endowed by the county councils of Kent and Surrey. PMT.O. 7349 ac. P. <1500.

Wye, riv., Eng. and Wales, rises on the S. side of Plinlimmon, co. Montgomery, near the source of the Severn, flows mostly SE. through a part of Radnorshire, and between the cos. Radnor and Brecon, intersects the co. Hereford near its centre, below Hereford turns S., and after separating the cos. Gloucester and Monmouth enters the estuary of the Severn 2 m. S. Chepstow, which town with Hereford, Monmouth, Ross, Hay, Builth, and Rhayader are on its banks. Principal affluents, l. bk. the Luff and Ithon, r. bk. Caerwen and Irfron. Total course, 130 m.; navigable for large vessels to Chepstow, for vessels of 40 tons burden to Hereford (70 m.), and to Hay (100 m.) for small craft; but its navigation is often interrupted by its shallowness or rapidity. Its course in Herefordshire is renowned for beauty. It is connected with the Severn by a canal from Hereford to Gloucester, and has a valuable salmon fishery. The rise of the tide at the mouth of this river, amounting at Chepstow to 46 ft. at the highest spring tides, is believed to be greater than anywhere else except Fundy Bay.

Wye, riv., U.S., Maryland, an arm of Chesapeake Bay, extending for some distance between Talbot and Queen Anne counties.

Wyersdale, Nether and **Over,** two adjoining pars., Eng., Lancashire, on the riv. Wyre, div. and 6–7 m. SE. Lancaster. Nether Wyersdale, 4229 ac., P. <1000; Over Wyersdale, 17,319 ac., P. <750.

Wyoming, vil., Canada, Ontario, Lambton co., 44 m. W. London, on a railway. P.<1500.

Wyo'ming, one of the United States, admitted 1890, a rectangular portion of the Rocky Mts., whence a small rectangle in the NW. has been set apart by the Federal Government as the Yellowstone National Park (*q.v.*), leaving Wyoming a little larger than Great Britain, bounded W. by Idaho, N. by Montana, E. by S. Dakota and Nebraska, S. by Colorado, SW. by Utah. Only Arizona and Nevada have a smaller population. Cheyenne (P. 11,700), the cap., in the SE., the most populous region, is the only city exceeding 8000. Since 1870 women have possessed equal right with men to vote and take office. The surface is a plateau, with an average elevation exceeding 6000 ft. From this level the higher portions of the mountains rise in ridges and hill groups. S. are the Laramie Hills, connected by Seminole and Green Mts., running W., with loftier Wind R. and Shoshone Mts. (Fremont's Peak, 13,570 ft.), running NNW. to the Yellowstone region. The Big Horn Mts. are N., and the Black Hills NE. Between these high grounds are rivers of corresponding names running to the Pacific, Atlantic, and Great Salt Lake. The rivers are not navigable, but furnish power and water for irrigation. The rainfall is slight; the air dry, clear, and rare; the summer short and cool; the winter long and severe [**Cheyenne**]. Pine forests clothe the higher ground to 10,000 ft. with fine timber, little used. Perhaps one-sixth of the soil is capable of cultivation under irrigation. Farm products are unimportant, but there is much natural grazing. The raising of cattle, sheep, and horses is the chief occupation. Wyoming has a very varied geology; minerals abound, but are little worked. Iron, gold, tin, soda, and salt are possibly capable of development. Petroleum is known to be abundant, but the distance of markets prevents working, and the bores made have been plugged. Coal exists over an area of 4000 sq. m., and is worked extensively along the line of the Union Pacific RR. The yield increases steadily, doubling from 1887 to 1891, in which year but seven states surpassed Wyoming in value of coal mined. Area, 97,890 sq. m. P. 60,700. See **United States,** table. [**W. S.**]

X

Xaintois, dist., France, dep. Vosges.

Xaintrie, dist., France, formerly in Bas-Limousin, now in dep. Corrèze; is a plateau, 1640–2460 ft. high, between the l. bk. of the Dordogne and its trib. the Cere.

Xala, municip., Mexico, Hidalgo, 100 m. NE. by E. Mexico.

Xalanga, settlement, Cape Colony, dist. Tembu-land, 80 m. SE. Aliwal North.

Xaltocan, lake, Mexico, in the 'valley,' 15½ m. NNE. Mexico, N. of Lakes Texcuco and San Cristobal. In times of inundation the waters of this lake, prior to the construction of a recent drainage tunnel, used to be a menace to the city; it is almost always dry, being in reality only a large pond without depth; its area varies according to the year and seasons.

Xalucingo, vil., Mexico, Vera Cruz, 125 m. NE. Puebla.

Xanten, tn., Prussia, Rhine Prov., 33 m. NNW. Düsseldorf, circle Mörs. P. <3000.

Xanthi, Turkey in Europe. See **Eskije.**

Xanthos, site of ruins, Asia Minor, N. of Günek, on l. bk. of the Eschen-Cai, about 8 m. above its mouth, in about 36° 20′ N.

Xaragua, another name for Enriquillo, lake, Haiti.

Xarayes, region, Brazil, on l. bk. of riv. Paraguay, between 16½° and 17½° N.; is subject to frequent inundations.

Xaultegua, large gulf, S. Chile, running E. from the W. end of the Strait of Magellan, in 53° S.

Xavier, isl., off the coast of Chile, just S. of 47° S.

Xenahu, or *Xelaluh,* tn., Guatemala. See **Quezaltenango.**

Xenia, vil., U.S., Illinois, Clay co., 85 m. E. St. Louis (Mo.). P. <1500.

Xenia, vil., U.S., Indiana, Miami co., 55 m. N. by E. Indianapolis. P. <1500.

Xenia, city, U.S., Ohio, cap. Greene co., 55 m. WSW. Columbus; seat of the Wilberforce University. Alt. 928 ft. (R.R.). P. 7300.

Xenil, riv., Spain. See **Jenil.**

Xerez de la Frontera, comm., Spain. See **Jerez de la Frontera.**

Xerokhorion (ksirokhori), tn., Greece, in the N. of Eubœa I., 33 m. SSE. Volo. P. <4000; comm. (Histiaia) P. 6700.

Xeros, Gulf of. See **Saros.**

Xertigny, vil., France, dep. Vosges, 36 m. NW. by N. Belfort, arr. and 10 m. SSW. Épinal. P. <2000.

Xieng, or *Xiang,* Portuguese spelling; in English spelling *Chieng;* in Chinese *Siang,* or *Kiang;* Laotian 'capital.' For all such places, see under **Chieng.**

Ximenez, tn., Mexico. See **Jimenez.**

Xingu, riv., central Brazil, formed by streams rising S. of the 14th S. parallel, in N. of the Matto Grosso plateau, and uniting a little N. of the 12th parallel. Below its confluence with the Ronuro and Kuluene it has a deep, rapid current, and a breadth of 1100 ft., and flows N., and in 10° S. leaping a rocky barrier at the cataract of Martius it becomes an impetuous torrent with foaming rapids and cascades, its width at places 6560 ft., again contracting suddenly to less than 655 ft., and bordered by hills of 985–1310 ft. About 3° 20′ S. the X. makes a sharp and sudden curve E. (the Volta). Here it receives on the r. bk. three trib. of some length—still unexplored—the Yema, Ilabagua, and Bacaja. On leaving the Volta the X. becomes navigable when it enters the Amazon plain (75 m. from its mouth). Running amongst numerous islands it spreads over a great width, and finally joins the Amazon in 1° 45′ S., forming a vast lake, in which the ocean tide is perceptible. Its blue waters appear black in contrast with the milky yellow of the Amazon water. Total length, 1300 m. It discharges into the Amazon 140,000 cubic ft. per second, its basin having an area of 152,000 sq. m.

Xirokhori, tn., Greece. See **Xerokhorion.**

Xochicalco, ruined Aztec fortress, S. Mexico, Morelos, about 140 m. S. Mexico, built on an isolated hill (385 ft. high) of blocks of basaltic porphyry, ornamented with hieroglyphics and figures in relief. The name means 'the castle of flowers.'

Xochimilco, tn., central Mexico, 12½ m. SSE. Mexico, on the SW. shore of Lake Xochimilco. P. (comm.) 12,700.

Xolotlan, lake, ancient native name of Lake Nicaragua.

Xoungs, settlement, Cape Colony, dist. Hopetown, 100 m. SSW. Kuruman.

Xuandai, bay, Annam. See **Shuandai.**

Xucar, riv., Spain. See **Jucar.**

Xul, vil., Mexico, Yucatan, 53 m. SSE. Mérida. P. 7000.

Xylokastron, maritime vil., Greece, prov. (nomos) Sihaia and Elis, 32 m. ESE. Vostitsa (Aigion).

Xyli, bay, Greece, on the E. shore of the Gulf of Laconia, in 36° 40′ N., partly sheltered on NW. by Cape Xyli.

Y

Y, inlet, Holland. See **IJ.**

Yaamba, tp., Queensland, Livingstone co., 20 m. NNW. Rockhampton. P. <1500.

Yaba, coast tn., W. Africa, Congo Free State, in 5° 45′ S.

Yabebyrí, vil., in the S. of Paraguay, near the Paraná, in 57° 20′ W.

Yablonovoi Khrebet, mts. See **Stanovoi Khrebet.**

Yabrud, or **Yebrud,** vil., Asiatic Turkey, prov. and 38 m. NNE. Damascus, 4 m. WSW. Nebk, on the road to Homs, between two calcareous ranges, with innumerable caves which serve equally as tombs or dwellings; seat of a bishop of the Greek United Church.

Yabucoa, vil., isl. of Porto Rico, SE. ct., 39 m. SE. by S. San Juan, in 65° 47′ W. P. 12,900.

Yacan Guazu. See **Capilla Borja.**

Yacarana, riv., S. America. See **Yavari.**

Yachi (in Marco Polo). See **Yünnan-fu.**

Yachi, or **Yatsi,** tn., Japan. See **Tanichi.**

Yachou-fu, tn., China, Süchwan, on the Ya-ho, 67 m. SW. Chengtu-fu, the centre of the brick-tea manufacture and of the tea-trade with Tibet. Alt. about 2600 ft. *Proc. R. G. S.,* 1886, p. 372; *Jour. R. G. S.,* 1878, p. 85; *Supp. Papers R. G. S.,* i. p. 193.

Yacka, post-tn., S. Australia, Stanley co., 84 m. SE. by S. Port Augusta. P. <1500.

Yackandandah, post-tn., Victoria, Bogong co., 9 m. ENE. Beechworth; has gold-mines. P. <1500.

Yacubia, or **Yagubia,** terr., Algeria, part of prov. and 100 m. SE. Oran, on the S. slope of the Tell; is an elevated region 3000–3700 ft. alt., with peaks 5300 ft. high. P. (comm.) 17,000.

Yacuma, *riv.,* Bolivia, a l. bk. trib. of the Mamore, which it enters in about 13° 15′ S.; navigable to within about 20 m. of Reyes. *Proc. R. G. S.,* 1881, p. 406.

Yadagiri, tn., India, Haidarábád, on a trib. of riv. Bhímá, 86 m. E. Bijápur.

Yádiki, tn., Brit. India, Madras, dist. Anantápur, in 15° 3′ N., 77° 55′ E. P. (1881) 6400.

Yadkin, co., U.S., N. Carolina, N. of 36° N., and E. of 81° W., bounded on N. and E. by Yadkin R.

Yadkin College, vil., U.S., N. Carolina, Davidson co., 6 m. NW. Lexington. P. <1500.

Yadrin, dist. tn., Russia, govt. and 155 m. W. Kazañ, on r. bk. Sura. P. <5000.

Yafa, seapt., Palestine. See **Jaffa.**

Yâfa, vil., Palestine, *Japhia* in the O. T., 32° 41′ N., 35° 16′ E., 1½ m. SW. Nazareth.

Yafforth, par., Eng., Yorkshire, N. Riding, div. and 11½ m. ESE. Richmond, 1½ m. WNW. Northallerton stn. P. <250. See **Danby Wiske.**

Yaga, dist., western Sudan; well wooded; grows cotton, indigo, and millet. The population are negro Gurmas, the chief living at Sebba, about 125 m. WNW. Say.

Yagami, seapt. tn., Japan, Kiushiu, 5 m. ENE. Nagasaki. P. 5300.

Yaghistan, region of NW. India and NE. Afghanistan, consists of the principality of **Yasin** in the N., and in the S. of the republics of the **Dards** (*q.v.*), and forms part of the Indus basin, between the riv. Kabul (SW.) and the Karakorum Mts. (NE.). Length, N. to S., 145 m.; greatest breadth, 105 m. P. probably about 300,000.

Yaguachi, riv., Ecuador, flows first S. under the name of the Chimbo [**Andes, B.**], then W. and NW., and enters the Rio Guayas; navigable by steamers all the year round to Yaguachi, about 7 m. from its mouth, in the rains to the confluence of the riv. Milagro.

Yaguachi, vil., Ecuador, 29 m. E. by N. Guayaquil.

Yaguajay, comm., Cuba, prov. Santa Clara. P. 6300.

Yaguaramas, tn., Cuba, 120 m. SE. by E. Havana.

Yaguaron, riv., on the NE. frontier of Uruguay, flows SE. into Lake Mirim.

Yaguas, Indian tribe, on the frontiers of Brazil, Colombia, and Peru, between the Amazon and the riv. Içá.

Yaguas, seapt., Cuba, S. ct., 20 m. ESE. Santiago de Cuba, in 75° 35′ W.

Yagubia, Algeria. See **Yacubia.**

Yahl, post-tn., S. Australia, Grey co., 4 m. SSE. Mount Gambier. P. <1500.

Ya-ho, riv., China, Süchwan, flows SE. and unites with the Tung-ho, just above Kiating-fu, in 29° 33′ N., 103° 57′ E.; navigation dangerous, so that few junks are to be seen upon the river; goods sent down on long narrow bamboo rafts.

Yaik. See **Ural.**

Yaila, mts., Russia, on S. ct. Crimea, beginning at Cape Kkersones and ending in Mount Babugan-yaila (5094 ft.) and Chatyr-dagh. S. slope covered with vineyards, summer-houses, and the town **Yalta.**

Yaitskiy Gorodok. See **Uralsk.**

Yakima, riv., U.S., Washington, rises in the Cascade Mts., and flows SE. into the Columbia, which it joins about 20 m. above the place where the river turns W. Its valley is irrigated, and is one of the most fertile in the state. The Y. traverses a region with important coal-mines. Length about 175 m.

Yakima, North, city, U.S., Washington, Y. co., 110 m. WNW. Wallawalla. P. <2000.

Yakla, pass leading across the Chola Range of the Himálayas, on the E. frontier of Sikkim, in 27° 22′ N., to the N. of **Yakla Lake,** in Chambi. Alt. of pass about 15,000 ft. *Proc. R. G. S.*, 1881, pp. 332–33.

Yakoba, tn., Africa. See **Yakubu.**

Yakobiye, tn., Asiatic Turkey, on the Diala, 40 m. NNE. Bagdad, on the road to Kirmanshah (Persia).

Yakobshtat (Jakobstadt, Lettish **Iehakaba Meests**), tn., Russia, Courland, 96 m. E. Mitau, on l. bk. W. Drina; ferry to the Jewish town Kreuzburg, on opposite bank. P. 7000.

Yakoma, stn., Congo Free State, in 4° 6′ N., 22° 40′ E., on l. bk. Ubangi, opposite mouth of Mbomu.

Yakubu, or **Yakoba,** tn., central Africa, Sokoto, 140 m. SE. Kano, in about 10° 20′ N., 9½° E.; superbly situated on a high and healthy plateau, in the midst of high wooded mountains, and divided into several quarters by fields, gardens, and small ponds. Alt. 2480 ft. P. 50,000.

Yakûk, ruins, Palestine, *Hukkok* in the O. T., 32° 53′ N., 35° 28′ E., 8 m. NNW. Tiberias.

Yakuno-shima, or **Yaku-shima,** isl., Japan, S. of Kiushiu, from which it is separated by the Strait of Van Diemen.

Yakutat Bay, large bay in Alaska, its mouth in 59° 30′–40′ N., crossed by 140° W.; navigation at all times difficult and dangerous, owing to its being directly exposed to the waves of the Pacific.

Yakutsk, prov., Russia, E. Siberia, including nearly the whole of the basin of the Lena, *i.e.*, nearly one-fifth of the Russian Empire, has the Arctic Ocean on N., Yeniseisk on W., Irkutsk, Transbaikalia, and Amur on S., and is separated from the Pacific (Sea of Okhotsk) only by the narrow Maritime Prov. Has in the SE. the Vitim plateau, 2500–3500 ft., with a border ridge 5000-6500 ft. high, fringed on NW. by a girdle of alpine tracts. Elevated plains 1000–1500 ft. in the NW. of both, a line drawn from the mouth of Vitim to the mouth of Aldan marking the approximate boundary between the two, and *tundras* in the N. The Arctic coast is indented by the bays of Borkhaya, Yana, Omulyakh, Kolyma, and Chaunskaya. Lyakhovskiye, Anjou, New Siberia, and De Long Is., and Wrangel's Land off the coast. Medvyezhiye Is. off the mouth of Kolyma. Watered by the Lena and its large tribs., Vitim, Olekma, and Aldan from right, and Vilyui from left. The Olenek enters the Arctic Ocean in the W. of the Lena, and the Yana, Indigirka, and Kolyma in the E. Climate extremely cold, the pole of cold of the Asiatic part of the N. hemisphere being at Verkhoyansk. At Yakutsk the average temperature of the three winter months is −40° F., and the soil is frozen for a depth of several hundred feet. Notwithstanding this severe climate, some barley, summer rye, and wheat and oats are reaped in the prov. Horses, cattle, and reindeer are kept, as well as several thousands of dogs for dragging sledges. Population chiefly Yakuts, with a few Tunguses (about 10,000), Yakagirs, Lamuts, and Chukchis. Russian settlers along the Lena and at the gold-diggings. The Yakuts (who call themselves *Sokhalar*) belong to the Turkish stem, and speak a Turkish dialect with an admixture of Mongolian words. The chief channel of communication is the Lena, upon which grain and all sorts of grocery and manufactured goods are shipped. The remainder are mere footpaths available as bridle-paths only during the summer. Divided into five dists.: Yakutsk, Olekminsk, Srednе-Kolymsk, Verkhoyansk, and Vilyuisk. There are no towns except Yakutsk. Area, 1,533,397 sq. m. P. (1892) 280,200.

Yakutsk, cap. of above prov., 62° 2′ N., 129° 44′ E., 1800 m. NE. of Irkutsk, on a l. bk. branch of the Lena, Khatystakh; great fair in July. Alt. 334 ft. Mean temp. (35 yrs., 1829–54, 1862–73), yr. 11.9° F., Jan. 45.0°, July 65.8°; mean rfall. (9 yrs.), yr. 13.7 in., June–Oct. 8.9 in. P. (1891) 6570.

Yala, tn. and mining dist., Malay Penin. See **Jala.**

Yalding, par., Eng., Kent, Tunbridge div., on the Medway, 5½ m. SW. Maidstone, 1 m. E. by S. of its stn. on the SE. R., PMT.O.; 6358 ac. P. <3000.

Yale, tn., Canada, prov. Brit. Columbia, on the C. P. R., about 121° 30′ W., 1379 m. by rail from Winnipeg, 103 m. from Vancouver; silver mined. P. <1500.

Yale, Mount, U.S., Colorado, 93 m. SW. by W. Denver, 25 m. S. Leadville. Alt. 14,187 ft. (Hayden); 14,263 ft. (Whitney); 14,121 ft. (Wheeler).

Yalesville, vil., U.S., Connecticut, co. and 14 m. NNE. New Haven. P. <1500.

Yale University, U.S., Connecticut. See **New Haven.**

Yali, small Turkish I., on the SW. of Asia Minor, 5 m. S. of Kos I.

Yalkhar, Kuh-i-, mt. group, NE. Persia, Khorassan, near the frontier of Afghanistan; highest point, 4735 ft.

Yalmal, large penin., Russia, Arctic Ocean, protruding from 68° to 72° 54′ N., between Kara Bay and Kara Sea on W., and Ob Bay on E.

Yâlo, vil., Palestine, *Ajalon* in the O. T., 31° 51′ N., 35° 1′ E., 13 m. WNW. Jerusalem.

Yalobusha, co., U.S., Mississippi, crossed by 34° N., and to the E. of 90° W.

Yalova, seapt. tn., Asia Minor, on the Sea of Marmora, 29 m. SE. by S. Constantinople.

Yalowaj, or **Yalovaj,** tn., Asia Minor, E. of the N. end of Lake Egerdir, 75 m. WNW. Konia (Konieh). Near it on the NE. are the ruins of Antioch of Pisidia.

Yalta, dist. tn., Russia, govt. Taurida, 57 m. S. Simpheropol, on S. ct. of Crimea and S. slope of Yaila Mts., 44° 30′ N., 34° 11′ N.; roadstead open to winds. Galita, or Jalita, of Arab geographers (12th century). Late autumn resort; surrounded by vineyards; enjoying a very temperate climate: yr. 62.5° F., Jan. 38°, Aug. 86.5°; mean rfall. (12 yrs.), yr. 19.4 in., Sept.–Feb. 12.3 in. Permanent P. 6000.

Yalu, or **Amnok,** riv., eastern Asia, flows W. then SW. on the N. frontier of Korea into Korea Bay; navigable, though not without interruptions, to about the place where it turns to the SW.; much used for floating timber. In rainy periods its waters rise 40 ft. Chinese fleet defeated by the Japanese on 17th September 1894. *Proc. R. G. S.*, 1886, pp. 292, 301; 1892, pp. 152, 156.

Yalung-kiang, riv., China, flows S. from Tibet into the prov. Süchwan, and enters the Yangtse-kiang in about 102° E.; not navigable. *Proc. R. G. S.*, 1886, p. 374.

Yalutorovsk, dist. tn., Russia, W. Siberia, govt. Tobolsk, 58 m. SE. Tyumeñ, 1 m. from l. bk. Tobol, amidst a fertile prairie. P. <5000.

Yalwal, mining-tp., New South Wales, St. Vincent co., 149 m. S. Sydney by road and rail. P. <1500.

Yam, old Russian for station or relay of horses; root of many names.

Yama, peak, Japan. See **Norikura Lake.**

Yama, riv., Russia, E. Siberia, chief affluent of Sea of Okhotsk. Length about 400 m.

Yamachiche, vil., Canada, Quebec, St. Maurice co., on a railway, 15 m. W. by S. Three Rivers. P. (of sub.-dist.) <3000.

Yamada, coast vil., Japan, E. ct. Honshiu, Swate ken, at the head of Nambu Bay. The harbour is excellent, permitting the manœuvres of the largest warships, and sheltered from the typhoons; has no landward approach, being hemmed in by mountains. P. <4000.

Yamada, tn., Japan, Ise ken, 60 m. SE. by E. Kyoto. P. 21,200.

Yamagata, tn., Japan, 75 m. ENE. Niigata. P. 27,300.

Yamagawa, coast tn., Japan, isl. of Kiushiu, ken and 28 m. SSE. Kagoshima, on the W. ct. of the beautiful Kagoshima Bay. P. 6300.

Yamaguchi, tn., Japan, in the SW. of Honshiu, 135 m. NE. Nagasaki; seat of a higher middle school. P. 12,600.

Yamaka, tn., Japan, Kiushiu I., Kuamoto ken. P. 5500.

Yamanaka, an elevated health resort, Japan, about 3 m. SW. Hakone (*q.v.*).

Yamanashi, a ken or prefecture, Japan, cap. Kofu.

Yamashiro, a kuni or old prov., Japan, now included in Kyoto-fu.

Yamaska. 1. Co., Canada, Quebec, on the S. side of Lake St. Peter (riv. St. Lawrence). **2.** Vil., Y. co., 30 m. SW. Three Rivers, on the l. bk. of the Yamaska R., 3 m. above its mouth. P. <1500. **3. Yamaska,** or **Rivière des Savannes,** riv., Quebec, rises in Brome co., and flows W. then N. into the upper end of Lake St. Peter, 90 m. long.

Yamato, kuni or old prov., Japan, now included in Nara ken.

Yamba, post-tn., New South Wales. See **Clarence River Heads.**

Yambara, tribe, Sudan. See **Niambara.**

Yambiga, stn., Congo Free State, on r. bk. Congo, in 2° 5′ N., 23° E.

Yambo, seapt., Arabia. Same as **Yanba-el-Bahr.**

Yamboli, Eastern Roumelia. See **Jambol.**

Yambuk, tp., Victoria, Villiers co., 25 m. E. by N. Portland. P. <1500.

Yamburg, dist. tn., Russia, govt. and 81 m. by rail SW. St. Petersburg. P. <5000.

Yambuya, vil., Congo Free State, on the l. bk. of the Aruwimi, just below its lowest rapid, in about 1° 17′ N., 25° 10′ E.

Yam Creek, mining dist., S. Australia, N. Terr., Rosebery co., 40 m. SSE. Palmerston; locality where the first gold was discovered; the station is now abandoned. P. <1500.

Yamdena, the largest isl. of the Timor-Laut group. Area about 1100 sq. m.

Yamdok-cho, lake, Tibet. See **Palti.**

Yam Hill, co., U.S., Oregon, in the NW., to the N. of 45° N., bounded on the E. by the Willamette R.

Yamina, tn., French Sudan. See **Nyamina.**

Yamithin, or **Yamethin,** tn., Upper Burma, 90 m. ESE. Pagan, 274 m. N. Rangoon stn. P. 6600; Buddhists, 4600.

Yamkanmardi, tn., Brit. India, Bombay, dist. and 21 m. N. Belgáum, 58 m. NNW. Dhárwár. P. (1872) 5300.

Yampa, or **Yampah,** riv., U.S., Colorado, flows W. and enters Green R. near NW. border of the state.

Yampol, dist. tn., Russia, govt. Podolia, 122 m. SE. Kamenets Podolsk, on l. bk. Dniester, at head of Y. Rapids. P. 5950.

Yamskaya, vils., Russia. **1.** Two suburbs of Kursk. P. 6000 and 2500. **2.** SE. suburb of Ryazañ. **3.** Name of several suburbs.

Yamunda, riv., Brazil, flows E. on N. front of Amazonas, forming a series of rapids, traverses Lake Faro (37 m. long), and enters the Amazon, l. bk., in 2° 14′ S., 54½° W. Length, 240 m.

Yana, or **Yan,** riv., Russia, E. Siberia, rises in Verkhoyansk Mts., under 64° 26′ N., 132° 32′ E., flows, generally speaking, N. Enters Arctic Ocean by seven large and many small mouths, under 71° 24′ N., 136° 17′ E., on to W. of Ust'-Yansk, which stands near head of its delta. Length, 750 m.

Yanagawa, tn., Japan, Kiushiu, 40 m. NE. Nagasaki. P. 18,900.

Yanaizu, or **Yanaitsu,** tn., Japan, 165 m. NE. by E. Nagasaki, Nagato ken, in the SW. of Honshiu (SE. ct.). P. < 5000.

Yanan-fu, tn., China. See **Yan-ngan-fu.**

Yanáon, tn. and terr., French India, on the l. bk. of the riv. Godávari, near its mouth, 83 m. ENE. Masulipatam. Area of French terr. about 3½ sq. m. P. (1891) 5300.

Yanba-el-Bahr, or **Yambo,** seapt., Arabia, on the Red Sea, in Hejaz, about 125 m. W. by S. Medina.

Yancey, co., U.S., N. Carolina, on the NW. frontier, crossed by 82½° W.

Yanchou-fu, or **Yenchou-fu,** tn., China, prov. Chekiang, 47 m. SW. Hangchow.

Yanchou-fu, tn., China, Shantung. See **Yenchou-fu.**

Yancowinna, co., New South Wales, on the W. frontier, crossed by 32° S.

Yanda, co., New South Wales, bounded on the N. by the Darling R., and crossed in the W. by 145° E.

Yandabu, tn., Upper Burma, on r. bk. of the Iráwadi, in 21° 38′ N., 95° 4′ E., about 40 m. W. Mandalay. Here the treaty of peace concluding the first Anglo-Burmese war was signed, February 26, 1826.

Yande, small isl., Pacific, off the NW. end of New Caledonia, in about 20° 5′ S., 163° 48′ E.

Yandiatuba, riv., Brazil, flows NE. into the Amazon (r. bk.), confluence a little above São Paulo d'Olivenza, about 3° 26′ S., 69° 10′ W. Length probably 270 m.

Yandilla, settlement, Queensland, Derby co., 90 m. W. by S. Brisbane.

Yandoit, postal-tp., Victoria, Talbot co., in 37° 14′ S., 144° 6′ E. Gold-bearing reefs, and an extensive bed of pottery clay occur; has a mineral spring; wine is made in large quantities. P. <1500.

Yandua, isl., off W. ct. of Vanua Levu, Fiji Is., in 16° 47′ S., 178° 17′ E.

Yandun, tn., Burma. See **Nyaungdun.**

Yangasa Islands, group of islets and reefs, in the Lau, or E., group of the Fiji Is., in 178½° W., just N. of 19° S.

Yangching, popular name of Canton, China.

Yangchou, tn., China, S. Kiangsu, on Grand Canal, 35 m. NE. by E. Nanking, called by Marco Polo *Yanju.* Headquarters of salt manufacture; has also manufactures of sweetmeats. Early in the 14th century Friar Odoric formed here a Franciscan house and three Nestorian churches; suffered greatly in the Taiping rebellion.

Yangchu, tn., Korea. See **Yangju.**

Yangchung, tn., China, prov. Kwangtung, 125 m. SW. Canton.

Yangery, postal-centre, Victoria, Villiers co., in 39° 18′ S., 142° 33′ E. P. <1500.

Yangfang, Yankiafang, or **Hankiafang,** coal-mining vil., China, Pechili, 19 m. NW. Peking. The coal deposits consist of four or five seams of anthracite 10–13 ft. thick.

Yang-ho, or **Jupira,** the northern headwater of the Hun-ho, China.

Yanghwa, tn., Korea, on E. side of island at mouth of Han, 25 m. NNW. Chemulpho.

Yangi-daban (-davan, or **-dawan),** pass across the Kuen-lun Mts., Eastern Turkistan, in 36° N., 79½° E., on the route from Leh (SW.) to Khotan (NNE.) and Yarkand. Alt. 18,500 ft.

Yangi-hissar, tn., Eastern Turkistan, 44 m. SSE. Kashgar, not far from the l. bk. of the Kara-tash. Alt. 4300 ft. P. 10,000.

Yangi-shahr (or **-shehr),** fortress, Eastern Turkistan, 5 m. SSE. Kashgar. The name means 'new town,' and is applied to numerous forts in the neighbourhood of towns in Eastern Turkistan. See **Yarkand.**

Yangju, or **Yangchu,** tn., Korea, 12 m. NE. Söul.

Yanglin, tn., China, Yünnan, 22 m. ENE. Yünnan-fu, on the SW. side of Sung-ming Lake, at the S. end of a large beautifully irrigated plain. *Jour. R. G. S.,* 1876, p. 192.

Yanglutungtse, tn., central China, Hupe, 83 m. SW. Hankow; is one of the most noted tea dists. of China.

Yangtse-kiang, one of the greatest rivers of the world, the principal commercial highway of China, called by the Chinese **Ta-kiang** (Great River) and **Chang-kiang** (Long River), rises, so far as is at present known, on the plateau of Tibet, some 270 m. N. Lhasa, amongst the N. spurs of the Tangla Mts., and in all probability at an altitude of about 16,500 ft., and in 33° 45′ N., 90° 45′ E. (Rockhill). This is on the assumption that the upper course of the Y. is identical with the Dichu (or Kinsha) of Tibet. This river, rising as indicated, flows apparently (for its course is but imperfectly known) E. and SE. The course of the Y. begins to be known at Batang (30° N., 99½° E.; alt. 8530 ft.). At this point the river, known as the Kinsha-kiang, is 130 yards wide at low water, and is crossed by a bridge 1240 ft. above the stream. Its direction is SSE. down to about 25¾° N., 100½° E. It then turns E., describing three or four deep, sharp curves in its efforts to break through the lofty ranges that radiate SE. from the Tibetan plateau. At the (N.) apex of one of these curves it receives (l. bk.) the large riv. Yalung, or Tachung, which likewise descends from Tibet, rising probably on the S. slopes of the Baianshara-ula Mts. (about 34° N., 97° E.), and flowing nearly parallel to the Y. Finally, on reaching 103° E., the great river assumes the direction, namely, NE. and E., which it maintains right through the heart of China to its entrance into the China Sea. Shortly after quitting the prov. of Yünnan it leaves behind it the rapids of the mountainous region, and at Pingshan, 1800 m. from its mouth, becomes navigable for small junks. Native boats are sometimes able to surmount the rapids and ascend nearly 200 m. further up. The city of Chungking, at the confluence of the Kialing and the Y. [**Süchwan**], is the highest point to which large junks penetrate, the river Y. being there 760 yards broad. Nevertheless, between Chungking and Ichang, in prov. Hupe (1100 m. from the sea), the river plunges through deep, sunless gorges, with a depth of more than 100 ft. deep at low water, and nearly 200 ft. in times of flood, when it races along in places at a speed of 10–12 m. an hour. Ichang, where the river is 880 yards wide, and has a nominal depth of 19½ ft., is the present terminus of steamboat navigation. From this point the banks decrease in height and the dangers of flooding begin, though the Chinese endeavour to prevent the dreaded inundations of the stream by riverine embankments and overflow lakes and marshes. The largest of these lakes is Tungting-hu (prov. Hunan), through which flow the rivs. Yüan-kiang and Heng-kiang; both enter the Y. from the right at Yuchou, on the S. frontier of prov. Hupe. Another large lake, Poyang-hu (in prov. Kiangsi), is traversed by the Kia-kiang, which joins the Y. in the extreme N. of prov. Kiangsi. Before leaving prov. Hupe, however, the Y. is increased by its most important trib. the Han-kiang (*q.v.*), which enters it from the left at Hankow. Ocean-going vessels, drawing 16½ ft. of water, are able during the flood season (April–October) to ascend the river as far as this point, 680 m. from the sea. At Hankow the Y. is a stately stream of 1½ m. wide, flowing ½ to ⅔ m. an hour. It then crosses the fertile alluvial plain of the prov. Nganhwei, passing Nanking, and crossing the Imperial Canal, by which it communicates with the Hwang-ho and the N. of China. About 50 m. below Nanking it widens out into its estuary, which has a general depth of 130 ft., in some places 330 ft., and a width at its seaward entrance of 60 m. The entrance is, however, narrowed and impeded by sandbanks and low islands, leaving but two passages for vessels, the Confucius Channel, accessible at high tide only, and the Hervey Point Channel, which can be entered at all times by the largest vessels. Fogs, too, frequent the estuary, and add to the dangers of navigation. The tides ascend the Y. to a distance of 220 m

The Wusung, or river of Shanghai, enters the estuary of the Y. from the right. The islands and sandbanks at the mouth are formed by the river itself, which brings down with it detritus calculated to equal a deposit of 200 cubic ft. in the second. The total length is estimated at 3000 to 3500 m.; the area of its basin at 700,000 to 750,000 sq. m.; its mean discharge at 770,000 cubic ft. per second, and the amount of sediment that it carries down annually at 6429 millions of cubic ft.

Yangyang, tn., Korea, 85 m. E. by N. Söul, near the E. ct., in 37° 55′ N.

Yan-ho, riv., China, a branch of the Huto-ho (*q.v.*), leaving the main stream in about 38° 15′ N., and joining the Hun-ho a little above its confluence with the Huto-ho.

Y'anîn, site, Palestine, *Neiel* in the O. T., 32° 54′ N., 35° 12′ E., 7½ m. E. by S. Acre.

Yanina, Yania, Janîa, Janina, or **Joannina,** tn., Turkey in Europe, cap. vilayet Y., forming the S. half of Albania, on the chief plain of that region, W. side of Lake Y., 80 m. W. Larissa, 50 m. E. Corfu; surrounded by walls; seat of a Greek archbishop. Its trade has considerably declined since the cession of Thessaly and the northern half of Acarnania and Aetolia to Greece. The **lake** is a shallow sheet of water, 5½ m. by 2 m., drained N. into the small Lake Labshistas or Lapshistas, and then W. through the Kalamas into the channel of Corfu. Alt. 1580 ft. Mean temp. (6 yrs., 1866-72), yr. 58.2° F., Jan. 41.5°, July 74.9°; rfall. (4 yrs.), 49.56 in. P. 20,000 (Philippson).

Yanitsa, tn., Turkey in Europe. See **Yenije-i-Vardar.**

Yanju (in Marco Polo). See **Yangchou.**

Yankalilla, postal-tp. and river-port, S. Australia, Hindmarsh co., 40 m. SSW. Adelaide, 15 m. WNW. Port Victor, on the Bungala. P. <1500.

Yankee Hill, gold-mining vil., U.S., California, Butte co., 20 m. N. Oroville. P. <1500.

Yankiafang. See **Yangfang.**

Yankin, vil., Upper Burma, 8 m. E. by N. Mandalay.

Yankpi-kiang, riv., China, trib. of Lantsan-kiang, or Mekong, l. bk., rises 12 m. W. Likiang-fu, in about 26° 49′ N., 100° 8′ E., flows S. inclining to E., and joins the Mekong a little to the N. of Chuning-fu. Total length nearly 200 m.

Yankton, city, U.S., S. Dakota, Y. co., 180 m. SE. by E. Pierre, r. bk. of Missouri, 980 m. above its junction with the Mississippi; communication by steamers. It is the forwarding point of supplies for military posts and the Black Hills, &c. Alt., Agency (Smithsonian Inst.), 1900 ft.; signal station (U.S. Signal Office), 1228 ft. Mean temp., yr. 45.9° F., Jan. 15.1°, July 73.9°; rfall. (10 yrs.), 28.82 in. P. (1870) 737; (1880) <4000; (1890) <4000.

Yan-ngan-fu, or **Yanan-fu,** tn., N. China, Shensi, 170 m. N. Si-ngan-fu, on the Nganshwi, l. bk. trib. Hwang-ho, in 36° 40′ N., 109° 35′ E.

Yano, tn., Japan, in SW. of Honshiu, Hiroshima ken. P. 6000.

Yanping-fu, tn., China, prov. Fokien, 80 m. WNW. Foochow. P. 200,000.

Yanshan, tn., China, prov. Pechili, 72 m. S. Tientsin.

Yantara, co., New South Wales, crossed by 30° S., and in the extreme E. by 143° E.

Yanteles, mt., Chile. See **Andes, F.**

Yantic, riv., U.S. See **Thames.**

Yantio, settlement, U.S., Montana, Choteau co., 225 m. NE. by N. Butte City.

Yantlet Island, Eng., in Thames R., off Hoo Allhallows, Kent, near the London Stone.

Yanûh, site, Palestine, *Janoah* in the O. T., 31° 16′ N., 35° 18′ E., 30 m. E. Beersheba.

Yanûn, site, Palestine, *Janohah* in the O. T., 32° 10′ N., 35° 21′ E., 6 m. SE. by E. Nablus.

Yanutha, isl., S. of Viti Levu I., Fiji Is., crossed by 180° 20′ S., 178° W.

Yanwath and Eamont Bridge, par., Eng., Westmorland, Appleby div., on the r. bk. of the Eamont, 1½ m. S. Penrith, P.O. P. <500.

Yanworth, par., Eng., Gloucestershire, div. and 8 m. NNE. Cirencester, P.O. P. <250. See **Hazleton.**

Yany-daria, or **Jany-daria,** riv., Russian Central Asia, a branch of lower Syr, which originates 8 m. below Fort Perovsk and flows SW. Said by the Kirghizes to have originated between 1760 and 1770, and to have flowed to the S. entrance of Lake Aral. Existed in 1816, but was desiccated four years later; it began to flow again in 1848, but is now lost in sands about Yan-kala.

Yan Yean, post-tn., Victoria, Bourke co., 18 m. N. by E. Melbourne. The principal reservoir for the water-supply of Melbourne, formed by the valley, with an embankment 3159 ft. across; into this basin the riv. Plenty was diverted, thus forming a lake 1330 ac. in area. An additional supply has been obtained from Wallaly Creek; Watts R. also being brought into the Y., the capacity of that reservoir will be largely increased. P. <1500.

Yao, or **Wa-yao** (more frequently pronounced Wa-hyao), called by the Manganja **Ajawa,** and locally **Machinga,** predatory and slave-raiding African tribe or nation, originally settled and still mainly found in the region traversed by the upper Rovuma and upper Lujende, E. of the S. half of Lake Nyassa, from which they were separated by the mountains overlooking the E. shore of that lake, now found partly on the shores of that lake and in the Shire highlands in British Nyassa-land.

Yao, native tribe, Trinidad, W. Indies.

Yao, Yaw, or **Yau,** people, Upper Burma, between 20° and 24° N., and the Arakan-yoma Mts. and the Pagan dist.

Yao, Yiu, or **Yao-ming,** tribe, in the SW. of prov. Kwangtung, S. China, not far from the frontier of Tongking.

Yao-chou, tn., China, prov. Kiangsi, 190 m. SE. by E. Hankow.

Yao-chou, tn., China, Yünnan, 74 m. E. by S. Tali-fu.

Yap, or **Eap,** one of the principal of the Caroline Is., N. Pacific, in the W. of the group, in 9° 25′ N., 139° 0′ E., about 850 m. E. of the N. end of Mindanao; surrounded by smaller islands and fringing coral reefs. Natives uncivilised, but intelligent and courteous. P. 8-10,000.

Yap-hammam, vil. with hot medicinal springs, Asia Minor, 37 m. SW. Angora.

Yapham with Meltonby, par., Eng., Yorkshire, E. Riding, Howdenshire div., 12 m. E. York, 2½ m. N. by W. Pocklington stn. P. <250. See **Pocklington.**

Yapper, co., Queensland, crossed by 20° S. and 142° E.

Yapton, par., Eng., Sussex, Chichester div., 3½ m. SW. Arundel, 1½ m. SE. Barnham Junction, on the Arundel and Portsmouth Canal, PM.O. P. <750. See **Ford.**

Yapura, or **Japura,** called by the Colombians **Caqueta,** riv., S. America, a principal trib. of the Amazon (l. bk.), two-thirds of the course being in Colombia, and the lower third in Brazil, flows ESE. across the plateau of Caqueta, with some cataracts. In about 65¼° W. it turns sharply SE., and reaches the Amazon by several arms between 64½° and 65° W. During the rains it is connected by a branch with an affluent of the Uaupes, one of the headstreams of the Rio Negro. Length 1750 m., of which 970 m. are navigable by steamers, 1550 m. by small boats; area of basin, 120,000 sq. m.

Yaqui and **Yaqui Chico,** rivers. See **Haiti,** isl.

Yaqui, Hiaqui, or **Huaqui,** riv., NW. Mexico, Sonora, rises in the S. of Arizona (U.S.), if we take its longest headstream as the source, but in about 29° N. receives on the left from Chihuahua a trib. also called the Y. After traversing the Sierra Madre in a series of valleys and tortuous gorges it flows SW. and enters the S. end of the bay of the Gulf of California, on which Guaymas (30 m. N.) stands. Its valley yields coal.

Yaquimo, isl. of Haiti. See **Aquin.**

Yaquina Bay, inlet, U.S., Oregon, in 44° 37′ N.; summer resort.

Yar, two small streams, Eng., Isle of Wight, one flowing N. then ENE. into the head of Brading Harbour, the other in the W. of the island flowing N. into the Solent at Yarmouth.

Yara, vil., W. Indies, Cuba, prov. and about 60 m. WNW. Santiago de Cuba, with large tobacco plantations; scene of the outbreak of the insurrection of 1868.

Yaracuy, riv., in W. of Venezuela, on borders of states of Lara (W.) and Carabobo (E.), flows NNE. into the Caribbean Sea between Tucucas and Puerto Cabello; canalisation projected.

Yaramboli, vil., Turkey in Asia, vilayet and 60 m. NNE. Aleppo, on r. bk. Euphrates, 4 m. above the confluence of the Sajur; site of the ancient *Hierapolis.*

Yarandale, tn., S. Australia. See **Lipson.**

Yarm, par. and market-tn., Eng., Yorkshire, N. Riding, Cleveland div., on the r. bk. of the Tees, 7 m. SW. Middlesbrough, on the NE. R.; it exports salmon to London. Mean rfall. (Egglescliffe, alt. 80 ft., 1866–80), yr. 26.7 in. PMT.O. P. <2000.

Yarmouth, seapt. tn. and port of entry, Canada, Nova Scotia, Y. co., on the SW. ct., 140 m. WSW. Halifax. Depth of 27 ft. in port and alongside one wharf at high water ordinary springs, 14 ft. at low water. Mean temp., yr. 43.3° F., Jan. 26.0°, Aug. 60.5°; mean rfall. (9 yrs., 1880–88), 39.71 in.; snowfall, 94.4 in. P. (1881) 3500; (1891) 6100.

Yarmouth, the ancient *Eremuth,* par. and seapt., Eng., Isle of Wight, on the Solent, 9 m. W. Newport, on the Isle of Wight Central Rly.; exports fine sand for glass-making. On several occasions it suffered severely from the French; it has a small battery. PMT.O. P. <1000.

Yarmouth, tn., U.S., Maine, Cumberland co., on Casco Bay, 8 m. NNE. Portland; has ship-yards. P. <3000.

Yarmouth, tn., U.S., Massachusetts, Barnstable co., 36 m. E. New Bedford. P. <2000.

Yarmouth, Great, parl. and (since King John) mun. bor., co. bor. (1888), par., seapt., and watering-place, Eng., Norfolk, 20 m. E. Norwich, with terminal stns. (**Southtown** and **Vauxhall**) on the G. E. R. and (**Yarmouth Beach**) on the M. & G. N. Joint Rly., at the mouth of the Yare, chiefly on the left or E. bank between the river and the sea, but including the par. of Gorleston, with the hamlet of Southtown, on the opposite bank, formerly in the ancient co. of Suffolk. The estuary of the Yare, bordered on both sides by quays with a total length of nearly 4 m., forms the harbour. Depth available at entrance to harbour at high water ordinary springs 16 ft., low water 10 ft.; increased during the prevalence of strong NW. winds. Four dry docks, the longest 230 ft. long at bottom. There is an iron drawbridge over the Yare 2 m. from the mouth. The herring-fisheries give employment to thousands, Y. being the chief seat in England of the herring-trade; there is also considerable deep-sea fishing and a little shipping. Y. is also one of the most frequented watering-places in the kingdom, having an excellent sandy beach and a handsome parade along the shore. The spacious market-place is 3 ac. in area. A peculiar feature of Y. is the long narrow streets called 'rows.' On 'the Denes' Nelson's column (Doric), 144 ft. high. The **Roads,** protected by sandbanks, afford excellent anchorage, and are often crowded during S. or W. gales; vessels pass them through one of three gatways or deep entrance channels, marked by buoys and light-ships. Mean temp. (19 yrs.), yr. 48.0° F., Jan. 37.7°, July 60.8°; rfall. (25 yrs.), 27.6 in. P. (1801) 14,800; (1871) 41,800; (1897) 49,300.

Yarmuk, the **Sheriat-el-Mandhur** (or **el-Menadire**) of the Arabs, the *Hieromax* of the ancient Greeks, riv., Syria, chief trib. of the Jordan (l. bk.), formed by the union of three head-streams, one from the N. (descending from an E. spur of Mount Hermon), and two from the E., from the volcanic plateau of Hauran; enters the Jordan 4 m. below the Lake of Tiberias. Length, 115 m.

Yarnfield, P.O., Eng., 3 m. from Stone, Staffordshire.

Yarnscombe, par., Eng., Devonshire, S. Molton div., 7 m. E. by S. Bideford, 3 m. W. Umberleigh stn. P. <500.

Yarnton, par., Eng., Oxfordshire, div. and 4 m. SE. by S. Woodstock, on the G. W. R. P. <500.

Yaroslavl, govt. of central Russia, has Tver and Novgorod on W., Vologda on N., Kostroma on E., Vladimir and Tver on S.; occupies a broad depression elongated W. to E., traversed by Volga, with tribs. in N. Marshy and flooded between the Mologa and Sheksna, as well as above Rostov. Soil of moderate fertility. Watered by Volga, which receives the Sheksna and Mologa (Mariinsk and Tikhvinsk systems of canals), Kotorost and Kostroma. Forests cover one-third of area. Climate like that of Moscow, average temps. at Yaroslavl being, yr. 37°, Jan. 6°, July 61°. Rivers are frozen for 118 to 183 days every year. Population thoroughly Great Russian. Agriculture carried on even in the manufacturing dists., and surplus of corn in good years. Large market-gardening, cheese-making. The govt. of Y., with its annual produce of £2,100,000, stands among the chief manufacturing provs. of Russia. Cotton and linen mills (£1,000,000), flour-mills, distilleries, tobacco works, chemical and machinery works. Great development of domestic trades in all villages: linen, boots, gloves, sheep-skins, knitted goods, felts, wooden goods, pottery, and various metallic goods. Considerable trade, favoured by the Volga. Divided into ten dists.: Yaroslavl, Danilov, Lyubim, Mologa, Myshkin, Poshekhoniye, Romanov-Borisoglyebsk, Rostov, Rybinsk, Uglich. Area, 13,751 sq. m. P. (1884) 1,118,130; (1891) 1,126,890.

Yaroslavl, cap. of above govt., on r. bk. of Volga, 173 m. by rail NE. Moscow; suburbs on l. bk. Old town containing many relics of the past, especially in Uspenskiy cathedral, begun in 1215. Has a high school with a faculty of law, and more than the usual educational institutions. Manufactures grow in importance, especially the cotton-mills; considerable trade. P. (1884) 48,310; (1891) 80,340.

Yaroslavskaya, Cossack vil., Russia, prov. Kubañ, dist. Maikop. P. 6000.

Yarrow, par., Scot., Peeblesshire and Selkirkshire, 7 m. W. Selkirk, 5½ m. S. Walkerburn stn., PMT.O.; 41,046 ac. P. <750.

Yarroweyah, post-tn., Victoria, Moira co., 150 m. N. Melbourne by road and rail. P. <1500.

Yarrowford, PT.O., Scot., Selkirkshire, on Yarrow Water, 5 m. NW. Selkirk.

Yarrow Water, rivulet, Scot., Selkirkshire, issues from St. Mary's Loch, and flows NE. into the Ettrick Water about 2 m. above Selkirk.

Yarsuat, or **Muhajirin,** Turkey in Asia, vilayet sanjak, and 33 m. E. by N. Adana, between Shamiran-kale and Ilankale. P. 5000.

Yarûn, vil., Palestine, *Iron* in the O. T., 33° 5′ N., 35° 25′ E., 19 m. SE. Tyre.

Yaruqui, vil., Ecuador, ENE. Quito, in the plain of which

La Condamine and his associates of the French Academy determined the length of a degree of the meridian in 1735–45, measuring a base from Caraburo, in the S., to Oyambaro, in the N.

Yaru-Sanpo, riv. See **Sanpo** and **Brahmaputra.**

Yarwell, par., Eng., N. div. of Northamptonshire, on the Nen, 6½ m. SSE. Stamford, 1 m. Nassington stn., P.O. P.<500. See **Nassington.**

Yary, riv., Guiana, S. America, flowing SE. from the Tumac-Humac Mts., in about 55° W., through an almost uninhabited region to join the Amazon (l. bk.), with several cataracts and falls. Length over 400 m.

Yasalasa, roadstead, Brit. New Guinea, in 150° 2′ E., 9° 40′ S.

Yasawa, string of isls. off the NW. ct. of Viti Levu, Fiji Is.; also the name of the northernmost of the group.

Yashil-kul, lake, central Asia, in the Pamir Plateau, in 37° 45′ N., just W. of 73° E., drained W. by the Gund, Ghund, or Hunt, into the Ab-i-Panj. Alt. 12,870 ft.

Yasin, or **Yassin,** tn., among the mountains on the NW. of India, E. of the range separating the Chitral (Yarkhun) valley from the basin of the Indus, 60 m. NW. by W. Gilghit. Alt. 7800 ft. For the principality of **Yasin,** see **Yaghistan.**

Yasin, or **Yassin,** dist. of the Senegal region, French West Africa, on r. bk. Kazamanza; inhabited by Mandingoes.

Yass, important tn., New South Wales, Harden co., 50 m. W. by S. Goulburn, on riv. Yass, in which gold has been found; copper, silver, and lead exist, but are not yet developed. The town includes **North Y.,** on the opposite side of the river, and **O'Connell town.** P.<2000.

Yassy, Roumanian **Iaşi** (yashĭ), or **Jassy,** tn., Roumania, cap. prov. Y., in a fertile region, on riv. Bahluiŭ, 115 m. SE. Czernowitz. Former cap. of Moldavia; seat of a Greek archbishop (metropolitan of Moldavia and Suciava), and of a Roman Catholic bishop; in ancient times cap. of the Dacian tribe of *Iassii.* Sacked in 1686 by Sobieski, king of Poland, in his wars with the Turks. Alt. 490 ft. P. 72,900.

Yâsûf, site, Palestine, probably the *En Tappuah* of the O. T., 32° 7′ N., 35° 14′ E., 7 m. S. by W. Nablus.

Yaswantgarh, port, Brit. India. See **Redi.**

Yat, oasis, central Sahara, on the route from Tripoli to Bornu, in 20° 34′ N., 13° 40′ E. Alt. 1650 ft.

Yátaiti, vil., Paraguay, 76 m. E. by S. Asuncion, 10 m. N. Villa Rica.

Yatala, tp., Queensland, Ward co., in 27° 45′ S., 153° 10′ E.; has sugar-mills. P.<1500.

Yate, par., Eng., Gloucestershire, Thornbury div., 7½ m. SW. by S. Wotton-under-Edge, with a junction stn. on the M. R.; has coal-mines. P.O. 4081 ac. P.<1500.

Yate and Pickup Bank, par., Eng., Lancashire, 4 m. SE. Blackburn. P.<750.

Yatehouse, vil., Eng., Cheshire, Knutsford div., 4½ m. SE. by S. Northwich, 1½ m. N. Middlewich stn. See **Byley with Y.**

Yateley, par., Eng., Hampshire, Basingstoke div., 6½ m. NNW. Aldershot, 2 m. S. by W. Wellington College stn., PMT.O. P.<1500.

Yatenga, dist. of French Sudan, between Massina and Mossi, N. Africa, in the loop of the Niger.

Yáter, vil., Palestine, *Edrei* in the O. T., 33° 9′ N., 35° 20′ E., 11½ m. SE. Tyre.

Yates, settlement, U.S., Illinois, McLean co.

Yates, co., U.S., New York, S. of 43° N., and bounded on the E. by Seneca Lake.

Yates, coal-mining bor., U.S., Pennsylvania, Luzerne co., 1 m. from Pottston. P.<1500.

Yatesbury, par., Eng., Wiltshire, Chippenham div., 10 m. SW. by S. Swindon, 4 m. E. by N. Calne. P.<250.

Yates Center, city, U.S., Kansas, cap. Woodson co., 80 m. S. Topeka. P.<1500.

Yates City, vil., U.S., Illinois, Knox co., 2 m. W. Elmwood by rail. P.<1500.

Yatesfield Hill, hill, Northumberland, Hexham div., E. of the Rede, 20 m. SE. Jedburgh.

Yatesville, coal-mining bor., U.S., Pennsylvania, Schuylkill co., 46 m. SW. by S. Scranton, 11 m. N. Pottsville. P.<1500.

Yathata, or **Cap Island,** Lau group, Fiji Is., in Goro Sea, in 17° 15′ S., 179° 30′ W.

Ya-theh-Myo, ruins, Lower Burma, marking the site of the ancient cap. of the kgd. of Prome, about 6 m. W. of Prome town.

Yatina, post-tn., S. Australia, Dalhousie co., 60 m. SE. by E. Port Augusta. P.<1500.

Yatong, frontier tn., Tibet. Same as **Yatung.**

Yatsauk, vil., Upper Burma, 72 m. SE. Mandalay; cap. Shan state.

Yatsi, Japan. See **Tanichi.**

Yatsuo, tn., Japan, ken of Toyama, central Honshiu. P. 6300.

Yatsushiro, tn., Japan, Kiushiu, 45 m. ESE. Nagasaki, on the opposite side of the bay of Nagasaki. P. 10,000.

Yattendon, par., Eng., Berkshire, div. and 6½ m. NE. Newbury, 2 m. ESE. Hampstead Norris stn., P.O. P.<500.

Yatton, par., Eng., Herefordshire, div. and 5 m. NNE. Ross. P.<250. See **Marcle, Much.**

Yatton, par., Eng., Somerset, N. div., 7½ m. ENE. Weston-super-Mare, on the G. W. R., PMT.O.; 5602 ac. P.<2000.

Yatton Keynell, par., Eng., Wiltshire, div. and 4½ m. WNW. Chippenham stn., 10 m. NE. Bath, PMT.O. P.<750.

Yatung, tn., Tibet, on the Sikkim frontier, about 80 m. S. Shigatse; the first town opened to foreign commerce by the Tibetan government (May 1, 1894).

Yau, people, Upper Burma. See **Yao.**

Yauri, country, central Sudan, on l. bk. Niger, S. of Gandu, of which it is a dependency.

Yaurisque, vil., Peru, dep. and 30 m. S. Cuzco; much frequented for its thermal springs.

Yaus, people, Upper Burma. See **Yao.**

Yautepec, tn., Mexico, Morelos, 42 m. S. by E. Mexico. Alt. 4100 ft. P. 6000.

Yautepec, tn., Mexico, Oaxaca, 187 m. S. Vera Cruz, 50 m. WNW. Tehuantepec.

Yauyos, vil., Peru, dep. and 90 m. ESE. Lima, cap. prov. Y.

Yavapai, co., U.S., Arizona, on the N. frontier, crossed in the middle by 112° W., and traversed by the Colorado R.

Yavari, Hyabary, Yacarana, or **Yaquirano,** riv., S. America, forming a part of the boundary between Brazil and Peru, rises in about 11° S., 71° W., and after a N. course of about 450 m. joins the Amazon at Tabatinga; it is navigable for 200 m. Total length about 600 m.

Yaverland, par., Eng., Isle of Wight, on the E. ct., 5 m. S. by E. Ryde, 1 m. SSE. Brading Junction. P.<250.

Yavi, vil., Argentine Republic, Jujuy, 322 m. N. Tucuman. P.<2000.

Yavisa, vil., Colombia, dep. and 137 m. ESE. Panama. P.<2000.

Yavish, tn., Abyssinia, Gojam, 115 m. S. by W. Debra Tabor.

Yaw, people, Upper Burma. See **Yao.**

Yawa, tn., central Africa, in the W. of Wadai, about 12° 40′ N., 18° 0′ E., to the E. of Lake Fittri.

Yáwal, tn., Brit. India, Bombay, dist. Khandesh, 108 m. S. by W. Indore. P. 10,800; Hindus, 8700.

Yawata-hama, tn., Japan, on the W. ct. of Shikoku, 185 m. SW. by W. Kobe.

Yawri, bay, W. Africa, to the S. of Sierra Leone Penin., crossed by 8° N.

Yaxley, par., Eng., Suffolk, div. and 1½ m. W. Eye, 18 m. ENE. Bury St. Edmunds, P.O. P.<500.

Yazili-Kaya ('written rock'), a name applied to various inscribed rocks in Asia Minor, especially one in a valley of Upper Sakaria, and another near Boghaz-köi.

Yazoo, riv., U.S., Mississippi, in the W., formed by the confluence of the Tallahatchee and Coldwater, flows S. then SSW. past Y. City to the Mississippi, which it joins on the l. bk. about 5 m. W. by N. Vicksburg; navigable for 290 m.

Yazoo, city, U.S., Mississippi, Y. co., on Yazoo R., 38 m. NNW. Jackson. P.<4000.

Yazor, par., Eng., Herefordshire, Leominster div., 8 m. NW. by W. Hereford, 1 m. N. Moorhampton stn. P.<250; eccles. par. (**Yazor with Mansell Lacy**) P.<500.

Ybbs, tn., Lower Austria, 35 m. ENE. Steyr. P.<2000.

Ybera, or **Ibera,** lake. See **Corrientes.**

Ybicuy, Brazil. See **Ibicuy-Guassu.**

Ychou, tns., China, provs. Pechili and Shantung. See **Ichou.**

Ydby, or **Ödby,** vil., Denmark, in W. of Jutland, on Lüm Fjord, prov. Thisted, 38 m. NNE. Ringkjöbing.

Ye, tn., Lower Burma, Amherst dist., Tenasserim div., on r. bk. of Ye R., near its mouth. P. (1876–77)<3000.

Yea, post-tn., Victoria, Anglesey co., 49 m. NE. by N. Melbourne; some mining is carried on. P.<1500.

Yeading Green, locality, Eng., Middlesex, Uxbridge div., 4½ m. SW. Harrow, 1½ m. NW. Southall stn.

Yeadon, par. and tn., Eng., Yorkshire, W. Riding, Otley div., 6½ m. NNE. Bradford; woollen manufactures. P. 7400.

Yeagertown, vil., U.S., Pennsylvania, Mifflin co., 45 m. NW. by W. Harrisburg. P.<1500.

Yealand (yĕl'and) **Conyers,** par., Eng., Lancashire, N. Lonsdale div., 8½ m. N. by E. Lancaster, 2 m. E. by S. Silverdale stn., PMT.O. P.<500.

Yealand Redmayne, par., Eng., Lancashire, N. Lonsdale div., 9 m. N. by E. Lancaster, 2 m. SW. Burton and Holme stn. P.<250.

Yealm (yam), small riv., Eng., in the S. of Devonshire, flows into the English Channel, forming a branched estuary known as **Yealm Mouth.**

Yealmpton, par., Eng., Devonshire, Totnes div., 6 m. ESE. Plymouth, on the Yealm, just above the head of Yealm mouth.

A quarter of a mile SW. is a cave in which were found the bones of the elephant and other animals. Marble quarries in the neighbourhood. PMT.O. P.<1000.

Yeanston, vil., Eng., Somerset, E. div., 10½ m. E. by N. Yeovil, 1 m. SE. Templecombe stn.

Yeardsley with Whaley, par. and tn., Eng., Cheshire, Knutsford div., 7½ m. NE. by N. Macclesfield, close to Furness Vale stn. P.<1500.

Yearsley, par., Eng., Yorkshire, N. Riding, Thirsk and Malton div., 14½ m. N. York, 1½ m. S. by E. Ampleforth stn. P.<250. See **Coxwold.**

Yeathouse (yāt'ŭs), stn., Eng., Cumberland, on the L. & NW. R., 4½ m. E. by S. Whitehaven.

Yeaveley, par., Eng., Derbyshire, W. div., 10½ m. W. by N. Derby, 4½ m. E. by S. Norbury stn. P.<250.

Yeavering, par., Eng., Northumberland, 4 m. WNW. Wooler. **Yeavering Bell** (alt. 2000 ft.) has druidical remains. P.<250.

Yebenes, Los, comm., Spain, prov. and 22 m. SSE. Toledo, dist. Orgaz, in the mountains of Toledo. P. 5000.

Yebisu, or **Yebisu-Minato.** See **Ebisu-Minato.**

Yebla, site, Palestine, *Ibleam* in the O. T., 32° 43′ N., 35° 28′ E., 14 m. SE. Nazareth.

Yebnah, vil., Palestine, *Jabneel* in the O. T., 31° 51′ N., 34° 44′ E., 13 m. S. Jaffa (ancient Joppa).

Yebrud, vil., Asiatic Turkey. See **Yabrud.**

Yebu, country, W. Africa, Upper Guinea, with cap. Ode, 37 m. NNE. Lagos; under English protection since 1892. P. 400,000.

Yecla, comm., Spain, prov. Murcia, 36 m. NW. by W. Alicante; at some distance relics of an unknown ancient town. P. 17,700.

Yeddingham, par., Eng., Yorkshire, E. Riding, Buckrose div., on the Derwent, 10½ m. WSW. Scarborough, 1½ m. NNW. Hesterton stn. P.<250.

Yedi, tn., central Africa, Bornu, at SW. angle of Lake Chad.

Yedi-burun ('the seven capes'), promontory of the Lycian Taurus, Asia Minor, abutting on the Mediterranean, a little E. of 29° E., over against Rhodes.

Yediyūr, vil., India, Mysore state, dist. Túmkúr, in 12° 59′ N., 76° 55′ E.; annual religious festival attended by 10,000 people.

Yedo, Japan. See **Tokyo.**

Yegge, vil., Upper Guinea, on l. bk. and at head of navigation in the Volta, 250 m. from the sea, 18 m. S. Salaga, of which it is the port.

Yegorlyk, or **Yagorlyk,** two rivs., Caucasia, govt. Stavropol, r. bk. tribs. of Manych; many populous Cossack villages on their banks. Length of Great Y. 200 m.

Ye-gyi-Pan-daw, tn., Lower Burma, dist. and 44 m. NNE. Bassein.

Yeha, vil., Abyssinia, Tigre, 10 m. NE. Adua, with monastery in a former Himyaritic temple, and remains of Sabæan civilisation.

Yehtan, rapid on Yangtse-kiang, China, about midway between Ichang and Wushan-hsien; said to be the worst in winter.

Yehudiyeh, El. See **El Yehudiyeh.**

Yeisk, dist. tn. and port, Russia, Caucasia, govt. Kubañ, on **Yeisk Bay,** on the SE. ct. of Sea of Azov, 46° 48′ N. lat., 38° 12′ E. long.; roadstead protected by a sandbank, but very shallow; exports chiefly corn. P. 35,840.

Yeju (or **-chu**), tn., Korea. See **Yŏju.**

Ye-kin, or **Re-keng,** tn., Lower Burma, dist. Tharáwadi, on the E. bank of the Iráwadi. P. (1881)<2000.

Yelden, par., Eng., in the extreme N. of Bedfordshire, Biggleswade div., 11½ m. N. by W. Bedford, 4 m. SE. by E. Higham Ferrers stn. P.<250.

Yeldersley, par., Eng., Derbyshire, 3 m. SE. Ashbourne. P.<250.

Yeldham, Great and **Little,** two adjoining pars., Eng., Essex, Saffron Walden div., the former on the Colne, 9½ m. N. Braintree, on the G. E. R., with a stn. (**Yeldham**) on the G. E. & Colne Valley Rly. Great Y., PMT.O., P.<750; Little Y., P.<500.

Yelford, par., Eng., Oxfordshire, div. and 9½ m. SW. Woodstock, 3½ m. S. Witney. P.<250.

Yelgandal, tn., India, Haidarábád, on Maner R., cap. Y. dist., 83 m. NE. by N. Haidarábád.

Yell, co., U.S., Arkansas, crossed in the E. by 93° W., and bounded on NE. by Arkansas R.

Yell, isl., Scot., second in size of the Shetland group, separated from Mainland by the Y. Sound. E. ct. generally low, but rocky on W. Fishing is the chief industry. Surface hilly (highest point, 672 ft.) and bleak. The N. part of the island forms part of the par. of Fetlar and North Y., the remainder forming the par. of Mid and South Y. PMT.O., (**Mid Y.**), P.O. (**East Y.**). 35,375 ac. P. isl. 2561; par. Mid and South Y. (including the now uninhabited **Hascussay Island**) P.<2000.

Yelland, vil., Eng., Devonshire, S. Molton div., 7 m. SE. by S. Bideford, on the r. bk. of the Torridge, 3 m. SE. Torrington stn.

Yellata Falls, the last falls on the Congo, 25 m. above Vivi.

Yelling, par., Eng., Huntingdonshire, div. and 6 m. S. Huntingdon, 4 m. ENE. St. Neots stn., P.O. P.<500.

Yellow Craig, rocky cliff, Scot., on the E. ct. of Berwickshire, in 55° 53½′ N., 2 m. S. by E. St. Abb's Head.

Yellow Furze, tn., Ire., NE. co. Meath, bar. Lower Duleek, 5 m. ENE. Navan. P.<250.

Yellow Head Pass, pass across the Rocky Mts., on the borders of Alberta and Brit. Columbia, in 52° 53′ N.; one of the passes originally proposed for the passage of the C. P. R.

Yellow Medicine, co., U.S., Minnesota, on the W. frontier, S. of 45° N., bounded on the NE. by Minnesota R.

Yellow River, China. See **Hwang-ho.**

Yellow River, Ire., in the NE. of King's co., l. bk. trib. of riv. Boyne.

Yellow River, or **Yellow Water River,** U.S., Alabama and Florida, flows 95 m. SSW. into the Gulf of Pensacola.

Yellow River, U.S., Wisconsin, flows SSE. into riv. Wisconsin. Length, 80 m.

Yellow Sea, a translation of the Chinese **Hwang-hai,** an inlet of the Pacific Ocean, in E. Asia, between 33° and, including its N. extension, the Bay of Korea, 40° N., 120° and 127° E., having W. the Chinese provs. Kiangsu and Shantung, N. Liautung, and E. Korea. It opens north-westward into the Gulfs of Pechili and Liautung, from which last it is separated by the long promontory termed the 'Regent's Sword.' It receives the Hwang-ho, and owes its name to the yellow sediment which that river carries down; numerous groups of islets border its E. and N. coasts. Average depth scarcely 100 ft. Regularly frozen round the shores.

Yellow Springs, vil., U.S., Ohio, Greene co., 50 m. W. by S. Columbus; the seat of Antioch College; has a mineral spring. P.<1500.

Yellowstone, co., U.S., Montana, crossed by 46° N. and 108° and 109° W.

Yellowstone, riv., U.S., one of the principal affluents or head-streams of the Missouri, rises immediately E. the Rocky Mts., in the southern part of Yellowstone National Park (*q.v.*), flows NE. through Montana, and joins the Missouri after a serpentine course of 600 m. on the border of Montana and N. Dakota. Principal tribs., Clark Fork, the Big Horn, Tongue, and Powder Rivs., all from the S. It is navigable to near the confluence of the Big Horn, about 300 m. above its mouth.

Yellowstone National Park, U.S., a rectangular area of 3348 sq. m. in the NW. of Wyoming, containing a marvellous collection of volcanic phenomena, by Act of Congress (1871–72) constituted a National Park. The region consists chiefly of a plateau broken by groups of mountains, and bordered on the E. by the Yellowstone Range; mean elevation 8000 ft., the highest mountains rising to 11,000–12,000 ft. Large tracts are covered with dense forest. In recent geologic times the region has been one of remarkable volcanic activity. It is almost entirely covered by lava, through which, in all directions, rise hot springs, calcareous, siliceous, sulphureous, and iron. The localities in which they group in largest numbers are White Mt., or Mammoth (near the N. boundary), Hot Springs, Gibbon, Lower and Upper Geyser basins, Shoshone basin, Heart Lake, and Mud geysers. The Upper and Lower Geyser basins, on the Firehole, contain thousands of hot springs, including one known as 'Old Faithful' (from the regularity with which its nearly hourly eruptions occur), which throws water to a height of 150 ft., while others throw it still higher. **Yellowstone Lake,** nearly in the centre of the Park, very irregular in shape, with long arms (alt. 7738 ft.; length, 20 m.; breadth, 15 m.), receives the upper Yellowstone R., and from its N. end issues **Yellowstone R.** The Snake, Gallatin, and Madison also take their rise in this region. Other beautiful lakes are Shoshone, Lewis, and Heart Lakes. Within the Park are the Great Falls, and the Grand Cañon of the Yellowstone. In the Falls the river precipitates itself over a cliff 112 ft. in height, and about ½ m. lower down it makes a second plunge of 300 ft. into a chasm, at some parts 1000 ft. deep, through which it flows for 12–15 m.; this is the Grand Cañon. The great continental 'divide' crosses the southern part of the Yellowstone Park. The Park is a refuge for the larger game—buffalo, elk, antelope, and bear—which, but for the protection here afforded, would soon be exterminated. On the S. and E. sides is a 'timber preserve,' containing about 1935 sq. m., practically an extension of the Park, making the total area about 5283 sq. m.

Yellow Sulphur Springs, vil., U.S., Virginia, Montgomery co.; its medicinal springs draw many visitors. P.<1500.

Yelmo, mt., Spain. See **Segura, Sierras de.**

Yelvertoft, par., Eng., Mid div. of Northamptonshire, 6 m. E. Rugby, 2 m. S. of its stn. (**Y. and Stanford Park**), P.O. P.<500.

Yelverton, stn., Eng., Devonshire, on the G. W. R., 5 m. SSE. Tavistock, PMT.O.

Yelverton, par., Eng., Norfolk, S. div., 5½ m. SE. by S. Norwich, 4½ m. E. by N. Swainsthorpe stn. P.<250; eccles. par. (**Y. with Alpington**) P.<250.

Yemana, or **Yemame,** dist., central Arabia, S. of Nejd, and W. of El Haza; cap. Salemiye.

Yemba, lake, Africa. . See **Tanganyika.**

Yemen, Turkish vilayet in the SW. of Arabia, bordering the Red Sea from about 17½° N. to the Straits of Bab-el-Mandeb, and lying to the N. of the chieftaincies dependent on Aden; cap. Sana. It is the *Arabia Felix* of the ancients, or rather the southern and most favoured part of it, that name having been applied to all that part of tropical Arabia enjoying the benefit of monsoon rains, coupled in the mountains with a mild climate. Like most of the other maritime parts of Arabia, it has on the side next the sea a series of nearly level plains, known collectively as the Tehama. In Y. these form a series of terraces, each nearly level, rising one above the other to the base of the mountains, which lie at a distance of about 35–50 m. These plains are arid and nearly desert, covered at most with a scanty and coarse shrubby vegetation. Beyond the Tehama, however, a range of mountains, here collectively known by the name of Serat, gradually rises to the height of about 10,000 ft., and on their outer slopes they enfold a large number of the most fertile valleys in the world, producing a great variety of tropical and sub-tropical produce—coffee, bananas, date, dum and other palms, figs and other southern fruits, durrah, dukhn (*Holcus Dochna* or *Pennisetum typhoideum*), maize and other grains, cotton, kat (*Catha* or *Celastrus edulis*), sesame, &c., &c. For coffee, the most important object of culture, at least in the western valleys behind Mokha and Hodaida, the climate is described by Glaser as almost ideal. Winter and summer alike a thick mist rises from the Tehama to the slopes on which the coffee is grown. About mid-day the plantations themselves become enveloped in mist, and thus protected against the glare of the sun, which the coffee-tree cannot stand very well. This shade continues until after the greatest heat of the day is usually experienced elsewhere, and then disappears. So regular is this occurrence that in certain places there are scarcely twenty days in the year on which the mist fails to rise. By night, on the other hand, the air ascending from the Tehama helps to prevent an excessive lowering of the temperature, so that there is here, as it were, hothouse culture regulated by nature. To take advantage of this admirable climate an enormous amount of labour has been spent in terracing the steep hill-slopes. On the road from Hodaida to Sana endless flights of terrace walls meet the eye on every side. Usually the walls are from 5 to 8 ft. high, and towards the top of the mountain much higher, sometimes 15 or 18 ft., each wall retaining on an average a terrace not more than twice its own height in width. On the top of the mountains beyond these valleys central Y. is a plateau of about 8000 ft. in average altitude, broken only by 'hideous ledges of black volcanic rock.' Farther E., Y. embraces the dist. known as the Jauf, or Jof (different from that so called in N. Arabia), containing many interesting remains of antiquity [**Marib**]. Transport is effected by means of camel caravans, camels travelling with ease over rough mountain roads that seem to strangers almost impassable for a mule. The only port of any consequence now is Hodaida, the former ports of Mokha and Lohaia having both declined, and Ghalefka become silted up. Area about 77,000 sq. m. P. about 750,000.

Yemen-kwan, pass, N. China, in N. of prov. Shansi, across the Mantu-shan, 12 m. NW. Tai-chou, in 39° 15′ N., 112° 50′ E., on one of the principal caravan routes from Peking to Mongolia. Alt. 6150 ft.

Yemiganúr, tn., Brit. India, Madras, dist. and 59 m. NE. Bellary; once noted for its weaving. P. 9700; Hindus, 7500.

Yen, riv., Upper Burma, formed by the union of two head-streams which unite a little to the N. of 20° N., after which the river winds W. into the Iráwadi, which it joins below Magwe.

Yena, tn., Turkey in Europe, prov. Kirk-Kilise, 47 m. E. Adrianople.

Yenang-young, tn., Upper Burma, on the l. bk. of the Iráwadi, 50 m. S. Pagan; petroleum in the neighbourhood. P. <5000.

Yenbai, vil. and fort, Tongking, at the head of regular navigation on the Songkoi (Red R.), midway between Hanoi and Laokai (about 100 m. by river from either); valuable coal strata in the neighbourhood.

Yenching, or **Yenking,** China. See **Peking.**

Yenisei, large riv. of NW. Mongolia and E. Siberia, govt. Yeniseisk, rises, from the junction of Bei-khem and Khuakhem, in the NW. Mongolia part of the High Plateau of E. Asia, in the S. of the Ergik-targak-taiga. They flow in open valleys at altitudes of 3000–3500 ft., and make by their junction the Ulu-khem, which pierces the Sayan border-ridge on the Russian frontier, where it assumes the name of Y., as well as a series of parallel chains fringing the border-ridge; it issues from the highlands under 53° 10′ N. at Sayanskoye. Flows next through the elevated plains of Minusinsk, receiving Abakan (l. bk.) and Tuba (r. bk.). In 55° N. bends NE. at the base of a range of a lower plateau, on the N. slope of which flows the Chulym, trib. of Ob′, within 6 m. distance from Y., 440 ft. above this latter. Joined by Kan below Krasnoyarsk, and next by Angara or upper Tunguska, which is now being rendered navigable by clearing its rapids as far as Irkutsk, and possibly as far as Lake Baikal. Approached on the left by several tribs. of the Ob′, one of which, the Ket, has lately been connected with the Y. by a canal with locks, which now only has to be enlarged. In 62° N. it receives from right the Podkamennaya Tunguska and, further on, the Nizhnyaya Tunguska, near Turukhansk (65° 40′ N.), and the Kureika and Denezhkina from the left. Attains the width of 6 m., and at Dudino begins to form an estuary, which is in places 40 m. wide, and contains numerous islands. Navigated by steamers between Krasnoyarsk and Minusinsk, and again below Yeniseisk town, which has been reached by Nordenskjöld on board a ship coming from Norway. The Y. Bay is now regularly visited by steamers from Europe (*viâ* Kara Sea); a regular navigation will be established when the surveys of the bay are completed, and a river-port is established in the estuary for unloading the vessels. Total length, 2500 m. (taking the Angara for its source); area of basin, 792,300 sq. m

Yeniseisk, prov., Russia, E. Siberia, has Arctic Ocean on N., NW. Mongolia on S., Tomsk on W., Yakutsk and Irkutsk on E. Covers one-ninth part of the Russian Empire. Includes in S. the W. Sayans, 7000–8000 ft., bordering the plateau of NW. Mongolia, and the belt of alpine tracts which fringe the plateau on NW. and N., consisting of shorter chains, running mostly SW. to NE., intersected by deep valleys (named S. Yeniseisk Taiga in SE. of Krasnoyarsk); a terrace of elevated plateaux, 1500–2000 ft. high, lies at the NW. of the above. Another system of mountains, the N. Yeniseisk Taiga, rises on the outer border of this last terrace, and consists of short chains, 2500–3000 ft. high, running NE., and containing rich gold-diggings in their valleys. Beyond the N. Yeniseisk Mts. begin the lowlands, 300–500 ft. high, gently sloping towards the Arctic Ocean, and further on, N. of 70° N., spread treeless *tundras*, protruding in Cape Chelyuskin to 77° 38′ N. The Tunguskiy Range and the Byrranga Mts. diversify their monotonous surface. Two great bays of the Arctic Ocean, Tazovskaya and Yenisei, 300 m. long, penetrate deeply into the mainland. Gyda, Taimyr, Thaddeus, and Khatanga Bays are also large inlets. The alpine regions of Y. consist of granites and syenites, as well as of a variety of gneisses, diorite and clay slates, talc and mica schists, intersected by dykes of protogene, diorites porphyry, marble, and quartz. Silurian, Devonian, Carboniferous, and Triassic deposits are spread in the plains, and covered in places by fresh-water and coal-bearing Jurassic deposits. Chalk and Eocene deposits are found further N. Traces of glaciation are met with in the hilly tracts, while a wide series of Post-Pliocene deposits are spread over the lowlands, and contain corpses and skeletons of mammoths and rhinoceroses. The S. and N. Yeniseisk Taigas, as also the spurs of the Kuznetskiy Alatau in the SW., are rich in auriferous deposits, and about 8500 lbs. of gold are extracted every year; iron ore widely spread (one small iron-work only, at Abakan); salt lakes in S. Well watered by Yenisei and its numerous affluents. Climate dry and relatively mild on the prairies (Steppes) of Minusinsk. Very cold and dry (want of snow) at Krasnoyarsk. Very cold and wet in the tundras (Taimyr, aver

age summer temp. 45°); the average temps. at Yeniseisk are: yr. 28° F., Jan. −12°, July 66°. Population mostly Russian. Survivals of a variety of Turkish and Samoyedic stems in the spurs and at the foot of the Sayans (Koibals, Kacha Tatars, Sagais, &c.; Karagasses, Kotts, Arintsi disappearing). About 2000 Tunguses and a few Yakuts, Ostyaks, and Yuraks. Chief occupations of Russians and Tatars, agriculture and cattle-breeding, the Minusinsk prairies being the granary of the prov. No manufactures worthy of mention. Hunting and fishing. Divided into five dists.: Krasnoyarsk (the cap. of the prov., now on the point of being connected by rail with Omsk, and later on will be connected with Irkutsk), Achinsk, Kansk, Minusinsk, and Yeniseisk; Turukhansk, chief town of a wide region (*Turukhanskiy Krai*). Area, 987,186 sq. m. P. (1860) 313,350; (1890) 458,570.

Yeniseisk, dist. tn. of prov. of same name, on r. bk. of Yenisei, 200 m. N. by W. Krasnoyarsk, 58° 27′ N., 102° 6′ E.; entrepôt for gold-mines of its wide district; public library; good natural history museum. Mean rfall. (12 yrs.), yr. 15.5 in., May-Nov. 12.0 in. P. 6650.

Yenishehr, or **Yenisheher** ('new town'), coast tn., Turkey in Asia, 25 m. ENE. Brusa, about 2 m. S. of the entrance to the Dardanelles.

Yevre, riv., France, dep. Cher, and r. bk. trib. of Cher (Loire basin), flowing from 17 m. E. Bourges to Vierzon; the Canal de Berry runs parallel for some distance. Length, 42 m.; area of basin, 1245 sq. m.

Yewbarrow, mt., Eng., Cumberland, N. side of Wast Water. Alt. 2058 ft.

Yeya (**Eya**), riv., Russia, rises in govt. Stavropol, enters Sea of Azov; many populous villages on its banks; fisheries. Length, 150 m.

Yezd, tn., Persia, prov. Kerman, 165 m. ESE. Ispahan, situated in an oasis of mulberries in a sandy plain, between two ranges of heights (containing lead, marble, and rock-salt). The fertility of the oasis depends on the snows and rains which fall on the neighbouring hills, the water from which is carefully collected in underground reservoirs. Centre of the silk industry of Persia (now partly decayed). This town and the dist. round contain the bulk of the 9000 or so adherents of Zoroastrianism, the ancient religion of Persia. P. 70–100,000.

Yezdikhast, vil., Persia, 80 m. SSE. Ispahan, curiously perched on a hump of rock rising out of the middle of a broad trench (upwards of 250 yards wide) which forms a gash in the face of a wide plain.

Yezidi, religious sect in Turkish and Persian Kurdistan and upper Armenia, about 50,000 in number; the name means 'star worshippers.'

Yezo, or **Hokkaido,** the northernmost of the isls. of Japan, is separated on the S. from Honshiu by the deep strait of Sangar or Tsugaru (10–12 m. wide), and on the N. from Sakhalin Is. by the Strait of La Perouse. Its outline is very irregular; but the coasts are tolerably regular and unbroken, in part low and swampy, as on the NE. and SE., in part faced with high cliffs (up to 500–1000 ft. high) in the E., W., and S. The interior of the island is a plateau rising up to 4000 ft., with elevated ridges, studded with volcanic peaks (Nutapkanshipe, 7500 ft.), radiating E., S., and N. A secondary backbone extends right down the W. ct., and is overtopped by several volcanic mountains, *e.g.*, Makkarinobori (6440 ft.). Hot springs are used for medicinal purposes near Mororan and N. of Hakodate, on the shores of Volcano Bay. Lakes (Eniwa and Tayako) exist in the W. and (Kucharo) in the E. On the NE. ct. there are large lagoons (Saruma, Notoro, and Abashiri), and near Akkeshi Bay in the SE. Three considerable rivers (100–200 m. long), the Ishikari (going SW.), the Teshio (NW.), and the Tokachi (SE.), drain the plateau, which is covered with primeval forest. In several respects the animal life differs from that in Japan, the Strait of Tsugaru (Blakiston's line) forming a sharp boundary between them. The winter, which lasts six months, is very severe, especially along the NE. ct., which is usually blocked with drift ice. On the other hand, the summer is very hot, breeding swarms of mosquitoes and different kinds of flies. Fogs prevail during the summer off the SE. ct. For temperature and rainfall, see **Hakodate, Nemuro,** and **Sapporo.** Y. possesses considerable mineral wealth, especially in coal and sulphur. Gold, iron, lead, lignite, and petroleum also exist. Coal is mined in the basin of the Ishikari (at Poronai and elsewhere); other beds exist on the NE. side of Volcano Bay and in the SE., particularly near Kushiro. Sulphur is

extracted on Mount Iwo-san (*q.v.*) or Yuzan and in the SW. penin. The Japanese government have been endeavouring to colonise the island with farmers from Japan, though with comparatively little success. Less than one-quarter of the entire area is cultivated, a large portion of the soil being poor in quality, and nearly three-fourths covered with forest; rice, rye, barley, wheat, and sugar are the crops principally grown. The chief occupations of the people are catching herring, salmon, sardines, oysters (in Akkeshi Bay and Saruma Lagoon), collecting edible seaweed (on SE. ct.), and preparing fish manure. Silkworms' eggs are reared in the SW. There are few roads as yet, though the government are making them by means of convict labour. Two lines of railway have, however, been built—one nearly 60 m. long from Otaru (W. ct.) up the valley of the Ishikari to the cap., Sapporo, and the coalfields (Poronai, Otaussi-noi, &c.); the other from the sulphur-mines of Iwo-san to the port of Kushiro. A third is being built from the Ishikari R. SW. to Mororan, on Volcano Bay. What little industry exists is confined to the production of silk, flour, sugar, and spirits. The principal ports are Hakodate and Mororan (SW.), Kushiro and Nemuro (SE.), and Otaru (W.). The present cap. is Sapporo; but the government have planned a new cap., Hokyo, 140 m. up the Ishikari R., in the dist. of Kamikawa. Other important towns are Esashi and Fukuyama. Both these, as well as Sapporo and Otaru, have each more than 10,000 inhabitants; Hakodate has nearly 60,000. Y. was conquered by a Japanese noble before the 17th century, and ruled by his descendants down to 1868. Since that date it has formed an integral part of the Japanese Empire. Area, 36,000–37,000 sq. m., a little larger than Ireland. P. (1876) 150,000; (1891) 314,000. In addition, there are probably 10,000–20,000 Ainu (*q.v.*), the aboriginal inhabitants of the island.

Yfan Brecheiniog, mt., Wales, Brecknockshire, 13½ m. WSW. Brecknock. Alt. 2631 ft.

Yokkaichi, tn., Japan, 50 m. E. Kyoto. P. 12,800.

Yokohama, 'open' seapt., Japan, isl. of Honshiu, cap. ken Kanagawa, 16 m. S. by W. Tokyo, of which city it is the port, and with which it is connected by railway, the first line constructed in Japan. Y. in 1859 took the place of Kanagawa, which was first appointed as the treaty-port on the W. side of Tokyo Bay, the change being made partly for political reasons, partly because of the better anchorage at Y. The harbour is sheltered by a breakwater, within which there is 1 sq. m. of anchorage, with a depth of 24–30 ft. at low water spring-tides, 26 ft. alongside of the pier. There are four government dry docks (including the Tokyo Dock), the longest 502.4 ft. long at the bottom, with a depth over sill of 28.4 ft. Cottons and woollens, metals, sugar, petroleum, and other commodities are imported to the value of nearly five millions sterling; and silk, tea, copper, coal, &c., exported to the value of more than seven millions sterling. In addition to the Japanese town (P. 152,200), there are a Chinese town (P. 3300) and a foreign (European) quarter (P. 1600, more than one-half English).

Yokoska, tn., Japan, Honshiu, prov. (ken) and 32 m. SW. Shizuoka. P. 5500.

Yolofs, W. Africa. See **Wolofs.**

Yoma (or **Roma**) **Hills,** two mt. ranges, Burma. The Arakan Yomas commence at Blue Mt. (alt. 7100 ft.), in 22° 37′ N., 93° 10′ E., run S. for more than 700 m., dividing Arakan from Upper Burma and Pegu, and, gradually diminishing, terminate in Cape Negrais. The chief pass is the An or Aeng Pass. The Pegu Yomas separate the valleys of the Sit-taung and Salwín, starting from Yekme-thin, in Upper Burma, and ending near the head of the Iráwadi delta.

Yonago, tn., Japan, 115 m. WNW. Kobe, N. ct. of Honshiu, at the E. end of a bay or lagoon. P. 12,500.

Yonezawa, tn., Japan, Honshiu, 63 m. E. by N. Niigata. P. 28,700.

Yongala, post-tn., S. Australia, Dalhousie co., 70 m. SE. by E. Port Augusta. P. <1500.

Yöngchhön, or **Yengchen,** tn., in NW. of Korea, about 15 m. E. of the mouth of the Yalu.

Yöng-hai, or **Yeng-hai,** tn., Korea, 100 m. N. by E. Fusan, near the E. ct., in 36° 35′ N.

Yöng-heung, or **Yeng-heung,** populous tn., Korea, 15 m. NW. by N. Wönsan, in 39° 20′ N.; gold and graphite obtained in the dist.

Yöng-san, river-port, Korea, adjoining Mapu. See **Han.**

Yonkers, city, U.S., New York, West Chester co., 19 m. N.

by E. New York, picturesquely situated opposite the Palisades, with the residences of many New York merchants. The manor house, built partly in 1682, is used as a city hall; manufactures of felt hats, cloths, sewing silk, carpets, lead-pencils, &c. P. (1880) 18,900; (1890) 32,000.

Yonne, dep., NE. central France, traversed ESE. to NNW. by Yonne R., formed in 1790 out of the provs. of Burgundy (Burgundy proper, Auxerre, and Avallonnais), Champagne (Champagne proper, Sénonais, and Tonnerrois), Orléanais (Gâtinais Orléanais), and Île de France (small part of Gâtinais Français), comprises five arrs.: Auxerre (cap.), Avallon, Joigny, Sens, and Tonnerre. Highest in Avallon in SE., Mount Lapeirouse (2000 ft.), with numerous hills of 1300–1650 ft., this dist. forming part of the Morvan. To the E., between the Cousin and Serein, is the plain, monotonous but highly fertile. Westward are low plateaux, in the SW., forming a distinct region, the Puisaye; this is the wildest region in Y., with marshes, pools, and forests. In the N. is the great forest of Othe. The dep. belongs to two basins, those of the Seine and the Loire, chiefly the former. The Loire drains only a small dist. in the SW.; the Seine receives the drainage by the Yonne and the Soing. The Y. traverses the dep. for 106 m., receiving on r. bk. the Cure with its affluent Cousin, Serein, Armançon (accompanied by the Canal de Bourgogne), and Vanne; the Loing, with its trib. Ouanne, drains the W. The Y. is navigable, and the Cure and Armançon are used for floating timber. Granitic rocks predominate in the Avallonnais, and calcareous formations throughout the rest of the dep. Climate similar to the Parisian; rainfall greatest in the W. Of cereals, cultivated chiefly in the arr. of Sens and the valleys of the Y., Tholon, and Armançon, wheat is the most important, then oats; the vine covers about 5 per cent. of the surface (Armançon valley, Auxerre, Chablis, &c.), production per acre about two-thirds of the average. No manufactures of importance. Area, 2894 sq. m. P. (1891) 344,700.

Yonne, the ancient *Icanna*, riv., France, deps. Nièvre, Yonne, and Seine-et-Marne, rises in the mountains of Morvan, about 15 m. W. Autun, and flows on the whole NW. past Clamecy, Auxerre, Joigny-le-Roi, Sens, &c., to join the Seine (l. bk.) at Montereau, 12 m. E. Fontainebleau. About 25 m. from its source it strikes the Canal of Nivernais, which accompanies it to Auxerre, where the river itself begins to be navigable for boats drawing 4½ ft. Some 15 m. below this it is joined by the Burgundy Canal. Length, 120 m.; basin, 4160 sq. m. Ordinary discharge about 2650 cubic ft. per second.

Yons Nab, cape, Eng., Yorkshire, N. Riding, 4 m. SSE. Scarborough.

Yora, riv., Transcaucasia. See **Alazan.**

Yordas Cave, Eng., Yorkshire, W. Riding, 4 m. N. Ingleton, lofty chamber 180 ft. long and 60 ft. high, with stalactites and stalagmites.

Yorgan-Ladik, tn., Asiatic Turkey, vilayet and 22 m. NNW. Konia; manufactures of carpets; ruins of *Laodicea Katakekaumene* in the neighbourhood.

York, co., Canada, New Brunswick, bounded SW. by Maine, U.S., crossed in the middle by 46° N. and 67° W.

York, co., Canada, Ontario, stretching from Lake Ontario to Lake Simcoe, crossed by 79½° W.

York, riv., Canada, Quebec, flows E. into head of Gaspe Bay, Gaspe Penin.

York (Latin, *Eboracum;* Anglo-Saxon *Everwye* or *Yvorwye*, both from ancient British (Caer) *Efroc*, probably connected with Celtic *eur*, *ebr*, 'water'; *eabar*, 'marshy soil'; hence 'the town in the marsh'—Egli), episcopal city, parl. and (since Henry I.) mun. bor. and co. in itself, Eng., Yorkshire, at the junction of the rivs. Ouse and Foss, in the diocese of York, 188 m. N. London (almost equi-distant from the English and Scottish capitals). The surrounding country, 'the Plain of York,' is of remarkable fertility. The city, with its narrow antique streets and its preserved walls, still forming a promenade, has a mediæval and dignified character, the crowning feature being the cathedral. The Ouse is crossed by three bridges, and its trib., the Foss, by five. Four great gates still pierce the walls, viz., 'Micklegate Bar' on S., 'Bootham Bar' on N., 'Monk Bar' on the Scarborough road, the most imposing, and 'Walmgate Bar,' retaining its ancient barbican. Y. cathedral is, in several respects, the finest and most remarkable of all English churches. It measures 524½ ft. by 250 ft., with central tower 216 ft. high, and the western towers each 202 ft. On the site of King Edwin's wooden church 'a more noble basilica' (according to Bede) was soon built, to be replaced by another in the 11th century, which was afterwards repeatedly rebuilt or enlarged. A striking and beautiful feature now is the W. front with the great window above the door, which, according to Mr. Britton, 'is an unrivalled specimen of leafy tracery.' Not till 1472 was York Minster completed as it now stands. There are many other beautiful churches. Amongst public buildings are the Guild hall, the Mansion House, the Assembly Rooms, theatre, &c. There is a public library of over 20,000 volumes, two museums, &c., and several endowed schools. The castle (dating from Edward I.) is an interesting object near the river, with Clifford's Tower. The railway station, into which through trains run from the G. N., G. E., M., L. & Y., L. & NW., and NE. Rlys., is one of the most imposing in the kingdom. Under the Romans, Y. was the military capital of *Britannia*. Hadrian resided here in A.D. 120, and Severus died here 211; here, too, the great Constantine assumed the purple, 306. In 627 King Edwin constituted the bishopric of York, a see which from its dignity afterwards became an archbishopric, embracing the six northern dioceses of England, and originally a large part of Scotland. The actual see includes the E. Riding and parts of the N. and W. Ridings; revenue, £10,000. Y. stood a six months' siege by the first Norman king, and in 1644 had to surrender to the Parliamentary troops after a siege of thirteen weeks. Y., as parl. bor., returns two M.P.'s, having done so since Henry III. Market-day, S. Mean temp. (20 yrs.), 47.9° F., Jan. 37.6°, July 60.3°; mean rfall. (25 yrs.), yr. 26.1 in. Area (1891) of both mun. and parl. bor., 3591 ac. Mun. bor. P. (1801) 16,100; (1851) 36,300; (1871) 43,800; (1891) 67,000.

York, tn., U.S., Alabama, Sumter co., 110 m. SW. of Birmingham. Alt. 159 ft. (R.R.). P. <1500.

York, tn., U.S., Maine, Y. co., 45 m. SW. Portland; favourite summer resort; has a fair harbour, but its entrance is difficult. P. <3000.

York, city, U.S., Nebraska, Y. co., on the Salt Creek, 91 m. WSW. Omaha. P. <4000.

York, bor., U.S., Pennsylvania, cap. Y. co., which occupies the angle between the Susquehanna R. on the NE. and the S. frontier, 23 m. SSE. Harrisburg; extensive manufactures of agricultural implements, cars, engines, boilers, mill machinery, &c. P. (1880) 13,900; (1890) 20,800.

York, co., U.S., S. Carolina, on the N. frontier, crossed in the E. by 81° W., bounded on the E. by the Santee R.

York, co., U.S., Virginia, in the SE., bounded on the NE. by York R., Chesapeake Bay.

York, mun. tn., W. Australia, Y. co., 55 m. E. by N. Perth. The dist. is the principal source of sandal-wood supply. Alt. 580 ft. Mean temp. (6 yrs.), yr. 63.2° F., Jan. 76.4°, July 51.6°. P. <1500.

York, Duke of, isls., Pacific. See **Oatafu.**

York, New, PMT.O., Eng., near Lincoln.

Yorke's Peninsula, boot-shaped tract of land, S. Australia, between Spencer's Gulf and the Gulf of St. Vincent, crossed by 35° S., 137° 30′ E. The dist. is not fertile, but contains rich copper deposits.

Yorke Town, postal-stn., S. Australia, Fergusson co., 58 m. W. Adelaide; manufacture of salt from lakes in the neighbourhood. P. <1500.

York Factory, formerly **Fort York,** settlement, Canada, Keewatin, on Hudson Bay, at mouth of Nelson R. Mean temp. (10 yrs., 1875–84), yr. 19.7° F., Jan. 22.0°, July 61.3°; mean rfall. (7 yrs.), 27.86 in.

Yorkhill, stn., Scot., Lanarkshire, in the parl. burgh of Glasgow, on the N. B. R., 2 m. WNW. Glasgow Bridge (stn. for Govan Ferry).

Yorkley, P.O., Eng., Gloucestershire, 4 m. NW. Lydney, 2 m. from Whitecroft.

York Mount, peak, New South Wales, in the Blue Mts., about 70 m. by rail and road W. Sydney. Alt. 3292 ft.

York Peninsula, Queensland, separating the Gulf of Carpentaria from the Pacific, between 10° 11′ and 18° S., with apex projecting into Torres Strait, and terminating in Cape York.

York River, Canada, Quebec, Gaspé co., flows E. into Gaspé Bay, Gulf of St. Lawrence.

York River, the estuary of the Matapony and Pamunky Rivs., U.S., Virginia. It opens into Chesapeake Bay, about 37° 12′ N., forming a wide and deep natural harbour, which large vessels can ascend for 20 m.

York Road, vil., U.S., Maryland, Carroll co., on Monocacy R., 37 m. NW. by W. Baltimore. P. <1500.

Yorkshire, maritime co., Eng., on the German Ocean, the largest in the country, more than twice the area of Lincolnshire, the next in size, more than three-fourths of the size of Wales, containing 26 parl. divs., as shown in the following table:—

Parliamentary Divisions (anct. co.).[1]	Area in Acres.	P. 1891.
1. Thirsk and Malton	339,096	57,183
2. Richmond	544,806	54,439
3. Cleveland	147,352	55,882
4. Whitby	372,832	54,776
5. Holderness	197,726	41,298
6. Buckrose	268,218	50,877
7. Howdenshire	275,343	49,327
8. Skipton	435,285	58,209
9. Keighley	36,324	63,272
10. Shipley	10,173	62,166
11. Sowerby	57,432	63,202
12. Elland	21,405	64,632

[1] Nos. 1–4 belong to the ancient N. Riding, Nos. 5–7 to the ancient E. Riding, and the remainder to the ancient W. Riding.

Parliamentary Divisions (anct. co.).	Area in Acres.	P. 1891.
13. Morley	22,938	65,216
14. Normanton	44,726	72,012

23. Barkston Ash	151,735	48,470
24. Osgoldcross	115,311	66,794
25. Pudsey	16,343	49,252
26. Spen Valley	11,873	57,402
Parl. bors.	101,256	1,629,525
Total	3,882,848	3,208,828

Administrative Counties.	Area in Acres.	Pop. 1891.
E. Riding[1]	750,053	341,560
N. Riding[2]	1,360,925	360,369
W. Riding[3]	1,773,782	2,444,931
City of York, co. bor.	3,591	67,004
Administrative cos. of E., N., and W. Ridings and co. bors.	3,888,351	3,213,864

[1] Including the co. bor. of Kingston-upon-Hull. The ancient E. Riding excludes part of the urban sanitary dist. of Filey. Area, 749,513 ac. P. 341,546.

[2] Including the co. bor. of Middlesbrough. The ancient N. Riding includes part of the urban sanitary dist. of Filey. Area, 1,361,465 ac. P. 360,383.

[3] Including the co. bors. of Bradford, Halifax, Huddersfield, Leeds, and Sheffield. The ancient W. Riding excludes part of the urban sanitary dist. of Todmorden, in the ancient co. of Lancaster, and includes parts of the urban sanitary dists. of Crowle and Mossley, in the ancient co. of Lincoln. Area, 1,768,279 ac. P. 2,439,895.

From its size Yorkshire has from early English times been subdivided into three 'Ridings' (*i.e.*, *Thrid*-ings or *Third*-ings), each being now, with slight modifications, regarded for administrative purposes as a separate county, having its own lord-lieutenant, &c. The area and population of these counties, with their relation to the ancient Ridings, are shown above in the second table. The county is mainly composed of the basin of the Ouse, which is flanked W. by the Pennine Range, E. by the Cleveland Hills and the Wolds, and stretches SE. to the Humber. Outside that basin the county includes a portion of the Ribble basin, a strip along its N. border watered by the Tees, and another along the coast. The NE. ct. is bold and rocky, but from Flamborough Head to Spurn Head it is low. Geologically the great feature of the Pennine Chain on the Yorkshire slope, all over the NW. of the county, is the Lower Carboniferous or Mountain Limestone. The limestones crop out on the hill-tops and sides in grey perpendicular-fronted terraces, and form an unmistakable feature throughout the district. To this region belong the highest peaks of the county (Mickle Fell, 2591 ft., in the NW. corner; Whernside, 2414 ft.; Ingleborough, 2373 ft.; Penygent, 2273 ft.). The Yoredale series, chiefly shales, flagstones, and limestone, is succeeded by the Millstone Grit. SE. of the Pennine dist. begin the Coal-Measures. All these members of the Carboniferous system succeed one another from N. to S. (the older in the N.), and are followed on E. by Permian strata overlaid by New Red Sandstone, which forms the low level Vale of York. Further E. occurs Lias in a narrow strip, bounding the great central basin from Redcar on the Tees to the Humber, and succeeded eastwards in the N. by the Oolitic heights forming the 'E. Moorlands' or Y. Moors, near Scarborough and Whitby, which rise to 1489 ft. at Burton Head, and, S. of the upper valley of the Derwent by the chalk tableland known as the Y. Wolds, the highest elevations of the county occur. Y. is noted for the scenery of its river valleys, the chief being the Ouse, formed by the Swale and Ure, receiving (r. bk.) the Nidd, Aire, Don, and (l. bk.) the Derwent, and finally forming with the Trent, the Humber, a broad, tidal estuary. During the Roman period this district was in some respects the most important in the island—*Eboracum* being the cap. of *Britannia*, as well as of the prov. *Maxima Cæsariensis* (see **York,** city). In Saxon times it was a chief part of the kingdom of Northumbria. Under the Norman rule it was often overrun by the Scots, King David in 1138 laying waste the land up to the gates of York, but defeated soon after at Northallerton. Two battles of the 15th century are famous—Wakefield in 1460, and the slaughter at Towton Heath, 1461. Marston Moor, scene of the Cromwellian victory of 1644, is but a few miles W. of the county town. Y. surpasses every county in ecclesiastical buildings—for some of these, and for castles, antiquities, &c., see below, under the respective Ridings. There are many noted mineral wells; *e.g.*, Harrowgate, Scarborough, Guisbrough, Boston-Spa, &c. There is abundant railway communication by the NE. R. and M. R., both meeting at Hawes, by G. N. R., the M. S. & L. R., the L. & Y. R., &c. Y. is in the dioceses of York, Durham, Lincoln, Ripon, Manchester, Southwell, and Wakefield. It returns fifty-two members to Parliament, including the borough members. See **England,** table.

I. East Riding, E. of the county town, extending from the Humber to Filey Bay. The W. dist., in the Ouse valley (called the 'Carrs,' or Howdenshire), has much rich soil, with stiff, clayey moorland in the uplands. The lower Wolds are fertile, while Holderness is mainly red clay and sandy loam. The E. Riding has over 14 per cent. of its area under oats, Chester (the second English county for oats) having only 9 per cent. See table (as above). For other agricultural statistics, see **Appendix,** pp. 7–9. There are valuable stone-quarries. White bricks made at Howden, and various manufactures are carried on at Hull. This Riding has some interesting churches; amongst the antiquities are two priories and remains of ancient Celtic settlements in the Wolds. It returns six members to Parliament, including the borough members. There are three mun. bors.—Hull, Beverley, and Hedon.

II. North Riding extends from the Pennine Range to the coast to N. of the riv. Ure and the E. Riding, containing four parl. divs. (see table). The surface consists of three parts: the W. moorlands, mostly in pasture; the rich district of the Vale of York; and the E. moorlands, with Cleveland, crossed by its beautiful valleys of the Esk and the Leven, and the fertile vale of the Rye. For agricultural statistics, see **Appendix,** pp. 7–9. Cleveland is of very great importance from its coal and ironstone (see **Middlesbrough, Stockton, Guisbrough**). Salt is extracted from brine at Middlesbrough and Cargo Fleet; lead ore is mined in Arkengarthdale and Swaledale; barytes at Mickleton and in Wensleydale; jet is obtained at several places near Whitby. Flagstones and slates are quarried in many parts of the county, and gannister has been obtained near Hawes. Besides the antiquities in and near the city of York, this Riding is noted for the abbeys Rievaulx, Jervaulx, and others, the castles of Helmsley, Richmond, Scarborough, &c. It returns eight members to Parliament, including the bor. members. There are four mun. bors.—York, Middlesbrough, Scarborough, and Richmond.

III. West Riding, separated from Lancashire by the Pennine Range, contains, between the Aire and the Don, a great coal-field of 45 m. by 20 m. in area, and is therefore one of the greatest and wealthiest seats of British manufacture: especially woollens at Leeds, Bradford, Halifax, Dewsbury, and Huddersfield; linen at Leeds and Barnsley; hardware, cutlery, &c., at Sheffield. The W. Riding contains three parl. divs. (see table). The chief centres of the coal-working are Bradford, Leeds, Rotherham, Sheffield, Dewsbury, Wakefield, &c. There are blast-furnaces at Leeds and Ardsley Junction. Lead ore is mined at Skipton and Pateley Bridge; barytes at Lothersdale. Stone quarries are numerous; among them may be mentioned the grindstone quarries at Wickersley, near Sheffield. The W. Riding returns 22 members to Parliament, including the bor. members. There are 14 mun. bors.—Leeds, Sheffield, Bradford, Halifax, Dewsbury, Huddersfield, Pontefract, Wakefield, Barnsley, Batley, Doncaster, Morley, Ripon, and Rotherham.

York Sound, an inlet on the NW. of the Kimberley div. of W. Australia, crossed by 15° S.

York Sulphur Springs, bor., U.S., Pennsylvania, Adams co.; pleasant summer resort. P. <1500.

Yorkton, settlement, Canada, dist. Assiniboia, 105 m. ENE. Regina.

Yorktown, coal-mining tn., U.S., Pennsylvania, Carbon co., contiguous to Audenried. P. <1500.

Yorktown, vil., U.S., Virginia, York co., on York R., 56 m. SE. Richmond. Here the revolutionary war was terminated, 1781, by the surrender of Lord Cornwallis to Washington. P. <1500.

York Town with Camberley, eccles. par., Eng., Surrey, Chertsey div., 10½ m. NW. Guildford, on the borders of Hampshire and Berkshire, 1 m. ENE. Blackwater stn., with a stn. (**Camberley and Y. T.**) on the L. & SW. R. P. <3500.

Yorkville, vil., Canada, Ontario, co. York, 2 m. N. Toronto, with which it was incorporated in 1883. P. (1881) <5000.

Yorkville, bor., U.S., Pennsylvania, Schuylkill co., near Pottsville. P. <1500.

Yorkville, tn., U.S., S. Carolina, York co., 68 m. N. by W. Columbia; has a military school. P. <2000.

Yoro, tn., Central America, Honduras, 98 m. NE. Tegucigalpa.

Yoro, riv., Nicaragua. See **Coco.**

Yorton, stn., Eng., Shropshire, on the L. & NW. & G. W. Joint Rly., 7 m. N. Shrewsbury.

Yoruba, or **Yarriba,** country in W. Africa, W. of the lower Niger. It is a fertile and densely peopled country belonging to

the British sphere of influence (see **Niger Territories**). Agriculture, commerce, and cattle-rearing form the chief occupations of the inhabitants, and native industries (leather goods) are highly developed. Traversed by rivs. Oni, Ogun, and Oshun. Principal town, Ibadan. Area estimated at 18,500 sq. m. P. estimated at 3,000,000. [**H. G. S.**]

Yosemite (yo-sĕm'i-te) **Valley,** U.S., California, on the W. slope of the Sierra Nevada. The valley is nearly level, about 6 m. long, from ½ m. to 1 m. wide, almost a mile below the general level of the surrounding region, and enclosed within almost perpendicular granite walls, 3000–6000 ft. in height. The valley is covered with a great variety of beautiful flowering plants and lofty trees. It was discovered in 1851 by Captain Boling when pursuing a band of Indians. An Act of Congress in 1864 granted the Yosemite Valley to the state of California for public use and recreation for all time. On the N. of the valley the Yosemite Creek makes a vertical fall of 1500 ft., then a series of cascades, and a final leap of 400 ft. Elevation of the valley about 4000 ft.

Yosgad, improper spelling of **Yozgad,** Asia Minor.

Yoshida, tn., Japan, near middle of SW. ct. of Shikoku I. (Ehime ken). P. 5900.

Youghal (yu'awl), mun. bor., market-tn., and seapt., Ire., co. and 27 m. E. Cork, bar. Imokilly, on W. of the Blackwater estuary, sub-port to Cork, on G. S. & W. R. Formerly enclosed by walls, of which parts remain. St. Mary's Church was rebuilt in the 15th century, and restored in the 17th; the site was occupied by an earlier church, existing before the Norman invasion. The house of Sir Walter Raleigh still exists nearly unaltered. The harbour is safe, but the bar prevents the entrance of vessels drawing more than 20 ft. Exports, corn and live stock, &c. Imports, coal, timber, colonial produce, &c. Salmon fishery is important here. Market-day, S. Par. 4831 ac., P. (1871) 7500; (1891) 6300; tn. P. <4500.

Youghalarra, par., Ire., co. Tipperary, bar. Owney and Arra, 5 m. NW. Nenagh; 7796 ac. P. <1000.

Youghiogheny (yō-hō-ge'nī), riv., U.S., Maryland, in the extreme NW., trib. of the Castlemans, which it joins on the l. bk.; navigable to the beautiful waterfall 30 m. from the mouth.

Youlgreave, par., Eng., Derbyshire, W. div., 6 m. NW. by W. Matlock, 3 m. W. by S. Rowsley stn. Church with ancient font 700 years old. Calcspar and gravel are quarried here. PMT.O. (**Youlgrave**). P. <1500.

Youlthorpe with Gowthorp, par., Eng., Yorkshire, E. Riding, Howdenshire div., 11 m. E. by N. York, 2 m. NE. by N. Fangfoss stn. P. <250.

Oulton, par., Eng., Yorkshire, N. Riding, Thirsk and Malton div., 10 m. NW. York, 1½ m. WSW. Tollerton stn. P. <250.

Youndegin, postal-stn., W. Australia, Howick co., 90 m. E. by N. Perth. P. <1500.

Young, cape, Korea. See **Fusan.**

Young, co., New South Wales, bounded on the SE. by the Darling R., and crossed in the S. by 32° S.

Young, tp., New South Wales, Monteagle co., 90 m. WNW. Goulburn. Here are the Burrangong goldfields, principally alluvial. P. <3000.

Young, co., S. Australia, bounded on the S. by the Murray, crossed in the middle by 140° E.

Young, co., U.S., Texas, in the N., crossed in the S. by 33° N., W. of 98° W., traversed by the Brazos R.

Youngstown, vil., U.S., New York, Niagara co., on Niagara R., 28 m. NNW. Buffalo. P. <1500.

Youngstown, city, U.S., Ohio, Mahoning co., on Mahoning R., 63 m. ESE. Cleveland, with extensive coal and iron industries, blast-furnaces, and foundries; has excellent railway communications. Alt. 863 ft. (R.R.). P. (1880) 15,400; (1890) 33,200.

Youngsville, bor., U.S., Pennsylvania, Warren co., 41 m. SE. by E. Erie. P. <1500.

Young Town, post-tn., Tasmania, Cornwall co., 3 m. S. Launceston. P. <1500.

Yoxall, par., Eng., Staffordshire, Burton div., 7 m. WSW. Burton-upon-Trent, 4 m. W. by N. Barton and Walton stn., PM.O.; 5103 ac. P. <1500.

Yoxford, par., Eng., Suffolk, Eye div., 19 m. SW. Lowestoft, 1 m. SW. Darsham stn., PMT.O. P. <1500.

Yozgad, or **Yüzgat,** tn., Asia Minor, vilayet Angora, 83 m. NNW. Kaiserieh. P. about 15,000 (Cuinet).

Ypacaray, lake, Paraguay, 19 m. E. Asuncion, 12–15 m. long, drained NW. into the Paraguay.

Ypane, and **Ypanema,** rivs. See **Ipane, Ipanema.**

Yport, tn., France, dep. Seine-Inférieure, arr. Havre; pleasant beach. P. <2000.

Ypres, French; Flemish **Yperen,** fortified tn., Belgium, prov. W. Flanders, 15 m. NW. by W. Tourcoing (France). The town, celebrated since the Middle Ages, has many relics of that period; among these the markets ('Les Halles'), an immense edifice in the Pointed style, begun by Baldwin, Count of Flanders, in 1201, completed in 1342; façade recently restored; the church of St. Martin, formerly a cathedral, dating mainly from the 13th century, containing the tomb of Bishop Jansen (died 1638); the houses of the Templars. In the 14th century it was noted for its manufacture of woollen cloth, and is said by some to have had a population of 200,000; but in the following century gradually declined, and never recovered. It now has textile and other manufactures on a small scale. Seat of a bishop from 1509 to 1801. Frequently taken and retaken by the French. P. 16,500.

Ypsilanti, city, U.S., Michigan, Washtenaw co., on Huron R., 30 m. W. Detroit. P. 6100.

Ypun, or **Narborough,** isl., off the coast of Chile, in the W. of the Chonos Archipelago, crossed by 44° 40′ S.

Yquitos, tn., Peru. See **Iquitos.**

Yr-Aran. See **Snowdon.**

Yr Arryg, mt., Wales, Carnarvonshire, 6 m. SE. Aber. Alt. 2950 ft.

Yr Eifl, mt., Wales. See **Rivals, The.**

Yreka, city, U.S., California, Siskiyou co., 88 m. E. by S. of NW. corner of state, with rich placer and quartz gold-mining. Is the point of supply for the N. part of the state. Alt. 2731 ft. (Williamson, *b.*). P. <1500.

Yrfon, riv., Wales, Brecknockshire, in the NW., trib. of the Wye, which it joins on the r. bk. at Builth.

Ysabel, one of the Solomon Is. See **Isabel.**

Ysabela, tn., isl. of Haiti, republic and 11 m. WNW. Santo Domingo.

Ysceifiog, par., Wales, Flintshire, 3½ m. SW. by S. Holywell, 1½ m. N. Nannerch stn., P.O.; 6077 ac. P. <1500.

Ysclydach, par., Wales, Brecknockshire, on riv. Usk, 8 m. W. Brecknock. P. <250.

Yser, riv., France and Belgium, rises in dep. Nord, and enters North Sea, 1½ m. below Nieupoort, W. Flanders. Length, 55 m.

Ysgwd-yr-Eira, fall, Wales. See **Hepste.**

Yshibum, Arabia. See **Yeshibum.**

Ysleta, tn., U.S., Texas, El Paso co., 30 m. SE. by S. of the W. corner of the state. P. <2000.

Ystradmeurig, P.O., Wales, Cardiganshire; has lead-mines. See **Yspytty Ystradmeurig.**

Ystrad Mynach, eccles. par., Wales, Glamorganshire, on the L. & NW. & Rhymney, and G. W. & Rhymney Joint Rlys., 11 m. N. Cardiff; has coal-mining. P.O. (**Ystradymynach**). P. <750.

Ystradowen, par., Wales, Glamorganshire, S. div., 11½ m. W. by N. Cardiff, on the Cowbridge branch of the Taff Vale Rly. P. <250.

Ystrad-Rhondda, PMT.O., Wales, near Pentre, Glamorganshire; coal mined.

Ystradvelltey, par., Wales, Brecknockshire, 8½ m. NW. by W. Merthyr-Tydfil, 5 m. NNW. Hirwain stn., on the Mellte, which about a mile below runs for 250 yards through the cavern of Cwm Porth; 19,355 ac. P. <750.

Ystrad-y-fodwg, par. and tn., Wales, Glamorganshire, Rhondda div., on the Rhondda, 9 m. SW. by S. Merthyr-Tydfil, with a stn. (**Ystrad**) on the Taff Vale Rly.; coal-mines. 19,441 ac. P. 68,700; urban sanitary dist. P. 88,400. The boundaries of the par. were made coincident with those of the urban sanitary dists. in 1894.

Ystradymynach, P.O., Wales. See **Ystrad Mynach.**

Ystwith, riv., Wales, rises in the SW. of Montgomeryshire, flows W. and NW. through Cardiganshire into Cardigan Bay at Aberystwith.

Ytatiba, vil., Brazil. See **Itatiba.**

Ythan (ai'than), small riv., Scot., Aberdeenshire, flowing SE. past Ellon, and entering the German Ocean 12 m. N. Aberdeen.

Ythanbank, P.O., Scot., 5 m. from Ellon, Aberdeenshire.

Ythan Wells, eccles. par., Scot., Aberdeenshire, Auchterless and Forgue pars. P. <1500.

Ython, riv., Wales. See **Ithon.**

Y Tryfan, remarkable pyramid of rock, Wales, Carnarvonshire, 5 m. SE. Bethesda, rising 2000 ft. above the Llugwy valley. Alt. 3009 ft.

Ytterö, isl., Norway, W. ct., in the middle of the Trondhjem Fjord, 29 m. NE. Trondhjem, 8½ m. long, in places only about ½ m. wide. Area, 14 sq. m.

Yüanchou-fu, tn., China, Hunan, 230 m. WSW. Changsha-fu (in middle of prov.), in 27° 24′ N., 109° 25′ E.

Yüanchou-fu, or **Yüenchou-fu,** tn., China, prov. Kiangsi, 190 m. S. Hankow.

Yuan-kiang, riv., China, Kweichou and Hunan, flows NE. into Tungting Lu; navigable to Chenyuen-fu, within 130 m. of Kweiyang-fu, but with a series of dangerous rapids in about 28° 35′ N., 110⅝° E. *Jour. R. G. S.*, 1876, pp. 177–79.

Yuankiang-chou, tn., China. See **Yuenkiang-chou.**

Yuankio-hsien, Yuenka-hsien, or **Yuenkhio-hsien,** tn., N. China, Shansi, 50 m. SE. Kiang-chou, on l. bk. Hwang-ho, in 35° 5′ N., 111° 4′ E.; mines of copper and lead.

Yuasa, or **Yuwasa,** maritime vil., Japan, Honshiu, ken and 15 m. S. Wakayama, on a bay of the Kii Strait. P. 9300.

Yuba, co., U.S., California, crossed by 39° N., and W. of 121° W., traversed by Feather R., which here receives the **Yuba R.,** a little NE. of Yuba City.

Yuba City, vil., U.S., California, Sutter co., on the Feather R., 40 m. N. by W. Sacramento. P. <1500.

Yucatan (long called by the Spaniards the 'Island' of Santa Maria de los Remedios), one of the states of Mexico, formed by the large peninsula to the N. of Guatemala, on the E. side of the Gulf of Campeche (Campeachy), the town of this name being the centre of the commerce in log-wood (*Hæmatoxylon campechianum*) of the littoral forests. See **Mexico,** table.

Yucatan, Channel of, separating the penin. of Yucatan from the isl. of Cuba, 120 m. in breadth, 500–1000 fathoms deep in the middle, but having in the W., N. of the Yucatan Penin., a vast submarine bank covered by less than 100 fathoms of water.

Yuching-hsien, tn., China, Kweichou, 74 m. NE. by E. Kweiyang-fu.

Yü-chou, tn., China, prov. and 90 m. SSE. Honan, 205 m. NNE. Ichang, 60 m. SW. Kaifong-fu.

Yü-chou, tn., China, prov. and 80 m. SE. by E. Honan, 33 m. NE. Nanyang-fu, 270 m. NNE. Ichang; tin-mines.

Yuchou- (or **Yochou-**) **fu,** tn., China, prov. Hunan, 140 m. SE. Ichang, at the E. end of Lake Tungting.

Yudanamutana, copper-mining locality, S. Australia, in 30° 6′ S., 139° 44′ E. P. <1500.

Yudinskoye, vil., Russia, prov. Akmolinsk, 115 m. ESE. Omsk; fair. P. <2000.

Yudoma, riv., Russia, E. Siberia, govt. Yakutsk, r. bk. trib. of Maya (affluent of Aldan). Village **Yudomo-Krestovskoye** on it. Length about 400 m.

Yuehhsiting, tn., China, Süchwan, in Kienchang dist., 170 m. SW. by S. Chengtu-fu.

Yuelba, Yuleba, or **Yulebah,** post-tn., Queensland, Waldegrave co., 220 m. W. by N. Brisbane; depôt for stock in transit. P. <1500.

Yuenching, tn., China. See **Lungtsun-chou.**

Yuenchou-fu, tn., China, Kiangsi. See **Yüanchou-fu.**

Yuenka-hsien. See **Yuankio-hsien.**

Yuenkiang-chou, tn., China, in the S. of Yünnan, 108 m. SSW. Yünnan-fu.

Yuensan, Korea. See **Wönsan.**

Yuenshing, tn., China, prov. Shansi, 310 m. N. Ichang, 80 m. WNW. Honan.

Yug, riv., N. Russia, unites with the Sukhona to form the N. Dvina; rises and flows in govt. Vologda, with a rapid fall, mostly W.; joins Sukhona at Ustyug. Considerable amounts of corn, linseed, and flax floated from Nikolskoye downwards, to be shipped to Archangel. Length, 330 m.

Yugan, electoral div., Ire., Leitrim, dist. Drumshanbo.

Yugorskiy Shar, strait. See **Vaigach.**

Yugovskiy, copper-works, Russia, govt. and 50 m. due S. Perm, on Yug R. P. 10,800.

Yukagirs, tribe of the now disappeared Omoks, Russia, prov. Yakutsk, nomadic on banks of both Anyui Rivs.

Yukhnov, dist. tn., Russia, govt. and 169 m. E. Smolensk, on Ugra R., on highway from Moscow to Warsaw; trade in corn, linseed, and hemp. P. <5000.

Yukin, ruins, Palestine, *Cain* in O. T., 31° 30′ N., 35° 9′ E., 3½ m. SE. El Khulil (ancient Hebron).

Yukon, large riv. in the NW. of N. America, formed at the old Fort Selkirk, in about 62° 40′ N., 137° 20′ W., by the union of two headstreams, the Lewes from the S. and the Pelly from the SE. Of these the Lewes, which has its source in the Hotilinku spring, in 59° 10′ N., 132° 40′ W., is best entitled to be regarded as the true headstream, being larger than the Pelly (about 295 m., as against 275 m. in a direct line from the respective sources), and discharging at the confluence a greater volume of water (37,700 cubic ft. per second as against 29,300). From the confluence the Y. flows first NW., entering Alaska, then SW., and finally enters Norton Sound S. of Bering Strait by a large delta between 61° and 63° N. It is navigable for small steamers from its mouth to the head of Bennett Lake, in about 59° 50′ N., with the exception of a small stretch of about 3 m. above Miles Cañon, in 60° 41′ N. It is already navigated by small steamers to Forty Mile Creek, in about 64° 4′ N. Total length, 2050 m.; area of basin, 205,600 sq. m.

Yulduz, or **Khaidu-gol,** riv., Eastern Turkistan, flows first W. through the Baga (little) Y. valley (about 43° N., 84°–86° E.), then E. through the Chom (great) Y. valley (between 42° and 43° N.) into Lake Bagrach, passing Karashar a little above its mouth.

Yule, mt., Brit. New Guinea. See **Kovlo.**

Yule, isl., off the S. ct. of New Guinea, in about 146½° E.

Yule, riv., in the NW. of W. Australia, flows NNW. into the Indian Ocean, which it enters in about 20° 25′ S.

Yuleba and **Yulebah,** Queensland. See **Yuelba.**

Yule Entrance, a channel leading through the Great Barrier Reef, E. of Torres Strait, in 10° 22′ S., 143° 55′ E.

Yülin-chou, tn., China, prov. Kwangsi, 180 m. S. Kweilin-fu, near the frontier of Kwangtung, on the route from Pakhoi to the valley of the Si-kiang.

Yülin-fu, tn., China, on the N. frontier, prov. Shensi, 400 m. W. by S. Peking.

Yuma, one of the Bahama Is. See **Long Island.**

Yuma, co., U.S., Arizona, in the SW. corner of the terr., bounded on the W. by Colorado R.

Yuma, mining city, U.S., Arizona, Y. co., on the l. bk. of the Gila, 20 m. NNE. from the SW. corner of the terr.; has considerable trade with the interior. Alt. signal station, 141 ft. (U.S. Signal Office). Mean temp. (14 yrs.), 72.2° F., Jan. 53.5°, July 91.8°; rfall., yr. 3.06 in. P. <2000.

Yuma, co., U.S., in NE. Colorado, on E. frontier, bounded on S. by 40° N.; cap. Yuma.

Yumachi, tn., Japan, Kiushiu, in a very fertile valley, ken and 16 m. N. Kumamoto. P. <5000.

Yumas, or **Cuchans,** Indian tribe, U.S., on both sides of the Colorado. P. now scarcely 900, as they have rapidly been decreasing.

Yumbel, tn., Chile, prov. and 58 m. by rail SE. Concepcion, dep. Rere. P. <4000.

Yümon, or **Yumen,** also called **Kiayu-kwan,** both meaning 'jade-gate,' the westernmost gate in the great wall of China, immediately NW. of Suchou, Kansu, at the N. base of the Nan-shan Range, so called because it is the gate by which the jade of Eastern Turkistan [**Yarkand-daria**] is introduced into China.

Yumurtalik, vil., Asia Minor, vilayet and 32 m. ESE. Adana, with excellent harbour on Y. Bay, on W. side of the Gulf of Alexandretta.

Yuna, riv. See **Haiti.**

Yunakovka, vil., Russia, govt. and 95 m. NW. Kharkov, 23 m. NE. Sumy. P. 5000.

Yuncas, a general name for the native tribes of the coast of Peru, who have now become merged in the general population.

Yunchang (or **Yungchang**) **-hsien,** tn., NW. China, in NW. of prov. Kansu, at the base of the Nanshan Mts., in 38° 6′ N., 102° 3′ E.; coal mined near.

Yünching, tn., China, in the W. of prov. Shantung, 240 m. S. by W. Tientsin.

Yünchou, tn., China, Yünnan, 83 m. S. Tali-fu.

Yunda, isl. See **Moskonisi.**

Yunga, riv., Santo Domingo, W. Indies, flows E. through the Vega Real into the head of Samana Bay.

Yungai, tn., Chile, prov. Ñuble, cap. dep. Y., 50 m. S. Chillan. P. <3000.

Yungay, Yungai, or officially **Ancachs,** tn., S. America, Peru, dep. Ancachs, 32 m. NNW. Huaraz. P. <5000.

Yungchang, tn., China, SW. Yünnan, 65 m. SW. Tali-fu, in a flat rice-plain 5 or 6 m. wide. Alt. 5645 ft. (Capt. Gill).

Yungching, tn., China, prov. Shantung, on Yungching Bay, 63 m. E. by S. Chifu (Chefoo).

Yung-chou, tn., China, prov. Hunan, 235 m. NNW. Canton.

Yungchuan-hsien, tn., China, Süchwan, 39 m. WSW. Chungking.

Yung-fu-kiang, riv., China, trib. Liu-kiang. See **Hunshui.**

Yungki, tn., China, prov. Kwangtung, 24 m. S. Canton.

Yung-kiang, riv., China, formed of two branches which unite at Ningpo to form an estuary, whose waters enter the sea 12 m. lower down, opposite the isl. of Chusan.

Yungning, tn., China, in the W. of prov. Shansi, 340 m. SW. by W. Peking, 90 m. W. by S. Taiyuen.

Yungning-hsien, tn., China, in the S. of the prov. of Süchwan, 132 m. SW. by S. Chungking.

Yungnulgra, co., New South Wales, crossed by 31° S. and 143° E.

Yungpeiting, tn., China, Yünnan, 88 m. NE. by N. Tali-fu; the terminus in a northern direction of the Burmese trade with Yünnan, by way of Bhamo and Tali-fu. *Proc. R. G. S.*, 1886, p. 382.

Yungping, tn., China, prov. Pechili, on the l. bk. of the Lan-ho, 105 m. NE. by E. Tientsin.

Yungshan-hsien, tn., China, in the NE. of Yünnan, 205 m. N. by E. Yünnan-fu.

Yungtitien, tn., Manchuria, 2½ m. from a narrow fiord-like inlet called Port Adam, on Society Bay, in 39° 28′ N., 122° 0′ E.

Yungtsing, tn., China, prov. Pechili, 43 m. S. Peking.

Yungtsung-hsien, tn., China, in the SE. of Kweichou, 150 m. E. by S. Kweiyang-fu.

Yunguyo, vil., Peru, dep. Puno, on an isthmus on the SW. of Lake Titicaca. A sacred spot; scene of a great annual fair. P. 7700.

Yunho, Chinese name of the Great and Imperial Canal. See **China,** Means of Communication.

Yun-ho, or **Yunliang-ho,** riv., China, Nganhwei, discharging into the Yangtse-kiang (l. bk.) the waters of Lake Chao-hu.

Yuning, tn., China, Honan, on Shet-ho, 170 m. N. Hankow.

Yunlung-chou, tn., China, Yünnan, 56 m. WNW. Tali-fu.

Yünnan, prov., China, in the extreme SW., lying N. of Tongking, and E. of Upper Burma. In the NW. of the prov. three large rivers, the Yangtse-kiang, the Mekong, and the Salwín, enter close together, hemmed in between lofty mountain chains (15,000–8000 ft.), all alike, rivers equally as mountains, running from N. to S. But the Yangtse-kiang eventually turns NE. and penetrates to the middle of China; the other two streams continue their S. direction. The mountains spread out fan-like over the prov., and proceed down the penins. of Siam and Annam. The SE of the prov. is further diversified by other mountain ranges (8500–7500 ft.), and by the Songkoi (Red River) and other rivers of Tongking. The centre of the prov. is a broken plicated plateau (6500–5000 ft.), inclining from NW. to SE. and E., and studded with lakes (Tienchih, Tali, &c.). Y. is one of the richest in minerals of the provs. of China. Copper, iron, and tin are extensively mined. Several of the streams contain gold-sand. Argentiferous galena is plentiful; and cinnabar, zinc, coal, and rock-salt exist. The prov. is equally rich in precious stones, as jade, emeralds, rubies, sapphires, topazes. It produces also a highly valued decorative marble. The climate varies between temperately mild and severe, according to altitude; whilst at Mengtse (in S.) the winter resembles that of Nice. On the mountains of the N. snow lies all the year round. Although the prov. is in general healthy, yet the plague is endemic. The mountains are in great part covered with forest. The chief natural products embrace rice, opium, wheat, maize, tobacco, aniseed, orchard fruits, mulberry-trees (for silkworm breeding). Furnaces for smelting iron, tin, silver, &c., the manufacture of steel, of metal utensils, silks, cotton and woollen stuffs, and the cutting of precious stones, are the principal industries. An active trade in cottons and similar textiles, salt, tobacco (imports), and in opium (70 per cent.), minerals, drugs, and tea (exports), is carried on with Burma, Siam, Tongking, and with Pakhoi, Canton, and Hong-kong. Mengtse is the only town open to foreign trade. The bulk of the people are Mohammedans; and probably one-half are Shans, Lolos, and Miautse, *i.e.*, not Chinese. Chief towns, Yünnan-fu (cap.), Choutung-fu, Puerh-fu, Tali-fu, Momein, Lin-ngan-fu, and Mengtse. Area, 140,000 to 150,000 sq. m. P. (1890) estimated at 12,000,000. See F. S. A. Bourne, *Journey in S W. China* (1888).

Yünnan-fu (the *Yachi* of Marco Polo), walled city, over 3 m. in circuit, China, cap. prov. Yünnan, in about 25° 3′ N., 102° 42′ E., a short distance from the NE. of shore of Tienchih Lake, with which it was formerly connected by canal. It suffered greatly in the Mohammedan rebellion, but the old and extensive suburbs are gradually being rebuilt. It is the great copper-market of China, and has large metal-works and a mint; an arsenal, with cannon and gunpowder factory; also manufactures of carpets, felts, &c., and is a great commercial centre. Inhabitants chiefly Lolos. Alt. 6420 ft. (Hosie).

Yünnan-hsien, tn., China, Yünnan, 30 m. SE. by E. Tali-fu.

Yunque, El. See **El Yunque.**

Yunquera, comm., Spain, prov. and 31 m. W. Malaga, Ronda dist. P. <5000.

Yunting, riv., China. See **Wen-ho.**

Yünyang, tn., China, prov. Hupe, on the l. bk. of the Han-kiang, 155 m. N. by W. Ichang.

Yura, vil., Peru, dep. and 16 m. NW. Arequipa; the railway here passes the Andes at the height of 9415 ft. Frequented warm springs near. P. <2000.

Yurburg, Polish **Jurburg,** tn., Russia, govt. and 50 m. WNW. Kovno, on Niemen R., and highway from Kovno to Taurogen, on Polish and 6 m. from Prussian frontier; very old Lithuanian settlement (11th century); custom-house; river-port of importance. P. <5000.

Yüzgat, tn., Turkey in Asia. See **Yozgad.**

Yuzhakova, Great, New, and **Old,** three vils., Russia, govt. Perm, 55 and 57 m. NNW. Ekaterinburg. Murzinsk quarries of semi-precious stones and lithium-mica near. P. (aggregate) <5000.

Yuzovka, or **Hughesovka,** vil., Russia, on N. shore of Sea of Azov, between Mariupol and Taganrog; iron-works, collieries, and rolling-mills. P. <5000.

Yverdon, French; German **Ifferten,** comm., Switzd., cant. Vaud, at the SW. end of Lake Neuchâtel; has a castle of the 13th century, occupied from 1805 to 1825 by Pestalozzi, the famous educational reformer. Near it a frequented sulphureous spring. Has the works of the Jura-Simplon Railway Co. P. 6400.

Yves-Gomezée, vil., Belgium, prov. Namur, 12 m. S. Charleroi; iron ore mined and smelted. P. <2000.

Yvetot, tn., France, dep. Seine-Inférieure, 20 m. NW. by W. Rouen, cap. arr.; manufactures silk, wool, and cotton goods. Anciently the lord of the manor was called 'roi de Yvetot.' P. 6500.

Yvoire, vil., France, on the N. border of dep. Haute-Savoie, on the S. shore of the Lake of Geneva, arr. Thonon-les-Bains, 15 m. NE. by N. Geneva. P. <2000.

Yvonand, vil., Switzd., cant. Vaud, on the E. side of Lake Neuchâtel, 5 m. E. by N. Yverdon. P. <2000.

Yvorne, vil., Switzd., cant. Vaud, 7½ m. SSE. Montreux. P. <2000.

Yvoy-le-Pré, vil., France, dep. Cher, arr. Sancerre, 19 m. N. by E. Bourges, with iron-mines and important iron-works. P. <2000.

Ywa-taung, tn., now a suburb of Allan-Myo, Lower Burma, Pegu div., dist. Thayet-Myo, in 19° 19′ N., 95° 19′ E., on l. bk. of the Iráwadi; has extensive cotton factories. P. (1881) <3000.

Ywe, one of the mouths of the Iráwadi R., Burma, in about 16° 33′ N., 95° 8′ E.; navigable by river steamers. Length about 60 m.

Y Wyddfa, Wales, Carnarvonshire. See **Snowdon.**

Ystradffyn, eccles. par., Wales, Carmarthenshire, 2 m. N. Llandovery. P. <750.

Yzabal, lake, tn., and dep., Guatemala. See **Izabal.**

Yzerberg ('iron mt.'), a hill of nearly pure iron, near Eersteling, South African Republic.

Z

Za, riv., Morocco, flowing first NE. under the name of the Sharef, then NW. into the Muluya. Length about 150 m.

Zaacha, oasis, Algeria, prov. Constantine, 22 m. SW. Biskra.

Zaal, Teutonic, 'a stone dwelling,' 'hall,' 'house.' See *Aal.*

Zaanaim, place named in O. T. See **Bessûm.**

Zaandam, vil., Holland, prov. N. Holland, 6 m. NW. Amsterdam, on the short **riv. Zaan,** by means of which (canalised) it communicates with the North Sea Canal; has paper-works, tobacco factories, &c. Near the port a small hut is shown, said to have been occupied by Peter the Great in 1697 when he came here to learn shipbuilding. P. (comm.) 15,500.

Zaandijk, vil., Holland, prov. N. Holland, 8 m. NW. by N. Amsterdam. P. (comm.) <3000.

Zab, Great (or **Upper**), Turkish **Böyük-Zab,** called by the Kurds **Zerb,** the *Lykos* of the ancient Greeks, and *Lycus* or *Zabatus* of the Romans, riv., Turkey in Asia, rises 50 m. NW. Lake Urmia, and flows SW., SE., and again SW., and enters the Tigris, l. bk., 23 m. below Mosul. During two-thirds of the year its current is fierce and rapid. Length about 260 m.

Zab, Little (or **Lower**), Turkish **Küchük-Zab,** known in Persia as the **Kalvi,** the *Kapros* of the ancient Greeks, riv., rises in the Persian prov. of Azerbaijan, 40 m. S. Lake Urmia, and flows SE., W., and SW., and joins the Tigris about 65 m. SSE. of the mouth of the Great Z., which it nearly equals in length, and quite equals in volume.

Zabaikalskaya Oblast, prov., Russia. See **Transbaikalia.**

Zabern, French **Saverne,** tn., Ger., govt. Alsace-Lorraine, circle Z., 20 m. NW. by W. Strassburg, finely situated on the Zorn and on the Marne and Rhine Canal. The castle now used as barracks; manufactures of agricultural instruments, grindstones, spectacle-glasses, &c. As *Tavernæ,* a place of importance in the time of the Romans. P. (1861) 5300; (1890) 6900.

Zabłotów, tn., Austria, Galicia, dist. Śniatyn. P. <5000.

Zabola, vil., Hungary, S. Transylvania, co. Haromszek, 33 m. NE. Kronstadt; mines of rock-salt. P. <3000.

Zaborowo, vil., Prussia, prov. Posen, circle Grzybno, 25 m. ENE. Glogau. P. <2000.

Zaborze, vil., Prussia, prov. Silesia, circle Zabrze, 29 m. ENE. Ratibor, 6 m. W. Königshütte. P. <3000.

Zabřech, comm., Austria, Moravia, 17 m. SE. Troppau. P. <4000.

Zábrěh, tn., Austria. See **Hohenstadt.**

Zabrež, river-port, Servia, prov. Šabac, on the Save, 14 m. SW. Belgrade, 2½ m. NNE. Obrenovac. P. <2000.

Zabrze, Alt- and **Klein-,** two vils., Prussia, prov. Silesia, circle Z. The former, 45 m. SE. Oppeln, has coke-kilns, manufactures of boilers, mines of iron ore, and blast-furnaces. P. Alt-Z. (1852) <2000; (1890) 9400; Klein-Z. (1890) 5700.

Zacapa, vil., Central America, republic of and 65 m. ENE. Guatemala, cap. dep. Z.; an ancient city, formerly an important commercial centre. Alt. 540 ft. P. (with dist.) 10,900.

Zacar, ruins of the ancient *Vasitana Sarra,* Tunis, 65 m. SSW. Tunis.

Zacaspiyskaya Oblast, terr., Russia. See **Transcaspian Territory.**

Zacate (or **Sacate**) **Grande,** the northernmost of the three larger islands in the Gulf of Fonseca, republic of Honduras, Pacific side.

Zacatecas, one of the central states of Mexico, on the plateau, and as far as the N. Bolsones; very important silver-mines (San Bernabi, Sombrerete).

Zacatecas, tn., Mexico, cap. state of Z., 120 m. NNE. Guadalajara; situated on the slopes of a number of deep and winding gorges, commanded in the NE. by an escarpment of porphyritic rock, crowned by a fortress. Rich in silver-mines, which have been worked from its foundation (by Nuño de Guzman in 1540). Numerous hot springs near. P. 60,000.

Zacatecoluca, tn., Central America, Salvador, 27 m. SE. by E. San Salvador. P. 5800.

Zacatlan, tn., Mexico, Puebla, 61 m. N. by E. Puebla. P. 13,400.

Zacatula, tn., Mexico, Guerrero, 220 m. S. by E. Guadalajara.

Zaccar, mt. ranges, Algeria. See **Zakkar,**

Zacualtipan, vil., Mexico, Hidalgo, 90 m. NNE. Mexico; coal mined. P. (comm.) 7400.

Zadonsk, dist. tn., Russia, govt. and 56 m. NNW. Voronezh, on r. bk. Don, and on highway Moscow–Voronezh. P. 6910.

Zadorra, riv., Spain, prov. Álava, flows W. across the plain of Vitoria, reaching the Ebro (l. bk.) above Miranda. Length, 50 m.

Zafaranboli, or **Zafranboli,** tn., Asia Minor, vilayet and 55 m. W. Kastamuni, 90 m. N. Angora, named from the saffron grown here. P. 25,000.

Zafarraya, comm., Spain, prov. and 30 m. SW. Granada, dist. Loja. P. <4000.

Zafarwál, tn., Brit. India, Punjab, dist. Siálkot, 55 m. N. by W. Amritsar. P. 5500; Hindus, 2900; Moham. 2600.

Zaffarano, Capo, cape, on the N. ct. of Sicily, 8 m. E. Palermo, with a lighthouse.

Zaffarines, group of three islets, Morocco, in the Mediterranean, in 2° 26′ W., 7 m. NW. of the mouth of the Muluya; known from ancient times as a protection to ships. They belong to Spain, which has fortified them as outworks for Melilla.

Zafra, the ancient *Julia Restituta,* comm., Spain, Estremadura, prov. and 42 m. SE. Badajoz. P. 6100.

Zafran, or **Marsa-Zafran,** small seapt., Tripoli, N. Africa, in 16° 36′ E., 230 m. SE. of the town of Tripoli.

Zafranboli, tn., Asia Minor. See **Zafaranboli.**

Zaga, comm., Austria, Görz and Gradisca, 26 m. NNW. Görz. P. <2000.

Zagarolo, tn., Italy, 16 m. ESE. Rome, on site of ancient *Bola.* P. 5500.

Zagazig, tn., Egypt, 34 m. ESE. Tanta, 40 m. NNE. Cairo. P. 19,800.

Zaghes, salt-lakes, Algeria. See **Zahres.**

Zaghwan, tn., Tunis, on the Miliane, 27 m. S. by W. Tunis, at the foot of Jebel Zaghwan (4400 ft.) on the N., the springs on which fed the ancient aqueduct of Carthage, now restored for the supply of the city of Tunis; has ruins of the *Nymphæum,* one of the most beautiful of the surviving Roman temples in N. Africa. P. 2000.

Zaglava, small isl., Austria, crownland Istria, in the Gulf of Quarnero, 22 m. E. by N. Pola, with a lighthouse.

Zagon, comm., SE. Hungary, Transylvania, co. Háromszék, 27 m. NE. Kronstadt. Alt. 1920 ft. P. <5000.

Zagora, tn., Greece, prov. Larissa, on the E. ct., 9 m. NE. by N. Volos. P. <4000.

Zagora, Stara and **Nova.** See **Stara Zagora** and **Nova Zagora.**

Zagorich, or **Zagority** (three syllables), tn., Turkey in Europe, prov. Koritsa, 33 m. S. Monastir. P. 4000.

Zagórzany, vil., Austria, Galicia, 24 m. SE. Tarnow; petroleum wells. P. <2000.

Zagreb. See **Agram.**

Zagros, general name for the mountain systems of **West Persia** (*q.v.*).

Zagros, Gates of. See **Akabah-i-Holwan.**

Zagubica (zhagubitsa), vil., Servia, prov. Požarevac, on the Mlava, 46 m. ENE. Kragujevac. P. <3000.

Zagyva-Róna, comm., Hungary, co. Nógrád, dist. Fülek. Alt. 1180 ft. P. <4000.

Zahara, tn., Spain, prov. and 63 m. NE. Cadiz. P. <3000.

Zahle, tn., Syria, vilayet Jebel Libnan, 33° 52′ N., 35° 55′ E., 24 m. E. by S. Beirut.

Zahna, tn., Prussia, prov. Saxony, circle and 7 m. ENE. Wittenberg. P. <3000.

Zahres, or **Zaghes,** two shallow salt lakes, Algeria, prov. Algiers, the **Eastern Z.,** or **Z. Shergi** (22 m. by 3⅓–9 m.; area, 190 sq. m.; alt. 2750 ft.), about 110 m. S. by E. Algiers; the **Western Z.,** or **Z. Gharbi** (18 m. by 2⅓–7⅓ m.; alt. 2810 ft.), 125 m. S. by W. Algiers.

Zaian, Berber tribe, Morocco, between the coast and the Atlas Mts. They are rich in goats, sheep, camels, and oxen. Dist. of 13,000 sq. m.

Zaichar, Servia. See **Zaječar.**

Zaidam, a German spelling of **Tsaidam.** See **Chaidam.**

Zaidpur, tn., Brit. India, Oudh, dist. Bara Banki, 26 m. E. by S. Lucknow; manufacture of country cloth. P. 9600; Moham. 6200; Hindus, 3400.

Zaire, riv., Congo Free State. See **Inzia.**

Zaiechar, tn., Servia. See **Zaječar.**

Zaïnde-rud ('river of life'), **Zayende-rud,** or less properly **Zende-rud,** riv., central Persia, rises on the slopes of the Kuh-i-Rang, in the Bakhtiari country, near the source of the Karun, winds E. through the mountains, and finally dries up after irrigating the plain of Ispahan. At high water (winter) it reaches the salt-marsh of Gavkhane, about 50–60 m. beyond Ispahan.

Zair, Berber tribe, Morocco, to the SE. of Rabat.

Zaire, former name of the lower Congo (*q.v.*).

Zaisan, lake, Russian Central Asia, prov. Semipalatinsk, near frontier of China (prov. Chuguchak), alt. 1200 ft.; receives the upper or Black Irtysh from the E., the Kokpekty from W.,

and many short streams, and gives origin to the Irtysh; 80 m. long, 10-20 m. wide, depth about 24 ft. Productive fisheries.

Zaisanskiy Post, dist. tn. and small fort, Russian Central Asia, prov. Semipalatinsk, 29 m. SE. of S. entrance of Lake Zaisan. Alt. 2180 ft. P. <5000.

Zaizelles, vil., Belgium, prov. Hainaut, 3 m. NW. Charleroi. P. <2000.

Zaječar, Zaichar, or **Zaichar,** tn., Servia, prov. Črna-Rjeka, on the Veliki Timok, 29 m. WSW. Viddin; connected by rail with the river-port of Radujevac; coal mined to the SE. Burnt by the Turks in 1876. P. 5900.

Zakarfalu, vil., Hungary, co. Szepes, 2 m. NNW. Göllniez; iron is wrought here. P. <2000.

Zakataly, fort and dist. tn., Russia, 116 m. E. of Tiflis, on the slopes of the main Caucasus range (alt. 1800 ft.), under the fortress, and surrounded also by a wall; chief town of a separate military district or governorship (1541 sq. m.), which includes the peaks of Sary-dagh (12,008 ft.), and several other high peaks and fertile valleys watered by the Alazañ, and peopled chiefly with Lezghians. P. (of dist.) 74,490; tn. P. <2000.

Zakho, tn., Turkey in Asia, vilayet, sanjak, and 60 m. NW. by N. Mosul. P. 2500; Jews, 1500; Moham. 900.

Zakkar, or **Zakkar Gharbi,** two cretaceous mt. ranges, Algeria, the **Western Z.** (5180 ft.) overlooking the town of Miliana; the **Eastern Z.,** or **Z. Shergi** (5035 ft.), separated from the former by the Riras Pass, traversed by the road from Miliana to Shershel.

Zakopane, tn., Austria, crownland Galicia, 52 m. S. Cracow. Alt. 2745 ft. P. <3000.

Zakroczim, tn., Russian Poland, 40 m. ESE. Plock, on Vistula. P. 5500.

Zakynthos, isl., Greece. See **Zante.**

Zala, riv., SW. Hungary, flows on the whole NE., with a great bend to the N., and enters SW. end of Lake Balaton. Gives name to a county, the cap. of which is Zala Egerszeg.

Zala Egerszeg, tn., Hungary, cap. co. Zala, 77 m. WSW. Stuhlweissenburg. P. 7800; comm. P. 20,600.

Zalaje, vil., Bosnia, prov. Bihac, govt. Priedor; iron mined. P. <2000.

Zalamea de la Serena, comm., Spain, prov. and 72 m. ESE. Badajoz; lead and iron mined. P. 5300.

Zalamea la Real, comm., Spain, prov. and 35 m. NNE. Huelva; terminus of a railway which conveys the produce of the neighbouring (Rio Tinto) copper-mines to Huelva on the coast. P. 6200.

Zalarin, vil., Austria, crownland Dalmatia, on an island of the same name, 32 m. WNW. Spalato, at the mouth of the small bay on which Sebenico stands.

Zalarinskaya, vil., Russia, E. Siberia, govt. and 40 m. NW. Irkutsk, on Zalara R., and on highway. P. <5000.

Zalatna, comm., Hungary, co. Alsó-Fehér (Unter-Weissenburg), 50 m. SSW. Klausenburg. P. <4000.

Zaledyeeva, vil., Russia, E. Siberia, prov. Yeniseisk, 19 m. NW. Krasnoyarsk. P. <5000.

Zalenze, vil., Prussia, prov. Silesia, circle Kattowitz, 35 m. ENE. Ratibor, and 2½ m. SE. by S. Königshütte. P. <4000.

Zaleski, vil., U.S., Ohio, Vinton co., 56 m. SE. by S. Columbus. Alt. 721 ft. (R.R.). P. <1500.

Zaleszczyki, tn., Austria, crownland Galicia, on the l. bk. of the Dniester, 26 m. NNW. Czernowitz. P. 5800.

Zalfar, or **Sulfa,** tn., central Arabia, at the entrance of a valley leading SE. to Riad; of great importance both as a military post and a commercial centre.

Zaliv Terpeniya, bay. See **Sakhalin.**

Zalmon, mt. mentioned in O. T. See **Jebel Eslamiych.**

Załozce, Załosze, or **Załósce,** tn., Austria, crownland Galicia, 20 m. NW. by N. Tarnopol. Alt. 1075 ft. P. 6900.

Zalt-Bommel, tn., Holland, prov. Gelderland, on the l. bk. of the Waal, 8 m. N. by W. Bois-le-Duc. Formerly fortified (since 1229), vainly besieged by the Spaniards in 1599, taken by Turenne after a long siege in 1672. P. (comm.) 4000. See **Bommelerwaard.**

Zalubincze, vil., Austria, prov. Galicia. P. (with comm.) 3000.

Za-lun, tn., Burma, dist. Henzada, on the r. bk. of the Irawadi (which is rapidly encroaching on the town), 60 m. NW. by N. Rangoon. P. 6000; Buddhists, 5800.

Zaluze, vil., Austria. See **Rohatyn.**

Zamániah, tn., Brit. India, NW. Provs., dist. Gházípur, in 25° 25′ N., 83° 34′ E., on the r. bk. of the Ganges. P. (1881) 5100.

Zamanti-chai, riv., Asia Minor. See **Selhun.**

Zamarstynów, tn., Austria, Galicia, dist. Lemberg, of which it is a N. suburb. P. <4000.

Zamba, isl., Colombia, 25 m. NNE. Cartagena; before 1840 it was a peninsula.

Zamba, vil., Portuguese W. Africa, near the r. bk. of the Kwango, in 8° 33′ S., 17° 50′ E.

Zambales, tribe, Philippine Is., on the W. ct. of Luzon.

Zambezi, Zembere, Ambezi, Luambezi (native names, all meaning 'large river'), the largest river of E. Africa. Its general direction is first S. and afterwards E. It takes its rise on the highlands S. of the Congo basin, in the Dilolo swamps (alt. 4750 ft.), where it probably forms a bifurcation with the Kasai. Thence it flows southward, as Liba or Liambai, through the Barotse valley (*q.v.*), turning E. near the Gonye Falls. Shortly below Sesheke (the place so well known through Livingstone's explorations) the Z. forms the grand Victoria Falls, or Mosi-oa-tunya (alt. above the falls 2600 ft., below the falls 2200 ft.). Flowing afterwards NE., E., and SE., the Z. reaches the Indian Ocean between 18° and 19° S. lat., forming a large delta, the principal arms of which are those of W. Luabo, Inyamisongo, Koama, Melambe, and Chinde (*q.v.*). Owing to the great number of cataracts and rapids in its upper and middle course (cataracts of Gonye, Katima Mololo, Victoria Falls, Kebrabasa Rapids) the greater part of the Z. is totally unfit for navigation. The Z. has numerous large tribs., Kapombo, Lungo-en-bungo, Kwando, Sanyati, Kafue, Loangwa, Hanyani, Mazoe-Ruenya, and Shire. The Z. belongs to the British and Portuguese spheres of influence, the British sphere separating Angola from Mozambique. Length of the Z. estimated at 1600 m.; area of basin at 550,000 sq. m. See also **Kilimane.** [**H. G. S.**]

Zambezia, a name applied roughly to the Brit. terr. in the basin of the Zambezi. See **Matabili-land** and **Nyassa-land.**

Zamboanga, or **Samboanga,** tn., S. ct. Mindanao, Philippine Is., in 122° 3′ E., cap. prov. Z., which embraces the two penins. in the SW. of the island and part of the third, the town lying near the S. end of the first. P. 5400.

Zamfara, or **Samfara,** one of the states of Sokoto, western Sudan, E. of Gandu.

Zamiran, vil., Baluchistan, 127 m. NE. of the SW. corner of the country.

Zamora, tn., Mexico, state Michoacan, 81 m. WNW. Morelia, 200 m. WNW. city of Mexico; seat of a bishop. P. 12,000.

Zamora, tn., Spain, cap. prov. Z., on the r. bk. of the Douro, 57 m. W. by S. Valladolid. P. (comm.) 15,200.

Zamora, state, Venezuela, crossed by 8° N. and 68° and 70° W.; cap. Guanare.

Zamość, Russian **Zamostiye,** dist. tn. and fortress, Russian Poland, govt. and 50 m. SE. Lublin. P. 10,200.

Zamuri, or **Zamori,** vil., Algeria, on the coast, 30 m. E. Algiers. P. 2500.

Znaga, tribes, Algeria. See **Sanhaja.**

Záncara, riv., Spain. See **Guadiana.**

Zandvoort, vil., Holland, prov. N. Holland, on the W. ct., 4 m. W. by S. Haarlem; now a frequented sea-bathing place. P. (comm.) <3000.

Zan-ei-Hager, tn., Egypt, 32 m. WSW. Port Said, close to ruins of ancient *Tanis* or *Zoan.*

Zanesville, city, U.S., Ohio, Muskingum co., 70 m. W. by S. Wheeling, on Muskingum R., here navigable for steamboats. Extensive facilities for manufacturing purposes are afforded by abundant water-power and deposits of bituminous coal in the surrounding hills. Z. has furnaces, rolling-mills, and manufactures of engines, castings, and other iron goods, tiles, glass, &c. P. (1870) 10,000; (1880) 18,100; (1890) 21,000.

Zanguebar, a former spelling of **Zanzibar.**

Zankle, city, Sicily. See **Messina.**

Zanku, or **Zanka,** riv. and mt. pass, Russian Turkistan. The river rises in an altitude of 11,130 ft. in the Kirghiznyn-Alatau, and flows into SE. part of Lake Issyk-kul. Best pass across the Tian Shan, leads to the upper Narym, and thence both to Kashgar and Aksu.

Zannone, isl., Italy, off the W. ct., one of the Isole Pontine, in 40° 58′ N.

Zanoah, places named in O. T. See **Zanûâ** and **Zanûta.**

Zanow, vil., Prussia, prov. Pomerania, circle Schlawe, 30 m. E. Kolberg. P. <3000.

Zante, or **Zakynthos,** isl., Greece, one of the Ionian Isles, 15 m. W. of the prov. Elis and Achaia, 8 m. S. of Cephalonia, in 37° 38′–55′ N. Entirely mountainous or hilly in the W. half or two-thirds (highest point, Vrakhionas, 2485 ft.), with a stretch of fertile plains extending from the small bay on the NE. ct. to the large bay on the S. ct.; hilly also in places on the E. ct., as in the SE. penin. and immediately N. of the town of Zante. The W. ct. is extremely steep and rocky, and is accessible only in summer weather. The southern bay is exposed to the frequently stormy S. and SE. winds; and hence the town of Z., on the E. ct., is the only good harbour. The plains are almost entirely occupied by the vine (introduced since the middle of the 15th century) and the currant vine (introduced before the middle of the 16th century), the cultivation of which has led to the gradual extinction of the swamps that formerly covered large tracts of the island. Oil and fruit-trees and cereals are grown on the foot-hills, and the villages are mostly so placed along the base of the hills so as to be able to share in vine-land, fruit and oil-lands, and the sheep and goat pastures of the hills. The island is one of the parts of Greece most subject to earthquakes (violent

Oct. 30, 1840; early in 1893, &c.). Area, 165 sq. m. (Wisotzki). See **Greece,** table.

Zante, tn. and seapt., Greece, on E. ct. of isl. of Zante, in 37° 47′ N. Vessels at present load and discharge by lighters, but a pier 1600 yards long, expected to be completed in 1895, is to give a depth of 32 ft. at the harbour entrance. P. 16,600.

Zanûa, ruins, Palestine, *Zanoah* in the O. T., 31° 43′ N., 35° E., 14½ m. NNW. El Khulîl (ancient Hebron).

Zanûta, ruins, Palestine, *Zanoah* in the O. T., 31° 22′ N., 34° 59′ E., 12½ m. SW. by S. El Khulîl (ancient Hebron).

Zanzibar, an Arab sultanate, E. Africa, since 4th Nov. 1890 under British protection, and now practically confined to the islands of Z. (20 m. from the E. ct. of Ger. E. Africa, crossed in the N. by 6° S.; 614 sq. m.) and Pemba (crossed in the N. by 5° S.; 372 sq. m.). Formerly the Sultan claimed authority over a vast but undefined extent of the opposite mainland, where a strip of ten miles in width, stretching along the coast from the mouth of the Tana to that of the Rovuma (about 2½° to 10½° S.) still nominally belongs to the sultanate, though actually under British or German administration. The isl. of Mafia, which formerly belonged to the sultanate, was ceded to Germany Jan 1, 1891. Z. is by far the most populous of the islands (about 325 to the sq. m.). Its most valuable product is cloves. The **town of Z.,** about the middle of the W. ct. of the island, has long been the chief centre of trade in this region—a trade largely in the hands of Indian Baniyas (Banyans). The harbour is an open roadstead; vessels loaded and discharged by lighters. Mean temp. (11 yrs., 1874–84), yr. 79.8° F., Feb. 82.2°, July 77°; mean rfall. (9 yrs.), 56.2 in. Isl. of Z., P. about 200,000; isl. of Pemba, P. about 10,000.

Zapara, isl., Venezuela, separating the Gulf of Venezuela from the lagoon of Maracaibo.

Zapardiel, riv., Spain, flows N. past Medina del Campo, and joins the Douro (l. bk.) near Tordesillas. Length, 80 m.

Zapata, penin., S. ct. of Cuba, between 81° 10′ and 82° 10′ W., E. of the Gulf of Matamano, separated from the mainland by a marshy tract or lagoon traversed by the Atiguanico.

Zapata, co., U.S., Texas, in the SE., crossed by 27° N., bounded on the SW. by the Rio Grande.

Zapatera, isl., Central America, in the Lake of Nicaragua.

Zapatoca, tn., S. America, Colombia, Santander, 160 m. NNE. Bogotá; lead-mines; cultivation of tobacco and indigo; manufacture of hats. P. (of dist.) 8000.

Zaphon (*Amathi*), place named in O. T. See **El Hammeh.**

Zapotal, tn., Ecuador, Esmeraldas, 103 m. WNW. Quito.

Zapotecs, tribes, Mexico, on the Pacific slope, states of Oajaca, Puebla, and Guerrero. P. 677,100.

Zapotitlan, cape, Mexico, Vera Cruz, on the N. ct., in about 94° 50′ W.

Zapotlan el Grande, tn., Mexico, Jalisco state, 90 m. S. by W. Guadalajara. P. 18,000.

Zara, tn., Asia Minor, vilayet and 40 m. ENE. Sivas, on the Kizil-Irmak. P. <2000.

Zara, seapt., Austria, crownland Dalmatia, 73 m. NW. by W. Spalato; a flourishing city till it was destroyed by the Venetians, 1127. Held by the Venetians from 1409 to 1797, except for a brief space when it was in the hands of the Sultan Bayazid II. Under the Venetians the small penin. on which it stands was fortified and separated from the mainland by an artificial channel of the sea, but the fortifications have been partly removed to make way for quays. It has a cathedral of the 13th century, and a fine old gateway on the side of the mainland. It is still the seat of a Roman Catholic archbishop and a Greek bishop, and has manufactures of woollens, silks, and maraschino. P. 11,500.

Zâra, hot springs, Palestine, perhaps the *Zareth Shahar* of the O. T., 31° 36′ N., 35° 35′ E., 23 m. SE. by E. Jerusalem, on the E. shore of the Dead Sea.

Zubtsov, dist. tn., Russia, govt. and 76 m. SW. Tver, on r. bk. Volga. P. 5000.

Zuckmantel, tn., Austria, Silesia, 31 m. NW. Troppau, and 6 m. W. by N. Hennersdorf; has cotton, linen, and sewing-thread manufactures; gold and silver mines near. Alt. 1365 ft. P. <5000.

Zuera, comm., Spain, on the Gallego, prov. and 15 m. N. by E. Saragossa. P. <3000.

Zuffenhausen, tn., Ger., Würtemberg, circle Ludwigsburg, 3½ m. N. Stuttgart. P. <5000.

Zug, French **Zoug,** the ancient *Tugium,* tn., Switzd., cant. Z., on the E. side of the Lake of Z., 13 m. NE. Lucerne; has manufactures of enamel and articles in metal, cotton yarn, tobacco and cigars, &c. In 1887 a portion of the town was submerged in the lake by a landslip. P. 5200.

Zug, central cant., Switzd., surrounded by the cants. Schwiz, Lucerne, Aargau, and Zürich. Length, 12 m.; greatest breadth, 9 m. Surface mountainous in the S. and SE.; highest point the Kaiserstock, 8258 ft. above the sea. The principal portion lies in the basin of the Reuss, and is watered by the Reuss, which forms its W. boundary, and the Sihl its NE. The greater part of the Lake of Zug, and the whole of Lake Egeri, is within the cant. See **Switzerland,** table.

Zug, Lake of (Zugersee), in the SW. of the cant. Z., Switzd., and bounded E. and S. by the Zugerberg and Righi Mts., which separate it from the cants. Schwiz and Lucerne, is 9 m. long, from 2 m. to 3 m. broad, and 1361 ft. above the sea. Area, 14½ sq. m.; depth, 650 ft. Chief affluent, the Lorze, from the Lake of Egeri, which enters it on the N.

Zuga, or **Botletle,** riv., S. Africa, the outlet of Lake Ngami, flows first E., receiving from the N. the Tamalakan, and afterwards SE., till it terminates in Lake Komadau (about 21½° S., 24° 40′ E.). An old bed of the river can be traced thence northeastwards towards the Makarikari salt-pans, but is only partly filled in seasons of exceptional high water. The river is remarkable for its regular annual inundations, apparently due to underground percolation, probably from the region of the headwaters of the Chobe and the Okavango, either directly into the upper reaches of the Z. itself or (chiefly) into the Tamalakan. The rise of the water begins in April, after the rains are over, and goes on slowly till late in August or early in September, and at the height of the flood the water in the Z. runs both ways, W. towards Lake Ngami, above the mouth of the Tamakan, and E. below that confluence.

Zugspitze, mt. See **Alps,** SUBDIVISIONS, **II. B. 4.**

Zuid, suyd, Dutch, 'south.'

Zuider Zee (*i.e.,* South Sea or Lake), a gulf or deep inlet of the North Sea, in the Netherlands, between the provs. Overijssel and Friesland in the E., Utrecht and Gelderland in the S., and N. Holland in the W. On the N. it is nearly enclosed by the isls. Texel, Vlieland, Terschelling, and Ameland. Length (measuring from Terschelling), N. to S., 85 m.; greatest breadth, 45 m.; area about 2000 sq. m. It communicates with the North Sea by the Marsdiep (2½ m. wide), between the N. extremity of prov. N. Holland and Texel, by the Eijerland Gat (1½ m. wide) between Texel and Vlieland, and by the Vlie Strom (6 m. wide) between Vlieland and Terschelling. The E. side approaches to these exits are thickly beset with sandbanks; the northernmost sea passes between Terschelling and Ameland, and between Ameland and the isl. of Schiermonnikoog, are practically blocked by them. (See **Watten.**) The riv. Vecht (from Hanover), the IJssel (an arm of the Rhine), another Vecht (also a branch of the Rhine delta), and the IJ are the principal streams which flow into the Z. Z. This inland gulf or sea is everywhere shallow

(average depth, 10 to 16 ft.), except in the Marsdiep and the Vlie Strom, consequently the tides are but little felt. On the other hand, the winds heap up the waters sometimes against one shore, sometimes against another, to the height of 8½ ft., so that to safeguard themselves against inundations the Dutch have surrounded the Z. Z. with a ring of dykes, extending to a length of 170 m. in all. In Roman times there was here but a small lake; successive irruptions of the sea, especially in the years 1170, 1237, 1250, 1287, and 1395, engulfed portion after portion of the diluvial mainland, and so created the existing Z. Z. Since the middle of the 19th century various projects have been proposed for draining and reclaiming this large bay, and in 1894 the expenditure of £26,250,000 sterling was advised by a Royal Commission appointed by the Dutch government upon a scheme for the reclamation of all that portion of the basin which lies S. of a line drawn from Enkhuizen E. to the isl. of Urk, and thence SE. to the Kamper Sands, an area of nearly half a million acres of land.

Zuidhorn, vil., Holland, prov. and 6 m. WNW. Groningen. P. <2000.

Zuidland, vil., Holland, dist. Putten, prov. S. Holland, 12 m. SW. by W. Rotterdam. P. <2000.

Zuila, tn., N. Africa, Tripoli, Fezzan, 95 m. ESE. Murzuk.

Zujar, or **Sujar,** riv., Spain, Andalusia and Estremadura, rising 50 m. NW. Córdoba; it flows NNE. then W. by N., and enters the Guadiana in 39° 3′ N., 5° 50′ W.

Zujar, comm., Spain, prov. and 48 m. ENE. Granada, dist. Baza. P. <5000.

Zukwala, or **Zikwala,** mt., in the S. of Shoa, Abyssinia, regarded as sacred both by the Christians of Shoa and the pagan Gallas. Alt. 9980 ft.

Zula, vil., on the W. shore of the Red Sea, in the Italian terr. of Eritrea, on the W. side of Annesley Bay, 30 m. SSE. Massaua, on the site of the ancient *Adulis.* In the Abyssinian war of 1868 the English made this the base of their operations.

Zulfikar, vil. and pass, in the extreme NW. of Afghanistan, on the r. bk. of the Heri-Rud, in 35° 36′ N.

Zulia, riv., S. America, Colombia and Venezuela, flows N., becomes navigable at Cachos, 45 m. above the frontier of Venezuela, turns NE. and E., and enters **Z. Bay** in SW. corner of the Gulf of Maracaibo. Length, 200 m.

Zulijana, vil., Austria. See **Giuljana.**

Züllchow, vil., Prussia, prov. Pomerania, circle Randow. P. 6700.

Züllichau, tn., Prussia, in the SE. of prov. Brandenburg, 50 m. ESE. Frankfurt, circle Züllichau-Schweibus, 4 m. from the r. bk. of the Oder; manufactures of cloth and linen, and fustian-weaving, &c. Founded in 1258 as a German town. P. (1816) 5900; (1890) 6800.

Zülpich, tn., Prussia, Rhine Prov., circle Euskirchen, 20 m. W. by S. Bonn. P. <2000.

Zulu-land, Brit. protectorate in SE. Africa, administered by the governor of Natal. It is situated NE. of Natal, and E. of the South African Republic. It is a hilly country, with numerous small rivers flowing to the Indian Ocean (Tugela, Umlatusi, Umvalosi). The St. Lucia Bay and the St. Lucia Lagoon are of importance on and near the coast. The coast-belt is hot and unhealthy, but the dists. in the interior are less dangerous. Cattle-rearing, sheep-breeding, and agriculture (maize, millet, beans) are the principal occupations of the inhabitants. The country is inhabited by the Zulu, a warlike Kafir tribe. A telegraph line connects Eshowe and Natal. In 1895 a terr. on the N., including Tonga-land and the tract lying to the W. of Tonga-land along the Pongola R. and extending N. to the Maputa, was annexed to Z. by proclamation of the governor. Area estimated at about 12,000 sq. m. P. (1892) 160,700. [**H. G. S.**]

Zülz, tn., Prussia, prov. Silesia, circle Neustadt, 33 m. NW. Ratibor. P. <3000.

Zumaya, tn., Spain, Guipuzcóa, 14 m. W. San Sebastian; fishing port; good sea-bathing. P. 2000.

Zumbo, tn., Portuguese East Africa, on the l. bk. of the Zambezi, at the confluence of the Loangwa, in 30° 21′ E., 160 m. N. by W. Fort Salisbury.

Zumbrota, vil., U.S., Minnesota, Goodhue co., 48 m. SSE. St. Paul. P. <1500.

Zumpango, lake, Mexico, the highest and furthest N. of the six lakes of the valley of Mexico, 22 m. N. of the city.

Zumstein-spitze, Alpine peak. See **Rosa, Monte.**

Zungoli, tn., Italy, Campania, prov. Avellino, circle and 6 m. SSE. Ariano di Puglia. P. 2300.

Zuni, settlement, U.S., New Mexico, Donna Ana co., 111 m. NE. from the SW. corner of the terr. Alt. 6355 ft. (Toner), Zuni Pass (R. R. Surveys).

Zuni, mt. range, U.S., in the W. of New Mexico, N. of 35° N., extending 45 m. from NW. to SE., and rising to 6500 ft. The range is of special interest to geologists. Gives rise to the **Zuni,** a small river.

Zuoz, comm., Switzd. See **Zuz.**

Zuri, or **Zirije,** vil., Austria, crownland Dalmatia, on a small island of the same name, 37½ m. SE. by S. Zara. P. <2000.

Zurich, vil., Canada, Ontario, co. Huron, 18 m. SE. Seaforth. P. <1500.

Zurich, vil., Holland, prov. Friesland, on the W. ct., 17 m. WSW. Leeuwarden, 4 m. S. Harlingen. P. <2000.

Zürich, cant., Switzd., bounded E. by cants. Thurgau and St. Gall, S. by Schwiz and Zug, W. by Aargau, N. by Schaffhausen and the gd.-duchy of Baden. Surface undulating (2250–3700 ft.), mountainous in the SE., where the Schnebelhorn reaches an alt. of 4250 ft. The cant. belongs entirely to the basin of the Rhine, towards which it on the whole slopes gently down. The only stream of any moment within its confines is the Limmat, which emerges from the Lake of Z., and which has one trib., the Sihl. Besides the Lake of Z. it has Lakes Greifen, Pfäffikon, and several smaller ones. Climate mild in the valleys and beside Lake Z., severer in the uplands. The soil is in general fertile, and produces good pasturage and fruit, besides crops of cereals, and hemp and wine. Cattle-keeping is an important occupation; but the most important are the spinning and weaving of cottons and the weaving of silk, supplemented by manufactures of machinery (Z. and Winterthur), bell, type, and other castings, chemical products, paper, &c. The town of Z. is the centre of the textile industries, though both branches are carried on all over the cant. There is a little iron and gypsum, and some mineral springs (at Girenbad and Nidelbad). Education is of a high character, and is compulsory. There are a university and a polytechnic in the cant., both at Z. The people elect directly both their executive (council of government of seven members) and their legislative (one member for every 1500 inhabitants), and every act of this last is controllable by the referendum. Chief towns, Z., Winterthur, Uster, Wädenswil, Wald, Horgen, and Wetzikon. Area, 666 sq. m. P. (1870) 284,800; (1888) 339,000, nearly all Protestants, and speaking the German language. See **Switzerland,** table.

Zürich, tn., Switzd., cap. cant. Z., stands on both sides of the Limmat, at the point where it quits the Lake of Z., 25 m. NNE. Lucerne. The older and larger town, with steep, narrow streets, is on the r. bk. of the river; the newer town, on the l. bk. Principal buildings, the Romanesque cathedral (11th–13th centuries), where Zwingli officiated; the Gothic church of Our Lady (13th century); the church of St. Peter, containing the tomb of Lavater, formerly its pastor; the town-hall (1699); the town library (120,000 vols. and 3000 MSS.) and antiquarian museum; the university (1832) and the polytechnic (1861), both frequented by several foreigners; the national museum of Switzd. (1892–94); and a great number of schools. In the suburb of Aussersihl there is an arsenal which contains a collection of old weapons and armour. Z. is not only an important educational centre, it is also the largest manufacturing town, and one of the principal commercial towns in Switzd. The spinning and weaving of silks and cottons are the chief industries; but there are also manufactures of machinery, paper, soap, candles, &c. The natural beauties of Z., including the views from the Zürichberg (2228 ft.) and the Uetliberg (2864 ft.), attract numerous summer visitors. This city was the birthplace of Lavater the physiognomist (1741–1801), Solomon Gessner the poet (1730–1788), Gottfried Keller the novelist (1819–1890), Pestalozzi the educationist (1746–1827), Orelli the philologist (1787–1849), Gesner the physician and philologist (1516–1565), and Bluntschli the jurist (1808–1881). The Roman *Turicum,* Z. was greatly favoured by the Frankish emperors; asserted its independence in the middle of the 14th century; was beaten in war by the Swiss Confederates in 1443, but shortly afterwards joined their league. Here in 1519 Zwingli began his reformation. In 1799 Masséna, commanding the French, was defeated by the Archduke Charles of Austria, but shortly after Masséna defeated the allied Austrians and Russians; and here, in 1859, peace was signed between Austria, Sardinia, and France. Alt. 1506 ft. Temp. (15 yrs.), yr. 47.5° F., Jan. 30.2°, July 65.7°; rfall. (20 yrs.), 47.01 in. P. 28,200; including its suburbs (Unterstrass, Oberstrass, Fluntern, Hirslanden, Hottingen, Riesbach, Enge, Wiedikon, and Aussersihl) P. (1888) 91,200; (1894) 122,500.

Zürich, lake, central Switzd., cants. Z., Schwiz, and St. Gall, 25 m. long E. to NW., with a curve towards the SW., 1½–2½ m. broad, now divided into two separate portions by a railway embankment crossing the lake, partly by the penin. of Hurden, from Pfäffikon to Rapperswil; the E. (smaller) portion known as the Obersee (Upper Lake). Fed at the E. end by the Linth Canal, conveying to it the surplus waters of Lake Walenstadt, drained from the NW. by the Limmat into the Aar. Area, 33.2 sq. m.; depth, 470 ft.

Zurzach, comm., Switzd., cant. Aargau, on the Rhine, 18 m. NE. Aarau. P. <2000.

Zutphen, or **Zutfen,** tn., Holland, prov. Gelderland, on the r. bk. of the IJssel, 8 m. S. by E. Deventer; has tanneries, paper-mills, oil-works, &c. Taken by the Duke of Alba in 1572; by Maurice, Prince of Orange, in 1591; by the French in 1672. Under its walls Sir Philip Sidney was killed in 1586. P. (comm.) 17,000.

Zuurberg, mt., Cape Colony, 45 m. N. Port Elizabeth.

Zuurbraak, vil., Cape Colony, dist. and 17 m. WNW. Swellendam. P. <1500.

Zuz, or **Zuoz,** comm., Switzd., cant. Grisons, 9 m. NE. by N. St. Moritz, in the Upper Engadine. P. <2000.

Zvenigorod, dist. tn., Russia, govt. and 33 m. W. Moscow, 10 m. N. of Smolensk Rly., on high l. bk. of Moskva; founded in 1152. P. <5000.

Zvenigorodka, dist. tn., Russia, govt. and 125 m. S. Kiev, 22 m. WNW. Shpola railway junction. Fabrication of tobacco; trade especially in cattle. P. 12,335.

Zvornik, tn., surrounded by forts, Bosnia, prov. Dolnja Tuzla, on the Drina, 50 m. NE. Sarajevo. Occupied by the Austrians in 1688; retaken in 1689 by the Turks, who here inflicted a disastrous defeat on the Austrians in 1717. P. <4000.

Zvyerinogolovskaya, Cossack vil., Russia, govt. Orenburg, terr. of Orenburg Cossacks, on l. bk. Tobol, near where the boundary of Orenburg, Uralsk, and Akmolinsk meet, on high-road Troitsk-Omsk; head of levelling across Siberia. P. <5000.

Zwaluwe, comm., Holland, prov. N. Brabant, 7 m. N. by W. Breda. P. <5000.

Zwammerdam, vil., Holland, prov. S. Holland, on the Old Rhine, 10 m. ESE. Leiden. P. <2000.

Zwartberg Pass, a pass across the Goote Zwarteberg Mts., Cape Colony, about 57 m. N. Mossel Bay.

Zwartkops, settlement, Cape Colony, dist. Uitenhage, 7½ m. N. Port Elizabeth.

Zwartsluis, vil., Holland, prov. Overijssel, on the Vecht, 8 m. N. by W. Zwolle, on the Meppeler Diep. P. (comm.) 4000.

Zweibrücken, French **Deux Ponts,** tn., Ger., Bavarian Palatinate, at confluence of the Hornbach and Schwarzbach, circle Z., 50 m. W. Spires, 23 m. SW. by W. Kaiserslautern; manufactures machinery, leather, cotton goods, silk-plush, &c. Z. belonged from the end of the 14th century to the Rhine Palatinate, in 1654 became Swedish, in 1718 fell to a Roman Catholic collateral line, in 1801 to France, in 1816 to Bavaria. Alt. 725 ft. P. (1840) 7600; (1890) 11,000.

Zweihonnschaften, vil., Prussia, Rhine Prov., circle and 4 m. SSW. Essen, on the Ruhr. P., including the peasant vil. (*bauerschaft*) of Bredeney (comm.) <4000.

Zwei Lütschinen, vil., Switzd., cant. Bern, 4 m. SSE. Interlaken, at the confluence of the Weisse and Schwarze Lütschine. P. <2000.

Zweisimmen, comm., Switzd., cant. Bern, at the confluence of two headwaters of the Simme, 19 m. SW. Thun. Alt. 3160 ft. P. <2000.

Zwellendam, tn., Cape Colony. See **Swellendam.**

Zwellendam Point, cape, Cape Colony, S. ct., in 23° 47′ E.

Zwenkau, tn., Ger., kgd. Saxony, circle and 8 m. S. by W. Leipzig. P. <4000.

Zwettl, tn., Lower Austria, 46 m. ENE. Linz. P. <4000.

Zwickau, tn., Austria, Bohemia, 18 m. W. Reichenberg, at the foot of the Lausitzer Gebirge; cloth manufacture; cotton spinning. Alt. 1180 ft. P. 5600.

Zwickau, tn., Ger., kgd. Saxony, circle Z., on the Mulde, 20 m. WSW. Chemnitz. Connected by electric tramway with Kainsdorf and Wilkau. Important industries; iron-smelting and manufactures of machinery, chemicals, woollen goods, hosiery, mirrors, paper, &c. Has the Ernst Julius Richter Institute (mineral collection). Birthplace of Robert Schumann, the composer (1810–56). Alt. 875 ft. P. (1834) 6700; (1890) 44,200.

Zwiesel, market-tn., Ger., kgd. Bavaria, govt. Lower Bavaria, circle Regen, 32 m. NNW. Passau. P. <4000.

Zwijndrecht, vil., Holland, prov. S. Holland, on the Old Maas, 2 m. WNW. Dordrecht. P. (comm.) 5100.

Zwing Uri, ruins of the traditional castle of Gessler, Switzd., cant. Uri, 7 m. S. by E. Altdorf.

Zwischenahn, vil., Ger., gd.-duchy and 9 m. NW. Oldenburg; health resort. P. <2000.

Zwittau, tn., Austria, in the W. of Moravia, 37 m. WNW. Olmütz; has important cotton as well as linen manufactures. Alt. 1425 ft. P. 7800.

Zwoleń, tn., Russian Poland, govt. and 21 m. E. by S. Radom. P. 5500.

Zwolle, tn., Holland, prov. Overijssel, 17 m. N. Deventer, 2 m. from the r. bk. of the IJssel; has cotton and other manufactures. The church of St. Michael is noted for its large organ. The town was fortified in 1223, but its fortifications razed in 1674. Thomas-à-Kempis died here in 1471. P. (comm.) 26,400.

Zwollen, or **Stvolny,** comm., Austria, Bohemia, 21 m. SE. Karlsbad. P. <2000.

Zwönitz, tn., Ger., kgd. Saxony, circle Chemnitz, 16 m. ESE. Zwickau. Alt. 1735 ft. P. <3000.

Zwota, vil., Ger., kgd. Saxony, circle Auerbach, 26 m. S. by W. Zwickau, and 4 m. NE. Markneukirchen. P. <3000.

Zwötzen, vil., Ger., princip. Reuss, Younger Line, circle Gera. P. <3000.

Zwyndrecht, comm., Belgium, prov. E. Flanders, arr. St. Nicholas, near l. bk. Scheldt, just above Antwerp, but on opposite bank. P. <5000.

Zydaczów, tn., Austria, crownland Galicia, 28 m. E. Drohobycz. P. <3000.

Zydowo, vil., Prussia, prov. Posen, circle Posen West, 28 m. E. Posen. P. <2000.

Zyeñkov (Zeñkov), dist. tn., Russia, govt. and 50 m. N. by W. Poltava; tanneries; trade in cattle and animal produce. P. 14,700.

Zygos, or **Lakmon,** pass across N. end of Pindos chain, in 39° 47′ N., leading from the NW. of Thessaly, Greece, into southern Albania (Metsovo and Yanina). Alt. 4900 ft.

Zyrmi, or **Syrmi,** tn., Africa, central Sudan, kingdom of and 110 m. E. Sokoto, in about 13° N., 6° 45′ E., on a l. bk. affluent of the Niger. P. 12,000 (Barth).

Zyryanovskiy, silver-mine, Russia, govt. Tomsk, Altai region, 250 m. SE. Semipalatinsk, and 46 m. ENE. Bukhtarma. Alt. 1590 ft. P. 5000.

Zyryans, Finnish stem of the Permian group, Russia, govt. Vologda and Archangel. P. about 120,000.

APPENDIX

Table showing the Principal Countries and Geographical Divisions of the World, with their respective Areas, Populations, and Densities per Square Mile.[1]

1 The details are taken from the several articles of the Gazetteer wherever available. Behm and Wagner's *Bevölkerung der Erde* is drawn upon for supplementary details. For the grand totals, see the article Continents. In some cases these grand totals do not agree with the sum of the entries in these tables, the discrepancies being due to overlapping claims and estimates of different countries.

2 Exclusive of the Azores and Madeiras.
3 Inclusive of Finland and Poland.
4 Exclusive of the Canary Islands.
5 Exclusive of Bulgaria and Bosnia-Herzegovina.
6 Exclusive of Aden and the Sinai Peninsula, but inclusive of Oman.
7 Inclusive of Hong-kong and Macao.
8 Exclusive of New Guinea and the Philippine and Sulu Islands.
9 Inclusive of Upper and Lower Burma, and French and Portuguese India.
10 Nepál, Bhután, and Sikkim.
11 Inclusive of Formosa and Riukiu Islands.
12 Inclusive of Straits Settlements.
13 Inclusive of Russian Turkistan, but exclusive of Bukhara and Khiva.
14 Exclusive of Turkish Arabia.
15 Inclusive of Shoa, but exclusive of Eritrea.
16 Exclusive of Sinai Peninsula.
17 Inclusive of Kamerun and Togo-land.
18 Exclusive of Niger Coast Protectorate (see next page, note 3).

Iceland	34,850	69	2
Antarctic Regions	252,000	...	...

1 Exclusive of Sudan and Saharan portions of Algeria, Tunis, and Tripoli. 2 Corresponding broadly to the former Egyptian provinces.
3 Inclusive of Niger Coast Protectorate, French Senegambia, Liberia, Sierra Leone, Gold Coast, &c.
4 Inclusive of Pemba. 5 Inclusive of British Honduras.
6 Exclusive of Brazilian Guiana. 7 Inclusive of Labrador.
8 Inclusive of Alaska. 9 Exclusive of the territory disputed with England.
10 For the separate colonies, see the table at the article **Australasian Colonies**.
11 Inclusive of the Auckland, Campbell, Chatham, Kermadec, and other insular dependencies.

Mean Annual Rate of Increase per 1000 of the Population in the Principal Countries of Europe.

Countries.	1840–50.[1]	1850–60.[1]	1860–70.[1]	1870–80.[1]	1880–90, or nearest Census Dates.

17 1879–89. 18 1876–91. 19 1879–91 (see note below table in article Servia). 20 1877–87. 21 1880–88.

MISCELLANEOUS STATISTICS OF THE PRINCIPAL COUNTRIES OF THE WORLD.

In the compilation of this Table, the following works have been generally used:—The last Statistical Abstracts for the United Kingdom, the Colonies, and for Foreign Countries; the different Statistical Year-Books of the principal Foreign Countries, the Victorian Year-Book, the Statesman's Year-Book, Whitaker's Almanack, the *Almanach de Gotha*, Juraschek's *Graphisch-Statistische Tabellen aller Länder der Erde*, and the *Annuaire de l'Economie Politique*. Cols. 9 and 11, Imports and Exports.—These are, where obtainable, the 'Special' Imports and Exports, and include Gold and Silver Bullion and Specie. Cols. 13, Wheat; 14, Maize; 16, Cotton; 17, Wool.—These figures are taken from the United States Department of Agriculture Reports No. 5, Miscell. Series, 1893, and Nos. 113 and 115, New Series, 1894. The Wheat and Maize are given in Imperial bushels, which are larger than Winchester bushels by one 32nd part. Cotton is given in bales of 400 lbs. weight. It should also be stated that the figures given are averages mostly for the ten years 1881–90. Cols. 22–28, Mineral Production.—The figures are given in metric tons (2205 lbs.) for Foreign Countries, and long tons (2240 lbs.) for the United Kingdom and Colonies. They are taken from the Mineral Statistics for the United Kingdom and Colonies, the Parliamentary Paper 'Coal Tables' (No. 317), 1894, and from *The Mineral Industry*, Vol. II., by R. P. Rothwell. Coal, except in the case of the United States, does not include Lignite or Brown Coal. As to Coal, see also table on p. 14 of Appendix.

[1] Exports.

MISCELLANEOUS STATISTICS—(*continued*).

In the compilation of this Table, the following works have been generally used:—The last Statistical Abstracts for the United Kingdom, the Colonies, and for Foreign Countries; the different Statistical Year-Books of the principal Foreign Countries, the Victorian Year-Book, the Statesman's Year-Book, Whitaker's Almanack, the *Almanach de Gotha*, Juraschek's *Geographisch-Statistische Tabellen aller Länder der Erde*, and the *Annuaire de l'Economie Politique*. Cols. 9 and 11, Imports and Exports.—These are, where obtainable, the 'Special' Imports and Exports, and include Gold and Silver Bullion and Specie. Cols. 13, Wheat; 14, Maize; 15, Cotton; 16, Wool.—These figures are taken from the United States Department of Agriculture Reports No. 5, Miscell. Series, 1893, and Nos. 113 and 115, New Series, 1894. The Wheat and Maize are given in Imperial bushels, which are larger than Winchester bushels by one 32nd part. Cotton is given in bales of 400 lbs. weight. It should also be stated that the figures given are averages mostly for the ten years 1881–90. Cols. 22–28, Mineral Production.—The figures are given in metric tons (2205 lbs.) for Foreign Countries, and long tons (2240 lbs.) for the United Kingdom and Colonies. They are taken from the Mineral Statistics for the United Kingdom and Colonies, the Parliamentary Paper 'Coal Tables' (No. 317), 1894, and from *The Mineral Industry*, Vol. II., by R. P. Rothwell. Coal, except in the case of the United States, does not include Lignite or Brown Coal. As to Coal, see also table on p. 14 of Appendix.

No.	Country.	Merchant Navies (mills. and decimals of mill. tons).		Fisheries.		Railways. Length per 1000 sq. m. of surface.	Telegraphs. Length per 1000 sq. m. of surface.	Army.		Navy.			Emigration, thousands.	Immigration, thousands.	Education. No. per cent. unable to read and write.	No.
		Wood and Composite.	Iron and Steel.	Tonnage and number of Vessels (V.).	Number employed, thous.			War Footing, thous.	Peace Footing, thous.	No. of Vessels	Total tonnage, thous.	No. Armour plated vessels over 4000 tons.

[1] See note on p. 9.

[2] Including the city of York.

[3] In 1869 the artificial grasses for hay and not for hay were not distinguished; the figures given below are, therefore, the acreage under artificial grasses per 1000 acres of total area.

[1] The areas are those of the administrative counties, including county boroughs as adjusted under the Act of 1888, and as entered in the Agricultural Returns for 1893. They take into account the corrections made in 1892 with the assistance of the Director-General of the Ordnance Survey of the figures previously published based on less exact measurements of the county areas, and it is these corrections (which do not affect the trustworthiness of the figures returned for the several crops) that chiefly account for the discrepancies between the figures for 1869 in these tables and those in similar tables in a paper contributed by the late Mr. William Topley to the *Journal of the Agricultural Society, Second Series*, vol. vii., 1871. In the tables here given the proportions are calculated on the total areas of 1893 both for 1869 and 1893, though in the former case the returns are for the ancient counties; but as the differences between the ancient county and the administrative county, including county boroughs, are slight, except in the counties affected by the creation of the administrative county of London, and, moreover, are mainly due to the transference from one county to another of portions of county boroughs and urban sanitary districts in which little or no agriculture is pursued, these differences do not appreciably affect the value of the figures in the tables for comparison. The administrative county of London is composed of 31,484 acres taken from the ancient county of Middlesex, 23,898 acres from Surrey, and 20,060 acres from Kent.

[2] Including the city of York.

[1] Exclusive of lignite, the amount of which produced in Austria-Hungary is fully 50 per cent. more than the amount of the coal production; in Germany, about one-fourth of the coal production.

[2] The mean rate of increase per cent. per annum in the production of coal in the three principal coal-producing countries, in the periods noted (1860, &c.), representing the mean of the three years including that before and that after the year mentioned, except in the case of Germany for 1860, and the United States for 1860, 1870, and 1880:—

	1860–70.	1870–80.	1880–90.
Germany	8.34	5.25	3.76
United Kingdom	3.33	2.64	2.26
United States	8.04	7.93	7.00

[3] The production of coal in the United Kingdom has been estimated at 2,148,000 tons in 1660, 2,612,000 tons in 1700, 4,774,000 tons in 1750, 6,889,000 tons in 1785, 10,080,000 tons in 1800. The first official returns of the coal produced in the United Kingdom are for 1854, when the amount was returned as 64,661,000 tons; but a mistake was afterwards discovered in the mode of making the estimate, from which it appears probable that the official returns are less than the truth by about 2,000,000 tons.

[4] Returns incomplete.
